

Japan IT Services: NC company results read-across (4) consulting/cloud: Future, SIGMAXYZ, Comture

In this report, we consider the implications for our IT services sector coverage from visits we made to three Not Covered companies (we have no investment views on these companies): **Future (consulting/SI)**, **SIGMAXYZ (consulting)**, and **Comture (cloud integrator)**. **Future** is tracking in line with guidance, but conditions remain tough on an underlying basis, excluding one-time gains (initial licensing fees for its next-generation banking system). The company noted that new client acquisitions for its next-generation banking system are running slightly below internal assumptions. At **SIGMAXYZ**, multiple core system renewal (SaaS) projects have peaked out, and the consultant utilization rate is on a yoy downtrend as a result. While FY3/27 operating profit guidance is for an increase, the company expects a project lull to continue in 1H before an earnings recovery in 2H. At **Comture**, the downtrend in its gross margin still continues due to the impact of wage hikes and delays in passing on costs. Its FY3/26 operating profits missed guidance, and FY3/27 operating profit guidance is for a third consecutive year of modest profit growth, indicating that challenging conditions persist. In terms of read-across, we see expanding demand for shared systems for regional banks as a positive for earnings at BIPROGY (Buy), which has a strong presence in this area. Below, we outline our key takeaways from company commentary (see [Exhibit 1/Exhibit 2/Exhibit 3/Exhibit 4](#) for company earnings).

Future Corp. (4722.T) (consulting/SI)

- (1) **1Q (Jan-Mar) results/2Q outlook:** Operating profits came at ¥3.43 bn (+3% yoy), broadly in line with guidance. Growth was modest due to the drop-out of large-scale consulting and maintenance projects. No one-time gains (initial licensing fees for the next-generation banking system) were booked in 1Q. The company left 1H guidance unchanged, implying 2Q operating profit guidance of +2% yoy, but noted that the booking of initial licensing fees for the next-generation banking system could fall short of its assumptions (sales/profits of just under ¥1 bn were booked in 2Q12/25). Future assumes a yoy impact from higher-than-usual wage increases.
- (2) **Consulting business:** 1Q sales increased +7% yoy, but operating profits declined slightly, by -0.4% yoy. On an underlying basis excluding initial licensing fees, this marked the fourth consecutive quarter of yoy operating profit decline, but the rate of decline narrowed substantially. By industry, growth was seen in finance (next-generation banking), services (projects in collaboration with

Revamp), and others (for public sector). By phase, upstream processes such as grand design and basic design expanded. A large-scale unprofitable project for the distribution and wholesale sector is progressing as planned, with the current phase scheduled for cutover in July.

- **(3) Next-generation banking system:** Future has acquired six banks as users to date. A large-scale project for the third bank, SBI Shinsei Bank, is currently in the grand design phase. Future said it expects full-scale development to begin in 2H, with cutover from FY12/29 onward. Given the project scale, the company noted that it will take a considerable amount of time, similar to the first and second banks. Acquisition of the seventh and subsequent bank clients is running slightly behind internal assumptions. As such, Future noted that the booking of initial licensing fees for the next-generation banking system in 1H could fall short of its assumptions.
- **(4) Business innovation business:** The 1Q operating loss improved by +¥0.09 bn yoy. This was helped by factors such as improved profitability at Yocabito (an e-commerce business for outdoor/sports goods) following a narrowing of its product lineup. As Yocabito continues to post an operating loss, the company commented that it will consider options including a business transfer after restructuring. Meanwhile, Curiosity (a design studio) lost a large-scale project that had been factored into guidance, and will need to cover this with other projects going forward, according to Future.

SIGMAXYZ (6088.T) (consulting)

- **(1) Guidance:** FY3/27 operating profit guidance is for ¥6.6 bn (+9% yoy). While consulting demand is currently in a lull, management said it aims for profit growth centered on 2H. According to the company, (a) conditions will be tough through 1H due to the impact of the peak-out of large-scale projects for major clients, as well as the drop-out in 1Q (Apr-Jun) of one-time gains (a ¥0.2 bn reversal of bonus provisions), but it expects an earnings recovery in 2H once these impacts have run their course; (b) there has been no weakening of client investment appetite due to the situation in the Middle East, and the possibility of a future deterioration is not factored into guidance, but it needs to keep a close watch on developments as it has major clients in the air and marine transport sectors.
- **(2) Consulting:** Sales in 4Q3/26 declined -15% yoy, with sales to the top 10 clients down -35% yoy; both marked a third consecutive quarter of negative growth. Multiple core system renewal (SaaS) projects have peaked out, and as a result the utilization rate is in a yoy downtrend (the 4Q utilization rate was 70%, down -6 pp yoy). The company believes this trend could continue through 1H3/27. However, it noted that inquiries are on a recovery trend, centered on core system renewal projects, with particularly strong demand for AI consulting, such as data infrastructure development and AI utilization.
- **(3) Potential capital and business alliance:** The company announced that it has begun considering a capital and business alliance with Core Concept Technologies (4371.T). Core Concept Technologies is a DX support and IT staffing company focused on mid-sized enterprises, with a strong presence in the manufacturing

sector. It does not engage in consulting, and therefore SIGMAXYZ believes it could have a complementary relationship with its own business, making it easy to create synergies. SIGMAXYZ's current equity stake in the company is 10.64%, but it has stated its intention to raise its voting rights ratio to a level that would allow for equity-method accounting by the end of March 2027.

Comture Corp. (3844.T) (cloud)

- (1) **Results:** FY3/26 operating profits were ¥4.66 bn (+1% yoy), well below guidance (¥5.0 bn). This was largely due to sluggish demand for the core cloud solutions business, coupled with a greater-than-expected deterioration in profitability on account of a lack of progress with cost pass-throughs. On a yoy basis, although SG&A expenses were curbed by personnel adjustments in indirect departments, profit growth was modest due to headwinds such as a decline in the gross margin (-1.3 pp yoy) from wage hikes. However, on a quarterly basis, 4Q (Jan-Mar) saw a +7% yoy increase in operating profits, with some signs of recovery centered on cloud and infrastructure implementation (4Q orders were up +13% yoy).
- (2) **Order environment:** 4Q3/26 orders increased +13% yoy, with the growth rate accelerating for the fourth consecutive quarter. In addition to a recovery in cloud solutions from US-based Salesforce, Microsoft, and ServiceNow, demand is strong in the data management/data lake fields. In particular, the company said that it believes that with the spread of generative AI, demand for the data management/data lake fields and AWS cloud (AI infrastructure) will continue to expand. On the other hand, it mentioned that growth in its core Salesforce cloud products could be sluggish, as the penetration rate among domestic customers is already quite high.
- (3) **Guidance:** FY3/27 operating profit guidance is for ¥4.7 bn (+1% yoy), which would mark the third consecutive year of modest profit growth. While the order environment shows signs of bottoming out, and the company assumes demand will recover in FY3/27 centered on the cloud solutions business, AWS cloud (AI infrastructure), and the data management/data lake fields (digital solutions business) (sales guidance is for +10% yoy), it expects lackluster earnings growth. This is attributable to factors including a decline in the gross margin (-0.4 pp yoy) from wage hikes and an increase in SG&A expenses (+18%/+¥0.63 bn yoy) from depreciation and amortization (+¥0.3 bn cost increase) associated with the launch of an internal system, wage hikes, and investment in other systems. According to the company, in 1Q (Apr-Jun), in addition to an increase in SG&A expenses, it anticipates an impact from the drop-out of high-margin software for the financial sector that was booked in the same quarter of the previous year.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.
