Biopharma | North America

A picture is worth a thousand words

Comprehensive US drug market analysis (IQVIA Rx). The latest weekly Total Prescription YoY growth (wk ending 7/10) was -5.3% vs. +9.2% last wk and +1.2% over the past 12 wks.

For week ended Jul 10, US total market weekly TRx YoY change was -5.3% vs. +4.0% year ago (Exhibit10). Rolling 4-week TRx YoY was +1.3% and rolling 12-week TRx YoY was +1.2%. Extended unit (EUTRx) weekly YoY growth was +5.6%, below TRx YoY (Exhibit 13). **Sequential weekly TRx** growth was -2.8% compared to +0.1% week before. Exhibit17 – Exhibit19 depict YoY momentum for key products.

BMY's Cobenfy was approved for schizophrenia on 9/26/24. Scripts are ~3,300 for the week vs ~3,220 last week. For full details on our views on the launch see our note "[Contextualizing Cobenfy launch expectations](#)", where we discuss that the analogs we are most focused on are the schizophrenia volumes from the Rexulti, Caplyta, and Lybalvi launches. We estimated that to achieve 2026 consensus expectations Cobenfy TRx needs to track at ~2-5x the volumes from those launches (see Exhibit 1) based on the implied consensus trend, as '26 estimate is \$289mn, which implies ~197K TRx are required to reach consensus estimates (assuming a ~\$1,450 net price, in line with our estimated price in our BMY model). We also show the Cobenfy launch to date and our estimate of the trajectory to achieve consensus relative to recent anti-psychotic launches, with TRx combined across all indications, in Exhibit 2 below for reference as well.

GILD's Yeztugo vs. Descovy vs. Apretude launch comparison chart (Exhibit 4). GILD's Yeztugo (lenacapavir) was approved on 6/18/2025. Latest week total TRx (oral + injectable) were ~1,750 vs. ~1,310 previous week, and last week TRx for injectable were ~1,030 vs. ~750 previous week. Using a linear method, we project the weekly injectable TRx needed to achieve 2Q26 cons, utilizing 1Q26 implied \$/script (Exhibit 5), but acknowledging we have limited visibility here at this point in the launch. Our analysis of IQVIA prescription data implies only modest incremental script growth is required to achieve 2Q26 VA cons of US \$223mn, based on applying the 1Q capture ratio to 1Q script volume/Yeztugo WAC, though we note there are several caveats including GTN dynamics. Channel mix is a key swing factor. We use price/IQVIA Rx to quantify the impact of channel mix, and our analysis brackets consensus with projected 2Q26 Yeztugo sales of \$208mn/\$251mn using 1Q26/4Q25 price/Rx. See our recent 2Q pre-preview [HERE](#). Bigger picture, we note Yeztugo has already secured 95% payor coverage. Moreover, most payers do not require copays, and only a limited number have prior authorization or step-edit requirements, which is an indication that most payers are aligning with USPSTF guidelines. Overall, we are encouraged by strong PrEP market growth (+14% y/y) and sustained Descovy share (>45%), which reinforce our confidence in 2026+ PrEP estimates (Yeztugo MSe \$1,148mn US (\$1,155mn WW) vs. VA cons \$999mn US (\$1,059mn WW)) and

GILD's US guidance of ~\$1.0bn. See our Yeztugo deep dive [HERE](#).

VRTX's Journavx was approved for acute pain on [1/30/25](#). Scripts are ~23,460 for the week vs ~22,770 last week. VRTX notes that hospital scripts are not captured by IQVIA - hospital/retail mix 45%/55% in 2025, and it recently commented that the average script duration is 10-11 days vs. 14 days prior, with the duration expected to increase in 2026 ([LINK](#)). To achieve 2026 VA cons estimate of \$ 241 mn, we estimate that ~ 1.2 / 2.1 mn total scripts are needed for 12-day script duration at GTN of 50%/70% respectively. Based on quarterly Journavx sales and scripts, we estimate the GTN to be around 65-75% for the past few quarters. Using a linear method, we project the weekly TRx needed to achieve cons estimate, by flexing the GTN from 50% to 70% for 12-day scripts ([Exhibit 3](#)). In addition, we include a line where the actual scripts are grossed up with estimated hospital scripts.

