This week's scripts were (as expected, and flagged previously) impacted by the long weekend, and hence total scripts were down ~6% for the class. Foundayo saw 16,982 TRx in its eighth week, +971 and +6.1% sequentially, given it is still in its launch phase. Wegovy Pill, on the other hand, saw 134k TRx this week, down -11.9k (-8%) sequentially. On NBRx, Lilly maintains a share of ~53% despite volatility at the start of 2026, due to the Wegovy Pill launch (Exhibit 18).

Total scripts: Total weekly scripts for the week ending 29th May were 2.44M, down vs last week (-5.67%, or -146k in absolute terms). The 4-week YoY growth for sema+tirz was 39.2%, down slightly on 39.3% last week. The company market share split (sema vs tirz) on a TRx basis is now 59.7% Lilly (26.4% Zepbound, 32.6% Mounjaro, 0.7% Foundayo) to 40.3% Novo (13.3% Wegovy pen, 5.8% Wegovy pill, 21.2% Ozempic).

Zepbound: Weekly market share for Zepbound decreased to 26.4% (-0.48 pp vs last week). YoY growth (4-wk avg) decreased to 79% from 82% (although impacted by recent drops). Whilst it has appeared like Zepbound NBRx has declined post-Wegovy pill launch (Exhibit 18), absolute numbers of NBRxs have held at around 60k per week this year (Exhibit 17). Zepbound growth split by presentations is, unsurprisingly, also volatile in light of IQVIA reporting (Exhibit 15, Exhibit 16). Mounjaro: This week **Mounjaro** posted 40.6% growth (4-week YoY), flat week on week (vs 40.6%), but down from the ~60% level sustained from Aug '25-Jan '26. Mkt share increased marginally to ~32.6% (+0.20 pp).

Semaglutide: Growth diverges significantly by indication and presentation. Wegovy Pill had ~134k TRx this week, -12k scripts. Wegovy pen's 4-week avg YoY growth is ~45%. However, Ozempic (T2D) continues to decline YoY at a 4-week avg of -12.5% (versus last week at -12.6%). Overall, semaglutide (Ozempic and Wegovy) posted 20.4% YoY growth, up on 19.5% last week.

Recent Foundayo/Orfo notes: [LLY: With an earlier than expected approval, we frame early expectations for Lilly's oral \(orfo / Foundayo\) GLP-1 launch](#) /// [LLY: Refining Foundayo \(orfo\) scenarios for 2026 - \\$2.0B well within reach](#); Raising estimates for 2026 after Q1: [Eli Lilly: 26Q1 wrap - raising revenue estimates to 87.3B FY \(+34% yoy\)](#), (further refines Q2 Foundayo estimates to \$157m)

ORAL GLP-1 LAUNCH DYNAMICS

Early, daily-to-weekly script conversion for Foundayo seems to correlate (Exhibit 8), but large gaps in conversion of absolute daily TRx into weekly numbers continue; ~12% vs ~79% for Wegovy Pill in week 5 (Exhibit 9). However, based on Lilly's earnings commentary, we continue to view oral GLP-1s as market-expanding, and estimate the IQVIA capture rate for Foundayo at ~70% (Exhibit 7). We agree with management that this launch is likely to play out over months, not weeks, for a couple of reasons: (1) this is an entirely new molecule (Wegovy Pill is a sema line extension), and requires greater physician education, and (2) given this, DTC advertising is unable to begin until physicians have been sufficiently educated, meaning DTC ads, including TV, won't start until Q3.

At the [2026 Novo AGM](#), Novo (covered by Justin Smith) reported that weekly Wegovy pill TRx were 3x higher than tirzepatide at week 10, whereas IQVIA prescription data suggested 1.6x (assuming tirzepatide = Zepbound). The patient/TRx counts reported by Novo may somewhat differ to our data considering that: (1) Novo has access to more timely and granular data, (2) NovoCare & other scripts may not yet be fully captured in IQVIA, and (3) in the future, adherence rates may influence observed patterns; i.e. adherence rates below 100% would imply a higher actual patient count than TRx suggests. Novo has been suggesting IQVIA has a capture rate of only 50% for the Wegovy pill to date - similar to the low capture rates we saw for the Zepbound vial when launched in Lilly Direct, and triangulating with their new 3x tirzepatide figure. On the 1Q26 earnings call, Lilly reported approximately 20k patients to date. We estimate an IQVIA capture rate for Foundayo of ~70%, compared with Novo's estimated ~50% capture rate for oral Wegovy.

EXHIBIT 1: Oral GLP-1 Launch Trajectories (TRx)

Novo '26 AGM reported that weekly oral Wegovy scripts were 3x those of tirzepatide (assumed to be Zepbound) at week 10; adjusted Wegovy figures assume the same capture rate as reported by Novo at week 10.

