Cool, Calm and Collected

Our thoughts on USD, GBP, KRW, HUF, CHF, CAD, THB, AUD/NZD, & Frontier FX

- **USD: Cool, calm, and collecting carry.** The cooler US inflation print crimped a tail that could have allowed for bigger policy divergence and outsized spot FX moves. Instead, carry considerations have once again had the largest contribution to returns and investor preferences, even within the G10 (Exhibit 1). This makes sense in a market defined by low vol and high dispersion in the level of rates, and we expect it to continue, but it is all the more remarkable when concerns have risen in commodities and equities. We have argued that the source of market volatility is increasingly moving from macro drivers to the more micro level and so far this is proving correct. If those factors morph into more macro drivers it would interrupt the carry-friendly environment in FX, but we see a high bar for that to happen given that even volatility within the most-affected asset classes is still low beyond the sector level, regional divergence has been more limited than in previous tech turmoil, and the level of rate dispersion provides a wide buffer for currencies. We think it argues for more carefully selecting funding currencies—as we discuss in more detail below, we prefer CHF, EUR, ILS, JPY, CAD, and THB in roughly that order—and respecting the Dollar’s relatively high-yielder status. We still see a risk of more divergent policy paths ahead, and therefore see value in Dollar calls as cross asset hedges, but in our baseline we expect it to be more of a grind.

- GBP: Too strong for keeps, go tactically short GBP/USD.** Sterling's striking July outperformance has continued this week, pushing against our expectation for limited further relief. We are mindful of a series of emerging medium-term tailwinds for Sterling—a procyclical global backdrop, a reach for carry in EUR/GBP, substantial M&A inflows, and the possibility of closer ties to the EU. But the speed and timing of Sterling's July rally appear to us to be more a function of growing optimism on a Burnham government (including Wednesday's GBP move coinciding with personnel reports), and of technical factors and positioning rotations following the range-break in EUR/GBP. From a fundamental model perspective, Sterling's move is fully at odds with its GSBEER-implied performance, which primarily reflects EU-UK front-end rate differentials returning close to their narrowest year-to-date levels (Exhibit 2). We have noted throughout the past year that bouts of premium that see Sterling underperform cyclical fundamentals are typically quickly reversed, and we think the same argument applies in the opposite direction here. We are sceptical of the pace of Sterling's move when there remain many policy unknowns and fundamental constraints on the fiscal front, alongside more durable macro and valuation challenges for the currency. Our historical analysis of near-neighbour crosses suggests the case for a reversion towards GSBEER-implied levels is 'cleanest' in EUR/GBP, but our current long-Dollar lean, energy re-escalation risks, and importance of carry considerations in this backdrop lead us to believe that Cable is currently the higher-quality expression. We therefore recommend GBP/USD shorts with a target of 1.3250 and a stop of 1.3600, targeting a near-term reversal.

- **KRW: Catching a break.** The Korean Won has finally caught a break in July, with the currency appreciating month-to-date in July. This bout of appreciation coincides with an interest rate hike, fresh curbs on leveraged investments, and a sell-off in local equity indices. That sell-off may have stemmed any forced selling of concentrated stock positions and may be partly related to a large overseas ADR listing, that at least for the time-being may have catalysed some capital inflow. More broadly, looking at KRW performance on the larger 'equities down' episodes earlier this year (up to the KOSPI peak on June 22), the correlation was mostly slightly positive (that is, both assets sold off together), though the Won did appreciate in the more extreme sell-offs, and most of the time was relatively range-bound (Exhibit 4). This was also the case in the best KOSPI days YTD when the currency stubbornly did not generally benefit from strong equity performance (Exhibit 5). More recently, this correlation has shifted in a clearly negative direction as the Won has been appreciating as local equities have been selling off. However, this correlation remains highly dependent on the direction and source of inflows and outflows, and could shift again, as the mixed signal from the prior relative performance suggests. Moreover, the Won appreciation in July only reverses the depreciation from May and June. KRW remains weak on most valuation metrics, and while the AI-driven export boom has been very supportive for Korean exports, fiscal revenues and growth over the past couple of years, that has come alongside a weakening currency, reflecting significant unhedged overseas investment by Korean retail and institutional investors, and FX hedging and rebalancing flows by foreign buyers of Korean equities. While our equity strategists expect local equity markets to recover, that is unlikely to be accompanied by a sustained strengthening in the Won without a shift in investor allocations or hedging behaviour.

