In this report, we provide an update to our Campus Networking model after recent company events and industry conversations. We are now forecasting overall growth of 8% and 7% for 2026 and 2027, respectively, decelerating from ~10% growth in 2025. The campus market has experienced healthy demand this year. Our model includes splits for wired switching, WLAN and WLAN Cloud, routing, and SD-WAN. Our conclusions are as follows:

- We adjust overall 2026/2027e Campus Networking growth to 8%/7% from 10%/7%. The market typically grows MSD but expanded above trend post pandemic on hybrid work tailwinds, growing ~20% in 2021 and mid-teens in 2022 and 2023. 2024 was a correction year, declining 16%, and now we see the market back to more normalized growth levels.
- We now expect the total Campus Networking market CAGR of 6% from 2021-2026 (vs. prior estimate of 7%).

- Wired Switching constitutes the largest segment within the total campus market with industry players reporting robust order and revenue growth. We believe refresh activity is back to normal, so enterprises are upgrading and also preparing their networks for AI inferencing.
- For total WLAN market, we are estimating ~12% growth in 2026 and ~8% in 2027 as WiFi 7 is ramping. The Cloud WLAN market grows faster than the rest of the WLAN market, as we forecast a 2021-2026 CAGR of 17% (vs. prior 15%) compared to our overall market estimate of 8% (vs. 6% prior). We believe Cloud WLAN is a mid teens percentage of total WLAN revenues.
- Enterprise Routing is the smallest part of the market and slower-moving. We expect modest growth this year and forecast low to mid single digit growth in 2026 and 2027. We expect the Enterprise SD-WAN market to grow at ~11% 2021-2026e CAGR. This market saw very high growth from 2020-2023 with a MSD decline in 2024.

From a vendor standpoint:

- ANET (OW rated) entered the Campus market later and has grown its LSD share over the years. In the most recent earnings call, the company campus revenue guidance was \$1.25B for 2026. Arista's market share in campus was 0.3% in 2020 which we expect to rise to 3.4% by 2027. With the VeloCloud acquisition completing their campus portfolio and Todd Nightingale, COO, focusing on building out the campus portfolio, we think ANET is set up well in this market.

FIGURE 1. ANET Market Share

- CSCO (EW rated) has the lion's share of the market (~50%). Networking revenues contracted in 2024 across the industry, but CSCO was hit harder on inventory correction. Since then, performance has been strong. In F3Q26, Cisco campus networking orders grew more than 25% Y/Y and wireless orders grew more than 40% Y/Y. While Cisco has meaningful market share in the campus market, we tend to see share shifts there, with Cisco likely being a share donor to other vendors like Arista. Despite the refresh/end-of-life in the campus segment, we expect the non-AI business to grow LSD in FY26 and FY27, with campus networking a little higher than this number given the lower growth being seen in software solutions.

FIGURE 2. CSCO Campus Revenues

- HPE (OW rated) has historically controlled low-DD share. Like CSCO, HPE experienced a bottoming of its Aruba business in 2024, and we model a strong return to growth in the Networking segment this year. We expect HPE to maintain the low DD market share level but with growth moderating through 2026 and 2027.

FIGURE 4. Total Campus Networking Revenue Growth

Source: Barclays Research estimates, company reports, 650 Group

The campus market corrected with a sharp 16% decline in 2024 following elevated growth in 2021-2023. We expect strong growth of 8% in 2026 and more normalized growth of 7% in 2027.

FIGURE 5. Total Market Share

Source: Barclays Research Estimates, Company Reports, 650 Group (for Commscope and Extreme)

CSCO dominates the campus market and has close to 50% share by our estimate. ANET came into the market much later, and, though a LSD player currently we expect it to continue gaining share in 2026 and 2027. HPE has maintained low DD share.

FIGURE 6. Total Switching Revenue (\$M)

Source: Barclays Research estimates, company reports, 650 Group

The Enterprise DC Switching market has been growing faster than the Campus market. We estimate 9% and 7% growth for campus switching and 47% and 24% for enterprise DC switching in 2026 and 2027, respectively.

