

CHINA RESOURCES MIXC LIFESTYLE (1209.HK)

1H26 Preview: On-track delivery of double-digit profit growth on the back of solid commercial segment; Buy

We expect CR Mixc's 1H26 results on-track to deliver double-digit profit earnings riding on steady mall portfolio expansion, solid rental growth and urban space engagement. We also see dividend outlook intact (i.e. 100% payout against core profit after factoring in special dividend), with 1H26 OCF coverage ratio likely similar to historical 1H levels (0.6–0.7X). We fine-tune our 26E–28E EPS to factor in slightly more conservative views on office and VAS topline amid macro adversities and weak consumer confidence. Maintain Buy with 12-month TP at HK\$52.0 (still based on a 18X 2028E FCF discounted back to 2026E with a 12.2% CoE).

- **Our view on 1H26:** overall we expect double-digit % yoy NI profit for 1H26, aligning with management guidance of double-digit growth for full-year 26E, on the back of HSD% yoy topline and strengthened commercial operation margin, mainly supported by **1)** on-track commercial portfolio ramp-up pace (to fulfill its 100 new shopping mall mandates across the 15th FYP) and **2)** solid retail sales/rental growth (e.g. CR Land's rental income grew by 13% yoy in 1H26). Besides, we expect urban space engagement to offset the impact of intensified competition for 3P projects and support PMS contract growth. We also expect OCF coverage ratio to remain at 0.6X–0.7X during 1H26 (align with historical 1H normal level and seasonality pattern), though cash collection from 3P residential project could be under pressure, in line with the industry trend. As such, we see 1H26 dividend payout likely unchanged at 100% of core profit after factoring in special dividends (same as 1H25 and management guidance for 2026E).
- **What we changed:** We fine-tune our 26E–28E EPS by an average –1%, on a combination of **1)** downward revision for office topline (average –1% for 26E–28E, we now project 3% decline in office rental income vs. previous +2% due to lackluster broader performance in YTD-26); **2)** lower 26E–28E VAS estimate by an average of 4% for 2B VAS, reflecting industry-wide completion deceleration, as well as 2% for 2C VAS, given below-expectation consumption recovery trends. Consequently, we have compressed 2026E–2028E margins by 1pp and 2pp for 2B and 2C VAS. We now expect the 2026E bottom line growth to meet double-digit growth guidance at 10% (vs. 11% previously), while maintaining our low-teens growth outlook for 2027E–2028E, and our next-three-year earnings estimates are largely inline with Datastream consensus though 2% below for

2026E.

- **Keys to watch for upcoming results:** **1)** company's strategy on commercial segment 3P expansion and rental improvement; **2)** residential: how to improve overall cash collection ratio for 2H; **3)** any update on company's M&A strategy.

Valuation: CR Mixc currently trades at 19x/17x/15x 2026E–2028E P/E, supported by a 12% EPS CAGR and a 5.2% dividend yield in 2026E, vs. our PM coverage at 10X/9X/9X against an 10% EPS CAGR and 7% dividend yield. Maintain Buy. **Key risks:** Slower-than-expected scale expansion and margin improvement for its residential PMS business; weaker-than-expected execution on 2C VAS expansion and mall operations.

Investment Thesis and Price Target, Risks and Methodology

China Resources Mixc Lifestyle (CR Mixc) is a leading luxury retail manager in China and is so far one of the few companies in China's mall operation industry that has stronger margin sustainability than other PM companies. We continue to see CR Mixc's valuation as attractive given its sector-leading earnings growth potential driven by its continuous leadership in the commercial property management business on both volume expansion and margin stability. We also expect it to accelerate market share gain and margin stabilization in the residential segment as supported by its SOE parent. We are Buy on CR Mixc.

Our 12m target price of HK\$52.0 is based on a 18X 2028E FCF discounted back to 2026E with a 12.2% CoE.

Key risks: Slower-than-expected scale expansion and margin improvement for its PMS; weaker-than-expected execution on 2C VAS expansion and mall operation.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
