

US WEEKLY KICKSTART

Corporate equity demand should outweigh record IPO supply in 2026

- IPO activity is continuing to recover after four years of muted issuance. 40 deals worth \$28 billion have launched YTD, the largest totals through May since 2021. While elevated IPO activity has characterized some previous equity market peaks, the number of IPOs YTD is only on pace to reach the historical annual average of 100. In contrast, more than 250 IPOs launched in 2021 and nearly 400 launched in 1999.
- 2026 should be a record year for IPOs in dollar terms. Our IPO Barometer continues to signal a healthy macro backdrop for new launches, and news reports and prediction markets indicate an increased likelihood that some of the largest private companies will come public this year. We raise our forecast for 2026 IPO volume to \$225 billion (from \$160 billion). We expect total corporate equity supply to register \$675 billion including follow-ons and other issuance. However, this issuance scales to just 1.0% of US equity market cap, compared to an average of 1.5% since 1995.
- As investor lockups expire, IPO issuance leads to additional potential equity supply. History shows that large IPOs with initial floats of less than 10% experience an average increase in float to 46% 12 months later. Following this historical pattern, we expect nearly \$500 billion in potential equity supply from expiring lockups in 2026. However, this post-lockup potential supply may not materialize if investors choose to maintain their ownership positions.
- Buyback growth has slowed alongside the AI capex boom, rising just 4% y/y in Q1 2026. Because market values have continued to rise, the S&P 500 buyback yield has declined to 1.9%, near the lowest level since 2021. However, the magnitude of repurchases remains large and continues to grow. Financials account for 27% of S&P 500 buybacks and grew repurchases by 18% in Q1. NVDA announced an \$80 billion authorization, and total buyback announcements are running at a record \$860 billion YTD. We forecast gross corporate buybacks of \$1.3 trillion this year.
- Despite slow recent buyback growth and prospects for a record year for IPOs, corporate demand for equities should outweigh both direct corporate equity issuance and potential post-lockup equity supply in 2026. Strong M&A activity should bolster that balance; announcements have totaled nearly \$900 billion YTD, 48% higher than this time last year, with nearly 70% cash consideration.

- The balance of corporate equity supply and demand will become more challenging in 2027. The magnitude of post-lockup supply will depend on many factors, including the performance of IPOs, the size of initial floats, and investor desire for liquidity. However, post-lockup equity supply will likely increase in 2027 relative to 2026.
- Outside of corporates, foreign investors represent a likely additional source of equity demand in coming months, as do households, who were net sellers in the late 1990s but have recently been buying US equities. In addition, much of the liquidity created by IPOs should eventually end up reinvested in the equity market. Changes in index inclusion rules should accelerate passive demand for some new issues.

The outlook for IPOs and the corporate equity supply/demand balance

US IPO activity has recently accelerated following four consecutive years of muted issuance. 24 US companies have come to market so far in Q2 2026, bringing the YTD total to 40. This represents more than double the number of IPOs at this point in 2025 and the largest total through May since the 95 IPOs launched in the first five months of 2021. Nonetheless, despite the recent pickup in activity, the number of deals so far this year has lagged the average total of 50 IPOs through May since 1995.

Exhibit 1: 40 US companies have gone public so far this year

US deals greater than \$25 million in value

Source: FactSet, Goldman Sachs Global Investment Research

US IPOs have raised \$28 billion in gross proceeds YTD, the largest total at this point in the year since 2021. \$44 billion was raised in the first five months of 2021. First day returns of recent IPOs indicate a healthy appetite for new issuance, with the average IPO in Q2 rising by 21% on its first trading day, in line with the historical average.

