

CHINA HUMANOID ROBOT: WAIC 2026 TAKEAWAYS

Embodied AI Takes Center Stage; key takeaways validate our selective investment approach

We attended the 2026 World Artificial Intelligence Conference (WAIC) in Shanghai. This year's conference continues to scale up significantly compared to previous years. WAIC 2026 showcased a **43% increase in total venue floor area** to over 100,000 sqm, with 1,100+ exhibitors (+38% YoY) and 1,400+ speakers (+16% YoY) across 140+ forums.

Jacqueline Du
+852-2978-1783 |
jacqueline.du@gs.com
Goldman Sachs (Asia) L.L.C.

The momentum in **embodied AI** was the defining highlight of the event:

- **Exhibitors:** 242 embodied intelligence exhibitors (+203% YoY), including 92 humanoid robot companies.
- **Products & Robots:** 208 embodied AI products (+247% YoY) and over 300 humanoid robots performing live demonstrations (+100% YoY).
- **Comparison:** This represents a significant leap from 2025, which featured 80+ exhibitors, 60+ products, and 150+ humanoid robots.

Key takeaways

- 1. AI Model ("VLA + WAM" Convergence):** The integration of Vision-Language-Action (VLA) models with World-Action Models (WAM) has solidified as the industry-wide mainstream standard. This dual-system architecture ("System 1" fast motor control + "System 2" slow cognitive reasoning) significantly improves humanoid task efficiency, spatial-physical reasoning, and cross-embodiment generalization.
- 2. Data Collection (The Egocentric Shift):** Non-embodiment, egocentric video data collection methods have superseded traditional teleoperation as the preferred strategy. This is driving an aggressive volume race among players targeting a hundred-million-hour scale dataset to train robust foundation models.
- 3. Commercialization Maturity (Divergent Paths):** While live demonstrations are proliferating, a stark, multi-tiered divergence exists across end-markets. Logistics handling and structured industrial environments show the highest commercial readiness (e.g., factory floor 1:1 demo zones), whereas household adoption remains a distant frontier due to safety, cost, and reliability constraints.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

- 4. Ecosystem Dynamics (Interconnected Networks):** The industry ecosystem is rapidly diversifying into an interconnected network of full-stack startups, traditional robotics vendors, cloud large-model giants, and industrial co-builders, moving away from isolated, vertically integrated silos.
- 5. Hardware & Supply Chain (Form Factors & Dexterity):** Wheel-based form factors continue to dominate lower-body mobility for near-term commercial deployments. Meanwhile, the upstream supply chain is seeing an absolute explosion in dexterous hand vendors and mechanical design variations, signaling rapid innovation but also looming competition risk.

Be selective in supply chain stocks

Inovance (300124.SZ) —Buy

Inovance is China's largest domestic supplier of industrial automation solutions, leveraging its dominant market share in servo systems and variable-frequency drives to establish a full-stack footprint in humanoid robotics. We see optionality for the company to participate in the embodied AI transitions from pilot demonstrations to commercial factory floor deployments.

Sanhua Intelligent (H-Share) (2050.HK) —Buy

Sanhua is a global leader in thermal management, leveraging its automotive and HVAC mass-production synergies to scale up humanoid robot actuator production. We prefer the H-share class due to its attractive valuation discount relative to A-shares, offering a superior risk-reward profile as commercial actuator shipments begin to scale.

Sanhua Intelligent (A-Share) (002050.SZ) —Neutral

While fundamentally stable, the A-share valuation currently reflects a higher premium on robot actuator business, leading to our Neutral rating relative to the H-share.

LeaderDrive (688017.SS) — Neutral

As China's leading harmonic reducer manufacturer, LeaderDrive is a direct proxy for humanoid joint demand. However, we believe current valuations fully price in mid-term growth, keeping us Neutral.

BEST Precision (300580.SZ) —Neutral

BEST benefits from the domestic substitution of planetary roller screws. However, we believe mass production scaling, equipment capacity constraints, and high manufacturing technique barriers limit near-term upside, justifying our Neutral stance.

Moons' Electric (603728.SS) —Sell

Moons' Electric is heavily exposed to upstream motors and dexterous hand components. The substantial increase in dexterous hand vendors and mechanical designs showcased at WAIC 2026 indicates intensifying competition and rapid commoditization. High valuation multiples combined with margin pressure from this fragmented supply chain support our Sell rating.