JNJ's Icotyde, partnered with Protagonist (not covered), was approved for the treatment of moderate-to-severe plaque psoriasis on 3/18/26 ([LINK](#)). Prescriptions were ~800 for the week vs ~470 last week. On JNJ's 1Q26 earnings call the company highlighted a strong initial launch noting day-one readiness with the first patient treated within 24 hours, noting ~1,500 patients have received prescriptions from more than 1,000 unique prescribers (~3 weeks post-launch, by our estimate), but did not comment on sampling dynamics. Additionally, we connected with a dermatologist who has prescribed Icotyde to ~21 patients. Early feedback suggests it is viewed as a compelling oral IL-23 option for moderate psoriasis with potential to expand the treated patient pool, though near-term uptake may be tempered by sampling friction (see our takeaways [HERE](#)). As such, we believe early IQVIA script data may not fully capture underlying prescribing dynamics. We estimate that achieving 2026 U.S. consensus revenue of \$270mn would require Icotyde TRx to ramp broadly in line with Otezla/Rinvoq (see [Exhibit 6](#)). This implies ~33-43k TRx are required in 2026, assuming a \$8,285/month list price and 0-25% gross-to-net. We also compare Icotyde's launch trajectory to recent psoriasis biologic and oral launches, alongside our estimated path to consensus.

New chart added. We added a new chart for tracking Biosimilar Tysabri monthly sales share [Q](#).

Immunology pricing analysis. We updated the charts for 1Q26 ([Exhibit 77](#) - [Exhibit 82](#)). We have divided the historical quarterly reported sales for Stelara, Tremfya, Skyrizi, Rinvoq, Dupixent and Cosentyx with respective quarterly IQVIA TRx to see how volume from additional indications impacts price/script.

ABBV's Skyrizi and Rinvoq. Please refer to [Exhibit 91](#) to [Exhibit 95](#) for key Skyrizi charts and [Exhibit 96](#) to [Exhibit 100](#) for key Rinvoq charts. Skyrizi and **Tremfya** latest 52-week NRx trend chart ([Exhibit 7](#)).

Alzheimer's launch. See [Exhibit 141](#) to [Exhibit 144](#) for LLY/Kisunla and BIIB/Eisai Leqembi sales charts.

COVID vaccine tracking exhibits. See COVID vaccine weekly & monthly TRx launch trend chart in [Exhibit 164](#) to [Exhibit 167](#).

Comprehensive biosimilar adoption analysis. See adoption of biosimilars across various branded drugs in these charts— [Actemra](#), [Avastin](#), [Epogen](#), [Herceptin](#),

Humalog , Humira , Lantus , Lucentis , Neulasta , Neupogen , Prolia , Remicade , Rituxan , and Stelara . For IV drugs, we track monthly IQVIA sales only. See **Exhibit 20** for Biosimilars U.S. approval/launch time-line.

- **JNJ: Stelara biosimilar TRx share and sales charts (Exhibit 37 & Exhibit 38)**. Biocon's (not covered) Yesintek has ~78% and AMGN's Wezlana has ~18% share in latest week.
- **AMGN: Prolia biosimilar TRx share chart (Exhibit 34)**. Sandoz's Jubbonti has ~25% TRx share in latest week, Celltrion's Stoboclo has ~12% vs branded Prolia share at ~56%.

**Humira (since 8/23/19), Vyndaqel (5/31/19), Skyrizi (5/24/19), and Evenity (5/10/19): Prescriptions are restricted, due to a contractual condition between a supplier and the manufacturers.

Source: IQVIA

IQVIA total market prescription and sales trends

The IQVIA databases are different for prescription (Rx) and sales (\$), and the IQVIA sales dollars only reflect list prices of drugs and not rebates/discounts. **TRx** represents total prescription dispensed including refills. **NRx** represents new prescriptions—that is, all scripts written except refills. However, the NRx also includes renewals—the script patients get when they run out of refills.

