## Online Travel Q2'26 Preview: Analyzing the Industry Debates &amp; Estimates

As we head into Q2'26 Online Travel earnings, we frame key industry debates, refresh our operating estimates for industry data and channel checks and update our 12-month price targets for names under coverage. We see a few key themes that have driven recent investor conversations and are likely to remain the focus of debates going into and out of the upcoming season:

- **1) Summer travel demand remains healthy and stable globally**, with booking trends improving in June, outperforming relative to investor expectations entering the quarter despite heightened geopolitical volatility and macroeconomic uncertainty impacting specific travel corridors;
- **2) Pricing trends continue to shift upward at the upper end of the travel market**, reflecting a continued bifurcation of travel demand (K-shaped economy) where spend per trip is increasing despite consumers finding travel less affordable;
- **3) The FIFA World Cup in North America is driving positive short-term rental demand and robust pricing power in host cities**, though with highly fragmented impacts as supply growth outpaces demand in several regions and displaces typical seasonal travelers in larger US cities;
- **4) Generative AI adoption continues to scale, with rising utilization of agentic tools in the trip planning stage**, though actual bookings within these tools remain limited as travel companies focus on building brand loyalty and consumer trust; &
- **5) Additional clarity over 2026 forward investment curve against key company initiatives** as we look out over the next 12-18 months, and resulting impact on margin & earnings trajectory.

**We highlight that investor expectations approaching Q2 results and our post-Q1 earnings estimates were largely anchored around management commentary at the height of more pronounced geopolitical volatility.** We are evaluating progress on two key fronts: 1) whether EMEA bookings will remain volatile & 2) the net impact of the World Cup (running from June 11 to July 19, 2026) on intra-EMEA travel. We continue to seek clarity on both points to better assess visibility into BKNG's YTD performance relative to its current risk/reward profile.

---

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to [www.gs.com/research/hedge.html](http://www.gs.com/research/hedge.html). Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

**Beyond these corridor-specific dynamics, our industry channel checks and third-party data sources point to an overall environment that remains steady and has generally outperformed investor fears entering the quarter.** While macro pressures and geopolitical disruptions remain top of mind, booking trends have stabilized and summer travel is off to a solid start.

In addition to broader macro/consumer demand trends, we see idiosyncratic debates for:

- **BKNG** (progress on supply and growth initiatives both in core travel products and broadening out the Connected Trip initiatives; rate of growth investments throughout the year);
- **ABNB** (output and yield of growth investments in expansion markets, topline growth and contribution of new business launches, any signs of operating margin upward trajectory);
- **EXPE** (rate of change at Vrbo & Hotels.com, margin expansion based on fixed vs. variable cost dynamics, magnitude of shareholder returns, and North American market share dynamics);
- **TRIP** (asset value unlock story, traffic headwinds in the legacy Hotels and Other segment, and execution on its AI strategy); &
- **YOU** (price vs. member growth, pace of airport technology deployment, and the scaling of CLEAR1 across healthcare, workforce, and government verticals).

#### Exhibit 1: Summary of Ratings & 12-Month Price Targets

| Ticker | Company          | Rating  | 12-Month PT |       | Current | % U/D |
|--------|------------------|---------|-------------|-------|---------|-------|
|        |                  |         | New         | Old   |         |       |
| BKNG   | Booking Holdings | Neutral | \$215       | \$223 | \$182   | 18%   |
| EXPE   | Expedia Group    | Buy     | \$330       | \$328 | \$269   | 23%   |

## Framing the Current State of Travel Demand & Takeaways from Recent Industry Events

### Summer Travel Demand Environment Remains Stable

**As we approach the Q2 earnings season, our industry channel checks and 3rd party data sources point to an overall environment that has outperformed relative to investor expectations entering the quarter** (given that management commentary and our post-Q1 earnings estimates were anchored in a period of heightened geopolitical volatility). We continue to evaluate progress on two key fronts: 1) EMEA bookings volatility & 2) the net impact of the World Cup on intra-EMEA travel.

**On a more global view, we view summer travel trends as off to a solid start, with idiosyncratic travel to the North America-based FIFA World Cup producing strong results across a few key large markets hosting the event.** As we discussed in our digital ad preview ([link](#)), overall industry inflation trends and demand at the upper end of

the travel market (mid-tier to luxury hotels and flights) continue to shift pricing trends upward.

A few more specific themes/narratives emerged from our industry work, which we summarize below.