FIGURE 7. Enterprise WLAN Revenue (\$M)

Source: Barclays Research estimates, company reports, 650 Group

The WLAN market accelerated in 2021 and 2022 before correcting in 2024. We model 12% growth for 2026 and 8% for 2027. Within this, we have WLAN Cloud growing faster at 17% CY21-27E CAGR.

FIGURE 8. Enterprise SD-WAN Market Share

Source: Barclays Research estimates, company reports, 650 Group

The Enterprise SD-WAN market share landscape has seen changes over the past few years. FTNT and HPE have maintained around 10% share while CSCO has ramped rapidly in recent years with 27% market share in 2025 (we estimate 28% in 2026). ANET is a small player with LSD share in this market.

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Stock Rating

Overweight - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Equal Weight - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Underweight - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Rating Suspended - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

J: Barclays Bank PLC and/or an affiliate is a liquidity provider and/or trades regularly in the securities by Arista Networks, Inc. and/or in any related derivatives.

Valuation Methodology: Our PT of \$195 is based on a 45x multiple on our CY27e EPS of \$4.33. We continue to like ANET as a way to invest in switching growth and as a share gainer in the campus. We see attractive risk/reward for shares with resilient cloud demand and campus upside with TAM expansion. We believe back-end AI switching and front-end pull through opportunity for ANET will drive sustainable growth.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: (1) Customer concentration, as the major Cloud service providers account for the largest portion of revenue. Both Microsoft and Meta were greater than or near 10% customers. (2) Sustained volatility and/or slowdown in Cloud spending (3) Competition: Juniper and others are trying to gain share, and will be more relevant in 400G as they field more competitive products. (4) New market timing: Arista has been slow to gain meaningful traction in routing, and campus could take longer. (5) Valuation: Arista is one of the higher valuation stocks in the Networking and IT Hardware universe.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: 1) Cloud. Cisco's shares in key hardware segments are much higher on-prem then on the cloud, so the transition may negatively impact revenues. 2) Software transition. Management is investing to keep the move to software rolling. However, many in the industry are hesitant to take as-a-service offerings for typical hardware purchases. 3) Macro. Future macroeconomic softness could pressure the IT spending environment, and could continue to depress sales growth if economic and/or political uncertainty persist. Upside risks include future share gains in core verticals, better traction in software and cloud, and macro holding up better than expected.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: 1) Cloud Competition. In addition to white box supplying cloud vendors, each segment has become more competitive, with Dell rebounding in storage and competing in server. 2) Macro. HPE and other traditional hardware vendors are susceptible to macro impacts. 3) Longer enterprise recovery could delay product refresh and AI story.

Sustainable Investing Related Research: There is currently no globally accepted framework or definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes a 'sustainable', 'ESG', 'green', 'climate-friendly' or an equivalent company, investment, strategy or consideration or what precise attributes are required to be eligible to be categorised by such terms. This means there are different ways to evaluate a company or an investment and so different values may be placed on certain sustainability credentials as well as adverse ESG-related impacts of companies and ESG controversies. The evolving nature of sustainable investing considerations, models and methodologies means it can be challenging to definitively and universally classify a company or investment under a sustainable investing label and there may be areas where such companies and investments could improve or where adverse ESG-related impacts or ESG controversies exist. The evolving nature of sustainable finance related regulations and the development of jurisdiction-specific regulatory criteria also means that there is likely to be a degree of divergence as to the interpretation of such terms in the market. We expect industry guidance, market practice, and regulations in this field to continue to evolve.

Any information, data, image, or other content including from a third party source contained, referred to herein or used for whatsoever purpose by Barclays or a third party ("Information"), in relation to any actual or potential 'ESG', 'sustainable' or equivalent objective, issue, factor or consideration is not intended to be relied upon for ESG or sustainability classification, regulatory regime or industry initiative purposes ("ESG Regimes"), unless otherwise stated. Nothing in these materials, including any images included therein, is intended to convey, suggest or indicate that Barclays considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG or sustainability classification, label or similar standards that may exist under ESG Regimes. Barclays has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.
