

AMERICAS TECHNOLOGY: INTERNET

Ridesharing & Delivery Q2'26 Preview: Analyzing the Industry Debates & Estimates

In previewing the upcoming earnings season for the Mobility/Delivery Internet sub-sector, we expect reported results to come in broadly inline to above investor expectations, with a relatively stable consumer backdrop (despite investor concerns) across our industry work and conversations. Within this note, we take the opportunity to update our US Grocery Industry model and operating estimates across the four companies in this sub-sector coverage universe. In our view, the online grocery category has one of the lowest online penetration rates today (across eCommerce) and we expect the industry to grow at a +11% 2025-2030 CAGR.

Specifically, within our industry model, we further break out the category between ship-to-home, delivery & pickup options – and believe that grocery delivery (similar to the food delivery industry) will see durable double-digit growth in the years to come. Despite several companies across our coverage universe investing to scale their presence within the industry (AMZN, DASH, UBER, CART) – we have not seen any evidence of growth rates being pressured. In our view, there remains a significant amount of white space for all players to grow into the market (as previously outlined [here](#)).

More broadly, the mobility landscape continues to benefit from rising utility trends across both higher HHI users (with an upward tilt to pricing – as seen with autonomous vehicles pricing power) & LHI users (driven by affordability initiatives). Given the widening array of product offerings – we view there to be a rising portion of users adopting rideshare services. In terms of industry debates within the sector, focus remains around: a) the state of the consumer; b) how autonomous vehicles could impact the industry (albeit with less concern around near-term disruption dynamics); & c) the broader competitive landscape – both across existing & new/emerging players aiming to take share within the market.

In the delivery landscape, the widening out of use cases from food delivery to grocery & local commerce initiatives remains one of the most compelling secular growth themes (and further outlined [here](#)). In terms of industry debates within the sector/industry, investor debates have been anchored around: a) the state of the consumer ; b) the competitive landscape within online grocery delivery; & c) local commerce/grocery margin trajectory – both in the near & longer-term. Across the four companies with exposure to the local commerce/online grocery industry, we expect that investments into the physical infrastructure (e.g. AMZN fulfillment

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

centers) and product improvements (e.g. driving a more comprehensive selection of items, greater affordability, improving delivery [both from a timing & accuracy perspective], etc.) will drive increased adoption & frequency in the coming years.

Exhibit 1: Summary of Estimate Changes & 12-Month Price Targets

Ticker	Company	Rating	Price Target		% Upside / Downside	Summary of Estimate Changes
			Old	New		
UBER	Uber	Buy	\$115	\$115	59%	We adjust our take rate & gross margin assumptions to more accurately reflect UK accounting changes. In addition, we also raise our longer-term CapEx assumptions to reflect AV investments
DASH	DoorDash	Buy	\$280	\$280	52%	We adjust our take rate/gross margin assumptions to better reflect geographic mix dynamics. In addition, we also adjust our share count assumptions on the back of disclosures within the most recently published 10Q
CART	Instacart	Buy	\$66	\$64	40%	Our updated price target is driven by an adjustment in our share count assumptions given disclosures included within the most recently published 10Q
LYFT	Lyft	Buy	\$24	\$22	42%	We modify our price-target methodology, adjust our operating expense estimates (to better reflect seasonal spending trends)

Key Debates, Trends and Company Commentary Heading Into 2H 2026

Heading into 2H 2026, we expect there to be a few key debates across the rideshare & delivery landscape:

- **How will the rise of autonomous vehicles impact industry growth rates?** Given that there has been several recalls with Waymo over the last few months, paired with the redeployment of vehicles into existing markets, near-term disruption debates have faded. We believe that within the US, robotaxi supply remains constrained. This, paired with incremental investments being made by Uber (both internally within their Uber Autonomous Solutions service capability offerings, and external [incl. Rivian/Lucid/Nuro]), reinforces our view that traditional rideshare platforms will offer autonomous vehicle rides on their platform. Heading into 2H26, we continue to look toward London as a key market to further understand the competitive landscape, and the evolution of demand trends within new/emerging Waymo markets (in the US).
- **How should investors think about the competitive landscape within the grocery & retail industry?** We believe that the industry itself remains in the early innings of scaling with a significant amount of white space for companies to operate within. Our industry work has not indicated any slowdown in growth attributed to the competitive environment/landscape. Additionally, within this report - we outline our views around the opportunity & would highlight that AMZN, DASH, UBER and CART remain positively levered to the broader industry.
- **What does the current state of the consumer look like and are there any pockets of weakness?** Exiting Q1 earnings, investor concerns around the state of the consumer increased as a number of consumer companies highlighted softer trends during April (incl. Shake Shack, Planet Fitness, etc.). That said - we believe that consumer spend trends were more nuanced (and pockets of softness varied by subsector/industry), given that mobility/delivery companies in our coverage universe did not call out any signs of consumer softness (during their Q1 earnings call). In addition, our intra-quarter work has not pointed to any softening within our rideshare/delivery coverage - and NPI rates (on a T3M basis) have not seen any incremental/significant step-downs.

Framing the Underappreciated Opportunity in Online Grocery

Given ongoing debates surrounding the competitive landscape of the industry, we take the opportunity to update our online grocery industry operating assumptions and highlight key secular trends/themes within the industry.

The US online grocery industry can be segmented into three key categories:

- **Ship-to-Home.** When grocery items are delivered to a consumer through contract carriers (i.e. FedEx, UPS, etc.). Unlike delivery orders, ship-to-home orders primarily consist of non-perishable goods given timing constraints.
- **Delivery.** Consists of grocery orders delivered in less than a day. Within our coverage universe exposure to this category would include: a) DoorDash, Uber and Instacart's

grocery offerings; & b) Amazon Fresh & same-day grocery services.

- **Pickup.** Includes orders where customers pick up items directly from the store (rather than being delivered directly by a third party). Outside of Amazon (where grocery items can be picked up in physical stores [i.e. Whole Foods]), Instacart's Storefront Pro enables grocers the ability to offer white label delivery, pickup, and in-store fulfillment options.

Across all three of these categories, we forecast the total industry to grow at a +11% 2025-2030 CAGR. Our growth assumptions are predicated around a number of key themes: a) the continued shift from offline to online grocery sales (as grocery remains has one of the lowest online penetration rates in the US); b) shifting consumer spend habits (away from traditional eCommerce platforms to local commerce/delivery players); & c) rising premium placed on time & convenience.

Exhibit 2: We expect the industry to reach ~\$400bn in sales by 2030...

US grocery spend (\$bn)

Source: Euromonitor, BrickMeetsClick, Goldman Sachs Global Investment Research

Exhibit 3: ... with delivery driving a majority of the growth 2025-2030 incremental grocery category spend (\$bn)

Source: Euromonitor, Goldman Sachs Global Investment Research

Across the three key categories of online grocery spend, we forecast:

- **Ship-to-Home (+9% CAGR).** As consumers increasingly look for ways to optimize efficiency and affordability, we expect the category to gain share of grocery retail sales. Relative to delivery grocery sales, ship-to-home orders do not involve tipping drivers - and recurring orders often include discounted options (incl. Amazon's "Subscribe & Save").
- **Delivery (+16% CAGR).** As previously highlighted ([link](#) | [link](#)), fast delivery speeds and wider selections have driven consumers into online delivery channels. With leisure time increasingly prioritized by consumers, we believe that the US grocery delivery category will see durable double digit growth over the next five years. In our view, lower delivery times will drive additional unlocks both in terms of: a) purchase frequency; & b) adoption of grocery delivery services by new consumers.
- **Pickup (+4% CAGR).** While the category saw durable growth from 2020-2023 (largely due to COVID), we see the category as being less of a driver of online grocery sales going forward, primarily due to the expectation that consumers will continue pivot to more convenient channels (i.e. Delivery & Ship-to-Home). That said, we still expect for the category to outpace in-store grocery spend.

Exhibit 4: Nearly 50% of consumers have increased the number of rapid delivery orders placed over the last year...