- **Summer Travel** - According to Priceline ([link](#)), summer travel demand remains healthy, with the majority of American consumers (particularly Gen Z and millennials) determined to take a summer vacation this year. Further, around a third of travelers have started to pull back on everyday expenses (including dining out, online shopping, streaming, etc.) to help fund a summer trip. Despite some evidence suggesting that the total number of bookers may be lower (vs. prior year), spend per trip is increasing, demonstrating a continued bifurcation of travel demand (K-shaped economy).
- **Pricing** - While a majority of consumers find summer travel to be less affordable this year (citing rising airline & lodging prices, extra fees & fewer complimentary extras included with trip), demand remains strong, with travelers cost cutting elsewhere to fund trips. In addition, executives from the GS Travel Network ([link](#)) report that, while spend per trip continues to increase YoY, booking windows remain bifurcated (with a fairly even proportion of bookings made 9+ months in advance and bookings made close-in, with the latter a growing trend post-pandemic).
- **Middle East** - Based on our industry checks, we've seen a stabilization in terms of geopolitical disruptions impacting travel demand (relative to when companies guided Q2'26 expectations). Despite increased cancellations from Q1 impacting April/May, we believe booking trends returned to a more normalized state in June.
- **World Cup** - Outlined in further detail below, the World Cup remains a key theme for our online travel coverage, with AirDNA data ([link](#)) suggesting that short-term rental platforms are seeing positive demand & occupancy trends on match dates in host cities across North America. We'd highlight a few key themes with respect to short-term rentals: a) a wide range of impacts across markets, with Mexico's host cities seeing the most outsized demand growth; b) supply growth (i.e. new listings made available) outpaced demand in most cities, leading to occupancy rates declining in several regions; & c) robust pricing trends led to booked rates increasing ~60%+ YoY across many supply-constrained markets.
- **AI Adoption** - As we have published in prior research ([link](#)), several companies in our coverage have reported an increase in usage of agentic commerce tools in the trip planning, research & discovery stage, while there remains less evidence of actual bookings made within these tools. However, utilization continues to increase — for example, according to Phocuswright ([link](#)), over half (~56%) of US leisure travelers used AI for travel in 1H26, up from ~33% a year ago. In order to enable the widespread adoption of agentic booking tools, travel companies continue to emphasize the importance of building brand loyalty and establishing consumer trust within new AI-powered experiences.

## Takeaways from Recent Industry Events

- At **Expedia's EXPLORE 2026** partner event in Las Vegas on May 19th ([link](#)), the company celebrated its 30th anniversary by detailing a strategic shift from its multi-year technology replatforming (2022-2024) toward a future defined by agentic AI and ecosystem integration. Central to the event was an emphasis on trust and loyalty as the foundation of the AI landscape, with Expedia innovating around the AI consumer experience to facilitate a more cohesive and personalized traveler journey. CEO Ariane Gorin (alongside other industry leaders) stated that, while the industry faces macro pressures (including rising fuel costs and global conflict), Expedia is leveraging its unified tech stack to lower user friction and capture high value segments. In addition, Expedia announced a new partnership with **CLEAR** (following their recent announcement with **Uber** - [link](#)) to further position itself as a comprehensive ecosystem for a seamless travel experience beyond the initial booking.
- In May, **Airbnb** hosted their **2026 Summer Release** ([link](#)), where the company made a number of announcements, including the introduction of new **Services & Experiences** categories, the addition of thousands of independent & boutique **Hotels** to the platform, and a number of new AI-powered features & upgrades to the app. We saw this event as an opportunity for Airbnb to continue to demonstrate how product and platform initiatives might continue to open up pockets of medium/long term market opportunity. Going forward, we expect Airbnb to continue expanding its ecosystem of travel-adjacent offerings (including further AI-driven features), with management hinting at upcoming rollouts later this year including in-home pet services, gym day passes, and equipment rentals.
- **Skift's Data + AI Summit** in New York ([link](#)) revolved around a few key themes: 1) while the use of AI enables several cost reduction initiatives (across software development, customer service, booking and travel operations), panelists suggested the ability for AI to generate new revenue streams in the travel industry is widely underappreciated; 2) most speakers cited a need for travel companies to adopt a

modernized technology stack to support the deployment of AI at scale; & 3) there remains a large opportunity to drive growth through optimizing better personalization, loyalty & guest experiences for customers.

## FIFA World Cup: Positive Short-Term Rental Demand Trends Across Host Cities

As we have published in prior research ([link](#) | [link](#)), short-term rental platforms in our coverage (including Airbnb [**ABNB**], Vrbo [**EXPE**], & Booking.com [**BKNG**]) have seen significant YoY growth in pricing & occupancy rates in host cities around World Cup match dates in North America. To provide a health check on the current state of short-term rental demand, we leverage insights from AirDNA ([link](#)), which regularly collects data across millions of Airbnb, Vrbo & Booking.com properties. Below, we summarize demand trends around matches played to date, including booked rate (average nightly rate for booked listings) % YoY growth, nightly demand (total booked nights) % YoY growth, & occupancy (% of available listings that are booked) in World Cup host cities.

