

CENTRAL BANK POLICY TRACKER

June 2026

- **Recent policy changes:** Central bank actions have shifted more hawkish due to the war in Iran. In DMs, no central banks lowered and 39% raised rates over the last three months. In EMs, 16% cut rates and 7% raised rates over the same period. But our Global Financial Conditions Index (GS FCI) has eased by 24bp over the last three months, reflecting 34bp of easing in DMs and 10bp of easing in EMs (largely reflecting higher rates). At the country level, financial conditions have eased the most in Türkiye (-117bps), South Korea (-93bps), and Romania (-83bps) and tightened the most in Russia (158bps), Israel (57bps), and Brazil (57bps).
- **Forecast updates:** We have made several policy rate forecast revisions over the last 30 days. In the US, we pushed back the final two rate cuts in our Fed forecast back to June and December of 2027 (vs. December 2026 and March 2027 previously). In Brazil, we raised our end-2026 policy rate forecasts by +75bp to 14.0%, in Hungary we lowered our end-2026 policy rate forecasts by -50bp to 5.25%, and in Taiwan we removed further rate cuts and now forecast a hold at 2% (vs 2.25% previously) through end-2026. In South Korea we raised our end-2027 policy rate forecasts by +25bp to 3.25%.
- **Current forecasts:** We forecast that global central banks will lower rates by 0.1pp to 3.1% (on a GDP-weighted basis) over the next four quarters. We expect that DM central banks will increase policy rates by 8bp on average over the next four quarters, reflecting rate hikes in New Zealand (+50bps), Euro Area (+25bps), Sweden (+25bps), Norway (+25bps) and Japan (+25bps) that are partially offset by holds or decreases elsewhere, particularly the US (-25bps through June 2027; -50bp through end-2027) and the UK (-50bps through June 2027; -75bp through end-2027). We expect that EM central banks will cut rates by -33bp on average, reflecting -208bp of cuts in CEEMEA and -35bp in Latin America, with 4bp of hikes in Asia.
- **Forecasts relative to consensus and current pricing:** Our end-2026 policy rate forecasts are dovish relative to market pricing (our forecasts are below pricing in 73% of DMs and 57% of EMs; above in 18% of DMs and 43% of EMs). Our forecasts are balanced relative to consensus in both DMs (at least 0.1pp below in 27% vs. at least 0.1pp above in 27%) and EMs (at least 0.1pp below in 32% vs. at least 0.1pp above in 36%).
- **Balance sheet policy:** Balance sheets as a share of GDP remain particularly

elevated relative to their 2019 levels in New Zealand (8pp higher) and Australia (4pp). In the US, we see scope for a modest reduction in the Fed's balance sheet size if a reduction in reserve demand warrants an adjustment, but think the bar to a meaningful decline is high.

DM Balance Sheet Policies

Exhibit 17: DM Central Bank Balance Sheet

Source: Goldman Sachs Global Investment Research, Haver Analytics

Exhibit 18: Balance Sheet Forecasts and Key Views

Economies	Current Size of Balance Sheet (as % of GDP)	Final Size of Balance Sheet (as % of GDP)	Expected Date to Reach Terminal Balance Sheet	Summary of Key Views
US	21%	21%	NA	Fed Chair Kevin Warsh has argued in favor of reducing the size of the Fed's balance sheet. We are skeptical that there is support on the FOMC for large reductions, although more modest reductions due to changes in regulatory requirements that reduce demand for reserves are possible.
Euro Area	24%	NA	NA	- Quantitative Tightening With reinvestments under the PEPP fully discontinued at the end of 2024, ECB balance sheet runoff is now at full speed, reaching about €40bn/month. Though the program is open-ended, the "Governing Council stands ready to adjust all of its instruments [...] to preserve the smooth functioning of monetary policy transmission." - Minimum Required Reserves (MRR) The ECB decided to keep the MRR unchanged at 1%. - Framework Review As central bank reserves gradually decline, the ECB is set to calibrate both long-term bank lending operations as well as the parameters of a structural bond holding portfolio.
UK	18%	10 - 15%	NA	- At its September 2025 meeting, the MPC voted to slow the pace of QT to £70bn in the year from October, down from £100bn in the current review cycle, implying that active sales will rise to £21bn (from £13bn) given lower redemptions. Both the pace of stock reduction and the change in the maturity split were in line with our expectations.
Canada	7%	7%	NA	- At its January 2025 meeting, the BoC announced its plan to complete its balance sheet normalization, ending QT. The Bank is gradually resuming asset purchases, starting with the resumption of its term repo program on March 5, so that its balance sheet stabilises and then grows in line with the economy.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g.,

marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