WAIC 2026 takeaways

VLA (Visual-Language-Action model) + WAM (World-Action-Model) with multiple layers of agents become industry's AI model mainstream, while different players' view on model training data strategy still diverge: "VLA + WAM" has become humanoid industry consensus as almost every embodied AI booth at WAIC 2026 was emphasizing that this convergent "VLA+WAM" stack would improve the overall task efficiency and accuracy, with VLA handling visual/semantic understanding and task grounding while WAM would handle physical dynamics, future-state prediction and action consequences. Robotic AI model players were highlighting the cross-embodiment model capability, which could drive heterogeneous third-party humanoid bodies to conduct long-horizon demos. Despite the pre-training foundations, fully "out-of-the-box" capabilities have yet to materialize, and any commercial deployments and real-world demonstrations still heavily rely on specific environmental trajectory collection and on-site fine-tuning.

Non-embodiment data collection is now the consensus (vs. teleoperation), driving data collection terminals toward diversified and lightweight form factors.

Lightweight devices are proliferating, led by Universal Manipulation Interface (UMI) handheld dual-finger grippers, Egocentric (Ego) first-person vision hardware, and exoskeleton data collection gloves. That said, the data collection solutions for dexterous hands have yet to fully converge, with exoskeleton, pure finger-cot, and tactile glove designs coexisting in the market. Global non-embodiment data volume is projected to reach the hundred-million-hour scale within 3 to 5 years from the 10mn-hour scale in 2026E, aiming to trigger the Scaling Law in model capabilities. However, industry views on data standards are diverging, as select teams emphasize that high-quality data - featuring precise tactile and force-control feedback - matters much more than the mere stacking of data hours in enhancing model generalization.

Demos are proliferating, but with significant tiered divergence in deployment maturity across end-markets and technical performance among players. Overall, the commercialization progress is advancing rapidly vs. previous conferences but there is still a significant gap between short-term demonstrations vs. hours of continuous high-intensity operations in the real world, and how to break through bottlenecks such as low error tolerance and the autonomous recovery from external interference is the key to determining whether various applications can move from "display" to "mass production." By end-markets:

- **In industrial application, logistics sorting and warehouse material handling** stands out as one of the most commercially-ready applications, where some leading manufacturers' logistics sorting and palletizing solutions have achieved decent accuracy and tempo, enabling long-term and continuous automated operations with the potential to move from PoC (proof of concept) to volume adoption, in our view. On the other hand, some enterprises suffer from low efficiency (such as long single-box handling time) and frequently encounter positioning or grasping errors. **Precision manufacturing and production line assembly** show clear divergence as well, where few players can achieve high success rates and long-process coherent operations in specific precision workstations (e.g. wire harness assembly, fine mobile phone assembly, and battery module plugging), whereas some enterprises

experience high failure rates during detailed operations (e.g. screwing and unplugging parts) with operation times still significantly lagging behind human labor.

- For **retail settings** (e.g. pharmacies, catering, and hotels), commercialization exploration is active but mostly stays in the “functional but inefficient” stage, for example, in smart pharmacy displays, although several players have demos that can achieve multi-SKU recognition and grasping, the single-item retrieval time is long (even reaching the minute level), and some food preparation or commercial greeting scenarios still carry strong display and gimmick attributes, with their capability to cope with high-frequency and high-intensity continuous commercial operation still awaiting verification.
- **Household and consumer scenarios**, in our view, are still the most difficult sectors for embodied AI deployment due to the high uncertainty, dynamic changes, and non-standard characteristics of the home environment: in household chores (e.g. breakfast making, clothes folding, and item organization), most applications still appear immature. In live demos, tasks involving refined and soft-object operations (such as putting bread into a toaster, folding clothes while keeping them neat upon placement, and cleaning messy desktops) generally have low success rates, with limited gripper ranges of motion, insufficient perception of soft-object deformation, and frequent errors or item drops during operations, indicating that current technology is still far from commercialization.

Market participant diversification is shaping an interconnected ecosystem.

