

Chinese AI Models Catching Up, Vulnerabilities Accelerating

Adding TENB to Analyst Focus List, Upgrading QLYS to Neutral, CRWD and PANW Remain Well Positioned for Incremental Demand

Chinese models are catching up; demand poised to accelerate. In our April [note](#) on Project Glasswing, we walked through Anthropic's frontier-AI vulnerability discovery launch and concluded the resilience factors across our preferred names remained intact, with CRWD and PANW best positioned as essential defensive layers rather than disruption targets. The picture has moved since. Open-weight Chinese AI models are closing the gap with frontier models in vulnerability discovery capabilities. Meanwhile, we already see evidence of vulnerability acceleration, illustrated by CVEs tracked for the first quarter of the year (Figure 1). This comes at a time when enterprises are preparing to assess and manage a 'tsunami of vulnerabilities' expected across their IT estates, and the progress of the Chinese models likely accelerates levels of urgency. Accordingly, *we are adding **TENB** to our Analyst Focus List* as we view TENB as the best positioned exposure management vendor to help organizations face this threat. We are also *upgrading **QLYS** from Underweight to Neutral* as we think the company will also benefit across its core installed base, and we could see upside to growth expectations in spite of the execution issues that the company has been managing through. Outside of the exposure management vendors, we anticipate that the collapse of mean time to exploit will also accelerate demand across the rest of our coverage universe as the number of vulnerabilities (and likely exploits) accelerate. We continue to view consolidators that have effectively invested in their platforms as best positioned to benefit from incremental demand with **PANW** and **CRWD** being best positioned.

Open-weight models still fall short but benchmarks are converging. Open-weight benchmarks are reaching parity with frontier US models at the model layer. Figure 3 shows GLM 5.2 tying Anthropic Opus 4.8 and OpenAI GPT-5.5, with a specialized agentic harness lifting Opus 4.5. Figure 2 illustrates similar

See page 9 for analyst certification and important disclosures.

convergence dynamics, with GLM-5.1 approaching the US frontier cluster. However, real-world attacks require chaining multiple vulnerabilities into end-to-end exploits against hardened targets, and frontier models still lead there. The OpenAI GPT-5.6 system card, published June 25, indicates the new flagship models "can find vulnerabilities and pieces of exploits, but in cybersecurity testing they were unable to carry out autonomous, end-to-end attacks against hardened targets," and Figure 4 shows GPT-5.6 roughly doubling GPT-5.5 on Easy and Medium FrontierCyber challenges while Elite-difficulty success held at 0% for both. However, individual benchmark outperformance isn't directly reflective of autonomous agentic capabilities, where frontier models maintain their lead.

Tenable: Best positioned to capture acceleration of exposure management demand. We think an acceleration in vulnerability volumes will likely lift exposure management vendors with VM exposure, and we view TENB as best positioned to benefit. In addition to greater asset coverage under the TENB platform, acceleration of the vulnerability landscape could drive better new product adoption across the company's exposure management platform, in our view. Hexa AI went GA on May 20, 2026 inside Tenable One Foundation and Advanced and is not available to standalone VM customers, making the product a concrete reason in the cycle to upgrade off legacy scanning. Hexa is Claude-powered per the joint Anthropic-Tenable announcement, and the Exposure Data Fabric, built on two decades of platform telemetry, is the trusted-execution layer that lets the agent act without operational disruption. Roughly 30% of customers are on Tenable One today, leaving two-thirds of a 40K-plus customer footprint as upsell runway, with 2,000-plus customers at over \$100k in ACV anchoring the migration economics. Tenable One was 41% of new business in 1Q26 with ASP uplifts in the 6% to 60% range, and Hexa's agentic engine resolves non-CVE exposures, where Tenable's own telemetry attributes 63% of breach entry points despite their making up only 37% of findings. TENB trades at 12.8x EV/FCF on CY27 against an FY29 framework targeting HSD/LDD revenue growth, 28% operating margin, 31% unlevered FCF margin, and Rule of 40, a multiple that does not yet reflect the category re-rate. We see the setup as favorable and the risk-reward asymmetric. We are adding Tenable to the Focus List with a Dec 2027 price target of \$40.

Qualys: A rising tide could lift this boat too, in spite of execution challenges. The same vulnerability explosion that lifts the VM category lifts QLYS off the UW floor, even with execution lagging. The company is a Project Glasswing and Daybreak participant, runs over 200mm agents worldwide, and has shipped a multi-agent platform with Agent Val GA for autonomous patch orchestration, Agent Nyra for threat-informed prioritization, Agent Sid for exposure and asset context, Agent Sara for risk elimination, and ROCKy as the conversational layer on top of the Risk Operations Center. Agent Grant is emerging as an identity play, with the company citing "over 74% of breaches" involving a compromised identity. The ROC has been operational with the customer base for over a year and is the 100% sales focus for 2026. The margin profile offers valuation support: adjusted EBITDA margin of 47% has held flat from 2022 through 1Q26, Rule of 40 is 57%, and FCF margin is 45% against a peer-median EBITDA margin of 26%. However, bookings mix has been a headwind. ETM and CSAM are 11% of LTM bookings, up only 3 points in two years, with VMDDR still 50% of mix, and the absence of a multi-year financial framework leaves the platform-value question unanswered. Until that mix shifts and a long-term framework is disclosed, we think QLYS captures less of the vulnerability tailwind than Tenable. We are moving Qualys to Neutral from Underweight, and establish a Dec 2027 price target of \$139.