NEW TO BRAND PRESCRIPTIONS (NBRx)

NBRx data - new to brand are scripts just for new users, that haven't filled a script for that brand in the past (either naive to the GLP1 market, or switching from another brand). This demonstrates with greater fidelity what we've seen from the CVS Caremark formulary change & provides a sense for where shares are trending towards.

Note, the new to brand weekly data is released by IQVIA at a lag to the rest of the weekly data. Please reach out if you'd like updated graphs before our next tracker when the data is released next week.

IQVIA PRESCRIPTION METRICS: QUICK REFERENCE GUIDE

THE CORE EQUATION

Every prescription dispensed rolls up into **TRx**. There are two ways to break it down:

- **TRx = NRx + RRx** (*new + refills*)
 - **TRx = NBRx + CBRx** (*new-to-brand + continuations*)
-

PRESCRIPTION VOLUME METRICS

TRx — Total Prescriptions

All prescriptions dispensed — both new and refill scripts combined. The top-level volume metric.

NRx — New Prescriptions

New prescriptions dispensed by pharmacists. Includes scripts written when a patient has exhausted their authorized refills and receives a new Rx number to continue existing therapy.

RRx — Refill Prescriptions

Authorized refill prescriptions dispensed by pharmacists, drawn from a panel of computerized pharmacies.

NBRx — New-to-Brand Prescriptions

Prescriptions for patients starting a specific brand for the **first time**, with no prior use of that brand in the previous 12 months (the look-back period).

CBRx — Continuation Prescriptions

All prescriptions associated with continued use of a product within the previous 12 months (the look-back period). Includes both authorized refills AND new scripts written when a patient's refills run out.

NBRX SUBTYPES

NBRx - new to brand scripts - is made up of two mutually exclusive patient groups:

NTS Rx — New to Therapy Start

- The patient's first-ever prescription in the therapy class; specifically a prescription dispensed to a patient who, during the assigned look-back period, has not filled any therapy within the defined USC 3 or USC 4 relevant defined market.

Switch / Add Rx

- The patient is new to this brand but has filled another drug in the same therapy class (USC3 or USC4) during the look-back period
- Covers two scenarios:
 - **Switch:** Patient moves from a competitor brand to this brand
 - **Add-on:** Patient adds this brand on top of an existing therapy in the same class

$$\text{NBRx} = \text{NTS Rx} + \text{Switch/Add Rx}$$

KEY DISTINCTIONS TO KNOW

NRx vs. NBRx

- NRx counts any new script, including renewal scripts for patients who ran out of refills — the patient may already be long-established on the drug
- NBRx is stricter: it only counts patients with no prior use of that brand in the last 12 months, making it the true measure of patient acquisition

RRx vs. CBRx

- RRx counts only authorized refills
- CBRx is broader — it includes refills plus renewal scripts written for patients who ran out of refills but are continuing therapy

LOOK-BACK PERIOD

- The standard look-back period for classifying NTS vs. Switch/Add is **12 months**
- Certain **acute therapy classes** use a **1-month look-back** to better reflect short-course treatment patterns
- Acute classes with a 1-month look-back include anti-infective, anti-biotics, and anaesthetics.

DISCLOSURE APPENDIX

I. REQUIRED DISCLOSURES

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社) and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY**Novo Nordisk A/S**

Our price target (DKK200) is the average of an EV/EBITA-multiples based valuation (applying a 36% discount to 2026-28e peer group and DCF (WACC 8.0%, terminal growth 0%).

Eli Lilly & Co

We arrive at our valuation using a blend of DCF (7.6% WACC, 5% FCFF CAGR to '43, and 2.5% TV GR) and multiples approach (32x P/E on FY27E adj. EPS), with equal weighting. Our \$1,300 target price implies a '27 P/E of 29x, well above pharma peers, although within the range of trading over the TTM.

RISKS**Novo Nordisk A/S**

Upside risks: 1. The major FDA approved growth drivers (Ozempic, Wegovy and Oral-Sema) and pipeline (in particular Cagri-Sema) deliver the consensus estimates 2. Novo's manufacturing scale means that patent expiries are even more benign than we expect 3. Management engages in major, value accretive, bridging M&A.

Eli Lilly & Co

Downside: Pressures on obesity TAM are more substantial than we estimate (demand, regulatory, pricing, competitive, compounding)

Downside: Manufacturing expansion stalls, limiting LLY obesity expansion

Downside: Excess value destruction through high-risk M&A / R&D advancement

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION**EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 500 Banks And Financial Services Index (BEBANKS) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 500 Insurance Index (BEINSUR) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, and the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/- 10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.