- **Booked Rates are Up DD%+ YoY Across All Host Cities.** Across all Group Stage & knockout matches that have been played so far, pricing trends for booked listings have improved significantly in all cities that have hosted a World Cup match.
- **Nightly Demand Increased YoY in Most Cities.** Nightly demand grew YoY in most cities, with Monterrey, Guadalajara & Kansas City seeing the highest benefit. On the other hand, some cities (including New York & San Francisco) saw a decrease in demand trends YoY.
- **High Occupancy Rates on Match Dates.** On World Cup match dates, short-term rentals in most host cities saw 70%+ occupancy rates, with more populated cities (e.g., New York, San Francisco) having occupancy approach ~90%.
- **Pricing & Demand Tailwinds Moderated in the Knockout Stage.** While booked rates & nightly demand still increased DD%+ YoY on knockout match dates, growth on average lagged the outsized step-up seen during the Group Stage. Occupancy

rates, on the other hand, remained stable across both stages at ~75% on average.

While we have seen positive trends overall, growth has come in below our previously published checks, particularly regarding occupancy. We are also seeing a highly fragmented range of impacts across cities — while demand surged in less frequent tourism hubs, a massive influx of new short-term rental listings outpaced this demand, causing occupancy to decline YoY in most host markets. Booking behavior remains highly compressed (with roughly a quarter of guests booking within two weeks of their stay), with last-minute bookings intensifying as matchups were confirmed, further driving up booked rates and concentrating performance around key knockout dates.

Despite these occupancy headwinds, hosts still captured substantial pricing power, with booked rates climbing over +60% YoY on match days (and over +40% YoY on surrounding dates) in supply-constrained markets such as Guadalajara, Monterrey, Mexico City, and Kansas City. Conversely, larger US cities that regularly host tourists (such as New York, San Francisco, and Seattle) experienced weaker demand growth during the group stage, suggesting the tournament may have deterred typical seasonal travelers. This displacement effect was particularly evident on surrounding dates, where demand declined YoY, contrasting sharply with Mexico's host cities where travelers extended their stays.

#### Exhibit 6: Short-Term Rental Demand on World Cup Match Dates (Group Stage)

Booked Rate (% YoY Growth), Nightly Demand (% YoY Growth) & Occupancy (%)

**Key Industry Debates & Trends Heading Into Q2 Earnings**

**As we head into Q2'26 earnings season, we see a few key themes that are likely to remain the focus of debates going into and out of the upcoming season:**

- **1)** How the online travel funnel evolves in a world where there is a potential shift in traffic to more generative AI focused interfaces;
- **2)** Normalized growth algorithm for online travel (with most investors landing somewhere between ~MSD-HSD% YoY) and how any macro volatility may translate into changed operating trends;
- **3)** Market share dynamics across geographies & segments (hotel vs. alternative accommodation, etc.);
- **4)** In a decelerating growth environment, what level of marketing intensity is required (vs. various initiatives to drive more direct traffic/demand);
- **5)** Levels of non-marketing investments that will drive leverage/deleverage as companies lap/lean into longer dated return investments (incl. geo & product

expansion to extend platform utility); &

- **6)** How a continued commitment to shareholder returns could potentially result in GAAP EPS estimate revisions.

## 2026 Investor Debates Center Around Demand Environment & Platform Evolution

The Online Travel sector (**BKNG, ABNB, EXPE, YOU, TRIP**) continued to demonstrate a trajectory of settling into a more normalized growth algorithm, but with more mixed demand trends in Q1. Key themes during Q1 earnings included: a volatile macroeconomic/geopolitical backdrop (particularly in Europe, where elevated cancellations resulting from the Middle East conflict were estimated to have driven a ~100-200bps headwind to room nights growth in the quarter); on the other hand, a US travel environment that continues to improve (albeit with some continued bifurcation in terms of cross-border travel and different booking habits by budget); constructive commentary around forward growth in terms of ability to scale marketing dollars and positive booking trends observed QTD (with April seeing a recovery from macro-related headwinds in Q1); companies continuing to lean into scaling their Experiences efforts as

a means of providing an incremental stream of revenue & expanding their addressable market opportunity set; positive commentary around AI adoption to enhance the traveler journey (and drive internal operating efficiencies) as well as striking platform partnerships/integrations to test new incremental sources of traffic; & companies continuing to reiterate commitments to returning capital to shareholders given strong FCF performance.