- I use much more than I did a year ago
- I use it slightly more
- About the same
- I use it slightly less
- I use it much less than I did a year ago
- I didn't use it a year ago and have only started

Consumers reporting changes in frequency of rapid delivery grocery orders

Exhibit 5: ... and we expect this increase in frequency to drive further category share gains in the overall industry

Source: BrickMeetsClick, Goldman Sachs Global Investment Research

Why Online Grocery Growth Rates Will Accelerate

Over the last few years, retailers and delivery platforms have made investments

into: a) improving their fulfillment networks; b) digitizing inventory to drive a blurring of the lines between physical infrastructure & online channels; & c) driving adoption of the online grocery category through promotional activity & in-store price parity.

- **Fulfillment network improvements & automation.** Companies with physical footprints (both in-person stores & fulfillment centers) such as Amazon & Walmart have made a number of investments to drive delivery times down - not only through expanding the number of fulfillment centers, but also through automation & delivery efforts. For example, in 2025, Walmart and Symbiotic entered into an agreement to enhance online pickup & delivery fulfillment systems ([link](#)). With regard to delivery methods - we see new fulfillment/delivery options to be in the early innings of scaling and expect these options to unlock a portion of the total addressable population (i.e. rural market adoption). In addition to a number of food delivery companies testing out drone delivery services, more scaled players including Amazon have begun to slowly scale out drone delivery services (Prime Air drone delivery - [link](#)).
- **Blurring the lines between physical stores & online purchasing channels.** The early stages of eCommerce growth required companies to catalog inventory & integrate in-store offerings online - and we view there to be a similar dynamic occurring within the grocery sector (albeit with a few added variables such as timing constraints with perishable items). Instacart has increased its presence within physical stores (enabling for improved order accuracy, inventory tracking, etc.) through various products ([Exhibit 6](#)).
- **Promotional activity & price-parity with in-person stores.** Promotional periods (e.g. Prime Day), subscription services (incl. Amazon Prime, DashPass, Uber One & Instacart+), merchant promotions (e.g. 20% off orders where a customer spends >\$50) and free delivery are driving user acquisition today. Price-parity also remains

an important driver - with Instacart noting that grocers who offer price parity (i.e. no markup vs. in store prices) are growing faster relative to grocers who do markup items.

Exhibit 6: Instacart is enabling the blurring of the lines between physical & online grocery

Instacart Offerings

Technology	Offering
Store View	Improves inventory checks by combining AI & computer vision to process inventory data tracking. Instacart shoppers can take videos of store shelves one aisle at a time, with the technology then analyzing videos to identify what products are in/out of stock
Caper Carts	Grocery carts which enable retailers to process data (incl. shelf intelligence, basket insights & consumer interactions) while also expediting checkout times
Carrot Tags	Software connecting electronic shelf labels, enabling for a more efficient way to locate orders (and increasing found rates/order accuracy)

Source: Company data, Goldman Sachs Global Investment Research

We expect the investments made by delivery platforms & grocers to result in an increasing number of consumers purchasing groceries from online channels. While COVID acted as a stimulant for online grocery purchases (Exhibit 7) - we see a clear pathway for penetration to increase to ~75% of the addressable population over time. We also forecast that the gap between US online grocery penetration rates (vs. total spend) will close relative to overall eCommerce penetration rates. That said, our penetration rates remain well below US eCommerce penetration rates today (and longer-term).

While penetration rates will increase - we believe that different platforms have different consumer bases (and purchase habits) - and as a result, frequency and basket sizes will likely vary across the broader industry landscape. In our view, this enables multiple different players to operate within the broader industry (e.g. CART & AMZN with larger basket sizes, UBER/DASH smaller basket sizes today). That said, this dynamic could change over time as an increasing number of grocers look to offer their products on delivery platforms & specific delivery platforms look to drive increased penetration into larger basket sizes (through additional/incremental investments & increased promotional intensity).