Exhibit 2: US IPOs have raised \$28 billion YTD

US deals greater than \$25 million in value

Source: FactSet, Goldman Sachs Global Investment Research

Exhibit 3: First day trading returns for the average IPO

US deals greater than \$25 million in value

Source: FactSet, Goldman Sachs Global Investment Research

We estimate IPO gross proceeds will total a record \$225 billion in 2026. Our previous forecast was for \$160 billion of IPO issuance. Our new estimates reflect a continued healthy macro backdrop for IPOs, as signaled by our [IPO Barometer](#) (Exhibit 35), and recent changes to the outlook for potential launches by some of the largest private companies. Including follow-ons, converts, and SPACs, we estimate corporate equity issuance will total \$675 billion this year.

Although we expect a record year in 2026 for corporate equity issuance, supply relative to the size of the equity market should remain below the long-term average. Our estimate for \$675 billion of corporate equity supply equates to 1% of Russell 3000 market cap, in line with average annual equity issuance from 2015-2019.

Exhibit 4: We forecast \$225 billion of IPO gross proceeds in 2026

Universe consists of US deals greater than \$25 million in value

Source: FactSet, Goldman Sachs Global Investment Research

Exhibit 5: We expect equity issuance will equal 1% of Russell 3000 market cap this year

Source: Dealogic, Goldman Sachs Global Investment Research

While modest floats should limit the equity supply created immediately by potential upcoming IPOs, these deals will create additional equity supply in subsequent months and years. Since 2003, 14 IPOs have come public with gross

proceeds exceeding 5 bp of Russell 3000 market cap and float shares of less than 10%. On average, the floats of these companies increased from 7% at launch to 28% 6 months following the IPO and 46% by 12 months post-IPO.

Exhibit 6: Additional equity supply could come to market as float increases post-IPO
includes 1,960 IPOs since 2003

Large IPOs with low float are 14 IPOs with deal values of at least 5 bp of Russell 3000 market cap at the time of IPO and float shares totaling less than 10% of total. 5 bp of Russell 3000 market cap today corresponds to roughly \$36 billion.

Source: Bloomberg, FactSet, Goldman Sachs Global Investment Research

Based on the historical pattern, we estimate that recent and upcoming IPOs will result in roughly \$500 billion of additional unlocked shares available to sell in 2026 and likely a larger quantity in 2027. We expect the majority of potential equity supply from the current pipeline of IPOs will become free float in 2027. Importantly, however, these shares will not necessarily translate to additional equity supply if investors choose to maintain their ownership in recent IPOs rather than sell those positions.

Exhibit 7: In addition to shares floated at IPO, expiring lockups can increase equity supply

Value of shares from expiring lockups calculated as shares available for trading at lockup expiry date multiplied by the share price at the expiry date. Lockup expiry data based on data in company filings captured by FactSet. These data understate the total value of locked up shares because they are only available for roughly 60% of IPOs in our database.

Exhibit 8: Value of shares from expiring lockups

Source: FactSet, Goldman Sachs Global Investment Research

On the demand side of the equation, corporate buybacks have continued to give way to surging capex spending. S&P 500 buybacks rose by 4% year/year in Q1, continuing the recent trend of mid-single digit growth. We forecast S&P 500 buybacks will grow by 3% this year as capex growth exceeds 30%.

Exhibit 9: S&P 500 buyback growth registered just 4% in Q1 2026

Source: FactSet, Goldman Sachs Global Investment Research

Slowing buyback growth alongside equity market appreciation has continued to

push the S&P 500 buyback yield lower. The S&P 500 trailing 12-month net buyback yield sits at 1.9%, compared with a median of 2.4% since 2005. As a result, the index divisor – a proxy for share count – has risen modestly during the last several quarters.

Exhibit 10: The S&P 500 buyback yield has continued to decline

Source: Goldman Sachs Global Investment Research

Exhibit 11: The S&P 500 divisor has inflected higher

Source: Standard and Poor's, Goldman Sachs Global Investment Research

Despite weak recent buyback growth, US companies remain a large source of equity demand. We expect US companies will execute more than \$1.3 trillion in buybacks in 2026. While hyperscaler buybacks fell by 64% year/year in Q1, growing buybacks from Banks and the beneficiaries of AI capex, such as semiconductors, should help offset some of those headwinds. NVDA, for example, added \$80 billion to its buyback authorization following its latest report. In total, US companies have announced a record \$860 billion in buyback authorizations YTD, 18% growth relative to this time last year.

