This is the second edition of our quarterly report (link to the first issue [here](#)) in which we analyze the results published by Arcadis's listed competitors. Within the sector, we cover Arcadis (Outperform, PT €48, covered by Derric Marcon) and Jacobs (Outperform, PT \$163, covered by Chad Dillard). This sector perspective allows us to track the evolution of trends and key events in the industry. We begin with a summary of each company's performance before highlighting the key themes that emerged this quarter. For the quarter ending in March, the share price reactions of the companies in our sample on the day their results were published were very mixed ([Exhibit 1](#)).

Investment Implications

Our ratings and estimates for the companies we cover remain unchanged in this report. Our key findings for the quarter ending March tend to reinforce our investment thesis on Arcadis. Indeed, the earnings releases confirmed the market trends we anticipated. These trends support our cautious revenue growth forecasts for Arcadis (+3.5% over 2027-36 with a peak at +4.3% in FY29, growth to perpetuity at +2.5%). In a market where customer demand remains generally positive, Arcadis's challenge remains to improve its operational performance (converting leads into signed contracts, accelerating the conversion of backlog into revenue, and increasing consultant utilization rates) and to reposition itself in market segments where customer demand is strongest. At the same time, the group has launched cost-take-out initiatives to increase its margins. Finally, effective management of activities facing declining markets, such as services related to residential construction, is a priority, even though the share of these activities in Arcadis's revenue continues to decrease quarter after quarter.

KEY TAKEAWAYS FROM ARCADIS'S 1Q26 PEER RESULTS

CUSTOMER DEMAND HELD UP DESPITE A TURBULENT ENVIRONMENT

Organic revenue growth for our sample of companies comparable to Arcadis remained broadly in line with previous quarters ([Exhibit 2](#)), despite operational disruption in the Middle East due to the conflict that began there in late February. Overall, published quarterly revenue and EBITDA exceeded Street forecasts by 2% and 1%, respectively, for the quarter ending in March. However, these relatively positive results have rarely translated into significant upward revisions to full-year estimates. The main movements we observed are as follows:

- The only company to have accelerated its OSG rate sequentially in 1Q26 was Arcadis.
- The companies with the highest OSG rates were Jacobs and AtkinsRéalis (Engineering Services division only; not covered).
- The companies that experienced the most significant slowdown sequentially were AtkinsRéalis (Engineering Services division only) and Sweco.

The results for 1Q26 (calendar) highlighted a strong acceleration in demand in sectors such as data centers, life sciences, and nuclear. Conversely, significant exposure to the Middle East or to declining market segments/projects (such as the headwind created by the termination of USAID/DOS for Tetra Tech or the wind-down of Canadian infrastructure projects for Stantec) hampered the OSG rate of many players (notably Stantec, Sweco, and AECOM -none of which we cover).

Despite an uncertain (and already strained) economic environment given the ongoing conflict in the Middle East, order intake and the order backlog continue to demonstrate strong resilience in customer demand.

MANY FIRMS HAVE BEEN ACTIVE ON THE M&A FRONT

Discussions about M&A were a common theme in the sector publications this quarter, with most groups having been active in this area recently:

- WSP Global has been the most active, finalizing the acquisition of TRC and maintaining M&A as its top capital allocation priority ([press release](#)).

- Jacobs finalized the consolidation of PA Consulting ([press release](#)).
- Stantec benefited from the earlier acquisition of Page ([press release](#)), which contributed significantly to the growth of its revenue and backlog, although the integration weighed on its FCF due to integration costs.
- AtkinsRéalis made several bolt-on acquisitions.
- Sweco continued its policy of making small acquisitions at a steady pace.
- Tetra Tech has made targeted acquisitions in the defense and cybersecurity sectors and has divested non-core businesses.

Unsurprisingly, Arcadis has remained behind its peers on the M&A front, with the group focusing on its operational turnaround and improving its day-to-day business management processes.

SUMMARY OF ARCADIS PEER PUBLICATIONS

Sweco (not covered): OSG was +2% in 1Q26, below the two previous quarters, reflecting softer customer demand and unfavorable calendar effects. Growth was driven by infrastructure, water, environment, energy, and security and defense, with strong contributions from Sweden, the Netherlands, Norway, Belgium, and the UK. Weakness persisted in residential and commercial buildings and parts of industry (notably pharmaceuticals and chemicals), with Finland, Denmark, Germany, and Central Europe weighing on performance due to weak end-markets. EBITA margin declined yoy to 10.4% due to negative calendar effects and higher personnel costs, though underlying profitability was broadly stable. Net staff hiring and engineers utilization rate were broadly stable sequentially. Looking ahead, the group anticipates sustained demand in its key growth sectors, driven by long-term trends (sustainable development and resilience, demographic shifts, and digitalization). However, like many suppliers, the group highlighted the significant uncertainty surrounding growth due to external factors beyond its control.