Exhibit 7: We believe that the number of online grocery shoppers will increase...

mm

Source: Statista, Goldman Sachs Global Investment Research

Exhibit 8: ... and for the spend gap between grocery & overall eCommerce to close % retail penetration

Source: Euromonitor, Goldman Sachs Global Investment Research

Even with the increased frequency & adoption of consumers purchasing groceries through online channels, our implied average spend per buyer per month remains well below what the average monthly grocery spend rate is today for shoppers

(across a wide range of budgets). In addition, depending on basket size assumptions (which we anchor around a ceiling for large basket order AOVs [\$100+] and floor dynamic for convenience orders [\$20-30]), our forecasts imply 1-5 average online orders monthly. Today, the average US consumer visits the grocery store 6-7 times monthly, according to Capital One.

Exhibit 9: Our monthly spend per buyer remains well below what single households spend on groceries

Autonomous Vehicle Operational Updates

Exhibit 11: Autonomous Vehicle Operations

Active cities defined as locations where operations are fully launched & available to the public. In development includes cities where testing & mapping operations are currently in progress. The partnerships listed are not exhaustive and reflect those involving companies within our Internet coverage. Nashville rides currently only accessible through Waymo App.

Source: Company reports, Goldman Sachs Global Investment Research

We outline recent commentary surrounding autonomous vehicle operations within the US below. For additional commentary and announcements (since Q1'26 EPS) see our [US AVs: Robotaxi Tracker report](#).

- **Uber.** Since early June, Uber has made a several commercial launch announcements across both domestic & international markets.
 - **Domestic markets.** In June, Houston was named as the second planned deployment market for Uber/Nuro and Lucid's robotaxi program, with services expected to launch in mid-2027. To support their autonomous robotaxi operations, Uber has secured a 50k sqft facility in Houston - which will help support a fleet of Lucid Gravity robotaxis (powered by Nuro).
 - **International markets.** Across both Madrid and Zurich, Uber announced that operations are expected to begin later in 2026 - with rides accessible via the Uber app. Across both markets, Uber noted that it will be working closely/collaborating with government entities (incl. Madrid's regional government & Switzerland's Federal Roads Office [FEDRO]). Within Madrid, WeRide, AVOMO and Uber committed to adding 100s of Robotaxis (as key milestones are met). Similarly, in Zurich, the WeRide-Uber fleet is expected to scale progressively and in coordination with authorities (and scale as key milestones are met).

■ **Waymo.**

- **Expansion into new markets.** On July 8th, Waymo announced that fully autonomous operations are being prepared to launch in four new markets: Denver, Las Vegas, San Diego and Tampa.
- **Existing market operations.** After initially launching in April 2026, the company announced that rides are now open to the public & that testing is currently underway at the Nashville International Airport. In Phoenix - Waymo (and Uber) confirmed that Waymo rides will no longer be accessible through the Uber application ([link](#)).
- **Vehicle recalls.** During June, a recall was issued for Waymo's 5th Generation ADS ([link](#), involving 3,871 vehicles). The recall came after several incidents across several markets & comes after a prior software recall related to a flooding issue in May 2026 ([link](#)).

Key Industry Trends and High Frequency Data Heading Into Q2 Earnings

We leverage SensorTower data to analyze the competitive environment and highlight monthly active users across both iOS and Android. We believe that these data points are useful for flagging inflection points and mainly draw directional conclusions based on the rate of change in the data & market share dynamics (with less of a focus on absolute rates).

The data presented below is derived from third-party sources and might differ from official company-reported figures.

Rideshare

- **Uber MAU growth decelerated during Q2'26.** While MAU trends improved on a sequential basis, global MAU growth decelerated further in Q2 (+7% YoY). International market growth continued to outpace the US (+10% YoY), driven by emerging markets including Argentina (+40% YoY) and India (+13% YoY).
- **Lyft MAUs declined -2% YoY - marking a further deceleration to growth rates seen over the last few quarters.** Despite seeing weakness within the US, Canada MAUs continued to grow >30% during the quarter.

We look at quarterly download share data to help highlight emerging rideshare platforms – both within the US & globally.

- **Waymo now accounts for a LDD % share of US rideshare downloads.** Over the last 12 months, the Waymo app has been downloaded >4mm times. That said – download growth on a YoY basis has decelerated (from 37% YoY in Q1'26 to 16% YoY in Q2).
- **Global download share dynamics remained stable.** Uber remains a dominant player within the broader global rideshare industry – and accounted for 20%+ of rideshare downloads (of tracked mobile applications) during the quarter.