**On their 1Q26 earnings calls, the online travel companies in our coverage universe gave the following updates on travel trends:**

- **Booking Holdings (BKNG)** - Q1 gross bookings, room nights & revenue were impacted (~200bps) by the geopolitical situation in the Middle East resulting in cancellations, slower forward booking trends and marketing deleverage impact (which was expected to persist through the end of June). At a regional level, room night performance in the quarter showed US +low-teens% YoY, Asia +HSD% YoY, Europe +MSD% YoY & RoW (including Middle East) down LSD% YoY. The continued acceleration in US room night growth was primarily driven by domestic travel, with strength across all offerings and growing direct channel mix (+DD% YoY growth at Booking.com). BKNG continues to make progress around Connected Trip (with transactions +high-teens % YoY & representing LDD% of Booking.com total transactions), and mgmt highlighted growth in flight tickets (+28% YoY) and attractions tickets (+25% YoY).
- **Expedia Group (EXPE)** - Mgmt. spoke to a more challenged macro environment beginning in March due to the Middle East conflict and travel advisories in Mexico driving elevated cancellations in Europe & Asia (albeit with cancellation rates stabilizing and booking activity reaccelerating in April). By region, US room nights were up +MSD% YoY, EMEA room nights +LSD% YoY, and RoW +LDD% YoY. The B2B business delivered strong performance, with +22% YoY bookings growth, while the consumer business saw +10% bookings growth (with vacation rentals on Expedia reaching an annualized run rate of \$1bn). Brand Expedia remained the fastest growing consumer brand in Q1, while Vrbo continued to show momentum after returning to growth in 2025.
- **Airbnb (ABNB)** - In Q1, while bookings accelerated (reflecting strong demand and pricing trends), the Middle East conflict drove slightly elevated cancellations in EMEA and Asia Pacific regions (contributing a ~100bps headwind to room night growth in the quarter). Mgmt. framed continued progress in expansion markets and called out that nights booked originating in expansion markets grew 2x faster than core markets in the past 12 months, with first-time bookers in Brazil, Japan, and India accelerating in Q1. More specifically, nights and seats booked grew +HSD% YoY in North America, EMEA +MSD% YoY, Latin America +high-teens % YoY, & APAC +high-teens % YoY. Looking ahead to Q2, mgmt. expects room nights to slightly decelerate (assuming a ~100bps headwind related to the Middle East conflict) and a moderate increase in ADR (driven by price appreciation and FX tailwinds).
- **Tripadvisor (TRIP)** - Highlighted a number of themes in Q1: 1) while the Experiences segment saw strong momentum in January and February, performance was interrupted in March by geopolitical events in the Middle East and disruptions in key

markets, which led to a ~4pt revenue headwind for the segment in the quarter; 2) despite near-term headwinds, mgmt. reiterated their commitment to reorienting the business around the marketplace opportunity in Experiences, which they view as the largest growth opportunity in travel; 3) continued efforts around accelerating their AI strategy (including the implementation of AI across infrastructure to improve internal productivity & external partnerships with leading AI platforms); 4) focus on simplifying legacy offerings and optimizing more for profitability and free cash flow than growth; & 5) although there were no share repurchases in Q1, no change in capital allocation priorities for the business.

- **Clear Secure (YOU)** - Key themes included: 1) all key operational metrics across the P&L and KPIs significantly exceeded guidance and GSe/Street estimates in Q1, with the platform seeing robust member adoption & retention (accelerated by macro tailwinds from a partial government shutdown towards the end of the quarter), and Q2 Bookings & Revenue were guided above prior expectations; 2) operational momentum in technology deployment remains a core focus, with eGates now live in 43 airports (on track for network-wide rollout in 2026) and Clear Concierge expanded to 32 airports, both of which are enhancing the premium member experience and driving retention; 3) CLEAR1 continues to scale rapidly, delivering another record quarter, with bookings increasing approximately fivefold YoY, with management prioritizing expansion in the healthcare, workforce and government verticals; & 4) despite growth investments, the company framed 2026 as a year of generating at least \$465m in free cash flow (increased from prior guide of at least \$440m).

## Q2 Online Travel Industry Data

We leverage insights from a number of third party data & industry sources to provide a health check on the state of the online travel consumer across lodging, flights, and overall user growth/traffic.

### Lodging

As it relates to alternative accommodations, AirDNA data would suggest US short-term rentals accelerated in Q2 (QTD), with total demand (nights stayed) +1.5% YoY in May (Apr. +2.4%). This included revenue per available listing (RevPAR) +2.6% YoY (Apr. +4.1%), with ADR growth of +2.1% YoY (Apr. +4.5%) and stable occupancy (57.2%, up 50bps YoY; Apr. down 30bps). Further, nights booked for future stays were +3.5% YoY (Apr. +7.7%). In Europe, total demand continued to decline to 39m, down (1.1)% YoY in May (Apr. (5.7)%). This included ADRs +6.8% YoY (Apr. +6.3%) & rising occupancy (58.3%, up 110bps YoY (Apr. down 820bps). Total nights booked for future stays were (2.9)% YoY (Apr. (2.6)%). On the supply side, AirDNA data indicates available listings in the US were +3% YoY in May (Apr. +3.5%) and +2.6% YoY in Europe (Apr. +3.6%).

