

EHang - ADR

Downgrade to Underweight; commercialization delayed, first-mover advantage diminished

Certification is no longer enough. We downgrade EHang to Underweight from Neutral and cut our PT to US\$4.4 (from US\$9.7) as we believe China's passenger eVTOL commercialization has entered a structural reset. Our original thesis assumed EHang's certification lead would rapidly convert into commercialization, generating operating cash flow to fund future aircraft while competitors remained in certification. Instead, regulators have continued moving the commercialization goalposts since 2H25, while the recent nationwide suspension of most general aviation activities following the [Beijing aviation accident](#) (26 June) further delays passenger deployment. We cut our FY26E/27E/28E revenue forecasts to Rmb261mn/Rmb290mn/Rmb319mn (55%/66%/75% below consensus), forecast non-GAAP net losses of Rmb407mn/Rmb176mn/Rmb89mn (also below consensus), and lower our valuation multiple to 7.7x FY27E P/S, reverting to 4Q23/1Q24 levels as the commercialization premium unwinds. Despite the stock declining 52% YTD, versus western eVTOL peers (-30%) and the Nasdaq (+11%), we believe the market continues to price EHang as a commercialization story when it has effectively reverted to a certification story.

- **Commercialization has become a moving regulatory target.** Our original thesis assumed TC, PC, AC and the first OCs represented the final regulatory hurdles before passenger commercialization. Instead, every major milestone has been followed by new commercialization requirements. Following the first OCs, regulators introduced operator training frameworks, licensing standards and standardized operating procedures before broader deployment. Shortly thereafter, CAAC requested onboard obstacle detection and detect-and-avoid capability before approving public ticketed operations. The recent nationwide suspension of most general aviation activities following the Beijing aviation accident further reinforces our view that passenger eVTOL commercialization will progress materially slower than previously expected.
- **We cut estimates materially and expect management to lower FY26 guidance.** We expect 2Q26 revenue of Rmb113mn (flat YoY, +340% QoQ), supported by deferred revenue recognition from 4Q25 and stronger non-passenger businesses, but forecast a wider non-GAAP net loss of Rmb124mn (vs. Rmb12mn in 2Q25 and Rmb75mn in 1Q26). We expect a much sharper slowdown during 2H26 as customers increasingly defer deliveries while commercialization remains uncertain. Our revised forecasts imply FY26E/27E/28E revenue 55%/66%/75% below consensus, and we believe management is likely to revise its Rmb600mn FY26 revenue target lower.
- **What could change our view?** We would become more constructive if commercialization becomes predictable rather than progressively delayed. Specifically, we would look for a stable regulatory framework without further material commercialization requirements, approval of additional operators and cities under a repeatable operating framework, accelerating passenger aircraft deliveries driven by commercial demand rather than demonstration projects, and evidence that commercial operations are generating sufficient operating cash flow to support internally funded development of future aircraft generations.

Summary Investment Thesis and Valuation

Investment Thesis

We are Underweight on EHang. We continue to believe China will become one of the world's largest long-term passenger eVTOL markets and that EHang retains a meaningful first-mover advantage through its TC, PC, AC and the first Operating Certificates (OCs). However, we believe the investment case has fundamentally changed. Rather than transitioning from certification into commercialization, regulators have continued introducing additional operational requirements after major certification milestones, while the recent nationwide suspension of most general aviation activities further reduces visibility on commercialization timing. We now expect passenger commercialization to progress materially slower than previously anticipated, delaying operating cash flow, extending cash burn and reducing the economic value of EHang's certification lead. While overseas markets and non-passenger businesses remain long-term opportunities, we do not expect either to offset weaker domestic passenger commercialization over our forecast horizon.

Valuation

Our Dec-27 price target of US\$4.4 is based on a 7.7x FY27E P/S multiple, equivalent to one standard deviation below EHang's average forward P/S multiple since 2023. We believe the commercialization premium that emerged following the first OCs has largely unwound as commercialization becomes increasingly dependent on evolving regulatory requirements rather than certification alone. We therefore value EHang closer to its historical certification-stage valuation framework until commercialization becomes more predictable.

