

JAPAN ELECTRONICS/SEMICONDUCTORS

TOPPAN/DNP earnings update: Reaffirming our positive view on MTPs; current share prices look low at less than 1X P/B

In this report, we update our earnings forecasts for TOPPAN/DNP, review the content of both companies' new medium-term plans, and cross-check our target prices by comparing implied P/B and P/E, as well as ROE/WACC and expected stock returns.

Key points are as follows: (1) We model TOPPAN's FC-BGA sales to grow at a +35% CAGR and operating profit at a +26% CAGR. We expect higher investment in next-generation semiconductor packages will weigh on profits, and that this business's operating margin will remain flat to slightly down. (2) For TOPPAN, an acceleration in earnings growth has been deferred to the next medium-term plan (MTP), but we think the company's strong commitment to corporate actions, led by shareholder returns, should be a positive factor that should help sustain market expectations. (3) For DNP's metal masks, we take a more cautious stance than before, given a decline in demand for development stage products due to the memory semiconductor shortage. (4) Our impression of DNP's new MTP is that it signals a shift toward improving the earnings structure through capital allocation and business portfolio strategies centered on agility/flexibility, and through ongoing structural reforms. This raises our expectations for high profit growth as sales growth accelerates. (5) Based on a comparison of implied P/B and P/E, as well as ROE/WACC and expected stock returns, we believe TOPPAN's current share price looks particularly attractive.

Having revised our earnings forecasts and mark-to-market EV/EBITDA peer multiples, we leave our SoTP-based 12m target price for TOPPAN unchanged at ¥6,000 and update our TP for DNP to ¥3,000, from ¥3,100. We maintain our Buy rating on TOPPAN. For DNP, while the current stock price appears undervalued based on the Implied PBR/PER comparison, we maintain our Neutral rating considering the upside potential relative to our target price.

Updating our earnings forecasts

We maintain our FY3/27-FY3/28 operating profit forecasts for TOPPAN and raise our FY3/29 forecast by +4%. Compared to our post-results forecasts, we raise our sales estimates for the FC-BGA business, mainly due to the normalization of operations from a reduced takt time and volume growth driven by the start-up of a new plant.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

The main reason for raising our FY3/29 operating profit forecast is the inclusion of a volume contribution from the new plant that year.

We lower our FY3/27 operating profit forecast for DNP by 5% as we adopt a more cautious assumption for metal mask volumes, and maintain our FY3/28-29 forecasts. We take into account the current declining demand for low-priced G6 metal masks, impacted by the memory semiconductor shortage (details below).

FC-BGA

At its results briefing, TOPPAN indicated that FC-BGA earnings growth will not occur until the next MTP (starting from FY3/30), dampening market expectations for earnings growth during the new MTP period (FY3/27-FY3/29) ([LINK](#)). The main reason given was due to increased upfront investment cost (capex + R&D expenses) in the next-generation semiconductor packages (mainly glass core substrates) which will weigh on profits in the next few years.

We forecast a sales CAGR of +35% in FY3/27-29 ([Exhibit 3](#)). In addition to the gradual start-up of plants and increased production capacity, we expect sales growth to be driven by an improving product mix (= higher unit price per production capacity) as the proportion of high-end network switches and AI ASICs increases. We model operating profit growth in this business to be slower than sales growth, at a +26% CAGR ([Exhibit 4](#)). At the results briefing ([LINK](#)), TOPPAN discussed plans to increase investment in next-generation semiconductor packages from c.¥1bn in FY3/26 to c.¥8 bn in FY3/27. We expect this will increase further to c.¥15 bn in FY3/28 before peaking in FY3/29. On this basis, we look for the operating margin for FC-BGA to trend flat to slightly down over FY3/27-29. This is in line with the company's assumption for the non-GAAP operating margin for its semiconductor-related business presented at the results briefing.

Info & Communications

Regarding the current status of its digital solutions, TOPPAN sees a challenge in that many sales are limited to standalone digital solutions, which has prevented it from achieving scale. Solutions proposal activities that integrate operational support—intended to serve as a driver of earnings recovery—have not progressed sufficiently, according to the company. As a result, revenue growth based on the envisioned cycle of digital solutions → operational support → data analysis → consulting has fallen short of the company's expectations, and has not kept pace with capex.