Exhibit10: Total Market weekly YOY TRx growth

Note: TRx= Total Prescription. See definition above.
Source: IQVIA

Exhibit 11: Total market absolute TRx and NRx

Note: NRx= New Prescription. See definition above.
Source: IQVIA

Extended unit (EU) data trends were more positive than prescription (Rx) trends suggesting physicians were writing more 90-day prescriptions during that period (Exhibit 12 and Exhibit 13). EU figures (EUTRx / EUNRx) may represent a more accurate picture of demand because they take into account larger/longer-duration prescriptions while NRx / TRx figures count both a 30-day and a 90-day prescription the same.

Exhibit 12: Total market weekly NRx and EUNRx YOY growth since January 2020

Source: IQVIA

Exhibit 13: Total market weekly TRx and EUTRx YOY growth since January 2020

Source: IQVIA

Exhibit 14: U.S. market* including brands and generics monthly gross sales growth

*IQVIA reports brands, branded generics, generics and others.
Source: IQVIA

Exhibit15: Total market Branded* pharmaceutical monthly YOY volume vs. sales dollar growth

*Includes Brands and Branded Generics. Note IQVIA includes some branded drugs in branded generics (e.g. Lidoderm)
Source: IQVIA

Exhibit 16: Total market Generic pharmaceutical monthly YOY volume vs. sales dollar growth

Source: IQVIA

The IQVIA databases are different for sales \$ and unit volumes, and the IQVIA sales dollars only reflect list prices of drugs and do not reflect rebates/discounts. We believe that branded net price realization is about half of what is implied by subtracting sales dollar growth minus volume growth.

Exhibit 24: Biosimilar Epogen 52-week TRx share. Epogen is administered as an IV as well as Sub-Q

Source: IQVIA

Herceptin

AMGN's **Kanjinti** launched in July-19 and has gained share rapidly. Mylan/Biocon's **Ogivri** launched on December 2, 2019, PFE's **Trazimera** was launched on February 19, 2020 and Teva's **Herzuma** was launched on March 16, 2020. OGN's **Ontruzant** was launched on April 16, 2020 and data are available from Jun-20 in IQVIA. We have also added Daiichi's brand drug Enhertu (Novel brand), which was launched in Dec-19 and is approved for treating HER2-positive breast cancer.

Source: IQVIA

Humalog

See [Exhibit 66](#) for weekly TRx share chart.

Exhibit 26: Biosimilar Humalog monthly sales share. We include Humalog A.G. (Insulin Lispro) in Humalog franchise

Source: IQVIA

Humira

Humira first biosimilar AMGN's Amjevita has had slow launch based on IQVIA TRx (data are restricted). Three other biosimilars have launched out of which two (Hadlima and Hyrimoz) have started to appear in IQVIA, but have limited TRx data due to data restriction, as further discussed above.

Exhibit 27: Biosimilar Humira 52-week TRx share

Source: IQVIA

Lantus

See [Exhibit 68](#) to [Exhibit 72](#) for weekly charts on biosimilar Lantus.

Exhibit 28: Biosimilar Lantus monthly sales share

Source: IQVIA

Lucentis

BIIB and Samsung Bioepis's **Byooviz** was launched on June 2, 2022 and data are available from Jul-22 in IQVIA. Coherus's Cimreli was launched on October 3, 2022. IQVIA (announced on 11/4/22) prescriptions are restricted, due to a contractual condition between a supplier and the manufacturers.

Exhibit 29: Biosimilar Lucentis monthly sales share

Source: IQVIA

Neulasta

Neulasta biosimilar Biocon's Fulphila market share (monthly sales) has flattened after January inflection, but there may be a reporting restriction in place. Biocon's Fulphila (biosimilar Neulasta) sales are available in IQVIA in July 2018. On Aug. 24 2018, IQVIA noted that a reporting restriction was implemented in the mail channel for a portion of the sales and prescription volumes for Fulphila, due to a contractual condition between a supplier and the manufacturer. IQVIA has not been able to confirm restriction since this supplier has never dispensed this product.

Sandoz's biosimilar Ziextenzo picked up share in 2H20, but has flattened since the launch of **PFE's Nyvepria** in January 2021.