Exhibit 15: US Download Share

%

Based on select rideshare apps globally

Food Delivery User Trends

- **DoorDash app MAUs grew +8% YoY.** While growth continued to decelerate in the core app, Deliveroo has continued to see improving YoY growth trends (+3% YoY in Q2'26, increasing sequentially vs. +1% in Q1'26 & -4% YoY in Q2'25). In addition, Wolt continued to see LDD % YoY growth.
- **Instacart app MAUs declined sequentially for the first time since Q4'24.** While our eGrocery channel checks continue to point to solid demand trends during Q2, MAUs at Instacart declined -10% YoY (vs. +1% YoY growth during Q1'26).

What Matters in Rideshare & Food Delivery? Analyzing Consumer Preferences Using HundredX

We supplement our industry work with data from HundredX, a mission-based data and insights company that takes an innovative approach to monitoring consumer perceptions and gathering consumer feedback to understand trends across 80+ industries and 3,000+ brands. HundredX analyzes collective opinions of everyday customers and evaluates how their priorities influence purchasing decisions and attitudes toward businesses and brands.

NPS Trends

- **Rideshare NPS scores for both Uber & Lyft have improved since the beginning of the year.** Since December 2025, Uber & Lyft NPS scores have improved by 3-4 points.
- **Trends within the broader food delivery landscape remain bifurcated.** Since January, Instacart NPS scores have improved by 4 points whereas DoorDash & Uber Eats have seen NPS scores decline by 3-4 points.

Exhibit 21: Rideshare NPS Scores

T3M

Source: HundredX, Data compiled by Goldman Sachs Global Investment Research

Exhibit 22: Food Delivery NPS Scores

T3M

NPI Trends

To help frame purchase intent trends among various income cohorts, we look at NPI scores of platforms overall & between select HHI cohorts.

- **Overall NPI trends at Uber, Lyft & DoorDash remain stable.** Despite broader concerns around the state of the consumer heading into 2Q26, we believe that overall NPI scores point to relatively stable end demand trends across the rideshare/delivery landscape.
- **Purchase intent across the highest income cohort (\$200k+ HHI) remained stable - whereas lower income (cohort) consumers saw bifurcated trends.** Specifically within the \$25-50k HHI cohort, NPI scores declined across Lyft, DoorDash & Instacart. That said - for the lowest income cohort (<\$25k HHI), scores remained relatively stable (to positive) during the quarter.

HundredX Definitions

- **Net Promoter Score (NPS)** - Widely used measurement that asks respondents, “Would you recommend to a friend?” on a scale of 0-10. The responses allow individual customers to be sorted into promoters, passives, and detractors as well as the computation of a company level NPS through aggregation of respondents. Promoters: respondents to the NPS question who choose 9 or 10. Passives: respondents to the NPS question who choose 7 or 8. Detractors: respondents to the NPS question who choose 0-6. NPS standardized measure for ‘Overall Recommendations’ is on a scale of -100 to 100.
- **Net Purchase Intent (NPI)** - Metric indicates consumers’ future spend, purchase or usage intent for an industry or a company/brand. In some cases, can be known as “Future Customer Loyalty.” A positive number indicates industry or company/brand growth; a negative number indicates industry or company/brand decline. If a company/brand has higher (i.e, more positive) PI vs industry, this can indicate market share gain (and vice versa). Calculation represents percent of respondents who expect to use more minus percent of respondents who expect to use less over the next 12 months.

Company Estimates, Valuations & Key Risks

Below we highlight our updated estimates (including vs. consensus) and our valuation/PT methodologies for each ridesharing & delivery company under our coverage. Please see each company's valuation section for additional details.

