Raise global MLCC shipment value forecast

As Exhibit 1 shows, global MLCC shipment value declined for two consecutive years, from \$17.47bn in 2021 (+26.0% YoY) to \$14.32bn in 2022 (-18.1%) and \$12.64bn in 2023 (-11.7%), before rising again to \$13.30bn in 2024 (+5.2%) and \$14.67bn in 2025 (+10.3%). We increase our forecasts for shipment value from \$16.48bn (+12.4% YoY) to \$17.43bn (+18.8% YoY) for 2026, from \$18.34bn (+11.2%) to \$20.89bn (+19.9%) for 2027, and from \$20.30bn (+10.7%) to \$24.25bn (+16.1%) for 2028.

We foresee ongoing expansion in demand for value-added products for AI/DC use from 2026. This application and the shift to a new generation of GPUs will require large quantities of MLCCs with large capacity owing to space constraints for chip-use ABF package substrates and AI accelerator boards. (1) Murata is a frontrunner in miniaturization and increased capacity; (2) although MLCCs generally experience a reduction in capacitance when a DC voltage is applied, Murata's MLCCs maintain a large effective capacitance with minimal change; (3) Murata's MLCCs also have the characteristic of maintaining stable capacitance during high-frequency operation, where currents in electronic circuits switch rapidly. We think these features are likely to create more opportunities for customers to pay premium prices for Murata's high-quality and highly reliable products. Some market participants expect MLCC unit prices to rise for similar products, but we forecast that unit prices for comparable products will continue to decline mildly. In contrast, as miniaturization and increased capacity progress, we think it likely that Murata will increase sales with differentiated high value-added products, and see a clearer difference in profit margins compared to other MLCC companies. We think a key risk for Murata would be if it were unable to ramp up production to meet surging demand in computing areas, such as AI servers/data centers, and it lost share as a result of sacrificing supply capacity of MLCCs for other applications in order to respond to rising demand. However, our view is that it will be able to increase production in line with rising demand.

US\$ MLCC export value in trade stats +16.0% YoY, +9.1% MoM

Trade stats published by MOF on May 28 show April MLCC export value at ¥74.2bn (+28.0% YoY, +9.3% MoM), export volume at 93.1bn units (+10.4%, +6.5%), and ASP at ¥0.797 (+15.9%, +2.6%). In US\$ terms, export value of \$466.23mn was up 16.0% YoY from \$402.05mn and up 9.1% MoM from \$427.52mn, while ASP of 0.501¢ rose 5.0% YoY from 0.477¢ and rose 2.4% MoM from 0.489¢. The trade stats data do not provide a fully accurate picture of how ASP has changed on a same-product basis, but from export values, volumes, and ASP by destination region and customs post, on a same-product basis, we believe price declines have moderated, while ASPs have risen both YoY and MoM due to an improved product mix. For Greater China (China, Taiwan, and Hong Kong), which accounted for 57.7% of exports in April, volumes increased 0.1% MoM, US\$ export value increased 7.5%, and US\$ ASP rose 7.4%.

At major customs points, values were \$92.33mn at Narita (+26.9% YoY, +4.1% MoM) with ASP at 1.18¢ (+1.5%, -1.7%), \$152.30mn at Osaka (+0.8%, +13.7%) with ASP at 0.50¢ (-5.1%, +4.9%), and \$64.06mn at Kansai International (+34.0%, -6.8%) with ASP at 0.25¢ (-12.0%, +9.3%).
