Broadcom Inc. | North America

In Defense of AVGO's ASIC Share

MediaTek participation in TPU is real, but we view displacement fears as premature. AVGO should retain majority share, sustain strong AI growth, and remain a core compute winner, close behind NVDA.

Key Takeaways

- We expect AVGO to retain ~80% TPU share over time, contrary to what some supply chain checks are indicating.
- HBM supply, packaging execution, and scale make rapid Broadcom displacement unlikely.
- AVGO remains a core AI winner and close #2 to NVDA, supported by ASIC leadership, networking, and new customer ramps; reiterate OW.

We have been somewhat surprised by AVGO's underperformance YTD, particularly given the continued strength of the company's AI growth trajectory. We think there are a few reasons for the weakness, including investor preference for growthier "bottleneck" stories across the AI semiconductor ecosystem, but the most persistent overhang remains the debate around MediaTek versus Broadcom share on Google TPU. **Our view is that MediaTek participation is real, but not disruptive: AVGO should remain the majority TPU supplier over time, with ~80% share, and we see the bearish calls for 50% share or eventual displacement as premature.**

Exhibit 1: AVGO and NVDA performance have lagged other AI Semis

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

This debate is somewhat reminiscent of last year's MRVL / Alchip debate, not because the share outcomes are identical, but because the market again appears to be extrapolating new supplier participation into a much more extreme displacement thesis. Marvell did lose meaningful Trainium share, but the view that it would be fully replaced proved too draconian. Similarly, while MediaTek clearly has a role in the TPU ecosystem, we think calls for Broadcom's share to fall to 50% or below, or eventually be fully displaced, are premature.

We agree MediaTek has a role, but disagree with converting that into a disruptive Broadcom share-loss thesis. To be clear, we do not dismiss MediaTek's opportunity. Google is cost conscious, wants supplier optionality, and is developing multiple TPU iterations. The Taiwan supply chain view also raises real points: MediaTek appears to have a credible 3nm TPU opportunity, Google has an incentive to reduce reliance on Broadcom, and advanced packaging constraints create a reason to explore alternatives. Where we disagree is the conversion of those facts into a disruptive share-loss thesis for Broadcom.

Our base case is that Broadcom maintains roughly 80% TPU share over time. We do not agree with the supply-chain framework that implies a rapid move toward Broadcom share loss. This view is consistent with MediaTek's publicly stated long-term strategy of reaching 15-20% share. Said differently, we think MediaTek participation is real, but we believe the market is overstating the amount and pace of Broadcom share loss within TPU. The key debate, in our view, is not whether MediaTek participates, but whether that participation disrupts Broadcom's broader AI ASIC growth trajectory. We do not believe it will, given risk around MediaTek's execution, AVGO's supply advantage, and the overall difficulty of replacing a scaled platform. In addition, AVGO has multiple new ASIC customers ramping in 2H27, which should help support its growth.

Exhibit 2: MS estimate of AVGO XPU GW deployed by customer

Source: Morgan Stanley Research Estimate

One of the primary motivations behind MediaTek adoption appears to be cost reduction, including the ability to procure certain commodity components separately rather than paying Broadcom pass-through revenue. However, we believe some of the hoped-for savings could be challenging to realize, particularly around

HBM. Buying HBM off the shelf is no longer necessarily cost advantaged given how constrained the market has become and how much open-market pricing has moved higher. By contrast, Broadcom has already secured supply under previously agreed contracts, which could make it difficult for a competing solution to achieve the intended cost advantage.

We also think investors should be careful underwriting aggressive MediaTek growth and high 2nm TPU expectations before the packaging path is more clearly de-risked. Our Taiwan semis team still expects MediaTek to secure some CoWoS capacity for 2nm TPU minimum production, with EMIB framed more as a potential 2029 volume and cost unlock “if executed well.” Our latest checks suggest EMIB remains uncertain for the level of complexity Google requires, with substrate capacity a potential bottleneck and CoWoS still viewed as the more reliable fallback. We are not arguing EMIB cannot work, but we think assuming a large 2nm TPU ramp before that path is proven requires too much faith, particularly given the execution risk and the availability of CoWoS as a fallback.

