

Kweichow Moutai (600519.SS)

Market-oriented plan #5: Second round of unexpected ex-factory and suggested retail price hike of Feitian in July 2026; Buy

600519.SS 12m Price Target: **Rmb1,667.00** Price: **Rmb1,253.00** Upside: **33.0%**

What's New: Kweichow Moutai officially announced a new round of price hikes for Feitian Moutai on July 17, effective immediately on July 18, 2026. Kweichow Moutai **raised the ex-factory price of Feitian Moutai (53% vol, 500ml, 2026 edition) by 7.9% or Rmb100/bottle from Rmb1,269/bottle to Rmb1,369/bottle** (mainly covering wholesale channels), and the **suggested retail sales price (RSP) of Feitian Moutai on i-Moutai platform by 6.5% or Rmb100 per bottle from Rmb1,539/bottle to Rmb1,639/bottle** (mainly covering direct sales channels). Recalling that the company raised Feitian Moutai's ex-factory price/RSP by Rmb100/Rmb40 per bottle on 31 March, this move marks the second price hike for Feitian this year, which is more frequently vs. its historic pattern of raising prices once every few years (Exhibit 1). **Price hikes in aggregate this year** have amounted to **17%/9%** for ex-factory price and RSP of 500ml Feitian Moutai, respectively, post July 18, 2026 vs. 2025, after the two rounds of price hikes, which we expect to contribute more to 2H26 results. **Other prices hikes for 500ml Feitian based on our channel checks:** Meanwhile, group-buy RSP of 500ml Feitian in self-operated specialty stores has increased to Rmb1,719 per bottle (vs. Rmb1,639 new RSP in i-Moutai), and direct exfactory price to KA/E-commerce platforms has also increased to Rmb1,529 from Rmb1,399 per bottle. In addition, according to the i-Moutai announcement, Feitian 53% vol **1L Feitian Moutai RSP increased by 4.8%, or Rmb150/bottle**, from Rmb3,119/bottle to Rmb3,269/bottle.

GSE Sales and Earnings impact to 2026: We estimate a **1.2% incremental sales, and 1.6% incremental earnings contribution to 2026** applying a 30% pro-rata to wholesale channels/c.40% pro-rata to Direct sales channels (see Exhibit 2), but estimate a c.3%/4%+ sale/earnings accretion to 2027. **We view this price hike action as a continued positive signal built on the constructive market feedback and stable wholesale price trends observed after the Mar price hike (see Our recent spirits in-depth research)**

that reaffirmed Moutai's pricing power strength. Additionally, wholesale prices reacted positively over the weekend post the announcement of Feitian's price hikes, and have **now reached Rmb1,720/Rmb1,680 per bottle for original case/unpacked Feitian**, vs. Rmb1,650/1,630 on Friday, up c. Rmb70/Rmb50 per bottle. We view the timing of these price hikes as unexpected and see the company preparing to support wholesale pricing ahead of the Mid-Autumn Festival, as i-Moutai retail demand has proved to be resilient in 2Q26 to date.

2Q26 Earnings outlook: We currently expect a c.1% topline growth in 2Q26 for Moutai with i-Moutai sales in April-May 2026 reaching c.Rmb11bn or c.30% of 2Q25 sales (GSe based on 7.13mn transacting users in 5M26 assuming c.3 bottles purchased per user on average, see Exhibit 3). **For i-Moutai:** We also estimate that c. **9,400 tons of Feitian volume sold was already in i-Moutai in 5M26** at a weighted average RSP of Rmb1,512 (Rmb1,499 in 1Q26 and Rmb1,539 in 31 March to 31 May per bottle).

Earnings revisions: We updated our earnings estimates by raising our Moutai spirit ASP by 1% in 2026 and by 3% in 2027-2028E to reflect the price hikes on ex-factory prices and higher volume mix of direct sales, while we largely maintain our volume forecast/series spirits forecast unchanged. We now expect 2026 sales/NP growth at 3.9%/3.1% yoy. We expect 2027 sales/NP growth to accelerate to 8%/9%. Our 2026/27/28E EPS rise by c.1~3% on our stronger sales outlook. Our 12-month target price increases to Rmb1,667 (prior Rmb1,616), based on unchanged 23.4x 2027E P/E discounted back to mid-2027. **We reiterate our Buy rating on Moutai** on its differentiated brand position in China spirits and resilient consumer demand driving market share gain through the cycles, a solid dividend yield at 4.2%/4.6% and trading at 19x/17x P/E in 2026E/2027E, respectively.

Price Target Risks and Methodology - Kweichow Moutai

Price Target Risks and Methodology - Kweichow Moutai

Valuation methodology: Our 12m TP of Rmb1,667 is based on a 23.4x 2027E P/E, discounted back to mid-2027 using an 8.5% COE. Our target P/E is benchmarked to the company's average P/E in the 2012-2023 full cycle.

Key downside risks: 1) Potential regulation changes such as a consumption tax rate hike; 2) Environmental pollution; 3) A slower-than-expected macroeconomic recovery; 4) Capacity constraints; 5) More volatility in US rate hikes given the negative correlation between Moutai's P/E and the US 10-yr bond yield.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