Tetra Tech (not covered): OSG, at +3.1%, was slightly weak in 2Q26 compared to previous quarters. However, its backlog was +8% sequentially. Demand is driven by secular trends, notably AI-led data center expansion, electrification, water scarcity, climate adaptation and the modernization of defense facilities. The construction of data centers supports the demand for water

supply, treatment, commissioning and expansion of wastewater treatment capacity. Increased defense budgets worldwide are stimulating work on expanding bases, ports and harbors, coastal resilience, flood protection and the cleanup of PFAS. Public sector demand remains key, with US Federal revenue up 11% yoy, State & Local up 9%, and International up 12%, supported by multi-year funding frameworks (US infrastructure programs and the UK's AMP8 water cycle). Offsetting this, US Commercial fell 2% yoy, due to weakness in renewables, while USAID/DOS-related activity remains structurally lower following program cancellations. Profitability continues to improve, with 2Q26 adjusted EBITDA margin up 90bp yoy. The group has maintained its growth forecast for the year broadly unchanged, with the expected weakening of its growth in the State & Local segment being offset by an expected rebound in the US private sector and prospects with the US federal government that remain solid.

Jacobs (Outperform, \$163 PT): since this company is covered by our US colleague Chad Dillard, we recommend investors read his latest report discussing the 2Q26 earnings ([link](#)). Jacobs delivered a solid quarter, with a record backlog of \$27bn (+22% yoy) and a book-to-bill of 1.2x (1.4x TTM), reflecting broad based demand across infrastructure and advanced facilities. The key highlight of the quarter was the continued acceleration in AI-related activity, which now represents approximately 10% of group revenue, including 3-4% from data centers, growing at over 40% yoy. The AI data center pipeline has increased 400% yoy, with visibility extending into FY27–28. Management also reported healthy demand across water, transportation, energy and power, with the Middle East remaining resilient despite recent turmoil. In 2Q26 adjusted net revenue increased 8.8% yoy, while adjusted EBITDA rose 14% yoy, with margins expanding 70bp to 14.1%. Post PA Acquisition, Jacobs raised its FY26 guidance for the second time this year and lifted its long-term targets.

WSP (not covered): WSP delivered a strong start to FY26, with 1Q26 net revenues up ~5% organically (normalized, i.e. excluding fewer billable days), while backlog reached a record ~\$20bn (+18% yoy). Demand is fueled by the energy transition, electrification, digitalization through AI, climate resilience and structural needs such as the modernization of power grids, aging infrastructure and the rapid expansion of data centers. Public sector clients (~51% of net revenues) remain the main growth engine, supported by multi-year infrastructure and clean energy programs, while private demand is strong in data centers and advanced manufacturing. WSP is benefiting from elevated data center activity, alongside continued investment in transport, water, and infrastructure (US infrastructure investment and jobs act -IIJA-), and strong demand for environmental, sustainability, and ESG services. Profitability is improving, with 1Q26 adjusted EBITDA margin up +80bp to 16.8%, driven by mix, productivity, and ERP efficiencies. Management highlighted that Power & Energy was boosted by the acquisitions of TRC ([press release](#)) and POWER Engineers ([press release](#)), a key growth driver, with opportunities in grid upgrades, electrification, and new technologies like small modular reactors. The group reiterated its FY26 revenue target while narrowing its EBITDA guidance slightly.

AECOM (not covered): revenue growth (excluding FX and the impact of the number of billable days) in 2Q26 slowed compared to 1Q26. Its adjusted segment operating margin expanded 50bp yoy to 16.5%. Backlog increased 8% yoy to a record \$26.2bn, supported by a 1.2x book-to-burn ratio. Demand is being driven by long-duration public infrastructure funding, notably US IIJA-backed transport and water investment, accelerating defense spending and AI-led digital and data-center infrastructure driving demand across power generation, transmission and emerging areas such as nuclear. Internationally, Australia, Canada and select Middle East markets showed strong backlog momentum tied to defense and infrastructure programs; however NSR declined 3% yoy at constant currency in 2Q, reflecting weakness and delays in Asia and the Middle East due to geopolitical disruption, as well as ongoing softness in UK transportation. AECOM reiterated its organic revenue growth outlook of 6-8% (which excludes a 200bp headwind from fewer working days) and narrowed its EBITDA forecast range for FY26.