Exhibit 30: Biosimilar Neulasta monthly sales share

Prolia

Exhibit 34: Biosimilar Prolia 52-week TRx share

Note: Bomynta appears in IQVIA but TRx are sporadic

Source: IQVIA

Remicade

Remicade biosimilar PFE's Inflectra adoption has decreased in recent months. OGN's Renflexis is slow to be adopted. PFE's **Inflectra** has been on the market for >3 years (launched in mid Dec-16). MRK's **Renflexis**, launched in late July-17, started to appear in IQVIA from September, 2017 only. We believe payers are choosing not to support the biosimilar because the pricing is not low enough below the net pricing of branded Remicade and because they would lose branded rebates on existing Remicade patients who remain on the brand. AMGN's **Avsola** was approved on Dec. 6, 2019 and launched in July 2020. Pfizer has decided not to launch Ixifi in the US.

Exhibit 35: Biosimilar Remicade monthly sales share. We track IQVIA sales rather than Rx because Remicade is an IV

Source: IQVIA

Rituxan

Teva's **Truxima** was launched in Nov-19 and is approved for all indications except pemphigus vulgaris (PV), which is immaterial. Pfizer's **Ruxience** launched on January 23, 2020. It currently lacks the rheumatoid arthritis (RA) and pemphigus vulgaris (PV) indications. Amgen's **Riabini** was launched in Jan-21 and was approved for RA on June 6, 2022. Per Roche, RA comprises ~20%+ of branded Rituxan sales. Commentary suggests that skinny-labels are more of an issue for physicians than payers.

Cardiovascular

Anti-Coagulants

Exhibit40: Anti-coagulants TRx market share

Source: IQVIA [Note: Total anti-coagulant market includes drugs above plus Warfarin/Coumadin TRx]

Exhibit41: Anti-Coagulants TRx YOY

Source: IQVIA

Exhibit42: Novel oral anti-coagulants launch comparison

FDA approved Xarelto for deep vein thrombosis in July 2011; launch trends above capture Xarelto TRx following AF approval in Nov. 2011 (i.e. exclude Xarelto TRx in July-Oct). Pradaxa launched in week of 10/29/10; Eliquis launched in week of 1/18/13; Savaysa launched in week of 2/13/15

Source: IQVIA

Lipid lowering

Exhibit 43: Lipid lowering absolute TRx: Amarin's Vascepa, Sanofi's Praluent, AMGN's Repatha. Vascepa is EPA indicated for high triglycerides. Praluent and Repatha are PCSK9s indicated for high LDL. Nexletol is ACLi indicated for high LDL.

Source: IQVIA

Exhibit 44: PCSK9 TRx share: Sanofi's Praluent vs AMGN's Repatha. We do not include Vascepa because it is indicated for high triglycerides and not LDL. Nexletol is indicated for high LDL so there may be minimal usage in combination with PCSK9.

SGLT-2 only

Exhibit55: SGLT-2 TRx market share

Farxiga franchise includes Farxiga and Xigduo XR. Jardiance franchise includes Jardiance, Glyxambi, and Synjardy. Steglatro franchise includes Steglatro and Steglujan. MRK records global revenues, which is recognized after MRK sells to 3rd party; PFE and MRK operating profit split is 40/60. PFE records revenues on product sold to MRK; product is sold at a price that will achieve PFE's share of the profit split. PFE revenues will be reflected on its own product revenue line (not in Alliance Revenues).

