一页摘要

- 全球经济增长放缓但分化加剧：HSBC维持2026年全球GDP增速2.5%的预测，但美国、台湾地区上调，印度、巴西、欧洲下调，AI投资与能源冲击是主要驱动力。
- 油价下跌缓解短期压力，但厄尔尼诺、AI投资狂热与财政货币政策分化三大“暗流”重塑增长格局。
- AI基础设施投资从芯片向电力、土地、冷却能力转移，东南亚成为新枢纽，电力瓶颈催生“自带发电”模式。
- 中国内需疲弱与出口强劲形成罕见分化，政策重心转向AI和电网等供给端资本支出，而非消费刺激。
- 全球资金流向出现微妙转向：美股基金流入减速，新兴市场保持韧性，投资者风险偏好正在结构性再平衡。
- 信用债市场系统性风险可控，但板块、评级和区域间的结构性分化加剧，利率而非信用利差成为定价核心。
- 美联储独立性面临实质性挑战，最高法院5-4裁决只是开始，未来12-18个月治理结构不确定性上升。
- AI驱动的网络攻击从理论进入实践，银行股估值核心变量正从信用风险转向网络安全引发的流动性风险。
- DRAM周期从“涨不涨”切换为“涨多少”，DDR5现货溢价重塑定价体系，HBM涨价预期大幅上调。
- 化工周期修复速度超预期，供给端结构性出清而非需求复苏是核心驱动力，估值仍处低位。

宏观与利率：全球增长分化，政策博弈加剧

全球经济处于“暗流涌动”的分化格局，油价回落只是消除了最坏情景，AI投资、厄尔尼诺与政策分化才是真正的胜负手。

- HSBC维持2026年全球GDP增速2.5%的预测，但内部结构剧烈分化：美国上调至2.3%，印度下调至6.4%，巴西下调至1.7%，欧元区腰斩至0.3%。
- 油价从120美元/桶回落至72美元/桶，但成品油价格仍高于战前水平，终端消费者感受的降价幅度有限。
- 美联储独立性受到挑战：最高法院以5-4裁决暂保理事Cook留任，但总统表示“这事没完”，未来12-18个月治理结构不确定性上升。
- NOM预测美元下半年走弱，DXY年底回落至98，核心逻辑是市场对美联储加息定价过度（约40个基点），而NOM认为美联储不会加息。
- 欧元、日元、新西兰元和澳元被看好，英镑、加元和瑞典克朗承压；人民币中间价模型指向6.79，但逆周期因子显示政策意图是放缓升值节奏。
- 亚洲央行多数偏鹰：日本已加息，菲律宾、印尼再加，韩国预计7月首次加息；印度是例外，市场预期加息但央行在“推后”。
- IMF警告爱尔兰跨国公司依赖成为最大风险，财政盈余中来自跨国企业税的部分可持续性存疑，结构性赤字已达-1.8%。