## Flights

On the flights side, we'd highlight the following key trends in Q2:

- **TSA Checkpoint Passenger Volumes Remain Above Pre-COVID Levels.** US Transportation Security Administration (TSA) data shows checkpoint travel throughput was +2% YoY in Q2'26 (vs. +1% YoY in Q1), with Apr. +1% YoY, May. +2% YoY & Jun. +3% YoY.
- **Foreign Arrivals Continue to Decline.** According to US Customs and Border Protection, foreign arrivals into the US have continued to decline (specifically following tariff announcements and, more recently, US-Iran war news), falling (5)% YoY in Q2.
- **Global Airline Seat Capacity Exceeded Pre-COVID Levels.** According to OAG, global airline seat capacity (which we use as a proxy / slightly leading indicator of flight demand) reached ~104% of 2019 levels in Q2 across all flights (vs. ~108% in Q1 & ~106% in Q4). Domestic flight capacity has reached ~104% of 2019 levels in Q2 (vs. ~106% in Q1 and ~103% in Q4), compared to ~104% for international flights (vs. ~110% in Q1 & ~111% in Q4).
- **US Airline Seat Capacity Continues to Lead Other Regions.** The US continues to lead other global regions (with respect to post-COVID recovery) - OAG data indicates that US airline seat capacity was at ~109% of 2019 levels in Q2 on an aggregate basis (vs. ~108% in Q1 & ~108% in Q4), including ~109% for domestic flights (vs. ~108% in Q1 & ~107% in Q4) and ~108% for international flights (vs. ~109% in Q1 & ~112% in Q4).

### SensorTower Mobile App & Similarweb Web Traffic Trends

We leverage SensorTower to highlight monthly average users across both iOS and Android. We believe that these data points are useful for flagging inflection points and drawing directional conclusions based around rate of change.

- The OTA platforms that have seen the largest monthly average user growth over the past ~5 years are **Expedia**, **Booking.com**, and **Airbnb** globally, & **Booking.com**, **Expedia**, and **Priceline** in the US, according to SensorTower.
- In Q2, specifically, **Airbnb** (+10% YoY) & **Priceline** (+10% YoY) saw the strongest global MAU growth amongst the comp set.
- In the US, **Booking.com** (+19% YoY) & **Priceline** (+10% YoY) saw the most significant MAU growth in the quarter.

**Exhibit 22: Global Monthly Average Users**  
Indexed to January 2021 = 100

**Exhibit 23: US Monthly Average Users**  
Indexed to January 2021 = 100

Source: SensorTower, Data compiled by Goldman Sachs Global Investment Research

In addition to mobile app MAU insights from SensorTower, we leverage Similarweb data to track website traffic trends in the US.

- **In Q2, Total Online Travel Website Traffic in the US Improved YoY.** Booking.com

(+20% YoY) saw the highest YoY growth, with Tripadvisor ((25)% YoY) seeing continued traffic decreases.

- **Booking.com Took Share of Traffic From Expedia in the US.** In Q2, Booking.com's share of site visits (relative to Expedia) increased by ~1% sequentially & ~2% YoY.
- **Airbnb Receives a Significant Portion of Total Website Traffic Direct.** However, the majority of Tripadvisor site visits are from organic search & social, Booking.com visits are primarily from affiliates, and Viator & Expedia primarily rely on paid search & social as their main source of website traffic.
- **Generative AI Sources Provide a Growing Source of Website Traffic for Online Travel Platforms.** While Gen AI traffic remains a small % of total site visits, growth has accelerated significantly — in Q2, total Gen AI traffic increased ~120% YoY for Airbnb, ~100% YoY for Booking.com, and ~40% YoY for Expedia.

## Company Valuations & Key Risks

Below we detail our updated estimates (including vs. consensus) and our valuation/PT methodologies for each online travel company under our coverage. Please see each company's valuation section for additional details.