In response, TOPPAN is shifting its business model from the provision of one-time digital solutions to a recurring service model that combines multiple solutions, including operational support. It is also developing services that combine multiple solutions tailored to customer challenges, building long-term relationships with customers and reinforcing its business model to capture cyclical business, as noted above. These efforts are gradually bearing fruit, and in TOPPAN's BPO business, recurring projects now account for 90% of recent sales, helping to secure more stable profits. Going forward, we expect TOPPAN to secure higher margins in this segment by expanding sales while strengthening its leveraged business structure specific to digital businesses (= sharing of products and services).

Exhibit 6: Comparison of turnover and capex in TOPPAN's info & communications segment and DNP's smart communication segment)

Source: Company data, Goldman Sachs Global Investment Research

Management's view is that FY3/27 and FY3/28 will serve as the key benchmark for achieving its FY3/29 target of ¥985 bn in sales and ¥72.5 bn in non-GAAP operating profit. At present, our forecasts do not incorporate a positive contribution from earnings structure reform, and are thus more conservative than management's target.

New medium-term plan

We take a positive view of the direction of the corporate actions set forth in the MTP. In particular, the policy of a 100% floor on the total payout ratio is in line with our prior expectations. Although accelerated earnings growth has been deferred to the next MTP, we believe the strong commitment to corporate actions, led by shareholder returns, will help sustain market expectations.

In addition to shareholder returns, TOPPAN outlined plans to improve capital efficiency through a 2pp reduction in SG&A expenses (mainly head office costs) and balance sheet reforms (30% reduction in total assets). TOPPAN's head office assets/expenses have long been viewed by the equity market as a drag on the company's profitability, capital returns, and turnover ([Exhibit 7](#), [Exhibit 8](#)), and management's commitment to aim for major progress in the first 1-2 years of the three-year MTP is likely to be welcomed by investors, in our view. In addition, cross-shareholdings had fallen to 12.3% of consolidated net assets as of end-FY3/26, and TOPPAN has set a target to continue reducing them to less than 7% during the new MTP period.

Catalysts

We see potential for market expectations for TOPPAN's earnings growth to rise should the following three events materialize:

■ **Early ramp-up of FC-BGA capacity:**

If Phase 1 of the JV with Broadcom were brought forward or Phase 2 were to start early. Currently, Phase 1 is scheduled to start in FY3/28 and Phase 2 is undecided, but if production were to commence earlier, we believe expectations for FC-BGA volume growth and mix improvement would increase, leading to higher expectations for earnings expansion.

■ **Next-generation semiconductor packages centered on glass core substrates:**

We would view an acceleration in the overall industry roadmap or in TOPPAN's technology development as a positive, as it would lead to an improved mix for the FC-BGA business and an early return on investment.

■ **Improvement in the earnings structure of the Info & Communications business:**

If higher sales and positive outcomes from earnings structure reforms were to emerge, supporting improvement in the profit margin in line with company assumptions, we believe this would lead to higher expectations for company-wide earnings.

TOPPAN is scheduled to hold an IR Day from 13:30 JST on June 12. It will provide an overview of the medium-term plan and discuss each segment and its financial strategy.

We lower our FY3/27 operating profit forecast by 5% and maintain our FY3/28-29 forecasts. For FY3/27, we are now more cautious on metal mask volumes. Due to the memory semiconductor shortage, metal mask shipment volumes have been decreasing since March. In the Chinese smartphone market, the cost of memory chips has risen significantly, and per management, some customers have canceled new model development. This has led to a notable drop in demand for development-stage metal masks, mainly low-priced G6 masks. While we assume the memory shortage will continue throughout FY3/27, we expect higher demand for high-definition G8 products, driven by the evolution of OLED and increased usage in laptops, to offset the slide in profits. Management has factored a negative impact in the double-digit billion yen range (we estimate ¥5-10 bn) into its guidance assuming the memory shortage persists.

New medium-term plan

DNP's new MTP is centered on agility and flexibility, as typified by the agile allocation framework it has adopted. The company has put in place a flexible framework to ensure that the company can capture opportunities in areas such as M&A, which are difficult to time, and in the rapidly changing semiconductor-related business. A key example of this is the ¥300 bn capex target being a guideline with room for upside/downside, while we also confirmed the agile allocation framework aims to prevent shareholder return expectations from weakening if DNP announces any M&A. The company also plans to continue the major structural reforms undertaken in the previous MTP. Although some businesses are waiting for demand to recover, we believe DNP is steadily building an earnings structure in which top-line growth in focus businesses will translate into earnings growth.

