

EM Money Trail

EM outflows broadening as well as deepening

EM equity fund outflows exacerbated this week to -\$7.5bn from -\$4.3bn last week. Outflows were equally across ETFs (-\$3.7bn, -\$3.1bn last week) and non-ETFs. The deceleration in non-ETF outflows we noted over the prior two weeks didn't hold this week, with redemptions widening to -\$3.8bn (-\$1.2bn last week). All regional funds were net-sold this week. GEMs funds saw a sharp rise in sell-off to -\$3.0bn from -\$363mn last week, while outflows from Asia ex-Japan also picked up to -\$4.4bn from -\$3.6bn last week. Redemptions eased in LatAm (-\$225mn, -\$268mn last week) and EMEA (-\$5mn, -\$75mn last week). EM ex-China funds saw marginal inflows (+\$50mn). YTD, EM equity funds are +\$66.8bn (from a peak of +\$83.3bn in April), of which ETFs are +\$78.2bn and non-ETFs are -\$11.5bn.

Market-level flows. Taiwan continued to attract subscriptions for the second week, albeit slower (+\$3.8bn, +\$8.7bn last week) while redemptions in Korea worsened again (-\$7.5bn) after easing to -\$1.3bn last week. Outflows in Korea have added up to -\$37.6bn in the past four weeks and -\$69.6bn YTD (see [report](#) for a detailed discussion). Outflows worsened sharply in India (-\$4.1bn, from -\$454mn last week) but continued to slow in Brazil (-\$394mn, from -\$473mn last week). Thailand (+\$147mn, +\$17mn last week) was the only market besides Taiwan that saw inflows. The rest of EM ASEAN saw large outflows: Malaysia (-\$625mn), Indonesia (-\$612mn), and the Philippines (-\$124mn). In EMEA, Qatar (-\$65mn), Dubai (-\$41mn) and Türkiye (-\$91mn, one-week lag) saw moderate outflows.

Consensus Asset Allocation

We publish a Consensus Asset Allocation report every month, where we review the asset allocation of major emerging market fund managers relative to the MSCI EM index as at the end of the reporting month. We use two approaches. Our preferred approach is to count the number of managers that are meaningfully OW or UW a market, defined as greater than 2% deviation from the benchmark. The results are displayed in the tables. The other is a simple average of the managers' country allocation compared with the benchmark. Extreme positions of a few managers distort this analysis.

This report reviews the allocation of emerging market funds for 56 managers surveyed by EPFR Global as of end-April 2026.

Consensus overweight markets: Brazil, Korea, Mexico

Consensus underweight markets: China, South Africa, Taiwan, India, Indonesia, Malaysia, Thailand, Saudi Arabia, Philippines, Türkiye, Czech, Egypt, Hungary, Peru, Poland, Chile, Greece, Colombia, UAE, Qatar, Kuwait.

EM funds increased allocation to China, Taiwan, and Thailand in April. Net underweights in China+HK, Thailand and Taiwan decreased to 2 (from 7), 17 (from 19) and 24 (from 26), respectively. **EM funds decreased exposure in Brazil, Korea and smaller markets.** Net overweights in Brazil and Korea decreased to 24 (from 27) and 2 (from 5) respectively. Net underweights in Indonesia, Turkey, Greece and Peru increased to 17 (from 15), 19 (from 18), 23 (from 21) and 28 (from 26), respectively. **India remains the biggest underweight amongst the big EM countries.**

The median fund outperformed the benchmark by 2.2%. The sectors and markets that significantly outperformed in the past month were Korea IT, Korea Consumer Discretionary, Taiwan IT, China IT, Mexico Materials, Korea, Taiwan and Peru. Price Momentum, Earnings Momentum and Size are outperforming quant factors. Volatility, Reversion and Beta were key underperformers. (2) The fund weightings are simple averages of global emerging market funds country weights tracked by EPFR. The survey covers 56 fund managers. (3) OW is greater than 2% overweight versus the MSCI benchmark. UW is less than -2% of benchmark weighting (4) Fund weightings are as of 30 April 2026 and MSCI weightings as of 1 May 2026. Numbers in brackets are the previous month's values. Potentially, Chinese stocks have been misclassified as Hong Kong, hence we show the combined weight for Hong Kong and China. Hong Kong investment may be providing non-China exposure.

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.