### Exhibit 28: Summary of Estimates & 12-Month Price Target Changes

| Ticker | Company          | Rating  | 12-Month PT |       | Current | % U/D | Summary of Estimate Changes                                                                                                                                                                                                                                                              |
|--------|------------------|---------|-------------|-------|---------|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|        |                  |         | New         | Old   |         |       |                                                                                                                                                                                                                                                                                          |
| BKNG   | Booking Holdings | Neutral | \$215       | \$223 | \$182   | 18%   | Our forward estimates are adjusted for Q2 stock price and hence largely unchanged.                                                                                                                                                                                                       |
| EXPE   | Expedia Group    | Buy     | \$330       | \$328 | \$269   | 23%   | We adjust room night trajectory to better reflect headwinds from macro and geopolitical pressures impacting growth in 2026. We also update our B2B segment assumptions and expect revenue growth to accelerate at a quicker pace than reflected in our prior forecasts.                  |
| ABNB   | Airbnb           | Neutral | \$155       | \$157 | \$146   | 6%    | While we leave Q2 estimates largely unchanged, we slightly tweak gross bookings trajectory in FY26 to better reflect impact from one-time factors (incl. pricing inflation and global events).                                                                                           |
| TRIP   | Tripadvisor      | Buy     | \$16        | \$14  | \$15    | 10%   | While we leave Q2 estimates largely unchanged, we update our Adj. EBITDA segment forecasts to reflect headwinds in the legacy Hotels & Other segment, with the majority of forward margin expansion driven by growth assets (Experiences & TheFork).                                     |
| YOU    | Clear Secure     | Buy     | \$70        | \$75  | \$56    | 25%   | While we leave Q2 estimates largely unchanged, we update our member growth assumptions in 2H26 to better reflect app user & engagement trends based on our industry checks (and expect some stabilization following a partial government shutdown in Q1 driving outsized member growth). |

Source: FactSet, Goldman Sachs Global Investment Research

Our \$215 (from \$223), 12-month price target is based on an equal blend of (1) EV/GAAP EBITDA applied to our NTM + 1 year estimates and (2) a modified DCF using an EV/FCF-SBC multiple applied to our NTM + 4 years estimates discounted back 3 years. Specifically:

- 14.0x EV/GAAP EBITDA (from 15.0x) applied to our NTM + 1 year estimates. We lower our absolute multiple to reflect less visibility into the stability of travel trends in Europe.
- 16.0x EV/FCF-SBC (unchanged) applied to our NTM + 4 years estimates discounted back 3 years at 12%. The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

Source: Company data, Goldman Sachs Global Investment Research

**Key Risks:** Upside and Downside risks to our Neutral rating and price target include: a) broader macroeconomic trends and impact on consumer discretionary spend could cause bookings & revenue growth to outperform/underperform our base case estimates; b) market share dynamics in North America and/or Europe could cause bookings & revenue growth to outperform/underperform our base case estimates; c) competitive intensity increasing across the online travel funnel (including from GenAI) could cause pressure on margins as a result of the need to invest more in marketing; d) capturing greater share of travel budgets through executing on the “connected trip” or investments related to this initiative having lower ROI and not yielding better revenue trajectory in coming years could lead bookings, revenue and Adj. EBITDA to outperform/underperform our base case estimates; & e) an accelerated pace of capital returns (or lack of capital returns for an extended period of time) could act as a positive catalyst for the stock in the future (or act as an overhang).

**Airbnb (ABNB) - Maintain Neutral Rating; Lower PT to \$155 (from \$157)**

While we leave our Q2 estimates largely unchanged, we slightly tweak our gross bookings trajectory in FY26 to better reflect the impact from one-time factors (incl. pricing inflation and global events).

Source: FactSet, Goldman Sachs Global Investment Research

Our \$155 (from \$157), 12-month price target is based on an equal blend of (1) EV/GAAP EBITDA applied to our NTM + 1 year estimates and (2) a modified DCF using an EV/FCF-SBC multiple applied to our NTM + 4 years estimates discounted back 3 years. Specifically:

- 20.0x EV/GAAP EBITDA (unchanged) applied to our NTM + 1 year estimates, which implies 0.96x EV/GAAP EBITDA-to-growth (from 0.93x).
- 18.0x EV/FCF-SBC (unchanged) applied to our NTM + 4 years estimates discounted back 3 years at 12%. The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

**Key Risks:** Risks to our Neutral rating and price target include: a) faster or slower growth in overall travel demand and accelerating adoption of alternative accommodations as a category within travel from current levels; b) success (or not) in gaining market share in international markets &/or entering new travel adjacency (e.g. Experiences); c) competitive intensity across the online travel funnel; d) expanding categories offered on the platform and seeing strong adoption by both existing and new users; & e) investments in new product & geos being faster or slower to manifest in growth outputs.

### Expedia Group (EXPE) - Maintain Buy Rating; Raise PT to \$330 (from \$328)

We adjust room night trajectory to better reflect headwinds from macro and geopolitical pressures impacting growth in 2026. We also update our B2B segment assumptions and expect revenue growth to accelerate at a quicker pace than reflected in our prior forecasts.