Exhibit 28: GSe Rides & Delivery Estimates

\$mm, % YoY

Mobility & Delivery (GSe	2024	2025	2026E	2027E	2028E	2029E	2030E

Our \$115, 12-month price target (unchanged) is based on an equal blend of (1) EV/GAAP EBITDA applied to our NTM + 1 year estimates and (2) a modified DCF using an EV/FCF-SBC multiple applied to our NTM + 4 years estimates discounted back 3 years. Specifically:

- 19.0x EV/GAAP EBITDA or 0.7x EV/GAAP EBITDA-to-growth applied to our NTM + 1 year estimates.
- 15.0x EV/FCF-SBC applied to our NTM + 4 years estimates discounted back 3 years at 12% (unchanged). The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

Key Downside Risks: Slower growth in Mobility due to demand elasticity, maturation, competition from Autonomous Vehicles, etc.; Regulatory environment around driver classification (incl. compensation, benefits, etc.), merchant commission caps, ESG, etc.; Competitive forces in both Mobility and Delivery (incl. local commerce/logistics); Normalization of consumer discretionary spend habits within Delivery; and volatility caused by the global macroeconomic environment and investor risk appetite for growth stocks.

DoorDash (DASH) - Buy, Reiterate PT of \$280 (unchanged)

We adjust our take rate/gross margin assumptions to better reflect geographic mix dynamics. In addition, we also update our share count assumptions on the back of disclosures included within the most recently published 10-Q.

Key Risks: Uncertainty around the health of the consumer and potential for slower growth for food delivery; Higher levels of marketing spend required to drive both demand and supply growth in its marketplace; Potential changes in regulation of restaurant commissions and worker classification laws; Competitive intensity increasing for local commerce (food delivery & commerce); Expansion into international markets (contribution to growth vs. costs/investments needed to launch such markets organically or inorganically); Medium-term profitability vs. Street estimates; Volatility caused by the global macroeconomic environment & investor risk appetite for growth stocks.

Our \$64, 12-month price target (from \$66) is based on an equal blend of (1) EV/GAAP EBITDA applied to our NTM + 1 estimates and (2) a modified DCF using an EV/(FCF-SBC) multiple applied to our NTM + 4 estimates discounted back 3 years. Specifically:

- 14.0x EV/GAAP EBITDA (unchanged) applied to our NTM + 1 estimate.
- 18.0x EV/FCF-SBC (unchanged) applied to our NTM + 4 estimate discounted back 3 years at 12%. The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

Source: FactSet, Goldman Sachs Global Investment Research

Key Risks: Uncertainty around near-term order growth given the normalization of customer behavior post-pandemic, slowing grocery inflation (vs. pandemic peaks) and lower government benefits; questions around normalized GTV growth medium-term; concerns about market share/competitive intensity vs. traditional grocers (mainly for larger orders) and other on-demand delivery platforms (mainly for smaller orders); customer concentration risk incl. potential for a declining pricing power and retailers in sourcing more orders over time; cadence of advertising revenue growth, where a slower ramp would represent downside to consolidated revenue & profits; overhang from the expiration of the lock-ups on employees' shares; volatility caused by the global macroeconomic environment & investor risk appetite for growth stocks.

Lyft (LYFT), Buy, Lower PT to \$22 (from \$24)

We maintain our topline assumptions and adjust our operating expense estimates to better reflect seasonal spending/expense trends.

Source: FactSet, Goldman Sachs Global Investment Research

Our \$22 12-month price target (from \$24) is based on an equal blend of (1) EV/GAAP EBITDA applied to our NTM + 1 year estimates and (2) a modified DCF using an EV/FCF-SBC multiple applied to our NTM + 4 years estimates discounted back 3 years. We adjust the valuation methodology used to be more aligned with more mature companies in our coverage universe (i.e. <20% topline growth and positive but stable/modestly growing margin trajectory). Specifically:

- 13.0x EV/GAAP EBITDA (from 0.9x EV/Sales) applied to our NTM + 1 estimates. Our applied GAAP EBITDA implies a 0.9x EV/Sales multiple.
- 6.5x EV/FCF-SBC multiple (from 10.0x EV/GAAP EBITDA) applied to our NTM + 4 estimates discounted back 3 years at 12%. Our applied multiple implies an NTM EV/FCF multiple of ~5.6x, ~inline with what LYFT has traded at over the last 12 months. The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

