

Japan Banks: Earnings Outlook (Apr-Jun)

Watching whether guidance is revised at 1Q results to reflect BOJ rate hike in June

We expect many major regional banks that did not announce a share buyback in May to announce buybacks during the Japan bank sector's 1Q FY2026 results reporting season (Figure 4). An even more important watchpoint is whether banks will incorporate the June BOJ rate hike into their guidance. As shown in Figure 3, many banks have not factored in the rate hike. If their guidance takes into account interest rate sensitivity to only a single rate hike, some banks may decide that they do not need to revise guidance, but if any banks move quickly to revise guidance with 1Q results, we would view this positively as a sign of confidence in business progress. Among the megabanks, we believe Mitsubishi UFJ Financial Group (MUFG) is the least likely to report eventful 1Q results. We do not expect MUFG to revise guidance with 1Q results, as its guidance already assumes a mid-2026 rate hike. Among other banks, we expect Sumitomo Mitsui Trust Group (SMTG) and Japan Post Bank (JPB) to post higher YoY rates of profit growth. We expect SMTG to record large gains on the sale of stocks and one-off profits in 1Q. We expect JPB to see a rebound in profit, as net interest income (NII) in the international division was weak in 1Q FY2025 due to a time lag.

YoY growth rates and progress for net profit in 1Q depends on company-specific factors: For Resona Holdings, major regional banks, and other banks, we expect a wide range of YoY growth rates for net profit in 1Q. Some banks recorded gains on asset sales or transient tax benefits in 1Q FY2025, and in these cases we expect relatively large profit declines (for example, at SBI Shinsei Bank, Aozora Bank, and Fukuoka Financial Group). At Seven Bank, we expect a subsidiary to record an extraordinary loss in 1Q FY2026. In addition, we expect YoY profit growth at regional banks to vary depending on whether credit costs or losses on the sale of securities were recorded in 1Q FY2025.

We expect regional banks to announce buybacks: Unless net profit guidance is revised, we do not expect any changes to dividend guidance, so buybacks are likely to be the shareholder return action at 1Q results. The megabanks, SMTG, and Resona Holdings already announced buybacks in May, while the major regional banks in our coverage opted not to announce buybacks in May. Against this backdrop, we expect Shizuoka Financial Group and Yokohama Financial Group to announce share buybacks of ¥40 billion (equivalent to one year's worth or close to it) with 1Q results, while we expect Mebuki Financial Group and Chiba Bank to announce buybacks equal to half their annual forecast amount or less.

Accelerating growth in domestic loan balances

According to BOJ statistics, the average balance of domestic loans grew 5.7% YoY in May 2026. The YoY growth rate slowed to the mid-2% level in 1H 2025 but has started rising again (Figure 8). Growth has accelerated markedly in 2026 (Figures 8-9). At city banks, the growth rate for loans to large corporations reached +10% YoY in March 2026 and accelerated further to +14% in May (Figure 10). At regional banks, loans to large corporations continue to grow at a high-single-digit YoY rate (Figure 11). The three-month TIBOR yield, which often serves as a benchmark for market rate-linked loan yields, has risen further following the rate hikes in December 2025 and June 2026 (Figures 15-16). We see no notable changes in the number of bankruptcies in Japan (Figure 17).

Valuation gains/losses on available-for-sale (AFS) securities worsened compared with end-March

From end-March to end-June 2026, JGB yields rose slightly in the short-term zone and increased more significantly in the 7-10 year zone. US Treasury yields rose relatively sharply in the 2-3 year zone, while the increase in the 10-year zone was more moderate. Meanwhile, TOPIX rose sharply, up 14% QoQ. At many banks, the increase in equity valuation gains more than offset the deterioration in yen bond and foreign bond valuation gains/losses, so it seems overall valuation gains/losses improved QoQ (Figures 22-24).

Deposits continued to grow at online banks

Rakuten Bank is an online bank we cover, and its monthly disclosures show that the deposit balance growth rate slowed in 2025. However, the YoY growth rate bottomed at +7.2% in June 2025 and rebounded to around +10% in 2H 2025. Since the start of 2026, YoY growth has remained at +13–15%, partly due to a low year-ago hurdle (Figure 38).

SBI Holdings

SBI Securities made online trading of domestic stocks commission-free from end-September 2023, so we expect financial income (such as margin trading-related income) and trading gains/losses (such as from forex transactions) to drive its income growth. Looking at the market as a whole, margin trading balances have increased to record-high levels compared to the past (Figure 39). We expect further growth in margin trading-related fees. Meanwhile, over-the-counter FX margin trading slowed QoQ in April-May 2026 (Figure 40). We expect SBI Holdings to post a YoY decline in net profit in 1Q, mainly due to quarterly volatility in tax rates and minority interests. For pretax profit in the core financial services businesses, we forecast a 34% YoY increase in 1Q, supported by gains on the sale of a subsidiary.

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmmarkets.com>.