Exhibit 4: On the majority of the worst KOSPI days up to mid-June, the Won sold off but it did appreciate in the more extreme sell-offs...

- HUF: Tactical headwinds vs fundamental tailwinds.** While last week's HUF sell-off reversed relatively swiftly, the Forint has been under renewed pressure this week. We continue to attribute the price action to heavy long positioning in a context of limited positive local developments but increasingly unfavourable global factors (higher energy prices, specifically gas prices, and weaker risk sentiment), which has left HUF among the most high-beta crosses in EM. Growing concerns regarding energy prices and supply into the winter months—with Qatari natural gas supply remaining low and new US tariffs on Russian oil importers being discussed—can keep the Forint under pressure in the near term in our view. To be sure, we think the fundamental case for HUF appreciation towards our 6-month forecast of 350 remains strong, but fresh local catalysts may only emerge later in the year, when a lower inflation target is announced (our economists expect this in late 2026) and when the RRF funds begin to flow (the deadline for payment requests is the end of September). Moreover, when it comes to energy prices, we have argued that EU funds inflows can more than offset the energy balance deterioration implied by current oil and gas prices. Nearer term, the upcoming MNB meeting is the next key local development, and follows comments from Governor Varga on both maintaining the guidance for cuts in July and August and that Forint stability in the 355-360 range was helping the economy. This is the first meeting since the elections where HUF is weaker on the intra-meeting period, but given continued disinflation momentum our economists still expect a 25bp cut to be delivered. We think the extent to which the MNB sounds more cautious, while still delivering a cut, will be an important signal of how policymakers see the trade-off between rates and FX in the broader risk premium reduction since the elections. We are still of the view that both FX and rates can rally together as EU convergence draws closer, but over the near term a stronger currency path would likely require rates to bear more of the brunt of the worsening global backdrop.
- CHF: Funding in focus.** Last week, we discussed the exceptionally high levels of carry-to-vol currently being afforded to G10 FX markets, and in many respects, CHF funding is the most striking opportunity within that. Low and stable Swiss inflation has supported a firmly on-hold SNB, which has helped both to keep

rate-differential-driven vol low in CHF crosses, but also to retain an unusually large gap in its policy rates to the rest of G10. This combination underpins the favourable levels of carry-to-vol available in both USD/CHF and EUR/CHF—both close to multi-decade highs ([Exhibit 6](#)). The Franc's terms of trade linkages to gold provide an added layer of interest to the carry proposition in these pairs too. The recent breakdown in gold's risk-hedge attributes has spilled over to CHF, partly explaining EUR/CHF's and USD/CHF's lower betas to risk this year ([Exhibit 7](#)). USD/CHF in particular offers exceptional levels of carry for a pair that has acted as a clear risk-hedge in this environment, which we think places it as an attractive portfolio hedge in an environment where energy shock risks are still simmering. At the same time, CHF's gold connection is also the clearest risk to the case for funding in our view. Gold prices have stabilised well off their January highs in recent weeks, but a return to a strong appreciation trend (as our commodity strategists ultimately expect) would likely provide support for the Franc, and challenge the funding proposition. We continue to see a pivot back to a neutral CHF intervention bias by the SNB as another potential route to Franc outperformance, though after the SNB's weak tweak in June, this process appears to us to be a more gradual one. We see good value in CHF funding on a three-month basis where these key risks appear more remote, offering greater carry in G10 crosses than the more typical choice of the Yen.

