FX tracker - sensitivities and correlations

Foreign exchange has re-emerged as a meaningful driver of both fundamentals and factor behaviour across the group, and it tends to matter most precisely when volatility rises and 'macro' overwhelms single-name narratives. In this first publication of our new Food Retail FX tracker, we attempt to refresh investors on where our companies' exposures sit in the financial statements – what is translation versus true economic/transaction impact, and what shows up on the balance sheet through net assets, funding and hedging. We will be updating it quarterly, and more frequently if warranted by large FX moves. Within, we also pair company-quoted sensitivities with observed market correlations. See for company-specific exposure and sensitivity analysis (company-calculated as well as JPM calculated). Overall, we would be mindful of mixing mechanical earnings tailwinds driven by FX and interest rates, with improving fundamentals.

Key take-aways

1. **Companies within our coverage with the largest foreign-denominated revenue exposure include Jeronimo** (PLN c70%), **Ahold-Delhaize** (USD c60%) and **Carrefour** (BRL c20%). This is equally the case from an EBIT standpoint (JMT c85%, AD c65%, Carrefour ≥30%). From a balance sheet perspective, Jeronimo carries material foreign currency-denominated debt (60% in pesos, 25% in zloty).
2. Based on our sensitivity analysis, FX swings have the biggest Price Target impact for **Jeronimo Martins**.
3. **Carrefour**: Share price performance is often highly correlated with BRL/EUR, reflecting both fundamentals and positioning: (i) Brazil contributes ~33% of group EBIT, and (ii) BRL also serves as a market proxy for Brazilian macro risk, which investors frequently treat as a key valuation driver. We would be mindful of mixing these share price and P&L tailwinds with improving fundamentals (i.e. volumes and margins should remain capped for Carrefour in Brazil as Cash & Carry remains structurally competitive, despite improving FX, SELIC and some re-rating in the IBOV Index).
4. **Ahold Delhaize**: Share performance is less tightly linked to USD/EUR movements than it might appear at first glance, as investors tend to anchor more on its defensive fundamentals and stable cash returns than on near-term FX fluctuations. As is the case with CA FP, EURUSD YTD is mechanically helping AD earnings, and yet US volumes and margins would continue to contract through the year on our forecasts, eventually making company guidance challenging.
5. National retailers with no or barely any FX exposure include **Colruyt**, **Domino's** and **Greggs**.

Stock-specific exposure

Ahold Delhaize

Ahold Delhaize's foreign currency exposure is mainly driven by the large US business (60-65% rev/EBIT exposure) vs Euro reporting and HQ costs all in Euros, so movements in the USD/EUR rate have a direct impact on reported net sales, operating income and EPS. The group sometimes explicitly bases guidance (e.g., EPS growth and margin outlook) on an assumed average USD/EUR exchange rate and highlights FX volatility as a key macro uncertainty, indicating that the translation of US earnings into euros is its principal currency risk, partly offset by a diversified European footprint and active treasury management of FX exposure. On the debt side, Ahold Delhaize's net debt is substantial (over €15bn in recent reports) and includes notes and financing obligations. While much of its capital structure is euro-denominated, the company does have exposure to the US dollar (c20% of loans and credit facilities).

Foreign currency sensitivity. *As of December 28, 2025, Ahold Delhaize carried out a sensitivity analysis with regard to changes in foreign exchange rates to revalue dollar-denominated cash, cash equivalents and debt in its balance sheet at year-end. Assuming the euro had strengthened (weakened) by 20% against the US dollar compared to the actual 2025 rate, with all other variables held constant, the hypothetical result on income before income taxes would have been an increase (decrease) of €8m (2024: an increase (decrease) of €12m), as a result of the foreign exchange revaluation of US dollar-denominated monetary assets and liabilities held by non-US dollar functional currency subsidiaries. The loss on foreign exchange recognised in the 2025 income statement – related to the revaluation of unhedged leases reported in the balance sheet – amounted to €12m (2024: loss of €5m). The strengthening (weakening) of the euro by 20% against the other currencies, with all other variables held constant, would result in a loss (gain) of €296m (2024: €194m).*

B&M

B&M's financial exposure to foreign currency is relatively limited and primarily arises from sourcing products in US dollars and euros while reporting in sterling, with a largely UK- and France-based store estate and revenues in local currency (France c10% of revs/7% of EBIT). The main FX impact is on gross margin and cost of goods sold where a part of the purchases are dollar-denominated, which B&M manages through foreign exchange hedging; for example, its statutory gross margin has recently benefitted from favourable hedge accounting, indicating that currency hedges can materially influence reported profitability. Overall, B&M does not have the kind of structural multi-currency operational and financing exposure seen in large global retailers, but it remains sensitive to movements in major sourcing currencies (notably USD) and uses hedging to smooth these effects. This risk is not considered material to the business as amounts owed in foreign currency are short term of up to 30 days and are of a relatively modest nature. Transaction exposures, including those associated with forecast transactions, are hedged when known, principally using forward currency contracts.