Source: FactSet, Goldman Sachs Global Investment Research

Our \$330 (from \$328), 12-month price target is based on an equal blend of (1) EV/GAAP EBITDA applied to our NTM + 1 year estimates and (2) a modified DCF using an EV/FCF-SBC multiple applied to our NTM + 4 years estimates discounted back 3 years. Specifically:

- 12.0x EV/GAAP EBITDA (unchanged) applied to our NTM + 1 year estimates.
- 16.0x EV/FCF-SBC (unchanged) applied to our NTM + 4 years estimates discounted back 3 years at 12%. The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

**Key Risks:** Risks to our Buy rating and price target include: a) a slower pace of travel demand resulting from potential macroeconomic headwinds and/or consumer discretionary spend shifts between services and goods could result in bookings & revenue growth underperforming our base case estimates; b) loss of North America market share to its peers would likely cause bookings & revenue to underperform our base case estimates and result in the need to incrementally invest in marketing; c) industry competitive intensity pressures revenue take rates and operating margins; & d) disappointing level of shareholder returns in forward years would limit a potential positive catalyst for the stock in the future.

**Tripadvisor (TRIP) - Maintain Buy Rating; Raise PT to \$16 (from \$14)**

While we leave our Q2 estimates largely unchanged, we update our Adj. EBITDA segment forecasts to reflect headwinds in the legacy Hotels & Other segment, with the majority of forward margin expansion driven by growth assets (Experiences & TheFork).

Source: FactSet, Goldman Sachs Global Investment Research

Our \$16, 12-month price target (from \$14) is based on an equal blend of: (1) EV/GAAP EBITDA applied to our NTM + 1 year estimates and (2) a modified DCF using an EV/FCF-SBC multiple applied to our NTM + 4 years estimates discounted back 3 years. Specifically:

- 8.0x EV/GAAP EBITDA (from 6.5x) applied to our NTM + 1 year estimates. We raise our absolute multiple to reflect an improved operating environment (given an easing of geopolitical pressures impacting forward growth).
- 12.0x EV/FCF-SBC multiple (unchanged) applied to our NTM + 4 years estimates discounted back 3 years at 12%. The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

Source: Company data, Goldman Sachs Global Investment Research

**Key Risks:** Risks to our Buy rating and price target include: a) Competitive Intensity - The company competes with a variety of players in the travel ecosystem. Rising competitive intensity from the likes of Google iterating its travel advertising products & new technology (generative AI as a risk to re-architecting the online travel funnel) could have implications for how travel advertising budgets are spent and where consumers engage, b) Traffic Acquisition Costs - The company relies on performance marketing to acquire traffic. Any fluctuations in the acquisition costs could negatively impact margins, c) Broader Macro & Travel Demand - Risks around a normalization of consumer spend on travel and/or widespread macro headwinds could pose a risk to revenue growth, & d) Online Penetration in Experiences Market - A slower pace of consumer adoption in the online tours, travels and attractions (Experiences) market would likely lead to our estimates for Viator being too optimistic.

**Clear Secure (YOU) - Maintain Buy Rating; Lower PT to \$70 (from \$75)**

While we leave our Q2 estimates largely unchanged, we update our member growth assumptions in 2H26 to better reflect app user & engagement trends based on our industry checks (and expect some stabilization following a partial government shutdown in Q1 driving outsized member growth).

Source: FactSet, Goldman Sachs Global Investment Research

Our \$70, 12-month price target (from \$75) is based on an equal blend of: (1) EV/GAAP EBITDA applied to our NTM + 1 year estimates and (2) a modified DCF using an EV/FCF-SBC multiple applied to our NTM + 4 years estimates discounted back 3 years.

Specifically, we use:

- 20.0x EV/GAAP EBITDA (from 22.0x) applied to our NTM + 1 year estimates. We lower our absolute multiple on the back of slightly lower forward estimates.
- 18.0x EV/FCF-SBC (unchanged) applied to our NTM + 4 years estimates discounted back 3 years at 12%. The discount rate represents CAPM using the blended average of companies within our coverage universe consisting of: (1) 3% risk free rate (based on the normalized 10-year rate); (2) average beta of ~1.3; (3) equity risk premium of 7%.

Source: Company data, Goldman Sachs Global Investment Research

**Key Risks:** Risks to our Buy rating and price target include: a) CLEAR Plus Members - Lower than expected member acquisition and retention might lead to our topline estimates being optimistic. A worsening customer experience through longer times to get through CLEAR lanes could result in members seeing less value/utility in the subscription product, b) Airport Ramp Efficiency - Lower than expected ramp in cost efficiency at the airport level following new airport launches in the coming years could lead to longer payback periods and impact margins, c) Competition - The potential for competing product offerings in the coming years could impact customer acquisition efficiency and/or absolute level of member adoption, d) Security - Core to the business is trust around personal data. A breach of CLEAR's information technology systems could impact consumer trust of the platform related to their personal data, e) Regulation - CLEAR's ability to meet the standards set by their airport partners & or governmental stakeholders is critical to maintaining designations & access, & f) Macro - A broader macro slowdown causing lower travel demand could negatively impact CLEAR Plus member additions & retention.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

### GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

### M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

### Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

### Disclosures

#### Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: Tripadvisor, Inc.

