

Asian Tech

Key takeaways from Broadcom's Apr-Q results

- 2H26 AI revenue double versus 1H and to surpass \$100bn in FY27:** Broadcom's AI revenue reached \$10.8bn in 2Q26, up 143% YoY and representing 49% of total revenue. Management guided for 2H AI revenue to double versus 1H, implying FY26 AI semiconductor revenue of ~US\$56bn, and reiterated its FY27 target of exceeding US\$100bn, with further substantial growth into FY28. On program cadence, management highlighted multi-year, multi-GW ramps across Google (multi-generation TPUs plus AI networking under a long-term agreement), Anthropic (additional TPU-based compute beginning 2027), OpenAI (production in late 2026 with contractual deployments in 2027), and Meta (MTIA XPU partnership; initial 1GW order with deliveries starting 2H27). Management also referenced another two customers (ByteDance and SoftBank/ARM, based on our supply chain checks) with shipments starting in late 2026 and accelerating into 2027, with purchase orders to date cited at ~US\$6bn. Broadcom's lack of numerical upside to 2027 guidance, while TPU ests have moved up and Mediatek pulling in its ASIC guidance ahead by a year is likely to be seen as a concession of meaningful share loss within the TPU program, in our view.
- TPU supply diversification acknowledged by the management; positive for Mediatek:** Management acknowledged that, despite a very substantial long-term commitment under the Google agreement, Google is likely to maintain some diversity of sources for its TPU/AI compute stack. This is consistent with MediaTek's collaboration with Google on TPU (v8t Zebrafish and upcoming v9 Humufish) and the potential for Marvell to cooperate with Google on an LPU-like chip. Longer term, we believe it could become the norm for large CSPs to engage 2–3 back-end design service vendors, driven by: (1) a broader set of product types (AI accelerators, AI CPUs, LPU-like, etc.); and (2) customers experimenting with different commercial structures (e.g., semi-CoT vs. full CoT) as their front-end design capabilities mature. In this context, we see MediaTek and Alchip as key potential beneficiaries as CSPs move towards CoT / semi-CoT models, given their structurally lower margin profiles (40%+/teens% GM for MediaTek/ Alchip) versus turnkey service vendors with front-end design services (60+% GM).
- AI bookings >\$30bn; visibility extended into 2028:** Management disclosed AI semiconductor bookings of over US\$30bn in the quarter, noting customers are pulling orders forward due to long lead times—not only for wafers and memory (HBM/DRAM), but also for power readiness. Importantly, management said visibility now extends into 2028, adding that Broadcom is comfortable securing supply for 2026–27 and is already working on 2028–29. This aligns with our Asia supply-chain checks that 3–5Y LTAs are increasingly in place across key bottlenecks such as substrates, HBM, and CCL, while leading-edge wafers still remain on annual negotiation cycles. We therefore have higher confidence that key supply constraints could persist through 2027 and potentially into 2028. Key beneficiaries, in our view, will be TSMC, ASE, SK Hynix, Samsung, Unimicron, Ibiden, and EMC.

- **Strong Networking performance (now ~40% of AI revenue):** Networking/interconnect is a key theme at 2026 Computex Taipei (June 2-5), supported by strong demand for high-bandwidth data transmission as agentic AI drives larger scale-up, scale-out domains. Broadcom indicated networking represented nearly 40% of 2Q AI revenue, reflecting strong attach of switching/SerDes/connectivity content across both its custom XPU and non-XPU products. That said, management suggested the ~40% mix is likely elevated and could normalize closer to ~30% over time as XPUs ramp faster in the next few quarters. On products, management emphasized leadership in scale-up copper/SerDes and switching, including over 1 year shipments of the 100Tb Ethernet switch (Tomahawk 6), and highlighted optics/CPO building blocks (1.6T DSPs, CW/EML lasers) positioning Broadcom as the industry standard. Management also noted that the next-generation 200Tb switch is planned to tape out this quarter. We expect networking to remain an increasingly important investor focus. While CPO is a key long-term topic as copper approaches its limits, Broadcom appears to be still more conservative on CPO ramp, aligned with the ramp schedule for ASIC customers (likely two years later than NVDA, in our view).
- **Non-AI semi improving; margins are mix-driven while operating leverage holds:** Outside AI, management highlighted non-AI semiconductor revenue of US\$4.2bn (+6% YoY) and bookings above US\$6bn as early signs of a cyclical recovery, and guided for 3Q non-AI semiconductor revenue to improve sequentially to ~US\$4.5bn (+12% YoY). Our Asia supply-chain checks echo Broadcom's commentary, with mainstream seeing some momentum supported by: (1) a gradual recovery in auto and industrial; (2) an AI crowd-out effect that is tightening capacity in mainstream; and (3) rising AI-adjacent demand (e.g., PMIC). We believe the latter two drivers could support stronger momentum as pricing improves under tighter S/D, benefiting mature foundries such as VIS, OSATs such as ASE, and passive component vendors such as YAGEO and Murata.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the

Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives,

or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