Carrefour

Carrefour has significant exposure to foreign currency risk because a large share of its sales and operations are outside France, notably in Brazil and Argentina, and movements in these currencies have a material impact on reported sales, recurring operating income and financial items, despite the use of various hedging instruments. A key aspect of this exposure is that Argentina is classified as a hyper-inflationary economy under IAS 29, which requires inflation restatement of local financial statements and translation of the full profit and loss at the year-end exchange rate; this amplifies negative accounting effects on Carrefour's euro-denominated results and equity when the Argentine peso depreciates, even if the underlying business performance is robust.

Colruyt

Colruyt's foreign currency exposure appears relatively limited compared with multi-national retailers because the group reports in euros and its core business is concentrated in Belgium and neighbouring European markets. Its main currency risk is transactional rather than translational: it arises from purchasing goods and services in foreign

currencies, especially where import or supplier contracts are not denominated in euros, and from any foreign operations or investments outside the euro area if applicable. Exchange rate risks as a result of consolidating revenues and costs of subsidiaries not reporting in euros are not hedged. The group has positions in EUR/INR, EUR/RON, and USD/EUR (not material). On debt, Colruyt's reported financial debt is largely euro-denominated, including a €250m bond due in 2028 issued in euros, and its financing strategy explicitly aims for a diversified funding mix to manage liquidity and interest risk.

Domino's Pizza

Domino's Pizza Group's foreign currency exposure is relatively modest because its core business is in the UK and Ireland and it reports in sterling, so most of its operating cash flow is generated in GBP and EUR rather than a wide range of currencies. On debt, there is no clear evidence of material non-sterling debt exposure, therefore any foreign-currency debt risk appears limited relative to the group's overall balance sheet.

Greggs

Greggs' foreign currency risk is low as it does not have regular material transactions in foreign currency although there are occasional purchases, mainly of capital items, denominated in foreign currency. There is no foreign-denominated debt exposure disclosed either.

Jeronimo Martins

Jeronimo Martins' foreign currency exposure is meaningful, driven by operations in Poland (PLN - c70% revenues/85% EBIT) and Colombia (COP - 9% revenues/5% EBIT) while reporting in euros, and it also carries material debt in non-euro currencies (PLN/COP - 25%/60% of total) alongside Euro-denominated borrowings.

Foreign currency sensitivity. *Considering the net position of the financial assets and liabilities on the balance sheet at 31 December 2025, a depreciation of the zloty against the euro of around 10% would have a positive impact of €535m on the equity's currency translation reserves (on 31 December 2024: a positive impact of €504m). Regarding the Colombian peso, a depreciation against the euro of 10% would have a positive impact on the equity's currency translation reserves of €182m (on 31 December 2024: a positive impact of €146m). Considering the net financial assets related with operating activities that some Group subsidiaries hold in currencies other than their functional currency, a 10% depreciation of the exchange rate would have a negative impact on the results of €50m (2024: €52m). Considering the total net assets (financial and non-financial) to which the Group is exposed to in zloty and Colombian peso, the effect of a 10% depreciation of these currencies would have a negative impact of €195m in total equity (on 31 December 2024: a negative impact of €145m).*

Sainsbury's

Sainsbury's is a UK-based retailer reporting in pounds sterling, so its core revenues and costs are in GBP and it does not have large overseas operating segments that would create major translation risk. FX risk mainly comes from paying overseas suppliers in foreign currencies (notably EUR and USD) for food and general merchandise imports, which affects the cost of goods sold when sterling moves. The Group has net euro-denominated trade payables of £99m (2025: £93m) and US dollar-denominated trade payables of £151m (2025: £140m).

Tesco

Tesco's functional and reporting currency is the British pound, but it does have operations in the Republic of Ireland (EUR: revenues 4%) and in Central European countries such as Czech Republic, Hungary and Slovakia (CZK, HUF, EUR: revenues c7%, EBIT c3.5% of total), but these are typically funded with local cash flows. The group also has modest debt exposure in EUR and USD, but hedged via cross-currency swaps. The group manages all residual foreign currency exposure using cross-currency swaps and FX derivatives, so material mismatches are minimised.

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Olcese, Borja : B&M (BMEB.L), Carrefour (CARR.PA), Colruyt (COLR.BR), Domino's Pizza Group PLC (DOM.L), Greggs (GRG.L), Jeronimo Martins (JMT.LS), Koninklijke Ahold Delhaize NV (AD.AS), Sainsbury (SBRY.L), Tesco (TSCO.L)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