Embodied AI startups represent the most high-profile group of players during the conference, with many of them claiming to have full-stack control on software and hardware through in-house foundation models, data infrastructures, and multi-form humanoid bodies. Legacy hardware vendors from different fields, such as logistics robots, collaborative robots, and rehabilitation robots, leverage existing customer trust as well as vertical-scenario engineering and focus on reliability breakthroughs in very specific applications. Internet/LLM giants are exploring **cross-embodiment AI, i.e. “one brain, multiple bodies”**, which means a centralized AI that can operate and share learned skills across a wide variety of physical bodies and hardware, leveraging their advantages in computing infrastructure, multimodal large model APIs, and cloud training platforms. On the other hand, vertical industry companies, represented by automakers/auto component suppliers, electronics manufacturers, and pharmacy chains, are trying to transform from robot purchasers into co-builders, by binding with humanoid body makers or model vendors and opening up their production lines, warehouses, retail stores, and hazardous operational environments to jointly build embodied AI training hubs with data feedback loops.

Wheel-based remains the dominant form factor for lower body, while dexterous hand is the key component in the spotlight from a supply chain perspective.

Wheel-based continues to be the most commonly seen form factor for lower bodies especially for products with live demos. Centaur-type robot is a novel form factor, which is a large quadruped robot base combined with a humanoid upper body with up to 60kg payload could address ultra-heavy-load, complex terrain application scenarios, according to several players. Looking at the upstream, the presence of dexterous hands grew visibly with more players (**38 in WAIC 2026 vs. only 9 in 2025**) and larger booths at more central locations than previous years. However, dexterous hand technology routes

remain fragmented, with direct-driven, linkage and cable-driven designs all on display during the conference, featuring a wide range of 11 to 42 DoFs, and a growing number of dexterous hand makers now pursuing multiple form factors in parallel rather than betting on a single one. Meanwhile, the boundaries of the component-module-body value chain are blurring, with many players seeking a higher content value by expanding their product lines; for example, some dexterous hand makers released ego data-collection devices and even upper-body dual-arm embodied robots, and some reducer makers are also building integrated joint modules.

The author would like to thank Zhou Li, Hao Chen, Zhihan Ye, and Junfang Zhang for their contribution to this report.

Investment thesis, price targets & risks

Investment thesis

Shenzhen Inovance (300124.SZ, Buy)

Shenzhen Inovance is a domestic leader in industrial automation. We like the company's growth outlook given: 1) although its two key products, i.e., inverter/servo already reached 25%/33% or No.1/No.1 in China as of 2025, the company still has opportunities in overseas markets; 2) we expect the company to gain market share in small/large PLC, which will serve as a building block for it to extend into digitalization and transform into an IoT solution provider; 3) EV components continue to ramp up share on top of fast industry growth; and 4) digitalization business development with the potential to exceed our expectations. We view Inovance's major competitive moats that will underpin its resilience through cycles as: 1) industry leading R&D effectiveness with high success rates for new product lines; and, 2) a comprehensive product portfolio and end-market coverage that reinforce customers' switching costs. We view valuation as attractive given shares are trading at around historical average multiples with a solid long-term growth and return profile; we are Buy rated.

Sanhua Intelligent Controls A/H (002050.SZ/2050.HK, Neutral/Buy)

Sanhua is a global leader in HVAC control & thermal management components. We like its growth potential in humanoid robot actuators on top of a solid market leadership position in its core business, and expect it to deliver 16%/17% revenue/net profit CAGR in 2025-30E. On the HVAC component segment, we believe the company is well positioned to deliver revenue growth above the residential HVAC industry, driven by commercial HVAC market share gain and ramp up in sensor products. On the EV thermal management segment, we believe the company's revenue growth will be driven by further global EV penetration increase and modest content value gain. In addition, we see humanoid robots as a significant long-term technology trend, with Sanhua likely to secure a key role in the supply chain, as a high visibility actuator assembler. Catalysts include technology advancement in humanoid robot functionality, volume production for humanoid robot big customers, and further EV penetration in Europe. However, we think the market has priced in a too bullish outlook for humanoid robots compared to rather a delayed timeline of Optimus production. We are Neutral/Buy-rated on Sanhua-A/H.

Leader Harmonious Drive Systems Co. (688017.SS, Neutral)

We are Neutral rated on LeaderDrive, the domestic leader in China's harmonic reduction gear market. We are positive on the company for its growing harmonic reduction gear TAM expansion, due to a growing set of applications both domestically and globally across industrial robots, collaborative robots (cobots), humanoid/service robots, CNC machine tools and other high-end equipment (solar/SPE/medical/aerospace). The company is in the process of penetrating into overseas customers, such as making volume shipments to 3 of the Big 4 international robot brands and expects more meaningful revenue contribution into the next few years.