Immunology

Exhibit 75: Autoimmune drugs with their MOA and approved indications

Drug name	Route	MOA	Indication
Cimzia (UCB)	SQ	Anti-TNF	RA, Psoriatic arthritis, Ankylosing spondylitis, Crohn's disease, Plaque psoriasis, Axial spondyloarthritis (nr-axSpA)
Enbrel (Amgen)	SQ	Anti-TNF	RA, Idiopathic arthritis, Psoriatic arthritis, Ankylosing spondylitis, Plaque psoriasis
Humira (Abbvie)	SQ	Anti-TNF	RA, Idiopathic arthritis, Psoriatic arthritis, Ankylosing spondylitis, Crohn's disease (adult & Ped), UC, Plaque psoriasis, Uveitis, Hidradenitis Suppurativa
Remicade (JNJ/Merck)	IV	Anti-TNF	Crohn's disease, UC, RA, Ankylosing spondylitis, Plaque psoriasis, Psoriatic arthritis
Simponi (JNJ)	SQ	Anti-TNF	Ankylosing spondylitis, Psoriatic arthritis, RA, UC
Kineret (Sobi)	SQ	IL-1	RA, Cryopyrin-Associated Periodic Syndromes
Dupixent	SQ	IL-4	Atopic dermatitis, Asthma
Actemra (Roche)	IV+SQ	IL-6	RA, Idiopathic arthritis, Cytokine Release Syndrome, Giant Cell Arteritis
Kevzara (SNY/REGN)	SQ	IL-6	RA
Ebglyss (LLY)	SQ	IL-13	Atopic dermatitis
Cosentyx (Novartis)	SQ	IL-17	Plaque psoriasis, Psoriatic arthritis, Ankylosing spondylitis, Axial spondyloarthritis (nr-axSpA)
Siliq (Bausch)	SQ	IL-17	Plaque psoriasis
Taltz (LLY)	SQ	IL-17	Plaque psoriasis, Psoriatic arthritis, Ankylosing spondylitis, Axial spondyloarthritis (nr-axSpA)
Bimzelx (USB)	SQ	IL-17	Plaque psoriasis
Stelara (JNJ)	IV+SQ	IL-12 and IL-23	Plaque psoriasis, Psoriatic arthritis, Crohn's disease, Ulcerative colitis
Omvoh (LLY)	IV+SQ	IL-23	Ulcerative colitis
Skyrizi (Abbvie)	SQ	IL-23	Plaque psoriasis, Psoriatic arthritis
Tremfya (Jnj)	SQ	IL-23	Plaque psoriasis, Psoriatic arthritis
Icefynd (Jnj)	Oral	IL-23	Plaque psoriasis
Ilumya (Sun)	SQ	IL-23	Plaque psoriasis
Nemluvio (Galderma)	SQ	IL-31	Atopic dermatitis, Prurigo nodularis
Xeljanz/XR (PFE)	Oral	JAK	RA, Psoriatic arthritis, Ulcerative colitis
Cibinqo (PFE)	Oral	JAK	Atopic dermatitis
Rinvoq (ABBV)	Oral	JAK	RA, Psoriatic arthritis, Atopic dermatitis
Olumiant (LLY)	Oral	JAK	RA
Entyvio (Takeda)	IV	integrin receptor	UC, Crohn's disease
Velsipity (PFE)	Oral	S1P	Ulcerative Colitis
Zeposia (BMV)	Oral	S1P	Multiple Sclerosis, Ulcerative Colitis
Orencia (BMV)	IV+SQ	T cell costimulation modulator	RA, Idiopathic arthritis, Psoriatic arthritis
Sotyktu (BMV)	Oral	TYK2	Plaque psoriasis
Bryhali (Bausch)	Lotion	corticosteroid	Plaque psoriasis
Duobrii (Bausch)	Lotion	halobetasol propionate and tazarotene	Plaque psoriasis
Vtama (Roviant)	Ointment	aryl hydrocarbon receptor	Plaque Psoriasis, Atopic dermatitis
Zoryve (Acurtis)	Ointment	PDE4	Plaque Psoriasis, Atopic dermatitis, Seborrheic dermatitis
Otezla (Amgen)	Oral	PDE4	Plaque psoriasis, Psoriatic arthritis, Oral ulcers associated with Behçet's disease
Eucrisa	Ointment	PDE4	Atopic dermatitis
Opzelura	Ointment	JAK	Atopic dermatitis, Vitiligo

SQ= Injection for subcutaneous use; IV= Injection for Intravenous use; RA= Rheumatoid arthritis; UC= Ulcerative colitis. We do not add Entyvio in any of the charts since it is an IV and approved only for UC and Crohn's disease.