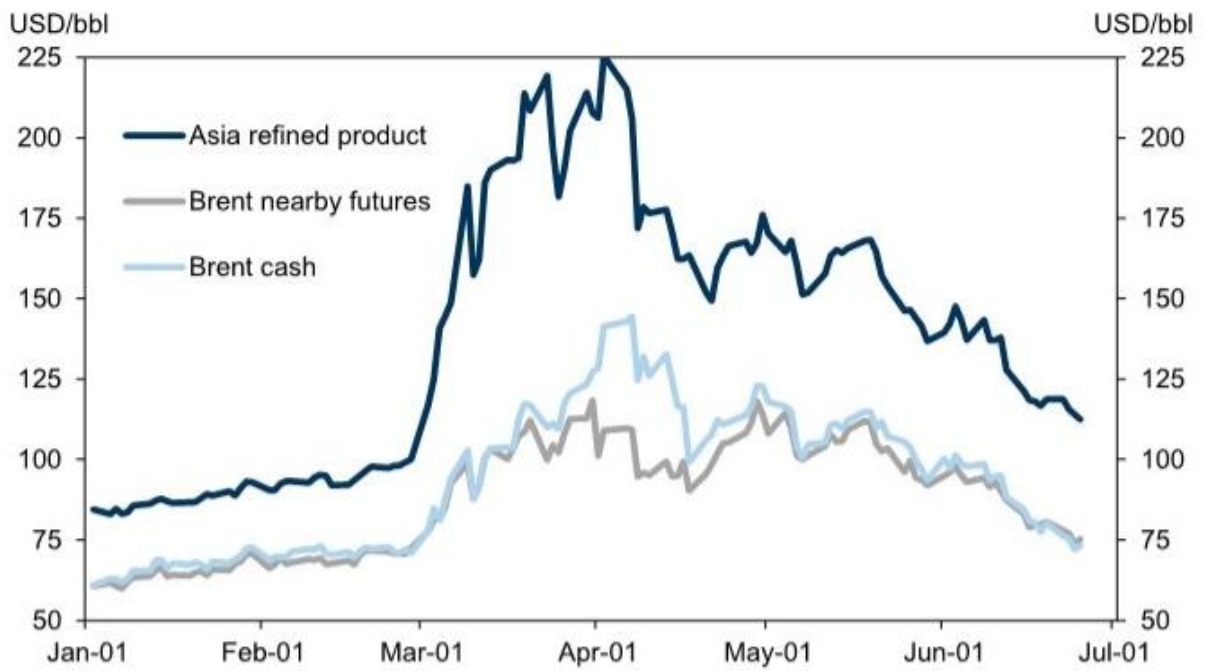

Exhibit 1 - Exhibit 1: Oil prices have nearly round-tripped to pre-war levels, but refined product prices remain elevated Exhibit 2: Dollar strengthened to near 2026 highs 2. The energy-driven pickup in inflation has remained manageable in

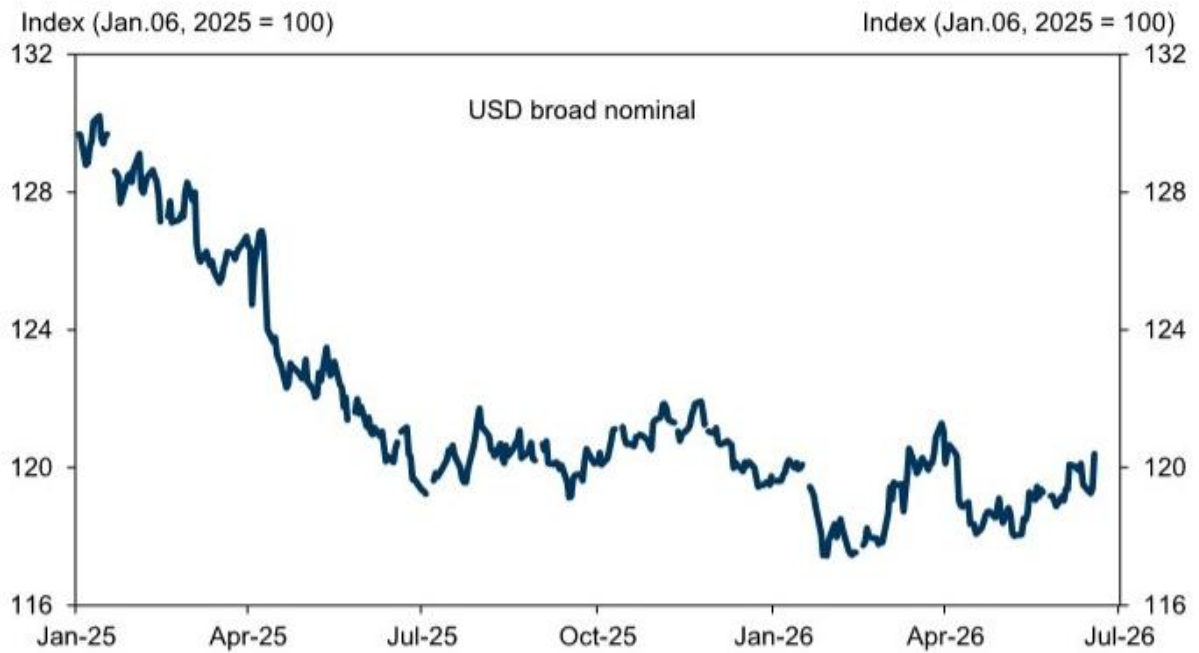

Exhibit 1 - Exhibit 3: Asia CPI inflation has moved up, but less dramatically than in 2021-22

