We update our estimates and 12M PTs for European semis players IFX (Buy) and STM (Neutral) to reflect stronger growth opportunities from AI-related semis demand. Please see more details below.

Changes to estimates

Infineon

We keep our FY26 revenue estimate unchanged but raise our FY27-30 revenue estimates by c.1-2% to reflect a more constructive view on AI-related demand (from both GPU/CPU) for IFX's power semis due to recent positive datapoints from the AI semis supply chain in tandem with the company's plans to ramp up capacity. On the latter, we highlight its upcoming Dresden module which can support a revenue run-rate of €5bn in the medium term (see more details in our [note](#)). Further, our FY26E GM is unchanged but our FY27-30 GM estimates are 0-1pp higher due to a higher top line and assumptions around lower underutilization charges. While our FY26 adj. EBIT estimate remains unchanged, we raise our FY27-30E adj. EBIT by 3-4% reflecting changes to revenue, GMs and operating leverage. Finally, our EPS is unchanged for FY26 but is higher by +3% to +4% across FY27-30 due to better EBIT.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. STMicro

We raise our FY26-30 revenue estimates by 4-9% (in \$ terms) to reflect the stronger-than-expected growth in STM's AI business given recent commentary around its customer engagements and continued demand for its offering in AI Infrastructure (especially in Optical networking). Further, our FY26-30 GM estimates are higher by c.1-2pp to reflect a better top line and lower utilisation charges. As such, our FY26-30E EBIT rises by 13-23% (in \$ terms) due to a higher top line, GMs and operating leverage. Finally, our EPS changes between +11% and +22% (in \$ terms) across our forecast period due to our EBIT and latest share count assumptions.

Valuation and key risks**Infineon**

We are Buy rated on Infineon with a 12-month price target of €88.0 (vs €75.0 prior) based on a 18x (vs 16x prior) CY27E EV/EBITDA multiple applied to our higher CY27 EBITDA estimate. Key risks to our view and price target include weaker end markets (such as lower-than-expected EV adoption rates), a worsening semi cycle and negative macro dynamics that could prolong the weakness in consumer demand and lead to demand being pushed out.

Our revised valuation multiple reflects better growth opportunities relative to history. Specifically, we note that the historical median 2Y FWD revenue CAGR is c.9% (per Reuters consensus) while the current 2Y FWD revenue CAGR is 17% (on GSe). We note that this 2Y FWD revenue CAGR increase of c.2x (vs history) is broadly aligned with the expansion in the 12M FWD EV/EBITDA multiple from c.10x historically to our 12M PT implied multiple of 21x.

Exhibit 3: The expansion in Infineon's valuation multiple implied by our PT is congruent with the increase in 2Y FWD revenue CAGR versus history

Source: Goldman Sachs Global Investment Research, Eikon Datastream

Additionally, we have contextualised our valuation multiple by comparing the expansion in IFX's historical 2Y FWD EPS CAGR with that in its 12M FWD PE multiple (based on our PT) versus history. We note that IFX's historical 2Y FWD EPS CAGR was 19% (per Reuters consensus), which compares to a 2Y FWD EPS CAGR of 43% (per GSe). Meanwhile, the historical 12M FWD PE multiple was c.20x, which compares to an implied 12M FWD PE multiple of 39x (on our latest PT), suggesting an expansion in line with that in EPS CAGR.

Exhibit 4: Contextualisation of valuation vs EPS growth

STMicro

We are Neutral rated on STMicro, with our 12-month price targets of €58.0/ADR \$67.5 (vs €42/ADR \$49 prior) based on a 13x (vs 10x prior) CY27E EV/EBITDA multiple applied to our higher EBITDA estimates. Key risks to our view and price targets include a quicker/slower-than-expected inventory correction trough in consumer semis, accelerating/slowing Silicon Carbide momentum at competitors and evidence that currently favourable pricing can be sustained.

Similar to IFX, we triangulate our valuation multiple for STM by comparing its current growth opportunities with history. We note that the historical median 2Y FWD revenue CAGR was 7% (per Reuters consensus) and this compares to STM's current 2Y FWD revenue CAGR of 14% (on GSe). As such, we note that STM's 2Y FWD revenue CAGR expansion of c.2x (vs history) is congruent with the 12M FWD EV/EBITDA multiple increase from c.8x historically to our 12M PT implied multiple of 17x.

Exhibit 5: The expansion in STMicro's valuation multiple is underpinned by an increase in 2Y FWD revenue CAGR versus history

Source: Goldman Sachs Global Investment Research, Eikon Datastream

Additionally, we also contextualise our valuation for STM by comparing the expansion in 2Y FWD EPS CAGR with the expansion in 12M FWD PE multiple (based on our PT) versus history. We note that STM's historical 2Y FWD EPS CAGR was 29% (per Reuters consensus), which compares to a 2Y FWD EPS CAGR of 72% (per GSe). Meanwhile, STM's historical 12M FWD PE multiple was c.18x (per Reuters consensus) whereas we see an implied 12M FWD PE multiple of 38x (on our latest PT).

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DA CF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
