both industry leaders remain rational and disciplined over store-open subsidies, with special subsidies only approved for special location/regions and total subsidies level subdued yoy in 1H26. **5) Mgmt believes L-T expansion runway remains intact, supported by: i)** meaningful share-gain potential versus traditional channels; **ii)** The company will maintain its focus on stronghold markets, noting runway for further penetration in certain prefecture-level cities; **iii)** enhancing franchise confidence signaled by existing franchisees contributing a high proportion of new openings (opening 2nd/3rd stores). **The stock is trading at 14x/12x 2026/27E P/E vs. GSE of 36%/84% sales/NP growth in 2026E. Key Takeaways

Mgmt decoded the growth path ahead in details:

■ Per-Store GMV drivers:

- **Category expansion:** new categories now account for c.5% of total GMV, with chilled/frozen food at c.3% and others (IP, daily essentials, etc.) at c.2%, which is expected to prudently grow with the mix.
- **Private Label (PL) scaling:** PL SKU count grew from 30+ in FY25 to more than double in 2026, aiming for full-category coverage by year-end (expanding from a beverage-centric portfolio now). At this stage, mgmt positions PL to deliver better customer value and product differentiation to drive traffic/sales rather than seeking GPM accretion.
- **Sharper operational tracking:** Mgmt shared that store expansion metrics are monitored closely and rigorously internally, focusing on per-store GMV (monthly/daily sales) and payback periods. Rent-to-sales ratios are strictly controlled by the company as well (through ie. three-party negotiation).
- **Membership operations:** mgmt shared that registered members grew from 190mn in end-2026 to 200mn+ with faster growth vs. store expansion. Active members' purchase frequency remained stable at 3 times/month, with a stable monthly contribution of c.Rmb90 per member, while active members numbers also increased vs. end-2025.

- **New store format expansion testing:** Wanchen is actively exploring new formats to drive long-term differentiation:

- ❑ **Discounter supermarket:** An iterative community discount format where ambient snacks and beverages contribute 90% of GMV, while other categories (chilled/frozen, IP, daily essentials) make up 10% in stores carrying these SKUs.
- ❑ **Full-category hard discounter** (Huishengjia / 惠省嘉): ~10 stores opened in Guangdong since early 2026, currently testing product assortments and locations with PL focus.
- ❑ **Convenience Store format:** Currently, only one pilot store is operating in Changsha, but mgmt is testing the model of which the expansion runway remains vast (c.320k CVS stores in China).
- ❑ **Fresh Snacks:** Mgmt is monitoring this high-growth niche-category store format in the industry while remain cautious about the scalability due to high cold chain costs/spoilage ratio/primary location requirement. Meanwhile, the company is testing cold-chain products.
- **Logistics and fulfillment efficiency:** The company is investing in more warehouses to support faster replenishment requirement as outlet network expands. Despite these new investments, mgmt expects the overall logistics expense ratio to decline yoy driven by improved fulfillment efficiency.

Price Target Risks and Methodology - Fujian Wanchen Good

Valuation: Our 12m TP is Rmb319, based on a target 2027E P/E at 21.5x discounted back to end-2026E at an 8.2 % COE. The target P/E is at a HSD% valuation discount to Busy Ming, as we reference the average gap of DLTR's NTM P/E vs. DG's in the past two years, factoring in the relatively slower network scaling momentum and less favorable UE (lower per-store GMV but profits driven by high mix of smaller brands/white labels).

Key risks: 1) intensifying market competition and price sustainability; 2) franchise model risk and scaling complexity; 3) M&A risks; 4) supply chain, food safety and logistics.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DAFCF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