Exhibit 6: USD/CHF and EUR/CHF carry-to-vol are both close to multi-decade highs

- **CAD: High but wide.** We have been highlighting CAD's attractive attributes as a funder for much of this year, including its ability to reduce risk exposure and improve carry relative to Dollar funding. Those attributes remain intact, and we continue to expect ongoing trade negotiations to weigh on CAD via a wide USD-CAD rate differential—the opening statement of the BoC's July meeting highlighted again that Canada's relationship with the US remains one of the two biggest risks to the outlook alongside the Middle East Conflict. That said, the language was toned down somewhat, noting that businesses are “finding a way to navigate through the uncertainty.” More broadly, the July BoC meeting was balanced, with the statement returning to its pre-war guidance noting that the current policy rate is “appropriate”

in line with our economists' expectations. A BoC firmly on hold should allow for CAD to remain an effective funder, though we have been arguing that sharper spot depreciation in CAD from here appears less compelling. USD/CAD has continued to align closely to rate differentials in recent weeks (Exhibit 8) and on one hand, while support for CAD looks unlikely to come via a more hawkish BoC, on the other hand, the softer US June CPI print should limit the extent of more near-term hawkish Fed repricing, reducing the scope for additional upward pressure on USD/CAD.

Exhibit 9: The softer US June CPI print should limit the extent of more near-term hawkish Fed repricing, reducing the scope for additional upward pressure on USD/CAD

Source: Goldman Sachs FICC and Equities, Goldman Sachs Global Investment Research

- **THB: Lower on gold and rates.** The Thai Baht (THB) has flipped from being one of the best performing Asian currencies in 2025 (trailing only the MYR) to the worst performing low-yielding Asian currency this year. This underperformance comes in spite of the BoT's recent upward revision to its 2026 GDP forecast of 2.3% yoy (from 1.5%), where +0.6ppt growth boost was attributed to the THB 400bn emergency decree and +0.2ppt due to better tracking growth in Q1 and Q2. Moreover, the political environment appears more stable following the convincing election results in February this year. Apart from the energy shock, we attribute THB's weakness to three factors. First, there was a sizable equity outbound flow at the end of June, where Singapore's Singtel sold a 2.3% of its stake in Thailand's Gulf Energy, which was worth USD 1bn. Second, global gold prices have dropped to around USD 4000/oz from just under USD 5,000/oz at the start of the year. As we have discussed previously, there exists a positive correlation between gold prices and THB, given Thailand's role as a large gold trading hub. The BoT announced several measures at the end of February to try and de-link this correlation, but it is only likely to take effect and fade gradually. Lastly, we note that real rates differentials have shifted significantly in favor of a stronger USD/THB. The BoT has cut policy rates to 1.0%, while inflation prints have been rising (2.4% yoy in June), leaving real rates in negative territory. Meanwhile, US real rates have risen. Looking ahead, while shifts in oil and gold prices will continue to affect Thailand's terms of trade and tourism outlook, we expect the currency to continue to underperform on its low real rates and see it as a good funder against higher carry currencies in the region, and continue to recommend short THB/ INR.

- **AUD/NZD: Turning the tide.** A few months ago, we flagged scope for an unwind in AUD/NZD if the relative policy backdrop shifted, domestic data diverged, or the terms-of-trade backdrop became less supportive. Incoming domestic data have increasingly met those conditions, and we recently recommended AUD/NZD 6m 1.1650 puts. While developments over the past week illustrate that renewed energy price pressures remain a risk, AUD/NZD has recently been responding less consistently with increases in commodity prices and more consistently with rate differentials which have been moving in NZD's favor. With our economists flagging the risk of more near-term RBNZ hikes and fewer RBA hikes than they are forecasting, this leaves us more comfortable with AUD/NZD downside despite lingering energy risks. NZD is also vulnerable to a "hawkish policy shock" backdrop in which equities fall alongside higher yields, so the June FOMC meeting introduced a new potential headwind to any NZD outperformance. However, this week's softer June CPI print leaves limited catalysts before the July FOMC for pricing to shift materially more hawkish. Finally, while we have found AUD is more exposed to China growth, our economists continue to see little urgency for broad-based, sizable near-term stimulus given resilient exports and a still-achievable full-year growth target. Taken together, while risks remain, the conditions we laid out have broadly materialized, and we see a window for AUD/NZD's catch-down to extend.
- **Frontier FX: Carrying through the near-term vol.** Re-escalation in the Middle East has re-injected short-term volatility into Frontier markets, particularly by interrupting the recent strengthening of the Egyptian Pound, our preferred long in that space. While we still expect the currency to gradually appreciate against the Dollar over the medium term, after incrementally raising the target we have widened the stop of our short USD/EGP trade recommendation. This would allow for more room for accruing carry returns despite near-term spot volatility caused by recent outflows from still elevated foreign positioning in local debt markets (Exhibit 10). This is consistent with our view that a high level of carry, particularly in local debt instruments, can amplify spot returns in a 'relief' scenario such as that in mid-June following the US-Iran peace deal announcement, but importantly can also cushion total returns in a 'muddle through' scenario in which spot returns are more limited, as has been the case recently as geopolitical uncertainty persists. More broadly, we continue to think that contained macro volatility should be conducive to the accumulation of carry returns in EM currencies, and it makes sense to maintain exposure to select high-carry Frontier currencies, including being long TRY, NGN and KZT against the USD (Exhibit 11). Beyond the elevated carry levels that TRY offers despite continued managed depreciation, we see risks as skewed towards spot appreciation in Nigeria and Kazakhstan.