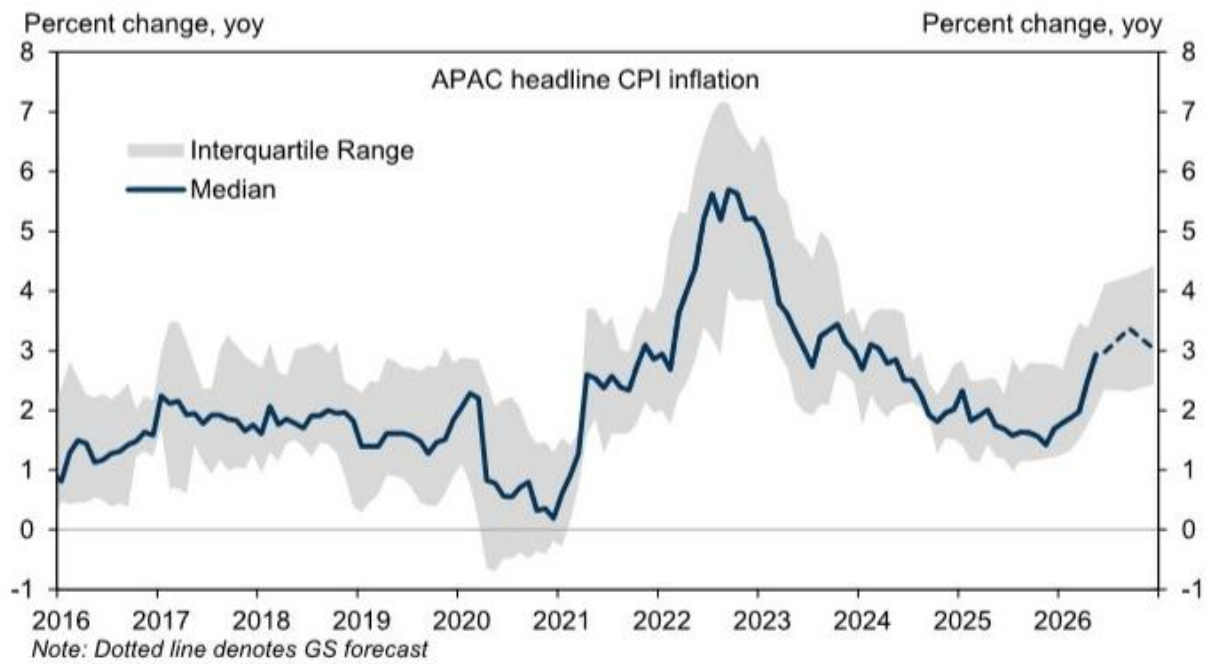

Exhibit 2 - Exhibit 3: Asia CPI inflation has moved up, but less dramatically than in 2021-22 Exhibit 4: Inflation is in line with or modestly above targets in most of the region * For Hong Kong and Malaysia, we use avg. annualized CPI in