Key Risks: Active rider growth or frequency below our forecasts (losing market share, slower consumer adoption of Mobility); Unfavorable changes in consumer behavior (autonomous vehicle adoption away from LYFT, work from home, office commute, airport travel, expanded use cases, etc.); Impact of introduction and adoption of new products/solutions; Worse return earned on micromobility investments (bikes & scooters); Higher levels of consumer/driver incentives; Impact of higher insurance costs on unit economics; Regulation of driver classification (incl. compensation, benefits, etc.). In addition, Lyft is exposed to the volatility caused by the global macroeconomic environment and investor risk appetite for growth stocks.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial Advisory Disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: UBER TECHNOLOGIES, INC.

The rating(s) for DoorDash Inc., Instacart, Lyft Inc. and Uber Technologies Inc. is/are relative to the other companies in its/their coverage universe: ACV Auctions Inc., Airbnb Inc., Alphabet Inc., Amazon.com Inc., Angi Inc., AppLovin Corp., Booking Holdings Inc., Bumble Inc., Chewy Inc., Clear Secure Inc., Corsair Gaming Inc., Coursera Inc., Cricut Inc., DoorDash Inc., DoubleVerify Inc., DraftKings Inc., Duolingo Inc., Ethos Technologies Inc., Expedia Group, Fiverr International Ltd., Frontdoor Inc., GoodRx Holdings Inc., Grindr Inc., Groupon Inc., Ibotta Inc., Instacart, Liftoff Mobile Inc., Lyft Inc., Match Group, MediaAlpha Inc., Meta Platforms Inc., Netflix Inc., Nextdoor Holdings, Opera Ltd., Pattern Group Inc., Peloton Interactive Inc., People Inc., Pinterest Inc., Playtika, Reddit Inc., Roblox, Snap Inc., Space Exploration Technologies Corp., Sportradar Group, Spotify Technology S.A., StubHub Holdings, Take-Two Interactive Software Inc., TripAdvisor Inc., Uber Technologies Inc., Unity Software Inc., Upwork Inc., Wayfair Inc., Webtoon Entertainment Inc., Xometry Inc., Yelp Inc., ZipRecruiter Inc.

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by Goldman Sachs Global Investment Research and referred to in this research.

Goldman Sachs beneficially owned 1% or more of common equity (excluding positions managed by affiliates and business units not required to be aggregated under US securities law) as of the month end preceding this report: Instacart (\$45.82) and Lyft Inc. (\$15.52)

Goldman Sachs has received compensation for investment banking services in the past 12 months: DoorDash Inc. (\$184.14), Instacart (\$45.82), Lyft Inc. (\$15.52) and Uber Technologies Inc. (\$72.46)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: DoorDash Inc. (\$184.14), Instacart (\$45.82), Lyft Inc. (\$15.52) and Uber Technologies Inc. (\$72.46)

Goldman Sachs has received compensation for non-investment banking services during the past 12 months: Instacart (\$45.82), Lyft Inc. (\$15.52) and Uber Technologies Inc. (\$72.46)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: DoorDash Inc. (\$184.14), Instacart (\$45.82), Lyft Inc. (\$15.52) and Uber Technologies Inc. (\$72.46)

Goldman Sachs had a non-investment banking securities-related services client relationship during the past 12 months with: DoorDash Inc. (\$184.14),

Instacart (\$45.82), Lyft Inc. (\$15.52) and Uber Technologies Inc. (\$72.46)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: DoorDash Inc. (\$184.14), Instacart (\$45.82), Lyft Inc. (\$15.52) and Uber Technologies Inc. (\$72.46)

Goldman Sachs makes a market in the securities or derivatives thereof: DoorDash Inc. (\$184.14), Instacart (\$45.82), Lyft Inc. (\$15.52) and Uber Technologies Inc. (\$72.46)

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution				Investment Banking Relationships		
	Buy	Hold	Sell		Buy	Hold	Sell
Global	50%	34%	16%		65%	59%	43%

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information

on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority

(“FCA”) and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE (“GSBE”) is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