Why our investment thesis broke

Our original thesis assumed certification would be the principal hurdle before passenger eVTOL commercialization. As the first company globally to obtain TC, PC, AC and operator OCs, we expected EHang to commercialize well ahead of competitors, generate operating cash flow, accumulate operating experience and fund successive generations of aircraft while peers remained in certification.

One year later, we believe this assumption no longer holds. Rather than moving from certification into commercialization, the industry has entered an iterative regulatory process where each major milestone has been followed by additional operational requirements. While these requirements are positive for long-term industry safety, they have transformed commercialization from a finite certification process into a moving regulatory target.

Figure 1: Evolution of commercialization requirements following certification

Timing	Investor expectation	What actually happened	Investment implication
1Q25	First OCs would unlock commercial passenger operations	Operations remained limited to highly controlled aircraft, routes and operating scenarios	Commercial rollout proved slower than expected
3Q25	Passenger operations would gradually expand and more OCs would be granted	Regulators introduced operator training standards, licensing requirements and examination procedures before broader deployment	New commercialization hurdle emerged after certification
Apr-26	Public ticket sales targeted by end-March	CAAC headquarters requested additional onboard obstacle detection and detect-and-avoid capability before launch	Ticket sales were postponed and another regulatory hurdle emerged
May-26	National operator training standards became effective, paving the way for commercialization	Public ticket sales were expected shortly thereafter	Commercialization appeared close
Jun-26	Gradual commercialization would continue	Beijing aviation accident disrupted parts of China's general aviation sector and reinforced aviation safety priorities	China indefinitely banned most general aviation (GA) nationwide. Commercialization visibility deteriorated further

Source: J.P. Morgan.

The Beijing aviation accident did not create this trend, but it reinforced regulators' already cautious approach toward aviation safety and reduced confidence that passenger eVTOL commercialization will accelerate in the near term. In our view, the key investment debate has shifted from "who can obtain certification first?" to "when will regulators permit commercialization at scale?" This fundamentally changes EHang's earnings trajectory and valuation framework.

Why delayed commercialization disproportionately hurts EHang

The same regulatory environment does not affect every eVTOL developer equally. We believe EHang is disproportionately exposed because its competitive strategy was built around commercializing first, rather than developing the industry's highest-performance aircraft.

The EH216-S was intentionally designed as a first-generation commercial platform capable of reaching certification quickly under a relatively constrained operating environment. The investment thesis was straightforward: obtain certification ahead of competitors, begin commercial operations, generate operating cash flow and reinvest that cash into successive generations of aircraft with longer range, higher payload, improved charging efficiency and broader urban air mobility use cases.

Instead, commercialization has repeatedly been delayed.

Without meaningful commercial deployment, EHang will remain in a cash-burning phase for longer than originally anticipated. This delays internally funded product development while competitors continue progressing toward certification with newer aircraft designs.

The issue is not simply that commercialization has been postponed. Rather, every year of delay reduces the value of being first. Certification only creates shareholder value if it can be converted into commercial operations before competitors narrow the gap.

Management has also acknowledged that meaningful upgrades involving batteries, propulsion systems, flight-control software or onboard obstacle detection would require additional CAAC testing and certification. As a result, even if technology advances rapidly, implementation into certified commercial aircraft is unlikely to be immediate.

Figure 2: How our investment thesis has changed

Original investment thesis	Revised investment thesis
Certification lead	Certification lead remains intact
Rapid commercialization	Commercialization repeatedly delayed by evolving regulatory requirements
Operating cash flow generated from EH216-S	Prolonged cash burn and greater reliance on external funding
Cash flow funds second- and third-generation aircraft	Next-generation product roadmap progresses more slowly than expected
Competitive lead widens	Competitors gain additional time to narrow the certification gap

Source: J.P. Morgan.

We therefore believe investors should place less emphasis on certification leadership alone and greater emphasis on the timing and scalability of commercialization. In our view, EHang remains the global certification leader, but the economic value of that leadership has diminished materially as commercialization timelines continue to move further out.