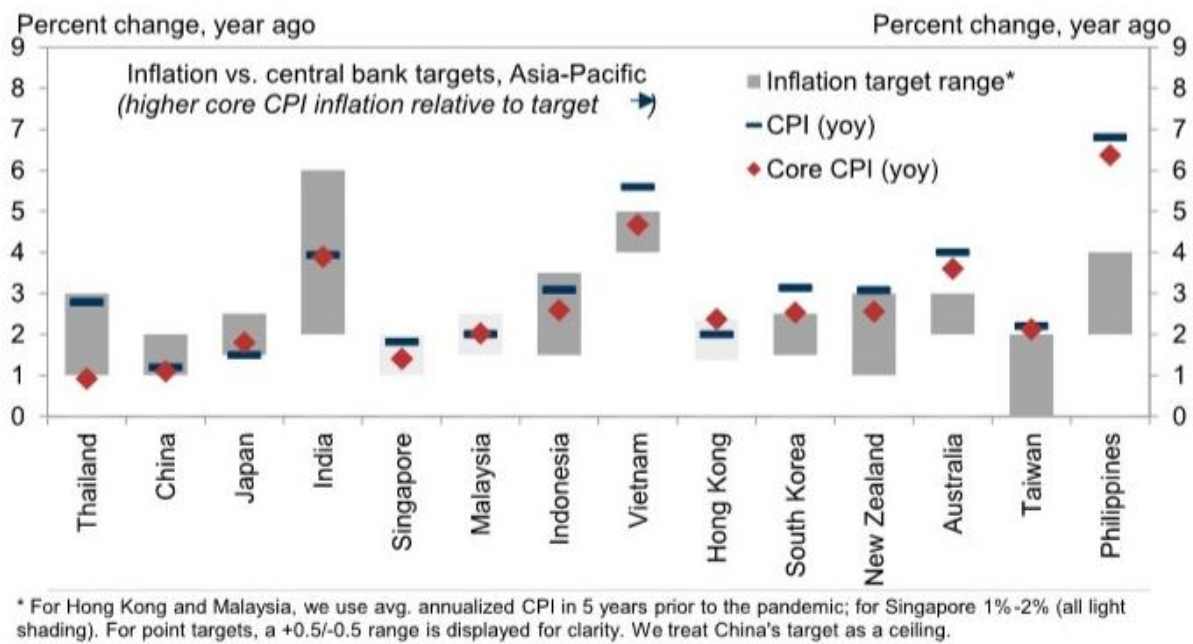

Exhibit 4 - Exhibit 3: Asia CPI inflation has moved up, but less dramatically than in 2021-22 Exhibit 4: Inflation is in line with or modestly above targets in most of the region * For Hong Kong and Malaysia, we use avg. annualized CPI in

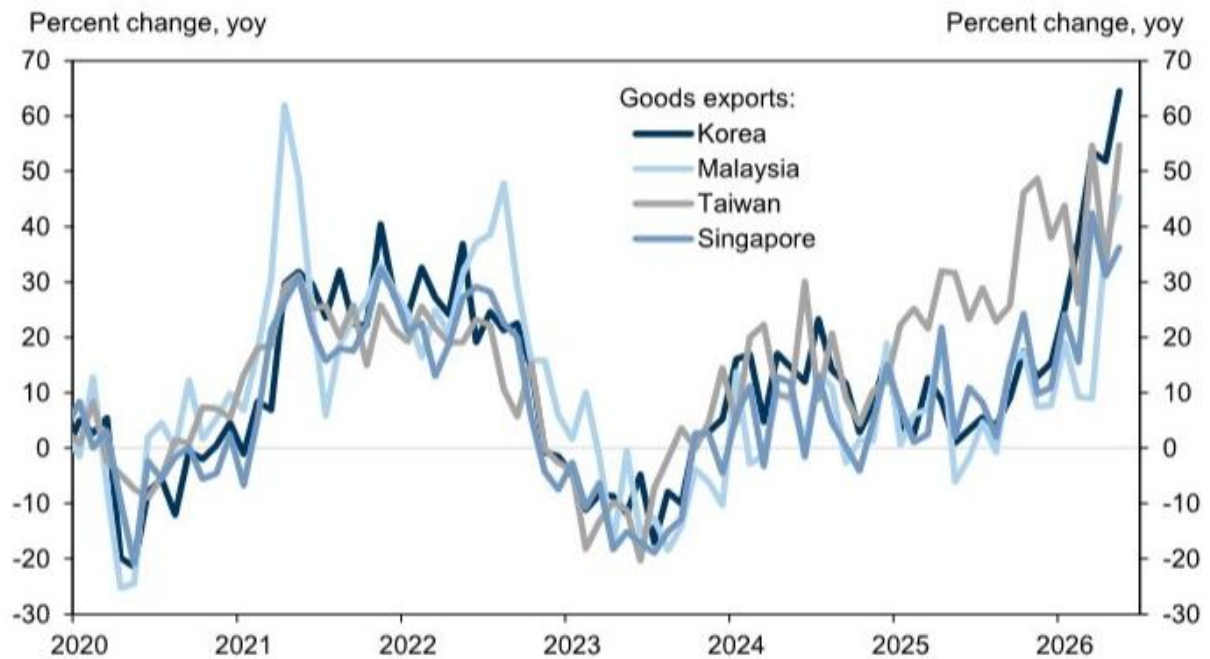

Exhibit 5 - Exhibit 5: Surging tech exports from key Asian suppliers Exhibit 6: Exports by far the largest driver of China's recent growth 5. China's exports power on amid weak domestic activity. In May, both retail sales (-0.6% yoy) and f

