

China Pet Food Monthly: Jun 2026: sales moderated in 2Q26 with more divergent landscape; China Pet Food led

In this monthly pet food tracker, we monitor: **1) domestic demand for pet food; 2) ASP trajectory and competitive dynamics within product/channel mix shifts; and 3) overseas demand and our monthly cost tracker.**

Overview:

1) GMV performance on Tmall/Taobao/Douyin: In Jun, pet food online GMV accelerated to 17% yoy from 8% yoy decline in May, driven by strong Douyin growth at 40% yoy. In May and Jun combined, which we believe should represent the full picture of 618 shopping festival, **Tmall/Taobao/Douyin GMV total grew 12% yoy**, mainly driven by 35% yoy increase on Douyin while partially offset by 1% yoy decline on Tmall/Taobao. Total 2Q26 GMV was stable at 14% yoy vs. 14% in 1Q26, with 34% yoy on Douyin and 3% yoy on Tmall/Taobao.

2) Performance by brands: In May+Jun combined, local brands continue to show divergent performance where non-listed leading companies are more aggressive (avg. 30% yoy GMV growth online), while global brands continued to show slow growth at 2% yoy in May+Jun; **Specifically, China pet food** grew 29% yoy with Wanpy being the best-performing local brand at 41% yoy while Zeal/Toptrees at 19%/21%. **Gambol** declined 4% yoy, with Myfoodie/Fregate at -10%/-6% yoy, albeit Balance Nutrition came in at 95% growth. For **Petpal**, Meatyway declined 4% yoy in May+Jun-26, with Tmall/Taobao at 1% yoy decline and Douyin declining 13% yoy; **However we believe ongoing consolidation trend with top 10 brands in Douyin remains outpaced at 70% yoy in 2Q26 vs top 300's c.40% yoy.**

3) On product discounts and Douyin ROI, we saw higher livestreaming sales mix ([Exhibit 19](#)) with a shift towards E-shelf/Merchants in 2Q26 ([Exhibit 18](#)). We saw Royal Canin and Myfoodie leading fan attraction on a yoy basis in Jun ([Exhibit 15](#)).

4) Overseas demand and cost tracker: US total dog and cat food imports via China recovered at 4%/50% yoy in May vs +3%/-30% in Apr, echoing recovery in orders reading from [Petpal mgmt](#). On costs, Jun raw material costs trended lower vs May, with 1-3% MoM decline in Cost index for our covered names. That said, we still see 31%/5% higher PET/chicken prices vs 2025 average. And we note RMB appreciation is likely to lead to FX losses among pet OEMs as well.

5) Thoughts on recent social media events: While we acknowledge [ongoing social media discussions](#) regarding food safety and potential health issues from cat food consumption, we await more proof & evidence regarding the issue. That said, we

believe the discussions could lead to better awareness on the pet food quality and stricter government regulation which potentially helps drive industry consolidation.

Within our Pet Foods coverage, we are Neutral on China Pet Foods/Gambol. While we acknowledge **China Pet Foods'** rising domestic momentum and strong global supply chain which we expect to drive wallet share gains, we expect pressures on profitability in the domestic market with heightened competition and in the overseas market with tariff sharing, FX losses and raw material headwinds. While **Gambol** maintains a leading position in China, we are Neutral rated on the stock on valuation and fierce competition in the premium-priced cat food segment. We maintain a Sell rating on **Petpal**, given pressures on domestic and overseas profitability and weaker bargaining power.

Price Target Risks and Methodology - Petpal Pet Nutrition Technology

Valuation methodology: We are Sell rated on Petpal. Our 12m TP of Rmb12.7 is based on SOTP: 1) the domestic business valued at a 26X 2027E P/E discounted back to 2026 at a 6.9% COE, and 2) the overseas business at 16X P/E on 2026E earnings.

Key risks: 1) Less intense competition in the overseas business; 2) Risks of order changes/receivables collection from large clients; 3) Better-than-expected execution of domestic brand building and channel expansion; 4) Lower tariffs on pet food exports from China to the US: Reduction on tariffs could improve the bottom-line and margins of the business.

Price Target Risks & Methodology - Gambol Pet Group

Valuation methodology: We are Neutral rated on Gambol Pet. Our 12m TP of Rmb44.3 is based on SOTP, with 1) the domestic business valued at a 25X 2027E P/E discounted back to 2026 at a 7.0% COE, and 2) the overseas business at 10X P/E on 2026E earnings.

Key risks: 1) More/less favorable exchange rates, freight and input prices impacting overseas business; 2) More/less intense competition in the online channel; 3) Better-/worse-than-expected execution of domestic brand building and channel expansion.

Price Target Risks and Methodology - China Pet Foods

Valuation methodology: We are Neutral rated on China Pet Foods. Our 12m TP of Rmb29 is based on SOTP: 1) the domestic business valued at a 20X 2027E P/E discounted back to 2026 at a 7.9% COE, and 2) the overseas business at 15x P/E on 2026E earnings.

Key downside risks: 1) Faster/Slower-than-expected domestic revenue growth; 2) Food safety issues; 3) Forex fluctuations; 4) Freight and raw material costs.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
