Exhibit 2: May's improvement in CAI was mainly led by manufacturing sectors

Source: Goldman Sachs Global Investment Research, NBS, CEIC

Exhibit 3: Our proprietary import-implied domestic demand proxy suggests weak domestic demand growth in Q2

Source: Haver Analytics, Goldman Sachs Global Investment Research

Exhibit 4: Our MAP surprise index (21-day moving average) shows recent macro data have come in below market expectations

Source: Bloomberg, Goldman Sachs Global Investment Research

Exhibit 5: Our manufacturing growth proxy and construction growth proxy both ticked up in May

Source: Haver Analytics, Goldman Sachs Global Investment Research

Exhibit 6: Our preliminary investment tracker (on a real value-added basis) points to slightly weaker growth in Q2

Source: Goldman Sachs Global Investment Research

Exhibit 7: Our China inventory tracker suggests inventory levels may stay roughly flat in Q2 2026

Source: Goldman Sachs Global Investment Research, Haver Analytics

Exhibit 8: The boost from inventory changes to sequential GDP growth is likely to decline in Q2 2026

Source: Goldman Sachs Global Investment Research, Haver Analytics, CEIC, Bloomberg

Exhibit 9: Our China outside-in export tracker outperformed the official export growth data in April

Note: April 2026 data print is estimated using countries with imports data available, which account for 31.1% of value of Chinese exports in 2025.

Methodology notes for GS proprietary economic indicators

1. Exhibit 1 and Exhibit 2: China Current Activity Indicator (Bloomberg ticker: GSCNCAI) is the “first principal component” of several real activity indicators including industrial production, electricity consumption, PMIs, etc., expressed in GDP-equivalent units. (See the latest GS CAI methodology note [here](#) and the revamped methodology for China CAI [here](#).) These indicators can be recategorized to measure sequential momentum in different areas of the economy — manufacturing, consumption and others (i.e., housing and the labor markets).
2. Exhibit 3: Our import-implied real domestic demand infers China’s domestic demand by assigning all Chinese imports by sector to an ultimate source of final demand using China’s input-output tables. (See a brief summary of the methodology [here](#).) The real domestic demand implied by national accounts is estimated from national accounts data ($GDP - (Exports - Imports)$), as a cross-check for the validity of the sectoral imports based domestic demand.
3. Exhibit 4: Our China MAP surprise index summarizes the importance and strength (relative to consensus expectations) of economic indicators for the country. Aggregating MAP over time allows us to examine whether economic data are outperforming or underperforming consensus expectations for a certain period.
4. Exhibit 5: Our construction growth proxy is the median year-on-year growth of housing starts, production of steel, cement and glass. Our manufacturing growth proxy is the median year-on-year growth in production of metal cutting machines, autos, power generating equipment and microcomputers. (See our explanations [here](#).)
5. Exhibit 6: Our revamped investment tracker is based on seven underlying investment indicators, including commodity demand and output, equipment sales, construction output, and new construction contracts. After data cleaning, we derive the first principal component, which explains 62% of the total variation across the seven series, and then map it to Gross Fixed Capital Formation (GFCF) to measure investment on a real value-added basis.
6. Exhibit 7 and Exhibit 8: Our revised inventory tracker is based on six underlying inventory indicators, including commodities, PMI sub-indices, industrial enterprises’ finished goods inventory, and auto inventory. After data cleaning, we derive the first principal component, which explains 25% of the total variation of the six series, and then map it into percentage of GDP terms as our tracker for inventory changes.
7. Exhibit 9 and Exhibit 10: Our revised “outside-in” trade measures estimate China’s export growth and import growth using “mirror” statistics reported by its major trading partners, based on the country-specific lead-lag relationship, as a cross-check for the validity of China Customs trade data.
8. Exhibit 11 and Exhibit 12: Our revised GS China Financial Conditions (GSFCI) Index tracks liquidity conditions by 1) funding index: AA MTN yield, 3m SHIBOR, M2 and TSF flows; 2) equity market P/E ratio; 3) RMB on a trade-weighted basis. Accordingly, the sequential change in FCI can be attributed to factors through four major channels, i.e., FX, equity, credit and rates.
9. Exhibit 13: Our estimated growth impact of FCI impulse measures the impact of FCI changes on GDP growth (see related studies on China FCI and credit impulse [here](#), [here](#) and [here](#)).
10. Exhibit 14: Our preferred gauge of FX flows tracks SAFE monthly net FX sales/settlement as well as the net cross-border flows of RMB.

11. Exhibit 15 and Exhibit 16: Our China domestic macro policy proxy summarizes China domestic macro policy stance from four aspects: 1) fiscal policy; 2) monetary policy; 3) credit policy; and 4) housing policy.
12. Exhibit 17: Our measure of augmented fiscal deficit is a sum of effective on-budget fiscal deficit and off-budget fiscal deficit. We estimate the off-budget spending by major channels that finance quasi-fiscal activities, which includes new local government special bonds (LGSB), land sales revenue, local government financing vehicle (LGFV) bonds, policy banks support, shadow banking loans, etc.
13. Exhibit 18: We define the fiscal spend-through ratio as a function of government revenue, government bond net issuance, and the sequential change in fiscal deposits, among others, to measure the degree to which policymakers are deploying the funds raised from government revenue and bond issuance.
14. Exhibit 19: Our government bond financing tracker measures the pace of government bond net issuance on a monthly basis and its breakdown by bond type, including central government general bond (CGGB), central government special bond (CGSB), local government general bond (LGGB) and LGSB. We also provide our projections for their monthly net issuance schedule through the remainder of the year, based on annual government bond issuance quotas, fiscal policy stance and seasonal patterns, but these may be subject to further changes when more data/policy signals come in.
15. Exhibit 20: Our property policy relative tightness index tracks the relative tightness of property policies in over 100 cities from the following aspects: 1) demand: purchase restrictions (household registration, social welfare contribution, etc.), credit restrictions (mortgage rate, down payment), sales restrictions; 2) supply: caps on selling prices, presales restrictions, land transaction tax, etc.; 3) others: property speculation, land supply.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g.,

marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