Best Precision (300580.SZ, Neutral)

We believe the company is on track to become a competitive supplier of planetary roller screws (PRS) for humanoid robots, on the back of stable auto parts business growth (including ICEs and EVs). We adopt a long-term valuation approach for the company given the potential benefits we expect it to reap from entering the supply chain of high-spec humanoid robots, which we forecast will post an 80% global shipment CAGR in 2024E-35E. We expect Best to secure 10% global market share of PRS used in high-spec humanoid from 2027E onward, on the back of precision manufacturing experience gathered from fixtures products and the capacity support from equipment procurement. Meanwhile, commercialization of machine tool components is on track with ball screws and linear guides starting to see adoption by a few domestic machine tool makers in 2024. That said, we believe the risk-reward is fair as compared to our China Industrial Tech coverage and within the humanoid robot supply chain stocks, and hence we are Neutral-rated.

Moons' Electric (603728.SS, Sell)

We are Sell-rated on Moons' Electric, a domestic leader in motor and drive solutions. We expect the company to become a key player in the humanoid robot coreless motor supply chain, gaining 25%/20%/20% market share in high/mid/low-spec robots in 2027E-30E driven by its leading position in coreless motor product, but offset by 1) less coreless motors adoption in dexhand due to continuously evolving technology roadmap and 2) intensifying coreless motor supply chain competition. We expect Moons' Electric to see Rmb318mn/Rmb827mn revenues from coreless motor applications in humanoid robots, contributing 9%/15% to firmwide revenues by 2027E/2030E. Meanwhile, we are conservative on its main business outlook given: 1) operational disruption from factory relocation/overseas capacity ramp-up; 2) weakening product competitiveness in the near term with limited product upgrades and new product launch; 3) underperforming peers at +7%/+12% for 2025E yoy/25E-30E revenue CAGR vs. Inovance's +19%/+16%. After fully factoring in the company's growth potential in humanoid robots and its main business (Motors and Drives), we believe the stock price is currently overvalued, and we see more compelling opportunities elsewhere in our space.

Price Target, Risks and Methodology Shenzhen Inovance (300124.SZ, Buy)

Our 12-month TP of Rmb92.9 is based on 35x 2027E P/E.

Downside risks: 1) Slower-than-expected industrial automation market share gains; 2) Weaker-than-expected margin trends; 3) EV component segment ramp-up coming slower than expected; 4) general manufacturing capex/automation demand slowing down.

Sanhua Intelligent Controls A/H (002050.SZ/2050.HK, Neutral/Buy)

Our 12m target price for Sanhua A/H is Rmb39.80/HK\$41.20, based on 2030E P/E of 25X, discounted back to 2026E with a COE of 9.5%.

Sanhua-A key upside/downside risks: (1) Faster/Slower-than-expected revenue contribution from humanoid robots; (2) Better/Worse-than-expected global EV sales; (3) Better/Worse-than-expected home appliance sales.

Sanhua-H key downside risks: (1) Slower-than-expected revenue contribution from

humanoid robots; (2) Worse-than-expected global EV sales; (3) Worse-than-expected home appliance sales.

Leader Harmonious Drive Systems Co. (688017.SS, Neutral)

Our 12-month target price for Leader Harmonious Drive Systems Co. is Rmb138.00, based on a 2030E P/E of 45x, discounted back to 2027E at an 11.5% CoE.

Upside risks: (1) faster-than-expected volume production and/or technology advancement of humanoid robots; (2) faster-than-expected penetration into key robot customers (especially foreign brands).

Downside risks: (1) worse-than-expected domestic industrial/collaborative robot demand; (2) more competition pressure from overseas and local brands.

Best Precision (300580.SZ, Neutral)

Our 12-month target price for Best Precision is Rmb26.40, based on a 2030E P/E of 32x discounted back to 2027E at a CoE of 9.5%.

Upside risks: (1) faster transmission components development; (2) faster EV parts capacity ramp-up.

Downside risks: (1) slower turbocharger penetration growth; (2) lower-than-expected margins.

Moons' Electric (603728.SS, Sell)

Our 12-month target price of Rmb39.60 for Moons' Electric is based on 37x 2027E P/E.

Upside risks: (1) faster-than-expected humanoid robots progress; (2) higher coreless motor adoption in dexhand or blended market share vs. our expectations; (3) stronger-than-expected product competitiveness and share gain progress in Motors & Drives.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act

2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority

of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
