

Bayer AG (BAYGn.DE)

Expecting a broadly inline 2Q; Pharma delivery is key post-litigation

BAYGn.DE

12m Price Target: €62.50

Price: €53.36

Upside: 17.1%

For 2Q26, our forecasts are 2% below Visible Alpha Consensus on Group sales but broadly in line on EBITDA pre-special, driven by our optimism on Pharma margins. We expect FY26 guidance to be reiterated. With respect to the glyphosate litigation, following the favorable SCOTUS ruling for Bayer, the fairness hearing for the Class Settlement has been delayed to August 19th, which gives Bayer more time to potentially encourage any remaining opt-outs to join the settlement. Additionally, we believe the consolidation of the glyphosate business into Ruveon could effectively ringfence future glyphosate liabilities, with both the settlement and any subsequent liabilities residing within Ruveon rather than Bayer. Beyond litigation, we expect investor focus to shift to a potential break-up of the company (as discussed [here](#)) and an unwind of the conglomerate discount which is c.€10 in our SOTP. With this note, we roll forward our DCF valuation, reduce the discount we apply to the Pharma business (to 15% from 25%) given the sector-like outlook, but balanced by lower historical R&D productivity, and lower our WACC assumption (to 8.8% from 9.3%) due to reduced litigation risks. We remain Buy rated with our price target up 14% to €62.5 (prev. €55) which implies c.17% upside to the share price at market close on July 3rd.

Bayer is due to report on Aug 4 at 6.30am BST.

- **For 2Q26, our forecasts are 2% below Visible Alpha Consensus on Group sales but broadly in line on EBITDA pre-special, driven by our optimism on Pharma margins.** We are 2% below Visible Alpha Consensus estimates on Group Sales, driven by our cautious view on the generic pressure on Xarelto and Eylea for Pharma and phasing for Corn and Soybean seed and traits in 2Q for Crop. We are less behind on EBITDA-pre special (1% behind) due to our optimism on Pharma margins. On Core EPS, we are 8% behind, potentially due to consensus

calculation issues as we are broadly in line on Core EBIT and Core Net income.

- **We expect FY26 guidance to be reiterated.** Visible Alpha Consensus estimates are broadly in line with the mid-point of the company's guidance range on Group sales/EBITDA-pre special and slightly above on Core EPS (3% above).
- **Litigation - what's next? Ruveon could ultimately separate long-tail glyphosate litigation risk from Bayer, in our view.** Following the positive US Supreme Court ruling, the fairness hearing for the Class Settlement has been delayed to August 19th (from July 9th), which gives Bayer more time to potentially encourage any remaining opt-outs to join the settlement. In addition, Bayer announced that it has consolidated all glyphosate operations into a new fully owned entity, Ruveon. Operationally, the structure allows Ruveon management to focus on running a strategically distinct business from the other Crop Protection businesses in the Bayer portfolio. However, we see scope for a future spin-out/separation of the business, which is non-core to the Crop Protection business. Such a transaction could effectively ringfence future glyphosate liabilities, with both the settlement and any residual litigation exposure remaining within Ruveon (with Bayer funding the settlement payments before any possible separation).
- **We increase our 12m price target 14% to €62.5 from €55, driven by reduced litigation risks and a lower WACC.** Our estimates for sales are 0-1% higher for each division and the Group across FY26-30, driven by FX. As a result, our estimates on Core EPS are 1% higher across FY26-30. Our price target moves up 14% from €55.0 to €62.5, driven by rolling forward our DCF, reducing the discount we apply to the Pharma business (to 15% from 25%) given the sector-like outlook, but balanced by lower historical R&D productivity, and a lower WACC assumption (to 8.8% from 9.3%) due to reduced litigation risk that impacted our company beta.

2Q26 preview table

2Q26 GSe 2% below consensus on Group Sales but broadly in line on EBITDA pre-special, driven by our optimism on Pharma margins. We are 8% behind on Core EPS potentially due to consensus calculation issues as we are broadly in line on Core EBIT and Core Net income. We are 2% behind Visible Alpha Consensus estimates on Group Sales, driven by our cautious view on the generic pressure on Xarelto and Eylea for Pharma and phasing for Corn and Soybean seed and traits in 2Q for Crop. We are less behind on EBITDA-pre special (1% behind) due to our optimism on Pharma margins relative to consensus. On Core EPS, we are 8% behind, which appears to be due to consensus calculation issues as we are broadly in line on both Core EBIT and Core Net income.