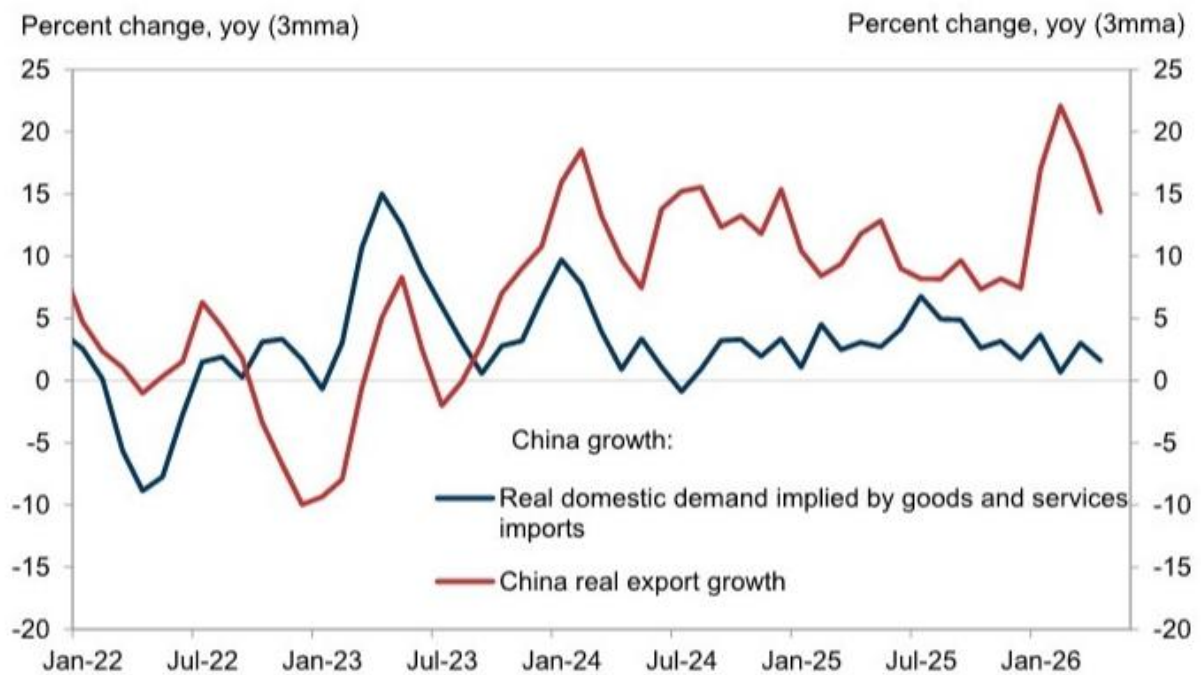

Exhibit 5 - Exhibit 7: CNY stands out among Asian FX in 2026

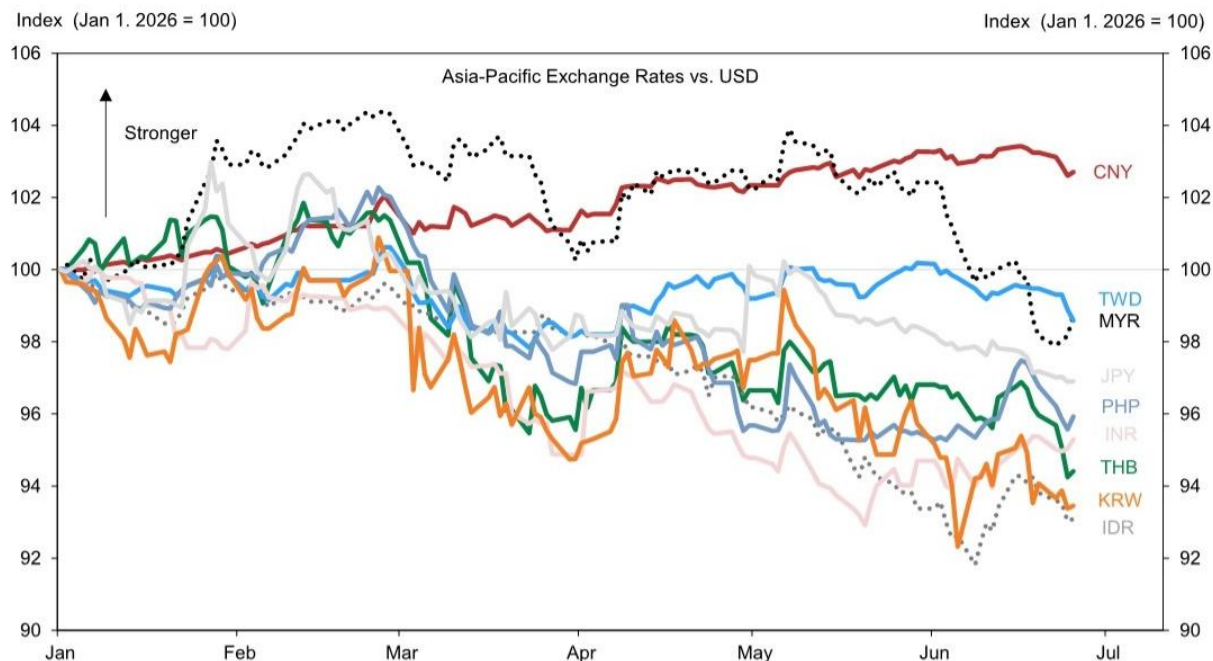

