

China Restaurants: Monthly Tracker: Apr update: sequentially better performance supported by spring break, yet decelerated into Labor Day

Apr SSSG performance was supported by incremental spring break and multiple restaurant companies saw sequential acceleration from relatively soft Mar. By brand, YUMC mentioned that Apr SSSG was solid and improved from Mar; Tai Er SSSG further accelerated to DD% for both old and new store format stores; Haidilao table turn growth also recorded MSD%, though from a relatively low base. That said, freshly made drink names generally saw SSSG deceleration from 1Q, with high base impact kicking in. **During Labor Day holiday, brands generally saw SSSG deceleration**, in line with the relatively soft travel/moderate demand during the holiday, partially attributed to the traffic distraction to spring break in April. At brand level, we also saw divergence — YUMC's performance has been on track with management's expectation, Tai Er delivered MSD-HSD% SSSG in ML China supported by new store format, while Haidilao's table turn was largely flat yoy. **For freshly made drink players, SSSG was generally negative during the holiday impacted by weather headwind and last year's tough base when delivery subsidy was aggressive**; but the performance by brand saw divergence subject to brand momentum and product cycle/expansion opportunity, e.g. Guming's performance was in line with management's expectation, while Nayuki had ~30% SSSG decline during the holiday. Delivery subsidy continued seeing normalization and some freshly made drink brands noted yoy delivery mix decline in Labor Day holiday, while the pricing activity from brand side remained rational; leading restaurant brands also remained disciplined in pricing.

In this note, we provide updates on a variety of high-frequency indicators, including air traffic run rate, and commodity inflation. We also include competition environment updates, key company news and key reports published over the past month.

Brand performance

1. Haidilao (6862.HK; Neutral): Haidilao's average table turn increase was at MSD% in Apr from last year's low base, accelerated from Mar and similar to Jan-Feb level. Based on our calculation, this implies 3.5x~3.6x table turn (slightly lower than Mar), and ~80% recovery level compared to 2019, sequentially lower than 1Q. Haidilao opened 4 company stores and 3 franchised stores, while closed 3 company stores in Apr. In **Labor Day holiday**, Haidilao had >5x average daily table turn, largely stable compared to last year. ASP has been relatively stable yoy.

GS read: While Apr table turn growth accelerated, we note it is from a relatively low base (DD% table turn decline in Apr 2025). Labor Day performance was unexciting, consistent with the moderate demand during the holiday.

2. Guming (1364.HK, Buy, on CL): Short-term performance could be impacted by weather, holiday period etc.; management commented that recent SSSG including Labor Day holiday performance has been in line with their expectation.

GS read: Guming's share price pulled back recently with concerns on SSSG decline with high base kicking in. While we expect SSSG to see decline in 2Q-3Q from tough base, we expect category expansion and successful new products to provide support to its outperformance. We factor flat SSSG in 2026; after a strong start in 1Q26 at DD growth, implied SSSG in 2Q/3Q26 could be HSD - 10% decline yoy.

3. Jiumaojiu (9922.HK, Buy): In April, Tai Er's SSSG in ML China continued to improve, maintaining +DD% growth and strengthening compared to March levels. Both new and old store formats achieved double-digit growth in April, with new models outperforming. During the **Labor Day holiday**, Tai Er's overall SSSG in ML China maintained +MSD-HSD% growth, despite rainy weather in South China impacting foot traffic. New model stores continued to outperform the overall average with +DD% growth, while old models maintained slight positive growth. For the Jiumaojiu and Song brands, SSSG trends remained stable vs previous quarters, continuing to face pressure as new store models are still being explored and optimized.

GS read: Tai Er's SSSG outperformed vs. overall market in Apr and Labor day, helped by upgraded fresh concept and diversified food offerings, despite weather headwinds in South China during Labor Day. Additional spring break also supported the stronger performance in Apr.

4. Nayuki (2150.HK; Sell): Apr average per store sales declined by 11% yoy (volume/ticket size down by 5%/6% respectively), expanded from slight decline in Mar; SSSG decline is at similar magnitude. During **Labor Day holiday**, SSSG declined by ~30% yoy from a high base when delivery subsidy notably boosted sales.

GS read: The SSSG performance sequentially weakened from 1Q. While we acknowledge the high base last Labor Day holiday, Nayuki underperformed vs. other freshly made drink brands.

5. Gourmet Master (2723.TW; Neutral): ML China sales decline remained significant at 48% in Apr, with store count at 290-300 which is similar to 1Q level (implies >30% yoy decline) and transition to franchised stores; yet management noted per store sales for company-owned stores continued seeing yoy increase and they expect profitability to see meaningful improvement this year with store network optimization. In US market, average per store sales in Apr increased by 7% vs. 1Q level, and store count reached 91 with a new store opened in California.

GS read: The sales decline in Apr in ML China was tracking weaker than GSe (low 40% yoy decline), and we expect to see OPM improvement this year. In US market, the performance continues to be on track.

Competitive environment

In freshly made drink, we have seen delivery subsidy normalization; and during Labor Day holiday some brands noted yoy decline in delivery mix given last year's aggressive subsidy. Pricing from brands remains largely disciplined, though we note Cotti introduced low price coupon in private domain. For restaurants, leading players continued being disciplined in pricing, e.g. KFC started to charge for additional dipping sauce, and Haidilao ASP was stable yoy.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may

discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
