

EU SMID Technology Hardware

Thoughts and numbers into Q2'26 earnings season:
Continue to prefer SemiCap over Semi Devices

- End-market backdrop will continue to be mixed:** AI and the associated infrastructure/data center build-out continues to be a mixed blessing for the EU SMID Tech names, with direct benefits (from increased WFE, growth in Optical), but growing indirect headwinds, specifically rising DRAM and NAND prices. *Semi-Cap* exposed names (COTN, IFCN) should be able to report accelerating momentum at Q2'26 results and we expect increasing visibility as WFE grows and looks well supported further out (JPMe WFE growth of 28%/29%/16% in CY26/27/28, [here](#)). The risk of higher DRAM and other Memory costs resulting in demand/volume destruction (or even supply constraints) is likely to be more acute at Q2 results with price increases becoming more visible. This issue is most relevant for *Consumer-exposed* companies where the end-market is most sensitive to such price increases. On *Automotive*, we expect the slow improvement to continue in Q2 and through the end of the year with destocking largely ended, but, we recognise that an upcycle is still to take hold in Auto's. On a reported basis, currency headwinds should be easing in Q2 and, given current trends, should flip to become a mild tailwind in the second half for EUR and CHF reporters.
- Where we are constructive:** Overall, we prefer Semi-Cap names over Semi Devices into Q2 reporting, where we continue to see upside to consensus forecasts across our covered names (AIXA, COTN, IFCN). On *Aixtron* (OW), we expect to see another strong quarter of orders as the optical build-out continues. Importantly, we expect Optoelectronic order activity to diversify as Asian customers become a larger part of the mix. Positive commentary on GaN (not necessarily orders) should also be helpful in supporting the next leg of growth. *Comet* (OW) should be able to report strong orders and growing consignment stock (also a forward indicator). Mid-term guidance looks very conservative/outdated (we don't expect an update), but we do see significant room for estimates to increase. We note that even with the significant share price performance of the Semi-Cap group year to date that on JPM forecasts, these Semi-Cap names are trading broadly in-line with 10-year median multiples.
- Where we are cautious:** The EU SMID Semi Devices group has a relatively high exposure to Consumer, and limited direct exposure to the AI stack, which generally leaves us cautious on this group. In particular, we are cautious on Nordic Semiconductor (N) which has a high exposure to Consumer electronics (~60%) and gross margins may see pressure from higher testing and packaging costs, as well as Memory (which is an input to some Nordic systems) while forecasts look full while the shares trade ahead of historic average multiples. Soitec (N) has a more divergent performance within the group but on balance we are cautious given valuation which is rich versus long-term history. Silicon Photonics should continue to post rapid growth (supported by adoption in optical infrastructure) but we see material downside risk to the core Mobile business which still represents ~50% of revenues (given mobile handset contraction and continued elevated inventory at Soitec customers).

FY26 guide (JPM/cons): Revenue of €560m +/-€30m (**€587m/€574m**); Gross Margin ~42% (**42.2%/41.9%**); EBIT margin 17-20% (**19.6%/19.0%**)

JPM thoughts into the quarter

We expect another strong order quarter for Aixtron, led by Optoelectronics. For the past two quarters, optoelectronic orders have been driven by North American and European customers; however, we expect that this should begin to diversify with a greater share coming from Asian customers. Note, for certain countries (particularly China), Aixtron only reports orders when it has also received the corresponding export license. Power segments are likely to remain subdued in Q2, but read-across from Power IDMs suggests a pick-up in GaN and SiC content in data-centre power applications, which should support equipment placements in 2027 and beyond. Some have questioned whether there is scope for a further 2026 guidance raise, we think the likelihood of this is low, given lead times (~5-9 months). There is no guidance on Q2 profitability, but we forecast a step up in operating margin through the year following the revenue line (which we expect to be Q4 weighted), while currency is trending to be more supportive in the second half.

Key watch points

- Orders will be the key number in the report and, in particular, whether Aixtron is seeing elongation of the order book (in particular in Optoelectronics), adding to confidence in 2027-2028 revenue estimates
- Commentary on GaN customers, including current utilisation levels and production capacity roadmaps in anticipation of accelerating end-market demand
- Operating leverage and earnings potential have become topics and we look for management commentary on opex progression as the company enters a period of high growth

JPM thoughts into the quarter

Reported numbers for Q2 and Q3 are choppy given the various perimeter changes as well as currency moves (note, the Non-Optical Sensor disposal to Infineon closed on 1 July 2027). For Q3'26, we forecast 4.1% organic growth (y/y) with a -6.5% impact from M&A and 0% impact from currency (which may see upside if the EUR rate continues its trend); this leaves us ahead of consensus for Q3'26. From our discussions, it feels like investors are willing to look through the next few quarters of noise around portfolio changes given the improving balance sheet position and free cash flow, as well as new growth opportunities (Smart Glass, AI Photonics). Recent high-profile hires to lead the Optical Interconnect business ([here](#)), add credibility to the Micro-LED technology and potentially indicate a more meaningful industry partnership (still unnamed following announcement at Q1'26 results).