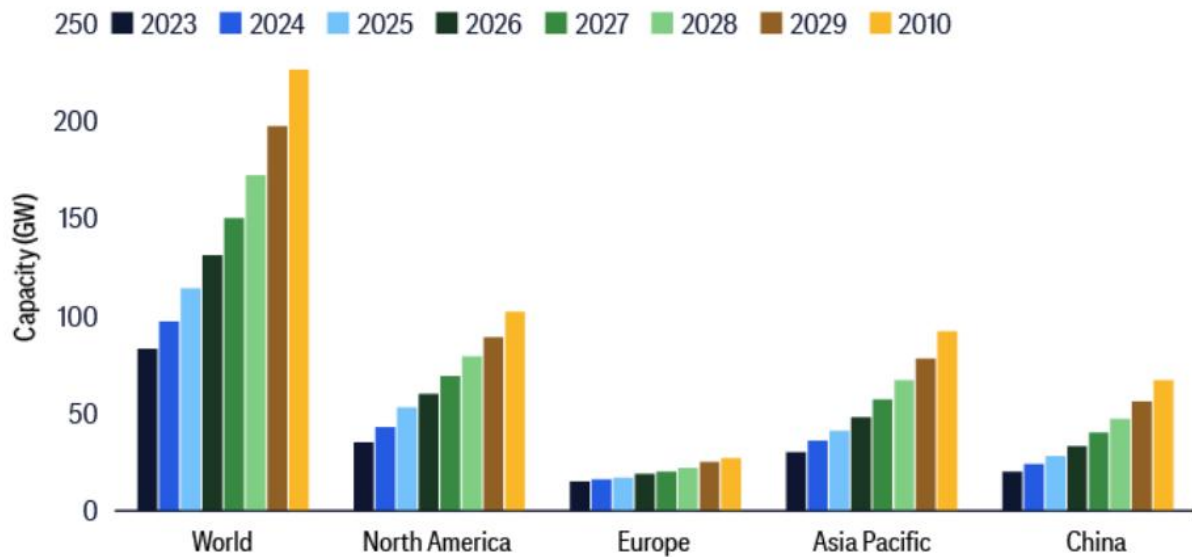

Exhibit 6 - Exhibit 8: We still expect tightening by several Asian central banks in coming months