Stantec (not covered): the group posted +3.6% OSG in 1Q26. Its adjusted EBITDA margin was up 70bp yoy to 16.9%. Backlog increased by ~13% yoy to a record \$9bn. Organic sales growth was slightly below previous quarters. This was due to headwinds in Canada and Infrastructure, where project timing weighed on performance, while its Buildings division also remained slightly negative. Underlying demand trends in other areas remain robust, with strong momentum in Water (+14%) and Energy & Resources (+9%), supported by infrastructure investment, energy transition, and demand for mission-critical facilities. Management highlighted strength in data centers, advanced manufacturing, and healthcare. Management described the weaker organic performance as timing-related rather than demand-driven and expects infrastructure activity in Canada and the US to recover in coming quarters. Stantec reaffirmed all its FY26 targets.

AtkinsRéalis (not covered): AtkinsRéalis has a strong start to the year, driven primarily by an exceptional performance in its nuclear segment, where revenues grew nearly +37% organically. Momentum in its Engineering Services Regions (ESR) unit was more moderate, with OSG of +5.0%. Performance in its ESR unit was impacted by the wind-down of US emergency response work, as well as softer activity in the Middle East and project timing effects. Looking ahead, the group expects demand to remain supportive in most of its units. It sees growth in Canada driven by transportation, power & renewables, industrial activity, and defense. It expects the UK & Ireland to be resilient thanks to water, aeronautics, and defence. In USLA, growth is expected to broaden as backlog converts and procurement improves, despite the drag from emergency response activity. In

AMEA, near-term uncertainty persists, but longer-term growth remains supported, particularly in Australia and Hong Kong. Nuclear is expected to sustain strong momentum. The company reaffirmed its FY26 guidance, which for its ESR unit factors in an OSG of +5% to +7% and an adjusted EBITDA margin of 16.5-17.5%, with activity weighted towards 2H. At the same time, AtkinsRéalis revised its long-term targets, lowering its ESR organic growth ambition for 2025-2027 to +5% to +7% (from >8% previously) and upgrading its Nuclear outlook, with this business now expected to generate 2027 revenue of ~\$2.6-3.0bn (from \$2.2-2.5bn previously) and an EBIT margin of 11-13% (unchanged compared to previous forecast).

WHAT DOES THIS TELL US ABOUT ARCADIS?

Water, Environment, Power: solid growth drivers this quarter

Water, environment, and power were the strongest areas of performance this quarter, supported by broad-based growth both in North America and Europe. Tetra Tech reported 8% yoy growth in water and environmental consulting, while Arcadis achieved 15% growth in its US water segment. WSP and Sweco also gave very positive feedback on this.

AI: still the source of intense discussions

Companies reported widespread internal deployment of AI tools and continued investment in proprietary platforms and AI-powered service delivery solutions, with high adoption rates among employees in their daily work. For our part, we believe the industry is still relatively immature in this area (relative to traditional IT services) and that civil engineering service companies will ultimately pass on most of the savings to their customers. However, we also believe this deflationary effect will be offset by clients allocating a larger number of projects for the same budget.

Services involved in the construction of data centers: a booming market

Data centers were one of the strongest areas of growth this quarter, supporting revenue expansion, backlog and order intake across the sector. Activity remained robust, particularly in the US and UK, driven by sustained investment linked to AI and increasing compute demand. As a reminder, Arcadis generates an annual revenue of approximately €100m from this activity.

The latest statistics from the Dodge Construction Network reinforce the credibility of these long-term growth forecasts. Construction planning rebounded in April, with the Dodge Momentum Index rising 6.2% month-over-month after a slow start to the year. This recovery is entirely attributable to strong activity in the data center construction sector. Commercial planning increased 8.1% month-over-month, while institutional planning rose 1.5%, with some improvement in traditional segments. Excluding data centers, commercial growth would have been only around 5% year-over-year, highlighting the exceptional contribution of this type of construction. The index now stands 14.1% above the April 2025 level, with 44 projects valued at over \$100m entering the planning phase during the month, including several large data center projects.

VALUATION METHODOLOGY**Arcadis**

Our price target of €48 is based on a target EV/EBITDA multiple of 11x aligned with that of comparable companies (weighted at 20%) and a discounted cash flow (DCF) model with WACC of 10%, terminal growth rate of 4.5% (weighted at 80%).

RISKS**Arcadis**

Downside risks: no rebound in residential and non-residential construction spending; weaker-than-expected GDP growth in Europe and the US; inability to pass on wage inflation in the price of projects billed to its clients.

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION**EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.