Share consolidators with favorable AI exposure; CRWD and PANW remain Overweight. We continue to read the Mythos moment as a structural shift, and CRWD and PANW are the cleanest beneficiaries, with the demand-side acceleration running through vendors that were already winning on coalition standing, platform consolidation, and AI-native execution. CRWD is the only vendor with standing across all three frontier-AI security coalitions, as a Glasswing launch partner, an OpenAI Daybreak partner, and the founder of Project QuiltWorks. AIDR has emerged as the new platform pillar, with management indicating the market could prove larger than EDR because it covers seven attack surfaces against EDR's one. The company cited "\$2.5tn+ in forecasted worldwide AI spending against only a low single-digit percentage of organizations with an advanced AI security strategy" as the gap AIDR converts. Falcon is the runtime defender for AI infrastructure across GPUs, neoclouds, token factories, and agentic applications. PANW was another of the first 12 named Glasswing partners, which our channel work indicates was an initial CIO procurement filter as enterprises shortlisted vendors. The data flywheel can help close the false-positive and last-mile gaps frontier models alone cannot solve, and Mythos-related consulting revenue is already accelerating for GSIs. Cortex XSIAM remains the consolidation engine, with Cyberark and Chronosphere extending the platform into identity and observability. We remain Overweight on both, with an upward bias to estimates from here.

Equity Ratings and Price Targets

Company	Ticker	Mkt Cap (\$ mn)	Price (\$)	Rating		Price Target			
				Cur	Prev	Cur	End Date	Prev	End Date
Qualys	QLYS US	4,578.33	128.32	N	UW	139.00	Dec-27	87.00	Dec-26
Tenable	TENB US	3,941.47	33.49	OW	n/c	40.00	Dec-27	35.00	Dec-26

Investment Thesis, Valuation and Risks

Qualys *(Neutral; Price Target: \$139.00)*

Investment Thesis

We believe that top-line growth for Qualys is currently reliant on existing customer expansion rather than new customer additions, and consequently view the detection and remediation product adjacencies as key to successful revenue expansion beyond core VA/VM offerings. However, we remain cautious as valuation remains elevated for a company with single-digit growth, contracting margins, and declining FCF. We see better risk/reward elsewhere in our coverage.

Valuation

We are establishing a Dec 2027 price target of \$139, which is derived from a 13x EV/CY27E FCF multiple (FCF of \$276mm for CY27), a substantial discount to our low growth coverage, which we believe is warranted due to execution risk.

Risks to Rating and Price Target

(+) Accelerated adoption of Cloud Agent Platform, traction with platform approach, rate of SMB market penetration. (–) Sales execution headwinds, slower bookings mix shift toward ETM/CSAM, margin contraction from accelerating S&M investment.

Investment Thesis, Valuation and Risks

Tenable (*Overweight; Price Target: \$40.00*)

Investment Thesis

We believe Tenable's growth expectations are reasonable and see potential for upside as the company continues to execute as a best-of-breed exposure management provider. Looking at the demand environment as a whole, we believe there remain plenty of greenfield opportunities as enterprises shift towards adoption of formal VA/VM programs in an elevated threat environment.

Valuation

We are establishing a Dec 2027 price target of \$40, which is derived from a 14x EV/CY27E FCF multiple (FCF of \$306.6mm for CY27) and a 3.7x EV/Sales multiple (sales of \$1,168.2mm), a substantial discount to our low growth coverage, which reflects the company's exposure to lower growth market segments, namely VM.

Risks to Rating and Price Target

(-) Federal exposure, exposure to lower priority spend, new management team.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe). NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report,

the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Essex, Brian : C3.ai (AI), Cellebrite (CLBT), Check Point Software (CHKP), CrowdStrike (CRWD), Elastic (ESTC), Fortinet (FTNT), GitLab (GTLB), International Business Machines (IBM), JFrog (FROG), Netskope (NTSK), Okta (OKTA), Palo Alto Networks (PANW), Qualys (QLYS), Rapid7 (RPD), SailPoint (SAIL), SentinelOne (S), Tenable (TENB), Varonis (VRNS), Zscaler (ZS)

J.P. Morgan Equity Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	83%	79%	74%
JPMS Equity Research Coverage*	49%	39%	13%
IB clients**	94%	93%	85%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other

services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts’ views and research, and it may also engage in transactions for its own account or for its clients’ accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