Exhibit90: IL-17A launches: Cosentyx (NVS), Siliq (Bausch/Ortho Dermatologics), and Taltz (LLY)

Cosentyx launched in Feb-15, Taltz launched in Apr-16, Siliq launched in Aug-17. Taltz was approved for ankylosing spondylitis on Aug. 26, 2019. Source: IQVIA

IL-23

Comparison is confounded by different indications and dosing schedules. Stelara is approved for plaque psoriasis, psoriatic arthritis, Crohn's disease and Ulcerative Colitis whereas Tremfya, Skyrizi, and Ilumya are approved for plaque psoriasis and Omvoh is approved only for Ulcerative Colitis. Also, TRxs may not be directly comparable because Stelara and Tremfya are dosed every eight weeks while Skyrizi and Ilumya are dosed every 12 weeks. Lastly, IQVIA data for Tremfya are unreliable due to restrictions.

Exhibit 91: IL-23 launches: Tremfya, Skyrizi, Ilumya and Omvoh (we do not have Stelara launch data)

Both Tremfya and Skyrizi scripts are restricted and unreliable. Tremfya launched in July-17. Skyrizi launched in April-19. Ilumya launched in Oct-18. Omvoh launched in Dec-23. Source: IQVIA

Atopic dermatitis

Eucrisa (PFE) and Dupixent (SNY/REGN) TRxs may not be directly comparable. Eucrisa is an ointment while Dupixent is an injectable with limited data capture. We understand there are no significant capture rate issues, so TRx should be a fair representation of true demand. Eucrisa is indicated for mild-moderate atopic dermatitis while Dupixent is indicated for moderate-severe atopic dermatitis. Dupixent is also approved for moderate-severe asthma.

Exhibit 106: Atopic dermatitis launches: Dupixent (SNY/REGN), Eucrisa (PFE) and Opzelura (INCY). However, **TRxs may not be directly comparable** because Eucrisa (PDE4) is an ointment that comes in 60g and 100g tubes, and is applied in a thin layer twice daily to affected areas, while Dupixent (IL-4 and IL-13) comes in a syringe (300 mg/ 2mL) and is given every other week.

Source: IQVIA

Exhibit 107: Atopic dermatitis launches: Dupixent (SNY/REGN) and Eucrisa (PFE). TRxs may not be directly comparable because Eucrisa (PDE4) is an ointment that comes in 60g and 100g tubes, and is applied in a thin layer twice daily to affected areas, while Dupixent (IL-4 and IL-13) comes in a syringe (300 mg/ 2mL) and is given every other week.

Dupixent got approved for Asthma on 10/21/2018.

Neurology

Migraine

Exhibit 119: Migraine drugs with their MOA and approved indications

Drug name	Route	MOA	Indication
Aimovig (Amgen)	SQ	CGRP	Migraine prevention
Emgality (Eli Lilly)	SQ	CGRP	Migraine prevention, cluster headache
Ajovy (Teva)	SQ	CGRP	Migraine prevention
Ubrovelvy (Abbvie)	Oral	CGRP	Acute treatment of migraine with or without aura
Qulipta (Abbvie)	Oral	CGRP	Migraine prevention
Nurtec (Biohaven)	Oral	CGRP	Acute treatment and Migraine prevention
Vyapti (Lundbeck)	IV	CGRP	Migraine prevention
Reyvow (Eli Lilly)	Oral	serotonin (5-HT) 1F receptor agonist	Acute treatment of migraine with or without aura
Zomig (Amneal)	Oral	serotonin (5-HT) 1B/1D receptor agonist	Acute treatment of migraine with or without aura

SQ= Injection for subcutaneous use; IV= Injection for Intravenous use.
Source: Morgan Stanley Research

Aimovig (AMGN) script trends: Amgen processes all claims via its hub in batches, and sometimes there are catch-ups in the figures sent to IQVIA.

Emgality (LLY) is also approved for treatment of cluster headaches. The approval was on June 4, 2019. We are unable to identify scripts by indication so Emgality TRx includes both migraine and cluster headache.

Ajovy is also available as auto-injector. Ajovy launched autoinjector on April 27, 2020.

TRx may not be a good metric for comparing the three drugs over time due to differences in dosing frequency. Amgen's Aimovig is dosed either 70 mg or 140 mg (70 x 2 injections) *every month*, Teva's Ajovy is dosed either 225 mg *every month* or 675 mg (225 x 3 injections) *every three months*, and Lilly's Emgality is dosed 120 mg *every month* but with a 240 mg loading dose administered as two consecutive 120 mg injections for the first month.