Key watch points

- The AI Photonics opportunity is likely to be the main focus for investors; however, we don't think that management will be in a position to provide much 'new news' compared to Q1'26 results (7 May), although a comment on the recent hire would be helpful.
- We view Consumer (~20-25% of ams-Osram's revenue) as the most challenging end-market, given the flow through of memory pricing into consumer electronics; commentary on the consumer order book trends and visibility will be important.
- Kulim II continues to be a question mark and concern for investors, particularly in a market where semiconductor companies are seeking clean-room capacity (investors are questioning why it hasn't already been disposed of).

Reporting date: Friday 31 July

H1'26 guide: n/a

FY26 guide (JPM/Cons): Revenue to be “significantly above 2025” (CHF 457m) (552.4m/556.3m) and Adj. EBITDA margin “significantly above 2025” (10.1%) excluding ~3pp of margin dilution from one-offs related to the ramp of the Penang site and efficiency program. Note that it is unclear in Bloomberg consensus how respondents have dealt with the one-offs (company consensus is to explicitly break this out).

JPM thoughts into the quarter

At H1 '26 results, we expect that management will provide quantified guidance for FY26 (following on from qualitative guidance issued in March). Latest Bloomberg consensus suggests the market understands that growth will be H2 weighted, which is consistent with our latest discussions with the company, while improving currency should support both revenue growth and margin (USD CHF rate trending towards ~0.81 vs. ~0.78 when management last communicated to the market). The assumptions behind the mid-term guidance issued in November 2025 are looking increasingly conservative (as a reminder, guidance assumed ~6% WFE CAGR and 0.70 USD CHF rate), and mid-term estimates could see meaningful upside, based on latest WFE forecasts. We doubt management will provide updated guidance ranges, but expect them at least to provide commentary that existing ranges can be exceeded meaningfully.

Key watch points

- We expect orders to continue their positive trend (Q1'26 +22% y/y); however, we will also look for colour on consignment stock build-up which is not included in orders but is a leading indicator of future revenue growth.
- An important part of the investment thesis is the adoption of Synertia, allowing market share gain in RF Power Generation and diversification of exposure beyond historical strength in NAND; management commentary around these points will be important for the shares.

Q2'26 guide: n/a

FY26 guide (JPM/Cons): Revenue of \$710m-750m (777m/758m) and Operating Profit margin of 18-20% (20.3%/19.3%)

JPM thoughts into the quarter

Although 2026 guidance was upgraded at Q1'26 (24 April), we see room for further raises at Q2 results. Historically, Inficon has grown in line with WFE in the upcycle, given its high exposure to spares and services (which increases with fab utilisation) and also rising content growth (given increasing sophistication of processes), and we expect that this will be the case in 2026-2028. On the other hand, the non-semi's business should see continued momentum supported by annualising price increases, as well as an improving solar industry (which was flagged as a risk to 2026). Management were relatively relaxed on the risk of stocking in the strong General Vacuum performance in Q1'26. As a USD reporter with a large EUR and CHF cost base, the trend in exchange rates is likely to be supportive to margin in the second half.

Key watch points

- We expect that investors will be seeking confirmation and detail on Inficon's capacity and ability to service the surge in demand in its semiconductor division.
- Inficon will be a user of memory in some of its components, and given the surge in prices we expect some gross margin pressure; we expect commentary on impact and mitigation.

Source: J.P. Morgan estimates, Bloomberg Finance L.P. (awaiting company-collated consensus).

Reporting date: Wednesday 29 July

H1'26 guide (JPM/Cons): Revenue “around the same level as the previous year” (€410m) (417m/414m), gross profit margin ~40% (40.1%/40.0%) and Operating Margin ~17% (17.1%/17.0%) – this guidance assumed EUR/USD of 1.17.