Exhibit 10: Despite recent outflows from local debt markets alongside spot losses, foreign positioning remains above its pre-war highs on a one-month rolling sum basis

Local debt includes bonds and bills.

Source: Bloomberg, Haver Analytics, Goldman Sachs Global Investment Research

Exhibit 11: Many Frontier currencies, such as TRY, EGP, NGN and KZT, offer significantly higher levels of carry than their EM HY counterparts

For Frontier currencies (apart from TRY and UGX) the carry is computed using 12-month NDFs. *Median carry of BRL, COP, MXN and ZAR. **Median carry of BRL, CLP, CNH, COP, CZK, HKD, HUF, IDR, ILS, INR, KRW, MXN, MYR, PEN, PHP, PLN, RON, SGD, THB, TRY, TWD and ZAR.

Disclosure Appendix

Reg AC

We, Kamakshya Trivedi, Michael Cahill, Danny Suwanapruti, Teresa Alves, Karen Reichgott Fishman, Stuart Jenkins, Victor Engel and Lexi Kanter, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Kamakshya Trivedi Goldman Sachs International, Michael Cahill Goldman Sachs International, Danny Suwanapruti Goldman Sachs (Singapore) Pte, Teresa Alves Goldman Sachs International, Karen Reichgott Fishman Goldman Sachs & Co. LLC, Stuart Jenkins Goldman Sachs International, Victor Engel Goldman Sachs International, Lexi Kanter Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Option Specific Disclosures

Price target methodology: Please refer to the analyst's previously published research for methodology and risks associated with equity price targets.

Pricing Disclosure: Option prices and volatility levels in this note are indicative only, and are based on our estimates of recent mid-market levels (unless otherwise noted). All prices and levels exclude transaction costs unless otherwise stated.

General Options Risks – The risks below and any other options risks mentioned in this research report pertain both to specific derivative trade recommendations mentioned and to discussion of general opportunities and advantages of derivative strategies. Unless otherwise noted, options strategies mentioned in this report may be a combination of the strategies below and therefore carry with them the risks of those strategies.

Buying Options – Investors who buy call (put) options risk loss of the entire premium paid if the underlying security finishes below (above) the strike price at expiration. Investors who buy call or put spreads also risk a maximum loss of the premium paid. The maximum gain on a long call or put spread is the difference between the strike prices, less the premium paid.

Selling Options – Investors who sell calls on securities they do not own risk unlimited loss of the security price less the strike price. Investors who sell covered calls (sell calls while owning the underlying security) risk having to deliver the underlying security or pay the difference between the security price and the strike price, depending on whether the option is settled by physical delivery or cash-settled. Investors who sell puts risk loss of the strike price less the premium received for selling the put. Investors who sell put or call spreads risk a maximum loss of the difference between the strikes less the premium received, while their maximum gain is the premium received.

For options settled by physical delivery, the above risks assume the options buyer or seller, buys or sells the resulting securities at the settlement price on expiry.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information

on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India. Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