One TRx for one drug may represent different numbers of months of therapy and/or doses. For example, assuming simplistically that one TRx represents one course of treatment, one Aimovig TRx represents one month of drug, one Ajovy TRx could represent one or three months' worth of drug, and one Emgality TRx could represent one month but could be one injection or three injections (including loading dose).

Oral CGRP (Ubrovelvy and Nurtec) launches are trending above injectable Emgality. Both Ubrovelvy and Nurtec TRx launch trends are above Emgality ([Exhibit 127](#)) and orals continue to gain share in overall market ([Exhibit 120](#) & [Exhibit 121](#)).

Exhibit 120: CGRP Injectable vs Oral. Injectable includes Aimovig, Ajovy, Emgality, and Vyepti; Oral includes Ubrelvy, and Nurtec. Vyepti is an IV, hence TRx is not captured by IQVIA completely.

Source: IQVIA

Exhibit 127: Migraine TRx launches. Aimovig, Ajovy, Emgality, Qulipta (oral CGRP) and Vyepti (inj CGRPs) are indicated for migraine prevention. Ubrelvy, Nurtec (oral CGRP) and Reyvow are indicated for acute treatment of migraine. Emgality was also approved for cluster headache on June 4, 2019. Reyvow is not a CGRP. Vyepti is an IV, hence TRx is not captured by IQVIA completely. Refer to [Exhibit 75](#) for more details.

Source: IQVIA, Morgan Stanley Research

Exhibit 128: Recent oral migraine launches. Note Reyvow is not a CGRP. Refer to [Exhibit 75](#) for more details.

Source: IQVIA

Another helpful metric to compare may be number of injections. We estimate the number of injections prescribed as another means of comparison. For Aimovig and Emgality we assume no. of injections to be equal to EUTRx (mL) and for Ajovy 1 injection = EUTRx/1.5, because Aimovig and Emgality are 1 mL injections, while Ajovy is a 1.5 mL injection. Unfortunately, this would still be a confounded comparison because the reality is much more complicated than our assumption suggests—for example, for one Aimovig TRx with two doses, we cannot distinguish whether that would be for one month or two months.

Exhibit 129: CGRP weekly no. of injections since launch. Vyepti is an IV, hence EUTRx/TRx is not captured by IQVIA completely

Definitions

TRx represents total prescriptions dispensed including refills.

NRx represents new prescriptions including renewals and excluding refills, so it does not represent new patient starts. Renewals are the scripts patients get to continue the drug when they run out of refills.

EUTRx / EUNRx (Extended Units) figures can represent a more accurate picture of demand because they include weighting of larger/longer duration Rx. Standard NRx / TRx / NRx count both a 30-day and a 90-day prescription the same. Counts include dispensed tablets, capsules, milliliters, and so forth. For solids, this is the number of tablets; for creams, grams; and liquids, mls.

NPA: "National estimates of prescriptions, or the rate at which drugs move out of the pharmacy and into the hands of a consumer via formal dispensed prescriptions".

NSP: "National sales estimates of product packages into retail drugstores, hospitals, clinics, and other nonretail type outlets".

NSP units: "Total amount of packages sold of a particular drug to the dispensing outlet/chain/hospital."

NSP Price: "Is based on a number of sources, depending upon Class of Trade (Channel). It generally represents a best estimation of Net price without the impact of proprietary rebating by the manufacturer. Equation = Sales \$ / Units".

NSP Sales \$: "Total amount of the sales into the dispensing outlets, chain, and health care providers from the manufacturers and distribution centers expressed in US dollars."

IQVIA sales data (NSP) is captured weekly, and grouped into 4 or 5 week 'months.' The weeks start in January, so the 5 week month falls at the end of each quarter: March, June, September, and December. Periodically, an extra week is added in November to ensure that DDD reporting months do not deviate too far from calendar months.

