

CHINA JINMAO (0817.HK)

1H26 Preview: consolidate contract sales performance to support earnings' improvement; Buy

We revise our estimates by 1) on positive side – post a solid 1H26 performance, we raised 2026E contract sales by 3% to Rmb120bn, implying +4% yoy for 2H, ahead of coverage stronger SOE avg of down 6%, followed by average 1% higher forecasts for 2027E-28E. We also expect Jinmao to sequentially accelerate landbanking in 2H, after a relatively light 1H due to intensified land market competition and rising premium ratio in May-Jun, with its full-year management budget of c.Rmb30bn (on attributable terms) likely intact; while 2) on the negative side – we mainly lower 2026E topline by 2% on smaller DP booking and 2026E DP gross margin by c.1pp to 12pp, reflecting ongoing lower-margin projects sold mainly before 2025, hence sending 26E net income (before PCS distribution) down 7% yoy, 24% below prior GSe. We also cut our 2027E-28E net income estimates by average -14% after mainly baking in higher SG&A expenses to support contract sales momentum. Our revised topline estimates are largely inline with Datastream consensus in 2026E-28E, while net profit estimates for 2026E-28E are -62%/-7%/+25% against consensus, likely attributable to that we fronted-load the adverse impact from de-stocking to this and next year. Among our coverage stronger SOE camp, Jinmao's cumulative write-down against total inventory balance ratio ranks top and seems to be on a downscale trend. Maintain Buy rating with 12m TP at HK\$1.7, still based on a 10% discount to end-26E NAV. Maintain Buy.

■ 1H contract sales solid while landbanking sequentially slowed down:

Jinmao's 1H26 contract sales recorded at a solid +8% yoy to Rmb58bn, ahead of our stronger SOE coverage average of flattish, riding on strong sales performance by high-end/luxury projects with prime locations in T1 cities. On the other hand, we note Jinmao's 1H26 land investment only accounted for c.20% of contract sales (below c.50% in FY25, 35% GSe for full-year 26E and mid-twenties % of our tracked SOE developers' average during 1H26) and implies less than 40% run-rate against full-year budget (aforementioned). That said, we estimate project-level GPMs for new land acquisition in 1H26 to remain competitive at c.24%. **Our view on 1H26:** we expect roughly a teen % yoy net income (before distribution to PCS) decline in 1H26, reflecting a moderate yoy dip in the topline, due to smaller booking aligning with the broader industry trend, and a mild yoy DP GPM decline alongside the booking of vintage projects.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

- **Key to watch next: 1)** inventory impairment impacts on profitability inflection timeline, and company's de-stocking/inventory revitalization progress; **2)** sustainability of contract sales growth momentum in 2H26E and executions of new launches in 3Q26E (c.10 projects located core cities); **3)** company's strategy of re-accelerating land sourcing through multiple channels.

Valuation: Jinmao trades at a 27% discount to end-26E NAV, 0.4X 2026E P/B and 4% 2026E-28E average dividend yield vs. SOE coverage average 36%/0.5X/2%. Maintain Buy. **Key risks:** Delays in land sales or unexpected austerity measures to cap land sale prices would result in earnings volatility and below-expectation margins; given its high land cost in high-tier cities, execution slippages in expansion may compress future margin prospects and lead to balance sheet deterioration; weak execution of its recurring business (property leasing, hotel and property management) that potentially leads to topline and earnings downside and weakening visibility for asset monetization opportunities; diminishing support from parent Sinochem Group.

Investment Thesis

Jinmao is a subsidiary of state-owned Sinochem Corporation, ranked 9th on the 2025 Chinese property developers list (in terms of sales, ranked by CRIC). We have a Buy rating on Jinmao driven by: 1) its healthy balance sheet (sits in the green camp under 3RL) with high quality land banks (including those from city operation projects) leveraged on the parent SOE Sinochem group; and 2) increasing revenue contribution from recurring rental/property management segments etc., supporting gradual earnings recovery post the dip in 2022-23. Jinmao remains undervalued vs. other SOE developers and its historical trading range.

Price Target, Risks and Methodology

Our 12m NAV-based target price of HK\$1.7 is based on a 10% discount to end-26E NAV.

Key risks: Delays in land sales or unexpected austerity measures to cap land sale prices would result in earnings volatility and below-expectation margins; given its high land cost in high-tier cities, execution slippages in expansion may compress future margin prospects and lead to balance sheet deterioration; weak execution of its recurring business (property leasing, hotel and property management) that potentially leads to topline and earnings downside and weakening visibility for asset monetization opportunities; diminishing support from parent Sinochem Group.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