AI/算力：从芯片到电力，基础设施瓶颈转移

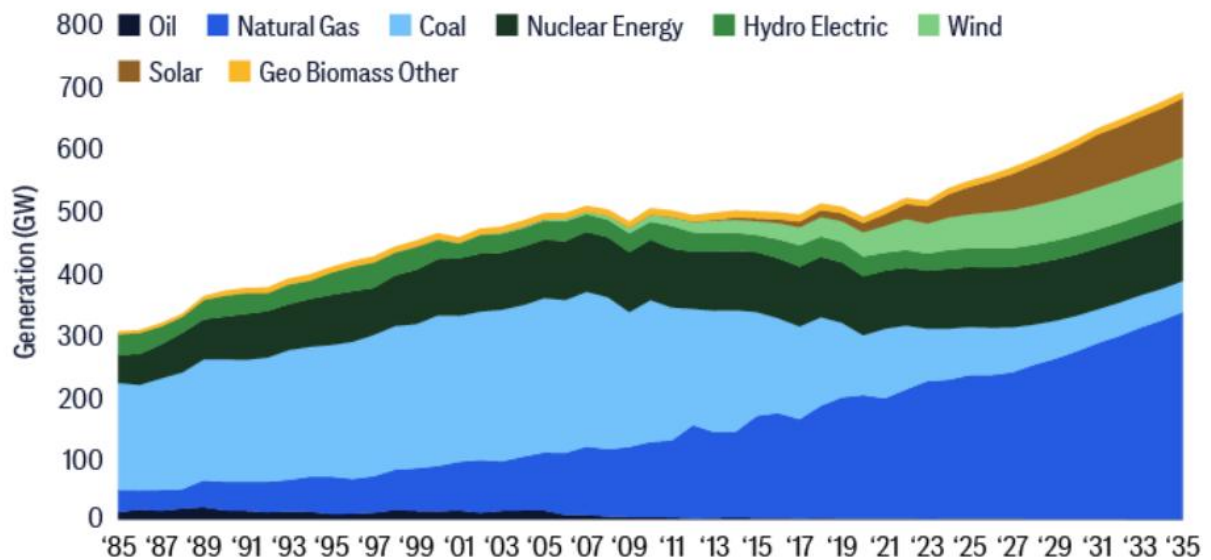

AI基础设施的竞争正从芯片性能转向电力、土地和冷却能力，东南亚成为新枢纽，电力瓶颈催生“自带发电”模式。

- Citi报告指出，全球超过2500GW的可再生能源和大型负荷项目在电网并网排队中停滞，大型变压器交货周期拉长至24-48个月，价格五年上涨约80%。
- “速度优先”推动数据中心选址从网络延迟转向电力获取速度，美国得克萨斯州因紧邻二叠纪盆地成为焦点，“自带发电”（BYOG）模式正成为主流。
- MS认为东盟正处在AI基础设施建设的独特交汇点：充足廉价土地和电力、战略性海底光缆连接、以及崛起的主权AI需求。
- AI GPU机架功率密度从传统5-15千瓦飙升至40-200千瓦，下一代平台直奔数百千瓦级别，液冷从可选变为必需。
- MS判断AI ASIC的长期增速将超过AI GPU，设计服务商成为最大受益者，市场对AI芯片的关注仍过度集中在英伟达GPU上。
- 康宁的GlassBridge技术对AI光模块公司未来1-2年影响有限，但对FAU厂商构成长期技术路线挑战，切换成本高、生态惯性大。
- Anthropic每月支付12.5亿美元获取SpaceX的计算能力，凸显前沿模型提供商对算力的饥渴和定制化交易模式。

半导体与存储器：超级周期还是产能陷阱？

DRAM周期正从“涨不涨”切换为“涨多少”，DDR5现货溢价重塑定价体系，韩国3.1万亿美元投资押注AI存储霸权。

- GS的DRAM情绪指标指向“温和积极”，DDR5现货价格自5月初上涨20%，对合约价溢价达25%，DDR4溢价更达45%。

- 韩国5月DRAM出口再创历史新高，环比+21%，同比+370%，受益于内存涨价及美中云厂商强劲需求。

- 韩国政府与三星、SK集团宣布4755万亿韩元（约3.1万亿美元）长期投资计划，三星龙仁工厂投产时间从2045年提前至2033年。
- JPM报告估算，仅前道晶圆设备支出就将占总投资的60-70%，市场短期反应偏负面，但中长期关注产能缺口。
- 苹果寻求向长鑫存储采购DRAM，Citi认为苹果的“意向”本身已是对其技术能力的有力背书，将长鑫从“国产替代”升级为“全球第四大DRAM制造商”。
- MS指出AI从“一问一答”向智能体系统进化，每次交互的内存消耗从线性变为指数级增长，美光已签下16份长期战略客户协议。
- GS上调2027年HBM涨价预期，从同比+14%上调至+44%，理由是当前传统DRAM价格强势可能传导至HBM定价谈判。