Ultimately, we believe investors are underestimating how difficult it is to replace Broadcom in a scaled TPU platform. This is not simply a question of whether MediaTek can tape out a chip or generate initial revenue. The relevant question is whether the chip can perform reliably at scale, secure constrained memory supply, qualify at the system level, and deploy across large TPU pods without disrupting Google’s AI infrastructure roadmap. That is a much higher bar.

We do not expect the MediaTek ramp to disrupt Broadcom’s overall ASIC growth trajectory. In fact, we believe multiple new programs ramping in 2H27 should help AVGO remain one of the fastest growers in our coverage. Our current expectation is for AVGO to generate roughly \$120bn of AI revenue in FY27. Within that, we assume TPU, including both Google internal deployment and external opportunities, accounts for roughly 75% of 10GW of AI deployment. Assuming a cost per GW of roughly \$10-12bn, this translates to approximately \$80bn of TPU-related revenue next year.

Exhibit 3: MS estimate for AVGO AI revenue and XPU GW

Source: Morgan Stanley Research Estimate

Looking into FY28 is still early, but we think it is feasible that AVGO supports at

least 15GW of AI deployment. In that scenario, we would expect TPU to decline as a percentage of AI revenue to roughly 60%, not because TPU weakens, but because newer ASIC customers begin to ramp more meaningfully. We would also highlight that Hock sounded incrementally bullish on FY28 during the last earnings call. We think the bias is to the upside, but we are remaining conservative because each new ASIC program has its own execution risk and optionality. That said, there are a lot of credible shots on goal.

MediaTek certainly has a role in this ecosystem, but we push back on the idea that its involvement is structurally disruptive to Broadcom. While MediaTek may take some share, we think that share gain is likely to be modest and additive to a broader TPU market rather than disruptive to Broadcom's growth. Until there is clear evidence that MediaTek can execute at scale, secure the necessary supply chain, and match Broadcom's performance and reliability, we view the bearish share-loss narrative as premature.

How do we reconcile with our Mediatek view? Our Mediatek team lead by Charlie Chan believes that Mediatek can take majority share of TPU over the next couple of years. That is based primarily on a view of supply chain planning, while we take the view that key milestones in chip development are still to be determined; our view is that replacing high functioning TPUs at scale is quite challenging. We also note that our split of the market seems closer to both companies' long-term share view (with AVGO suggesting to us that they can maintain 80%+ of its SAM while Mediatek's longer term goal is 20% share of ASIC). We also note that unit share can be misleading, given the substantially lower prices for the Mediatek part - even our Mediatek unit numbers are closer to 20% revenue share next year. That said, our teams share many of the same inputs and we will continue to test our hypothesis over time.

What would make us wrong? We would become more concerned if MediaTek's silicon proves materially more performant than expected, if Google / MediaTek can secure competitive HBM supply, if EMIB becomes reliable enough to support a scaled 2nm ramp, and if customer deployments move from risk silicon to production faster than historical AI accelerator ramps. Until then, we view MediaTek as a second-source diversification story rather than evidence that Broadcom's TPU position is structurally impaired.

Thoughts on the stock: AVGO remains one of our preferred AI compute names and a close #2 behind NVIDIA, which remains our Top Pick. We view Broadcom as one of the best growth stories in semis, supported by its leadership in custom ASICs, strong networking franchise, increasing AI revenue diversification, and a management team we trust to execute through product transitions. While the MediaTek / TPU debate is a real overhang, we think the market is overstating the risk to Broadcom's growth trajectory and view AVGO as a core AI winner

Morgan Stanley is acting as advisor to Broadcom Inc. ("Broadcom"), in connection with its establishment of the AI XPV Platform with Apollo and Blackstone Credit & Insurance Business as initial anchor investors, as announced on June 9, 2026. Broadcom has agreed to pay fees to Morgan Stanley for its financial services.