H2'26 guide (JPM/Cons): “Sales in the second half of 2026 are expected to grow compared to the first half of 2026” (H2/H1 growth: +6.6%/+7.3%)

JPM thoughts into the quarter

We think Melexis should be able to achieve the conservative guidance issued for H1 revenue (flat year-on-year), with destocking largely coming to an end (consistent with commentary from other Auto-exposed Semi suppliers). For H2, we think there is low risk of a meaningful upgrade to guidance on an underlying basis, although currency moves should be supportive in H2. Automotive end-market growth remains subdued and we don't think that OEMs or Tier 1s will be aggressively restocking in this context. Additionally, given their product portfolio, we do not think that Melexis can raise prices to the same extent as other Auto Semi peers (i.e. Melexis's portfolio will not enjoy the same spillover effect from AI demand as Infineon).

Key watch points

- Visibility on H2 pick-up: previously this was predicated on an end of destocking/low inventory levels and improving order activity, and confidence on growth returning to HSD% levels
- Gross margins are improving with volume but there are growing headwinds (namely, higher packaging and testing costs, annualising gold prices, higher labour costs); management commentary on moving parts and trajectory to target (~45%) would be welcome.
- Commentary on exposure to AI data center (motor drivers for cooling fans and pressure sensors for liquid cooling systems), which could be supportive of growth expectations.

Q2'26 guide: Revenue of \$200-220m with gross margin >50%

FY26 guide (JPM/Cons): n/a

JPM thoughts into the quarter

We expect Nordic to comfortably hit Q2 revenue guidance issued on 29 April (it has consistently beaten its own revenue guidance for last six quarters) and, also, gross margin guide (given the annualising of the Memfault acquisition). Looking forward, we are more cautious on both revenue and profitability. On revenue, following elevated activity in H1'26 (which management noted included a degree of stocking) we expect to see some softening of the consumer electronics end-market (given flow-through of Memory pricing), although Industrial & Healthcare should be more robust. Positively for Nordic, the annual report indicates that stocking at distributors is low (Rebate Liabilities are historically low as a percentage of sales). We expect some pressure on gross margin as higher testing and packaging costs flow through the P&L as well as a Memory (which is an input cost to some Nordic products); however, we expect some offset with mix and selective pricing. Currency headwinds at the EBITDA level should ease into H2.

Key watch points

- Forward-looking commentary on orders, particularly for Consumer customers where volumes are likely to be more vulnerable to DRAM-related price rises.
- Gross margins have benefitted from the annualisation of the the Memfault acquisition, but, looking forward, headwinds look to be growing from raising testing and memory costs (consensus forecasts gross margins stabilise >52%).

H1'26 guide: n/a

FY26 guide (JPM/Cons): Revenue of CHF 335m-360m (346m/349m) with EBITDA margins in the “mid-to-high teens” (16.6%/18.0%)

JPM thoughts into the quarter

Following a very strong 2025, Sensirion set 2026 revenue growth guidance below the mid-term range (low-to-mid teen%), which was partly due to currency (with the headwind easing), but also reflecting the elevated base. We see Sensirion’s end-markets as little different compared to when guidance was issued in March and confirmed with the April Capital Markets Day (Sensirion has a relatively small Consumer exposure). Gross margin is likely to be an area of risk given rising input costs (wafer, foundry, packaging, testing) as we move into an upcycle.

Key watch points

- Traction in new applications and growth opportunities (including A3 testing, optical methane testing, etc.).
- Commentary on forward gross margin trends given rising wafer, foundry, packaging and testing costs

Q1'F27 guide: ~15% organic revenue growth

FY27 guide (JPM/Cons): n/a

JPM thoughts into the quarter

Similar to consensus, we are slightly ahead of company guidance for Q1 organic growth, reflecting the view that new management have set achievable guidance as they seek to rebuild investor credibility. We expect that management will continue to guide just one quarter ahead on revenue (given low visibility due to high channel inventory), and provide only indicative commentary on margin or profitability (with loading trajectory an important factor). For Q2 and into the remainder of FY27, we continue to see diverging trends between Mobile Communications and Edge & Cloud AI (Photonics-SOI), the net effect leaves us below consensus on full year revenue.

Key watch points

- Indication of terms of long-term supply agreements signed with Photonic SOI customers.
- Indication of qualification process for Photonics SOI customers, and yields being achieved.
- Impact on RF-SOI channel inventory digestion from mobile phone market declines.

Valuation, consensus comparison and performance

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: McDowell, Craig A: Aixtron (AIXGn.DE), Comet Holding (COTNE.S), Inficon (IFCN.S), Melexis (MLXS.BR), Nexi (NEXIL.MI), Nordic Semiconductor (NOD.OL), Sensirion (SENSI.S), Soitec (SOIT.PA), Wise (WSE), Wise Plc (WISEa.L), Worldline (WLN.PA), ams-Osram (AMS.S)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law.