Earnings implications

We reduce our FY26E/27E/28E passenger aircraft delivery forecasts from 196/245/294 units to 60/60/60 units, lowering revenue forecasts to Rmb261mn/Rmb290mn/Rmb319mn, 55%/66%/75% below consensus. We now forecast non-GAAP net losses of

Rmb407mn/Rmb176mn/Rmb89mn, versus consensus expecting profitability from FY27 onward.

We expect 2Q26 revenue of Rmb113mn (flat YoY, +340% QoQ) and a non-GAAP net loss of Rmb124mn (vs. Rmb12mn in 2Q25 and Rmb75mn in 1Q26). The relatively resilient reported revenue is primarily driven by revenue originally deferred from 4Q25 following tighter auditor collectibility requirements together with stronger contributions from non-passenger businesses, rather than an improvement in underlying passenger aircraft demand.

More importantly, we believe 2Q26 will mark the last quarter before commercialization delays materially affect financial performance. We expect passenger aircraft deliveries to slow sharply during 2H26 as customers increasingly defer deliveries until commercialization becomes more predictable following the nationwide suspension of most general aviation activities and continued regulatory changes. As a result, our FY26 revenue forecast of Rmb261mn is 56% below management's current Rmb600mn guidance, and we believe management is likely to revise guidance lower as customer delivery schedules are reassessed.

Source: J.P. Morgan estimates, Bloomberg Finance L.P.

Our assumption of 60 passenger aircraft deliveries annually does not imply demand disappears. Rather, we expect deliveries to continue to strategic government entities (e.g. fire and rescue), overseas demonstration projects and early adopters evaluating the technology ahead of future commercialization. This assumption is broadly consistent with EHang's historical experience, when the company delivered approximately 60-70 aircraft annually during 2019-20 before any certification, supported by domestic demonstration projects and overseas customers evaluating the platform.

We also expect management's current Rmb600mn FY26 revenue target to become increasingly difficult to achieve. While management reiterated guidance partly because revenue originally expected in FY25 is now expected to be recognized in FY26 following tighter auditor requirements, we believe the commercialization environment has deteriorated materially since guidance was reaffirmed. Our FY26 revenue forecast of Rmb261mn is 56% below management's current target, and we therefore expect management to revise guidance lower as commercialization timelines and customer

delivery schedules are reassessed.

Valuation

We lower our Dec-27 price target to US\$4.4 (from US\$9.7) by applying a 7.7x FY27E P/S multiple, equivalent to one standard deviation below EHang's average forward P/S multiple since 2023. Historically, EHang's valuation expanded following the first OCs as investors priced in rapid passenger commercialization and several years of operating cash flow before competitors entered the market. We believe that commercialization premium has now largely unwound. Since 2H25, regulators have continued introducing additional commercialization requirements after major certification milestones, while the recent nationwide suspension of most general aviation activities further reduces visibility on commercialization timing. As a result, we believe investors should once again value EHang primarily on its certification leadership rather than near-term commercialization.

Taken together, these changes justify a materially lower commercialization premium despite EHang retaining its certification leadership.

Figure 4: Commercialization premium largely unwinds

Source: J.P. Morgan estimates, Bloomberg Finance L.P.

Our lower target multiple reflects four changes to our investment framework.

Figure 5: Why we lower our valuation framework

Factor	Previous view	Revised view
Commercialization timeline	Commercial operations begin scaling shortly after certification	Commercialization remains contingent on evolving operational requirements with limited visibility on timing
Revenue growth	Passenger deliveries accelerate rapidly	Passenger commercialization remains gradual with deliveries largely supported by demonstration and strategic customers
Cash flow profile	Early commercialization funds future aircraft development	Cash burn persists for longer, delaying internally funded product development
First-mover advantage	Certification translates into a durable commercial lead	Certification lead remains, but its economic value declines as competitors gain time to narrow the gap

Source: J.P. Morgan.

Taken together, we believe these changes warrant a materially lower valuation multiple despite EHang retaining its certification leadership. Our revised target price primarily reflects a higher regulatory risk premium, a longer path to commercialization and reduced confidence that certification alone will generate sustainable competitive advantage.

