AMD held its Advancing AI event from July 22-23, culminating in a keynote by CEO Dr. Lisa Su and investor Q&A. We thought the event was generally quite positive with key announcements around new customer partnerships, updates on the product portfolio and roadmap, increased TAM outlooks. We summarize the main announcements below.

Helios (MI450) officially launched with (unsurprisingly) strong performance benchmarks, both vs. Vera Rubin and vs. MI350 (though as always with this sort of thing we take them with a grain of salt) (**Exhibit 1, Exhibit 2**). An updated Helios roadmap was also provided with an annual release cadence of successive rack-scale systems with MI500/MI600 series expected to launch in 2027 and 2028, respectively (**Exhibit 3**). The near-term MI455X ramp is still expected to start in 3Q and ramping into 4Q of this year.

AMD announced Anthropic as a third major customer for its Helios architecture, joining OpenAI and Meta. As part of the strategic partnership with Anthropic, AMD will invest up to \$5B (so no warrants) and the companies will collaborate on ROCm. Anthropic will deploy up to 2GW of compute, with deployment of the first 1st GW starting in 1H27 with the goal of deploying almost the full 1GW in 2027. AMD also [announced a partnership with Microsoft to deploy Helios at scale on Azure](#), although not providing specific targets.

CPU 2030 TAM raised to \$220B vs the prior \$120B they provided only 3 months ago (**Exhibit 4**), implying an >50% CAGR from \$26B in 2025, with the vast majority of growth driven by agentic AI. They also see the Accelerator TAM growing to \$1.4T by 2030 (~45% CAGR from \$200B in 2025) mainly driven by inference spend with the overall compute TAM growing to ~\$2T (~40% CAGR from \$365B in 2025).

Management provided color on its CPU product roadmap. AMD's CPU portfolio of next gen Venice CPUs addresses varying requirements via several Venice variants tailored to GPU servers / host nodes (Venice HF/Verano), Agentic CPU servers (high core count, high ASP Venice 256c) and general purpose CPU servers (Venice SP7/SP8/Venice-X) (**Exhibit 5**). Management remains confident that AMD's CPU portfolio is strong and believes that a favorable competitive position vs. both x86 and Arm-based CPUs will help them to gain further market share.

Cerebras and AMD announced a partnership for ultra-low latency inference. As inference workloads are becoming more heterogenous with customer requirements varying widely across latency, throughput, token capacity, cost and scale, the AMD-Cerebras partnership seeks to combine the throughput from AMD Instinct GPUs, with ultra-fast token generation capabilities of Cerebras (**Exhibit 6, Exhibit 7**). This announcement is perhaps unsurprising given that NVDA is taking a similar (although likely more integrated) approach with Groq. While sparse on technical details, Cerebras plans to deploy the first joint solution in its own data center and making it available to customers initially via Cerebras Cloud in 2H26.

(continued on next page)

AMD introduced ROCm.AI, an AI-driven development platform that aims to speed up development and workload-specific GPU performance optimization and programming via AI (and which they seem to view as their answer to the NVIDIA CUDA moat; we shall see...) The solution draws on the core ROCm software stack of compilers, libraries and frameworks and has integrations with AI coding agents which can use expert skills to help generate code to optimize GPU performance (**Exhibit 8**).

AMD also announced a host of smaller offerings in Enterprise, Personal and Physical AI. AMD announced new products addressing several challenges in enterprise AI deployment including power & cooling, cost and ease of deployment for the enterprise with its Instinct 350P GPU which it positions as a cost-effective, easy-to-deploy solution for on-prem datacenters for non-frontier workloads. Other new products include personal AI compute solutions which can run model sizes from 24B to 200B parameters (Ryzen AI400, Ryzen AI Max) as well as a new developer-oriented platform (Gorgon Halo). Lastly, AMD introduced KRIA AI Robotics, a turnkey robotics developer platform.

Overall we found the event to be quite positive, and continue to see fundamental strength with the company benefitting from fundamental upside in both CPU and GPU trajectories. We rate AMD Outperform, \$600 PT.