For reference, see our reports on FY3/26 results ([LINK](#)), the new MTP outline briefing ([LINK](#))/group call ([LINK](#)), the results/MTP briefing ([LINK](#)), and our GS-hosted webinar ([LINK](#)).

Catalysts

■ Glass core substrates:

An acceleration of the overall industry roadmap would likely be viewed positively by the market, as we think it would lead to an improved mix for the FC-BGA business and an early return on investment. At the results briefing, we confirmed that management is targeting mass production around FY3/29, and that the contribution from this ramp-up is not factored into the current MTP.

While we assume that meaningful recovery of investment for DNP's tender offer for Shinko Electric (¥85 bn), the cost of launching pilot lines, and the investment required for future mass production will come in the next MTP (from FY3/30), we think a steady ramp-up and growth acceleration in this business would be viewed positively by investors.

■ **Battery pouches:**

We confirmed management's view that the automotive business bottomed in 3Q3/26 and saw a slight recovery in 4Q. However, the company also said that the situation in North America has not improved. It expects a positive earnings contribution from battery pouches for ESS from 2H3/27 through FY3/28, but management commented that the scale is not yet large enough to offset weakness in the automotive business. If the automotive business, which is the core of the battery pouch operation, were to enter a demand recovery phase earlier than the market expects, we would expect this to be a positive catalyst.

SoTP-based target price calculation

We continue to use a Sum of the Parts (SoTP) methodology to calculate enterprise value and target prices for TOPPAN and DNP. The EV/EBITDA multiples we apply to each segment are slightly revised from the time of the companies' results announcements, reflecting changes in the multiples of the companies used to calculate the average. We maintain our 12-month target price for TOPPAN unchanged at ¥6,000 and slightly lower our TP for DNP to ¥3,000, from ¥3,100.

Implied P/E and P/B, derived by dividing our target prices by our forecast EPS/BPS, are shown in [Exhibit 11](#). For the likelihood of implied P/B exceeding 1.0x and staying at the high end of the historical range, see the comparison of each company's WACC with their ROE and ROIC ([Exhibit 12](#)). Our forecast ROE and ROIC are both at levels exceeding the companies' cost of capital, implying that both companies are sufficiently creating value based on their shareholders' equity and interest-bearing debt ([Exhibit 12](#)). Current share prices (as of the May 29 close) are below the level equivalent to 1.0x P/B, and look low ().

Investment Thesis - TOPPAN Holdings

TOPPAN Holdings' predecessor, TOPPAN Printing, was founded in 1900 with printing as its original business. Amid the structural advance of digitalization and the move toward paperless operations, TOPPAN is leveraging the core technologies it cultivated in the printing business to accelerate its expansion into other areas and is transforming its business portfolio. In its medium-term plan for FY3/24-FY3/26, it selected growth businesses and businesses requiring review. In parallel with aggressive investment in its growth businesses, it is improving profitability in businesses requiring review through

structural reforms, downsizing or exiting low-margin businesses, and price revisions. At the same time, it has set targets for selling cross-shareholdings and strengthening shareholder returns, mainly through share buybacks, which are being consistently executed. In the new medium-term management plan for FY26–28, the company positively evaluates the directions of corporate actions such as shareholder returns with a minimum total payout ratio of 100%, balance sheet reform targeting a 30% reduction in total assets, and a reduction of selling, general, and administrative expenses by 2 percentage points. Although the full-scale profit growth and investment recovery from FC-BGA is expected in the next medium-term management plan (from FY29 onward), the direction of these corporate actions is seen as meeting market expectations. From the perspective that the structural earnings growth potential centered on FC-BGA—which is expected to achieve high growth over the medium to long term—is not fully reflected in the current stock price, we are Buy rated on TOPPAN.