Brief from IQVIA on NSP Price: Note that NSP reflects significant Class Of Trade discounts and is often well below Gross Price even though it does not reflect rebates manufacturers pay to payers. "Our NSP Sales \$'s represent a trade price or transaction price. It is the actual cost that was charged to acquire the pharmaceutical products as seen on the purchase invoice. NSP is a projected database. What that means is IQVIA collects the data from the sample (which for NSP represents about 88%) and using IQVIA methodology, the data is projected to 100% of the universe. The prices reflected in IQVIA National Sales Perspectives™ are the prices outlets (i.e. pharmacies, hospitals, clinics) pay for the products, whether purchased directly from a manufacturer or indirectly via a wholesaler or chain warehouse. Invoice line item discounts are included. Prompt-payment discounts and bottom-line invoice discounts are not included. Rebates, typically paid by the manufacturer directly to a customer, insurer, or PBM (Pharmacy Benefits Manager), are not reflected."

Morgan Stanley is acting as financial advisor to Organon & Co. ("Organon") in relation to a definitive agreement to be acquired by Sun Pharmaceutical Industries Limited, as announced on April 26, 2026. The transaction is subject to customary closing conditions, including receipt of required regulatory approvals and approval by Organon stockholders. This report and the information provided herein is not intended to (i) provide voting advice, (ii) serve as an endorsement of the proposed transaction, or (iii) result in the procurement, withholding or revocation of a proxy or any other action by a security holder. Organon has agreed to pay fees to Morgan Stanley for its financial services. Please refer to the notes at the end of this report.

Morgan Stanley is acting as financial advisor to Vertex Pharmaceuticals Incorporated ("Vertex"), in relation to their definitive agreement to acquire Crinetics Pharmaceuticals, Inc. ("Crinetics"), as announced on July 6, 2026. The transaction is subject to Crinetics shareholder approval, receipt of regulatory approvals and other customary closing conditions. This report and the information provided herein is not intended to (i) provide voting advice, (ii) serve as an endorsement of the proposed transaction, or (iii) result in the procurement, with-holding or revocation of a proxy or any other action by a security holder. Vertex has agreed to pay fees to Morgan Stanley for its financial services, including transaction fees and financing fees that are contingent upon the consummation of the proposed transaction. Please refer to the notes at the end of the report.

Important Regulatory Disclosures on Subject Companies

As of June 30, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Abbvie Inc., Bristol Myers Squibb Co, Eli Lilly & Co., Johnson & Johnson, Merck & Co., Inc., Organon & Co., Pfizer Inc, Royalty Pharma Plc.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Abbvie Inc., Bristol Myers Squibb Co, Eli Lilly & Co., Merck & Co., Inc., Royalty Pharma Plc.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Abbvie Inc., Bristol Myers Squibb Co, Eli Lilly & Co., Merck & Co., Inc., Organon & Co., Pfizer Inc, Royalty Pharma Plc.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Abbvie Inc., Bristol Myers Squibb Co, Eli Lilly & Co., Johnson & Johnson, Merck & Co., Inc., Organon & Co., Pfizer Inc, Royalty Pharma Plc.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Abbvie Inc., Bristol Myers Squibb Co, Eli Lilly & Co., Johnson & Johnson, Merck & Co., Inc., Organon & Co., Pfizer Inc, Royalty Pharma Plc.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Abbvie Inc., Bristol Myers Squibb Co, Eli Lilly & Co., Johnson & Johnson, Merck & Co., Inc., Organon & Co., Pfizer Inc, Royalty Pharma Plc.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Abbvie Inc., Bristol Myers Squibb Co, Eli Lilly & Co., Johnson & Johnson, Merck & Co., Inc., Organon & Co., Pfizer Inc, Royalty Pharma Plc.

An employee, director or consultant of Morgan Stanley is a director of Merck & Co., Inc.. This person is not a research analyst or a member of a research analyst's household.

Morgan Stanley & Co. LLC makes a market in the securities of Organon & Co..

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1544	42%	453	49%	29%	757	44%
Equal-weight/Hold	1577	43%	390	42%	25%	769	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	544	15%	89	10%	16%	204	12%
Total	3,668		933			1731	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures.

For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Eli Lilly & Co.. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