What could change our view?

Our Underweight rating reflects uncertainty around commercialization timing rather than EHang's technology or certification leadership. We would become more constructive if evidence emerged that certification is once again translating into scalable commercial deployment.

Figure 6: What would make us more constructive

Catalyst	Why it matters
Stable regulatory framework	No material new commercialization requirements emerge after existing milestones are completed, improving confidence that current approvals are sufficient for broader deployment.
Expansion beyond the first operators	Additional operators, cities and operating routes receive approvals under a repeatable regulatory framework, demonstrating commercialization is becoming scalable rather than remaining limited to isolated pilot projects.
Acceleration in passenger aircraft deliveries	Deliveries increasingly reflect commercial operating demand rather than strategic government purchases or demonstration programs.
Meaningful operating metrics	Higher aircraft utilization, passenger traffic, flight frequency and ticketed operations demonstrate attractive commercial economics under the current regulatory framework.
Material overseas commercialization	Firm overseas orders convert into recurring commercial operations, reducing reliance on China's commercialization timeline.
Path to positive operating cash flow	Passenger commercialization accelerates sufficiently to improve operating leverage, reduce cash burn and support internally funded development of future aircraft generations.

Source: J.P. Morgan.

In our view, the investment debate is no longer centered on whether EHang can obtain regulatory approvals. Instead, it is whether those approvals can be translated into predictable, scalable and economically attractive commercial operations. We would revisit our Underweight rating once there is clear evidence that commercialization, rather than certification, has become the industry's primary source of competitive differentiation.

Investment Thesis, Valuation and Risks

EHang - ADR *(Underweight; Price Target: \$4.40)*

Investment Thesis

We are Underweight on EHang. We continue to believe China will become one of the world's largest long-term passenger eVTOL markets and that EHang retains a meaningful first-mover advantage through its TC, PC, AC and the first Operating Certificates (OCs). However, we believe the investment case has fundamentally changed. Rather than transitioning from certification into commercialization, regulators have continued introducing additional operational requirements after major certification milestones, while the recent nationwide suspension of most general aviation activities further reduces visibility on commercialization timing. We now expect passenger commercialization to progress materially slower than previously anticipated, delaying operating cash flow, extending cash burn and reducing the economic value of EHang's certification lead. While overseas markets and non-passenger businesses remain long-term opportunities, we do not expect either to offset weaker domestic passenger commercialization over our forecast horizon.

Valuation

Our Dec-27 price target of US\$4.4 is based on a 7.7x FY27E P/S multiple, equivalent to one standard deviation below EHang's average forward P/S multiple since 2023. We believe the commercialization premium that emerged following the first OCs has largely unwound as commercialization becomes increasingly dependent on evolving regulatory requirements rather than certification alone. We therefore value EHang closer to its historical certification-stage valuation framework until commercialization becomes more predictable.

Risks to Rating and Price Target

Upside risks include: (1) stabilization of the commercialization framework, with no further material operational requirements following existing certification milestones; (2) faster approval of additional operators, cities and operating routes under a repeatable regulatory framework; (3) stronger-than-expected passenger aircraft deliveries driven by commercial demand rather than demonstration projects; (4) meaningful overseas commercialization, particularly in Southeast Asia and the Middle East; and (5) earlier-than-expected operating leverage resulting in positive operating cash flow.

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Aug 21, 2025. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe). NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock

because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Lam, Beatrice : CIMC Enric (3899.HK), COSCO Shipping Energy Transport - A (600026.SS), COSCO Shipping Energy Transport - H (1138.HK), EHang - ADR (EH), Johnson Electric - H (0179.HK), Pacific Basin Shipping - H (2343.HK), Wolong Electric - A (600580.SS), Yangzijiang Shipbuilding Holdings Ltd (YAZG.SI)

J.P. Morgan Equity Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	83%	79%	74%
JPMS Equity Research Coverage*	49%	39%	13%
IB clients**	94%	93%	85%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and

should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
