

US Monthly (June)

Despite concerns about high gasoline prices, demand remains solid

Autodata reported a June US new vehicle sales SAAR of 16.67 million, higher than our forecast of 16.2 million. SAAR has remained above 16.0 million since March, which suggests that demand is solid despite concerns about the impact of high gasoline prices. Among Japanese automakers, Honda's sales remained strong and Toyota's market share (single-month basis) fell amid a cautious switchover to the new RAV4, while at mid-tier maker Subaru there were signs of a recovery in Outback sales. HEV penetration was 16.1% in June, down slightly compared with May, although the strong trend was unchanged. Amid ongoing concerns about how Middle East risk will affect demand, we think confirmation of solid demand in the US will foster a certain level of reassurance in the market.

- US SAAR continues to exceed 16.0 million amid lingering Middle East concerns:** Based on Autodata's announcement, June new vehicle sales SAAR in the US was 16.67 million, up from 16.21 million in May. SAAR has remained above 16.0 million since March 2026, which suggests solid demand. On a single-month basis, June sales were 1.38 million units (+3.4% YoY on a daily selling rate (DSR) basis), comprising 0.24 million sedans (+1.2%) and 1.14 million light trucks (+3.9%). While there are concerns about how the rise in gasoline prices caused by tensions in the Middle East will affect demand in the US, we think the apparent absence of a meaningful decline in demand will be viewed as reassuring.
- Sales performance of Japanese automakers:** Figures 1-3 show the sales performance of Japanese automakers. Among the three majors, Honda's sales remained brisk (134k units, +12.2% YoY) and its market share (single-month basis) remained high at 9.7%. At Toyota (213k units, +5.7% YoY), market share declined slightly in June to 15.4% and sales continued to decline MoM amid the switchover to the new RAV4, indicating tepid momentum. Among mid-tier companies, Mazda's CX-5 sales continued to decline YoY, so we may need to keep an eye on the pace at which the new model ramps up. Please refer to Figures 4 and 5 for inventory and incentive details.
- HEV growth continues:** Total EV sales in June came to 313k units (+8.3% YoY). BEV sales fell sharply, to 73k units (-30.5%), but HEV sales continued to grow strongly, reaching 222k units (+37.0%). HEV sales by major automakers were as follows: Toyota (110k units, +23.6%), Honda (35k units, +15.9%), Hyundai (21k units, +67.0%), Kia (22k units, +175.2%). Toyota is waiting for the new RAV4 to make a full contribution, and we do not expect its sales momentum, including HEVs, to accelerate in earnest until October.

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.