Please refer to the notes at the end of the report.

Risk Reward – Broadcom Inc. (AVGO.O)

Overweight on growth in AI, recovery in core semis, and potential VMW upside.

PRICE TARGET \$502.00

We value AVGO at 28X CY2027e ModelWare EPS of \$17.92. This is roughly 26x non-GAAP EPS of \$19.59, which is broadly in-line or below their AI peer group.

Consensus Price Target Distribution

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 13 Jul 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

OVERWEIGHT THESIS

- AVGO has the second largest AI exposure (in absolute dollars) in our coverage and is poised to grow as hyperscale capex increases. We see the company maintaining their premium multiple as networking and ASIC businesses continue to grow.
- We expect non-AI semis to have a cyclical rebound late next year after a period of high excess inventory in the networking and storage markets.
- We expect VMware to successfully integrate into the portfolio and focus operations, cut costs, and drive stable cash flows.

Consensus Rating Distribution

Risk Reward Themes

New Data Era: *Positive*
Pricing Power: *Positive*

View descriptions of Risk Rewards Themes [here](#)

BULL CASE \$637.00

31X 2027e ModelWare Bull EPS of \$20.55

Revenue growth surprises to the upside and AI revenues grow from ramp of new xPU customers, continued networking strength, and VMware synergies. The stock's valuation multiple expands as investors gain confidence in its AI and M&A strategy.

BASE CASE \$502.00

28X 2027e ModelWare Base EPS of \$17.92

Posts strong revenue growth in CY26 CY27 driven by strong AI revenues from xPU and Networking, and software growth.

BEAR CASE \$308.00

20X 2027e ModelWare Bear EPS of \$15.40

Revenue growth disappoints and synergies underwhelm. New customer engagements fail to reach production The stock's valuation multiple falls to 31X

Valuation Methodology and Risks

NVIDIA Corp. (NVDA.O)

~22x our MW CY27 EPS estimate of \$13.08, in-line with the broader market and a discount to compute semis peers (AMD/AVGO/INTC) as high marketshare and gross margins leave limited levers for multiple expansion in the near term.

Risks to Upside

- Growth in training and inference propel data center revenue
- Gaming sales accelerate as GPU based AI PCs gain traction
- Nvidia can recapture lost revenue in China

Risks to Downside

- AI end markets don't materialize as expected, customers sharply reduce GPU purchases
- AMD reemerges as a viable GPU competitor
- Cloud customers outside of Google are able to develop competitive custom hardware

Important Regulatory Disclosures on Subject Companies

As of June 30, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, **Broadcom Inc.**, Cadence Design Systems Inc, Cerebras Systems, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Aeva Technologies Inc, **Broadcom Inc.**, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Quantinuum, Semtech Corp..

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Amkor Technology Inc, Analog Devices Inc., **Broadcom Inc.**, Cerebras Systems, Intel Corporation, IonQ Inc, Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Quantinuum, Semtech Corp., Texas Instruments.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, **Broadcom Inc.**, Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Quantinuum, SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC. Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Advanced Micro Devices, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., **Broadcom Inc.**, Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, **Broadcom Inc.**, Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Quantinuum, SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Advanced Micro Devices, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., **Broadcom Inc.**, Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc, Cerebras Systems, Quantinuum, Silicon Laboratories Inc..

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision

to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1544	42%	453	49%	29%	757	44%
Equal-weight/Hold	1577	43%	390	42%	25%	769	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	544	15%	89	10%	16%	204	12%
Total	3,668		933			1731	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Effective January 13, 2014, the industry view benchmarks for Morgan Stanley Asia Pacific are as follows: relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Micron Technology Inc., NVIDIA Corp.. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Please use the provided link to review the Terms and Conditions and Most Important Terms and Conditions for Morgan Stanley India Company Private Limited (https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms_and_conditions.pdf) and the following link to review the audit report (<https://ny.matrix.ms.com/eqr/research/webapp/researchdocs/>

[MSICPL_Morgan_Stanley_Research_Audit_Report.pdf](#).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