We expect the company to reiterate FY26 guidance. We forecast a slightly stronger FX

headwind relative to the last update at March 2026 ([Exhibit 2](#)). Visible Alpha Consensus estimates are broadly in line with the mid-point of the company's guidance range on Group sales/EBITDA-pre special and slightly above on Core EPS (3% above).

Upcoming newsflow

We expect investor focus on the **fairness hearing** regarding the glyphosate class settlement, which is scheduled for August 19th, and potential company updates on opt-outs. Within Pharma, a key asset we are watching is umiposgene parvec a Phase 2 gene therapy for congestive heart failure, which could be a springboard for the AskBio platform, if Phase 2 data are successful.

Key focus areas for the call

- **Implications from the US glyphosate business consolidation:** On July 2nd, Bayer announced the consolidation of the US glyphosate business into Ruveon. We expect investor questions on the impact on Bayer from the current glyphosate settlement plan and potential future glyphosate cases not covered by the plan in the context of the consolidation.
- **Management confidence regarding the glyphosate settlement fairness hearing and updates on opt-outs.** Following the favorable SCOTUS ruling for Bayer (see our note [here](#)), we expect questions on Bayer's strategy regarding the glyphosate settlement, confidence in passing the fairness hearing, as well as whether the number of opt-outs met Bayer's threshold.
- **Bayer's conglomerate structure.** With a major litigation overhang partially lifted, we expect investor focus on Bayer's conglomerate structure and whether a Consumer Health spin-off could be an option.
- **Hot and dry weather - risks to the FY26 Crop Science guidance.** Given the recent heatwaves across the Northern Hemisphere, we expect focus on how this impacted Farmer planting patterns as well as the expectations for Crop yields and the degree of seed returns in 3Q26 vs historical levels.

Forecast Changes

We roll forward our DCF by 6 months and update our forecasts based on recent FX, IQVIA script trends, and company commentary. Our estimates for sales are 0-1% higher for each division and the Group across FY26-30, driven by FX. As a result, our estimates on Core EPS are 1% higher across FY26-30. In addition, **1)** we reduce the discount we apply to the Pharma division vs. Peers from 25% to 15% given that we see the Bayer business with a similar mid-single digit revenue growth outlook vs. the sector, but less of a strong track record in drug discovery/development to help offset patent expirations in the 2030s; and **2)** we lower our WACC assumption from 9.3% to 8.8%, driven by reduced litigation risks.

As a result, our price target moves up 14% from €55.0 to €62.5, mainly **driven by our reduced Pharma valuation discount and lower WACC.**

GSe vs Consensus

For FY26-30, we are broadly in line with Visible Alpha Consensus on Total Sales but for FY29-30, we are 6-9% ahead on EBITDA pre-special items, driven by our optimism on Pharma margins largely due to an improvement in the Pharma division, led by high-margin sales for Kerendia and asundexian.

Valuation and Risks

We are Buy rated on Bayer. Our DCF valuation (50% weighting in the PT) is €65 per share (vs. €54 previously) which assumes an 8.8% WACC (vs. 9.3% previously; driven by reduced litigation risks following the SCOTUS decision and the announced consolidation of glyphosate business into Ruveon) and TV growth rate of 1.5% (unchanged). Our SOTP-based valuation (50% weighting in the PT) is €60 per share (vs. €56; driven by a lower Pharma discount, in part reflecting solid recent Nubeqa and Kerendia prescription trends). This leads to our 12-month target price of €62.5 (vs. €55.0 previously).

Key downside risks to our view and price target: (1) Earnings momentum in Crop Science returning to negative territory; (2) Greater-than-anticipated margin impact from Pharma generics holding back divisional earnings development; (3) Negative outcomes and slower resolution across the various litigation processes; (4) Slower-than-anticipated realisation of the cost and operational benefits from the new DSO operating model.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DA CF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied

upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