**The rating(s) for Airbnb Inc., Booking Holdings Inc., Clear Secure Inc., Expedia Group and Tripadvisor Inc. is/are relative to the other companies in its/their coverage universe:** ACV Auctions Inc., Airbnb Inc., Alphabet Inc., Amazon.com Inc., Angi Inc., AppLovin Corp., Booking Holdings Inc., Bumble Inc., Chewy Inc., Clear Secure Inc., Corsair Gaming Inc., Coursera Inc., Cricut Inc., DoorDash Inc., DoubleVerify Inc., DraftKings Inc., Duolingo Inc., Ethos Technologies Inc., Expedia Group, Fiverr International Ltd., Frontdoor Inc., GoodRx Holdings Inc., Grindr Inc., Groupon Inc., Ibotta Inc., Instacart, Liffoff Mobile Inc., Lyft Inc., Match Group, MediaAlpha Inc., Meta Platforms Inc., Netflix Inc., Nextdoor Holdings, Opera Ltd., Pattern Group Inc., Peloton Interactive Inc., People Inc., Pinterest Inc., Playtika, Reddit Inc., Roblox, Snap Inc., Space Exploration Technologies Corp., Sportradar Group, Spotify Technology S.A., StubHub Holdings, Take-Two Interactive Software Inc., Tripadvisor Inc., Uber Technologies Inc., Unity Software Inc., Upwork Inc., Wayfair Inc., Webtoon Entertainment Inc., Xometry Inc., Yelp Inc., ZipRecruiter Inc.

#### Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by Goldman Sachs Global Investment Research and referred to in this research.

Goldman Sachs beneficially owned 1% or more of common equity (excluding positions managed by affiliates and business units not required to be aggregated under US securities law) as of the month end preceding this report: Clear Secure Inc. (\$56.03), Clear Secure Inc. (C) (\$23.41) and Tripadvisor Inc. (\$14.58)

Goldman Sachs has received compensation for investment banking services in the past 12 months: Airbnb Inc. (\$145.98), Booking Holdings Inc. (\$181.68), Clear Secure Inc. (\$56.03), Clear Secure Inc. (C) (\$23.41), Expedia Group (\$268.77) and Tripadvisor Inc. (\$14.58)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Airbnb Inc. (\$145.98), Booking Holdings Inc. (\$181.68), Clear Secure Inc. (\$56.03), Clear Secure Inc. (C) (\$23.41), Expedia Group (\$268.77) and Tripadvisor Inc. (\$14.58)

Goldman Sachs has received compensation for non-investment banking services during the past 12 months: Airbnb Inc. (\$145.98) and Booking Holdings Inc. (\$181.68)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Airbnb Inc. (\$145.98), Booking Holdings Inc. (\$181.68), Clear Secure Inc. (\$56.03), Clear Secure Inc. (C) (\$23.41), Expedia Group (\$268.77) and Tripadvisor Inc. (\$14.58)

Goldman Sachs had a non-investment banking securities-related services client relationship during the past 12 months with: Airbnb Inc. (\$145.98), Booking Holdings Inc. (\$181.68), Clear Secure Inc. (\$56.03), Clear Secure Inc. (C) (\$23.41), Expedia Group (\$268.77) and Tripadvisor Inc. (\$14.58)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Airbnb Inc. (\$145.98), Booking Holdings Inc. (\$181.68) and Expedia Group (\$268.77)

Goldman Sachs makes a market in the securities or derivatives thereof: Airbnb Inc. (\$145.98), Booking Holdings Inc. (\$181.68), Clear Secure Inc. (\$56.03), Clear Secure Inc. (C) (\$23.41), Expedia Group (\$268.77) and Tripadvisor Inc. (\$14.58)

## Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

|        | Rating Distribution |      |      |  | Investment Banking Relationships |      |      |
|--------|---------------------|------|------|--|----------------------------------|------|------|
|        | Buy                 | Hold | Sell |  | Buy                              | Hold | Sell |
| Global | 50%                 | 34%  | 16%  |  | 65%                              | 59%  | 43%  |

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price targets shown in table(s) are unadjusted for corporate actions.

## Regulatory disclosures

### Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

### Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at:

<https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

**European Union and United Kingdom:** Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

**Japan:** Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

## Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

**European Economic Area:** Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

## General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and [https://www.goldmansachs.com/disclosures/cftc\\_fcm\\_disclosures](https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures). Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