Exhibit 12: Buyback authorizations have totaled \$860 billion YTD

Source: Goldman Sachs Global Investment Research

Exhibit 13: Consensus buyback growth estimates by sector

Sector	Cons. 2026E buybacks	
	Share of total	Year/Year growth

Financials	27	18
Communication Services	10	(19)
Health Care	6	10
Consumer Discretionary	6	(14)
Industrials	7	(15)
Energy	6	16
Consumer Staples	2	(11)
Materials	2	8
Utilities	1	124
Real Estate	0	64
S&P 500	100 %	10 %

Source: FactSet, Goldman Sachs Global Investment Research

Even including the additional potential supply represented by expiring lockups, we expect corporate buybacks will outweigh corporate equity issuance in 2026.

Buybacks of \$1.3 trillion this year compare with \$1.1 trillion of corporate equity issuance

combined with potential post-lockup supply.

Exhibit 14: Corporate equity demand from buybacks should exceed corporate equity supply this year
net demand assumes all shares available after lockups expire are sold

Source: Goldman Sachs Global Investment Research

M&A will be another source of corporate demand for US equity in coming quarters. US M&A activity has been resilient this year despite market volatility, with almost \$900 billion of announced transactions YTD (+48% year/year). Cash has represented roughly 70% of consideration for announced M&A this year, close to recent averages.

Exhibit 15: Announced US M&A has been resilient YTD

US strategic and sponsor M&A over \$100 million

Source: Dealogic, Goldman Sachs Global Investment Research

Exhibit 16: Cash has represented nearly 70% of consideration for announced M&A YTD

US strategic and sponsor M&A over \$100 million

Source: Dealogic, Goldman Sachs Global Investment Research

In addition to corporates, US households and foreign investors represent additional potential sources of US equity demand in coming months. While households were a significant source equity supply during the late 1990s, the group has recently been a net buyer of equities. The share of the corporate US equity market owned by foreign investors has risen from 6% in 1995 to 18% today, and recent ETF and mutual fund flows have reflected an incremental recent rotation from global equities to US equities.

Exhibit 17: Households have been net buyers of US corporate equities in recent years

Source: Federal Reserve, Goldman Sachs Global Investment Research

Exhibit 18: Flows into US equity funds have recently outpaced flows into non-US equity funds

Source: EPFR, Goldman Sachs Global Investment Research

Recent changes to index inclusion rules should accelerate the demand from passive funds for some of the potential impending IPO supply. FTSE Russell recently approved methodology changes to Russell US indices that would allow fast entry for large IPOs, following in the footsteps of changes to the Nasdaq-100 methodology earlier this month. The consultation on treatment of large IPOs held by S&P Dow Jones Indices closed for comments this past week.

Disclosure Appendix

Reg AC

We, Ben Snider, Ryan Hammond, Jenny Ma, Daniel Chavez, Kartik Jayachandran and Christophe Sung, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Ben Snider Goldman Sachs & Co. LLC, Ryan Hammond Goldman Sachs & Co. LLC, Jenny Ma Goldman Sachs & Co. LLC, Daniel Chavez Goldman Sachs & Co. LLC, Kartik Jayachandran Goldman Sachs & Co. LLC, Christophe Sung Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Basket disclosure

The ability to trade the basket(s) in this report will depend upon market conditions, including liquidity and borrow constraints at the time of trade.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details can be found at: <https://www.goldmansachs.com/worldwide/india/documents/Grievance-Redressal-and-Escalation-Matrix.pdf>, and a copy of the annual audit compliance report can be found at this link: <https://publishing.gs.com/content/site/india-annual-compliance-report.html>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this

research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be

supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