Price Target Risks and Methodology - TOPPAN Holdings

We use a sum of the parts (SoTP) method to calculate TOPPAN's enterprise value/target price (base year: FY3/27). We apply the following EV/EBITDA multiples for each segment: 5.4x for Info & Communications, 8.3x for Living & Industry, and 12.0x for Electronics. We also apply a -10% conglomerate discount to the total business value. Based on the above, we calculate a 12-month target price of ¥6,000. Key risks include: sudden changes in customer production/technology roadmaps for various products, production problems at TOPPAN that prevent them from fulfilling orders, difficulty in procuring key materials, intensified price competition with rivals leading to a decline in market share or profitability, a rapid appreciation of the yen, and a surge in raw material costs.

Investment Thesis - Dai Nippon Printing

Dai Nippon Printing (DNP) was founded in 1876 with printing as its original business. Amid the structural advance of digitalization and the move toward paperless operations, the company is leveraging the core technologies it cultivated in the printing business to accelerate its expansion into other areas and is transforming its business portfolio. In its medium-term plan for FY3/24–FY3/26, it selected growth businesses and businesses requiring review. In parallel with aggressive investment in its growth businesses, it is improving profitability in businesses requiring review through structural reforms, downsizing or exiting low-margin businesses, and price revisions. At the same time, it has set targets for selling cross-shareholdings and strengthening shareholder returns, mainly through share buybacks, which are being consistently executed. In the new medium-term plan for FY26–28, the company has outlined a flexible approach by pre-establishing plans such as an agile allocation framework. This enables them to reliably seize attractive investment opportunities in the rapidly changing semiconductor market and unpredictable timing of M&A. Alongside growth investments, the company intends to regularly review its business portfolio, which is expected to build a revenue structure where growth phases in focus businesses are more likely to translate into profit growth. On the other hand, although the company holds multiple businesses with high growth potential, such as the semiconductor photomask business and battery pouch business, it is considered that this earnings growth potential is already sufficiently reflected in the current stock price. Therefore, we are Neutral rated on DNP.

Price Target Risks and Methodology - Dai Nippon Printing

We use a sum of the parts (SOTP) method to calculate DNP's enterprise value/target price (base year: FY3/27), applying the following EV/EBITDA multiples for each segment: 5.4x for Smart Communication, 10.4X for Life & Healthcare, and 9.3x for Electronics. We also apply a -15% conglomerate discount to the total business value. Based on the above, we derive a 12-month target price of ¥3,000. Key risks include sudden changes in customer production/technology roadmaps for various products, production problems at DNP that prevent it from fulfilling orders, difficulty in procuring key materials, intensified price competition with rivals leading to a decline in market share or profitability, a sharp appreciation of the yen, and a surge in raw material costs.

Contributing Authors: Mitsuhiro Icho Goldman Sachs Japan Co., Ltd., Daiki Takayama Goldman Sachs Japan Co., Ltd..

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Dai Nippon Printing and TOPPAN Holdings is/are relative to the other companies in its/their coverage universe: Alps Alpine, Dai Nippon Printing, Hirose Electric, IRISO Electronics, Ibiden, Japan Aviation Electronics Industry, Kohoku Kogyo, Kyocera, MARUWA, Mabuchi Motor, Maxell Ltd., MinebeaMitsumi Inc., Murata Mfg., NGK Corp., Nichicon, Nidec, Nippon Ceramic, Niterra, Nitto Denko, Renesas Electronics, Rohm, TDK, TOPPAN Holdings, Taiyo Yuden

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by Goldman Sachs Global Investment Research and referred to in this research.

Goldman Sachs beneficially owned 1% or more of common equity (excluding positions managed by affiliates and business units not required to be aggregated under US securities law) as of the month end preceding this report: TOPPAN Holdings (¥4,539)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Dai Nippon Printing (¥2,727) and TOPPAN Holdings (¥4,539)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Dai Nippon Printing (¥2,727) and TOPPAN Holdings (¥4,539)

Goldman Sachs had a non-investment banking securities-related services client relationship during the past 12 months with: TOPPAN Holdings (¥4,539)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Dai Nippon Printing (¥2,727) and TOPPAN Holdings (¥4,539)

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at <https://www.gs.com/research/hedge.html>.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under

applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst – SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details can be found at: <https://www.goldmansachs.com/worldwide/india/documents/Grievance-Redressal-and-Escalation-Matrix.pdf>, and a copy of the annual audit compliance report can be found at this link: <https://publishing.gs.com/content/site/india-annual-compliance-report.html>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for “professional investors” within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither “registered banks” nor “deposit takers” (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand

Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
