

EM IN FOCUS

EM Output Gaps — Significant Room to Grow, But Mixed Picture

- Measuring the output gap—the difference between actual and potential output—is difficult but it is impossible to assess the outlook for economic growth, monetary policy, and asset prices without forming some judgment on the degree of overall spare capacity in an economy.
- We update our production function output gap estimates for 22 emerging market economies. These estimates are intended to enable cross-country comparisons and should be considered as a complement to the data provided by our country economists. As a cross-check on our findings, we compare them with those from international organisations (such as the OECD) and statistical filters.
- Our analysis suggests that most EMs continue to operate close to or below potential, with meaningful divergence across regions and economies. Since our last update, output gaps have become more negative—that is, spare capacity has increased—in CEEMEA and China, while LatAm is operating close to potential in aggregate and EM Asia ex-China has moved into positive territory.
 - **EM Asia:** We do not view the sharp, semiconductor-led growth acceleration in Taiwan, South Korea, Hong Kong and Malaysia as evidence of broad-based overheating. Our estimated output gap remains negative in South Korea and is only slightly positive in the others. Most output gap estimates for China—including our own—now point to significant spare capacity in the economy.
 - **Latin America** is operating close to potential in aggregate, with Argentina, Mexico and Chile exhibiting slack, counterbalanced by above-potential output in Brazil.
 - In **CEEMEA**, both the CEE region and South Africa continue to see aggregate demand fall well short of their supply capacity. In Türkiye and Russia, growth has continued to slow since our last update but both economies have been operating above capacity, contributing to inflationary pressures.

EM Output Gaps — Significant Room to Grow, But Mixed Picture

Measuring the output gap—the difference between actual and potential output—is difficult but it is impossible to assess the outlook for economic growth, monetary policy, and asset prices without forming some judgment on the degree of overall spare capacity in an economy.

In this *EM in Focus*, we update our production function output gap estimates for 22 emerging market economies. We have previously outlined our methodology in detail [here](#). Briefly, our approach examines the fundamental drivers of potential output—capital, labour, and technology—to calculate labour and capital usage gaps and combines these estimates to derive an overall output gap.

Given the inherent uncertainty in estimating output gaps, our estimates should not be viewed as the definitive assessment of economic slack for any specific economy (especially as our unified methodology may not fully capture the unique features of individual nations). We therefore present our results alongside a range of other estimates, including those from international organisations such as the OECD and those derived from statistical filters.

Since Our Last Update, Negative Gaps Have Widened Modestly in CEEMEA and LatAm, and Shifted into Positive Territory in EM Asia ex China

[Exhibit 1](#) shows our regional output gap estimates for CEEMEA, EM Asia and Latin America; detailed estimates for each of the 22 EMs in our sample are provided in the Appendix. The results point to meaningful divergence across regions and economies, with a majority operating below potential but a number slightly above potential. Since our last update, output gaps have turned more negative in CEEMEA and China, while LatAm is operating close to potential in aggregate, and EM Asia ex-China has moved into positive territory.

- **CEEMEA:** Most CEEMEA economies—particularly CEE and South Africa—have grown below potential since the post-pandemic rebound, opening up spare capacity. But the picture is mixed. In Türkiye and Russia, growth has slowed following earlier overheating, but both economies continue to operate slightly above capacity.
- **EM Asia:** Supported by relatively strong growth, output gaps across EM Asia ex-China have generally moved in a more positive direction over the past year. However, in our assessment, much of this strength has been supply-driven, leaving output gaps only moderately positive. This is especially true for economies that have benefited from the semiconductor boom: because the strength is concentrated in a limited number of firms, it has not resulted in a broad-based tightening of labour market conditions.¹ Our estimated output gaps are only slightly positive in Taiwan, Hong Kong and Malaysia and negative in South Korea. Conversely, growth has slowed notably in the Philippines, unwinding earlier overheating, while Thailand and China

¹ However, it does have a direct impact on our estimates via productivity. In the case of Taiwan – the economy most affected by the chip boom – we have lowered the weight on productivity.

continue to operate below capacity.

- **Latin America:** Latin America is operating close to potential in aggregate, with notable slack in Argentina—and, to a lesser extent, in Mexico and Chile—offset by above-potential output in Brazil. In Colombia, growth has picked up since 2024, and our estimates now point to a modest degree of overheating.

Exhibit 1: Our Regional Output Gap Estimates Are Either Close to Potential (EM Asia ex China and LatAm) or Below Potential (CEEMEA and China)

Source: Goldman Sachs Global Investment Research

Exhibit 2 compares the latest (2026Q2) readings. Our results suggest significant spare capacity in South Africa, CEE ex Poland, South Korea, China, Chile and Argentina. Since our last update, Taiwan's output gap has turned from slightly negative to slightly positive, remained broadly unchanged in CEE ex Poland, Korea, and Argentina and widened in China and Chile. Owing to their considerable slack, these economies appear best-placed to deliver above-trend growth in the coming years without generating inflationary pressure. Conversely, no EM economy currently exhibits a notably large positive output gap, although activity remains above potential in Brazil.

Our estimates are broadly consistent with the median of alternative measures, with Taiwan and South Africa as the main exceptions. In Taiwan, traditional methods of estimating the output gap based on statistical filters imply much larger positive gaps than our estimate because they treat the sharp acceleration in real GDP growth—driven by a few semiconductor companies with limited economy-wide spillovers—as evidence of broad-based overheating.

Exhibit 2: Still Significant Spare Capacity in South Africa, most of CEE, South Korea, China, Romania, Chile and Argentina

Output Gaps as % of GDP. Economies are ranked by GS production function measure.

Implications for Wage Growth and Inflation

We assess the implications of our output gap estimates for inflation and wage growth. In an overheating economy, stronger labour demand typically puts upward pressure on wages, while excess capacity, by weakening workers' bargaining power, tends to work in the opposite direction. Although such wage pressures had historically fed through to inflation, this relationship has become less stable over recent decades as supply chains have become more globalised and external factors have started to play a larger role in EM inflation dynamics. Across the EMs in our sample, our estimates point to a strong correlation between economic slack and the wage gap—defined as deviation of wage growth from target-consistent levels—with above-potential output associated with larger wage overshoots, and vice versa ([Exhibit 3, LHS](#)). However, consistent with cross-country evidence of flatter Phillips curves, we find a weaker, though still positive, relationship between output gaps and inflation gaps ([Exhibit 3, RHS](#)).

In Hungary and Czechia, where significant spare capacity exists, relatively strong wage growth largely reflects real wages catching up to their pre-pandemic trend and is less concerning for inflation given the openness of these economies and the dominance of external factors in driving their inflation. On the other hand, positive output gaps and tight labour markets in Colombia and Brazil have complicated disinflation, leading to a renewed hiking cycle in Colombia and more cautious monetary easing in Brazil. Wage growth also remains elevated in Türkiye and Russia despite the recent reduction of these countries' output gaps.

Exhibit 3: Wage Growth is Generally Higher in Economies that are Running Positive Output Gaps

Core inflation (wage) gaps are defined as deviations of core inflation (wage growth) from target (target-consistent levels) and are based on data from Q1-2026. Output gap estimates are lagged by a quarter (Q5-2025)

Disclosure Appendix

Reg AC

We, Basak Edizgil and Kevin Daly, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Basak Edizgil Goldman Sachs International, Kevin Daly Goldman Sachs International.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India. Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are

available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints.

As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