能源与大宗：油价回落与电力瓶颈并行

油价下跌缓解进口国压力，但电力基础设施瓶颈成为AI和数据中心扩张的结构性约束，天然气需求上升。

- 布伦特原油从4月底120美元/桶暴跌至72美元/桶，GS预计四季度稳定在80美元/桶，但成品油价格仍高于战前水平。

- Citi报告指出，AI驱动的数据中心电力需求将从2023年的4.3GW飙升至2030年的约110GW，全球电网投资到2030年每年需增加约4000亿美元。

- 美国天然气管道容量已基本满载，Citi预计96GW净天然气发电需求以支持电力增长，数据中心占美国电力需求增长的1/3。

- MS判断中国化工周期修复速度超预期，亚洲裂解装置利润率已接近周期中段水平，约一半的利润率回升具有粘性。

- 亚洲约10%的烯烃产能被永久关闭或长期检修，新产能持续推迟，资本开支削减近三分之一，自由现金流开始回血。

- MS偏好石脑油路线的化工企业（相对于天然气路线），在周期复苏中弹性更大。

- Bernstein数据显示美国5月巨型项目开工金额同比增长约420%，LNG、公共基础设施和数据中心是主力，占比约65%。

中国：内需疲弱与出口强劲的罕见分化

中国经济的核心矛盾在于出口繁荣掩盖了内需的真实收缩，政策重心转向AI和电网等供给端资本支出。

- NOM预测中国二季度实际GDP增速从一季度的5.0%放缓至4.1%，零售和固投4-5月平均增速已转负。

- 5月出口同比增19%，但一半是芯片涨价撑的，实际量没那么多；内需方面，零售跌0.6%，固投跌4.1%。

- MS判断北京正在准备以资本支出为核心的财政发力，重点投向AI和电网，而非消费，时间窗口在第三季度。

- 5月工业利润同比增18.8%，但呈“双速分化”：电子设备制造利润同比飙升103.9%，而家具利润跌58.4%，汽车跌19.8%。

- 中国楼市二手房连续多月跑赢新房，上半年新房成交同比下滑14%，二手房几乎持平，定价权正从开发商转向业主。

- GS数据显示端午假期后新房和二手房交易量分别环比反弹38%和27%，但新房同比仍跌17%，二手房同比转正至+6%。

- 欧盟对华贸易摩擦升级但不会走向全面脱钩，MS认为中国经常账户顺差正从“政策驱动”转向“结构驱动”。

地产与消费：分化加剧，结构性机会浮现

中国地产板块最恐慌的时刻可能已过，但真正的分化刚刚开始；奢侈品情绪从“全面回避”转向“选择性进场”。

- Citi在地产行业会议后变得更加积极，认为9月新盘集中推出和7月政治局会议政策信号将构成结构性窗口。
- 5月有5家开发商实现超过10%的同比增长，依靠核心城市存量项目去化能力提升，而非新盘入市。
- 上半年开发商盈利面临压力测试，但土地市场保持纪律、核心城市有产品溢价能力的公司有望在下半年迎来估值修复。
- MS发现纽约投资者开始重新打量欧洲奢侈品，科技财富的外溢效应是最真实的短期催化剂。
- LVMH被多数投资者视为“默认首选”，其F&LG部门2Q26销售预期五周来首次上调，从接近0%上调至约2%。
- 爱马仕当前33.8倍PE远低于10年均值44.5倍，但空头担心其向香奈儿让出市场份额且配货比下降。
- NOM数据显示小红书首次出现月度总使用时长同比下降，AI聊天机器人正在替代其“信息发现”的核心价值。

区域市场：亚洲与新兴市场的结构性机遇

亚洲正迎来“油跌、钱紧、科技热”的罕见窗口，东盟成为AI基建新枢纽，印度国防板块进入订单兑现驱动阶段。

- GS认为亚洲通胀压力快速消退但央行紧缩倾向未同步降温，科技出口重塑部分经济体增长曲线。

- 台湾地区2026年GDP增速被上调至10.2%，直接受益于AI芯片与半导体生态持续扩张。
- 韩国存储器双雄的巨额投资本质上是关于“供给短缺”与“竞争壁垒”的豪赌，但市场反应复杂。
- 德里电动车新政对CNG天然气业务构成“终局价值风险”，从2027年起只允许新电动三轮车注册。
- GS发现投资者对印度国防板块的兴趣从“能否买”转向“买什么、何时买”，订单兑现和盈利增长成为新驱动。
- Solar Industries是讨论最多的股票，焦点在于能否从炸药企业成功转型为复杂平台级国防供应商。
- IMF对爱尔兰发出罕见警告，跨国公司依赖成为最大风险，需利用当前“窗口期”进行结构性改革。

风险偏好与资金流向：全球资金正在重新配置

全球资金流向出现微妙转向，美股基金流入减速，新兴市场保持韧性，投资者风险偏好正在结构性再平衡。

- NOM数据显示6月19-25日当周，海外资金流入美国股票基金规模从39亿美元骤降至14亿美元，降幅超60%。

- 新兴市场基金同期流入18亿美元，与前一周的19亿美元基本持平，6月累计已达29亿美元。

- 韩国个人投资者上周仅净买入4900万美元美股资产，相比前一周的9.9亿美元大幅下降。

- 台湾投资者转向美债，上周净买入6100万美元美元计价债券基金，扭转了前一周的净卖出。

- GS信用债报告指出利差极窄但收益率具吸引力，当前信用债的吸引力几乎完全来自无风险利率本身。

- 养老金和保险公司作为“基于收益率”的买家，持有美国公司债市场至少40%的流通名义金额。

- GS供应链拥堵指数已回到疫情前基线（2级），但运费正在悄悄反弹，亚洲→美西航线运费环比大涨19%。

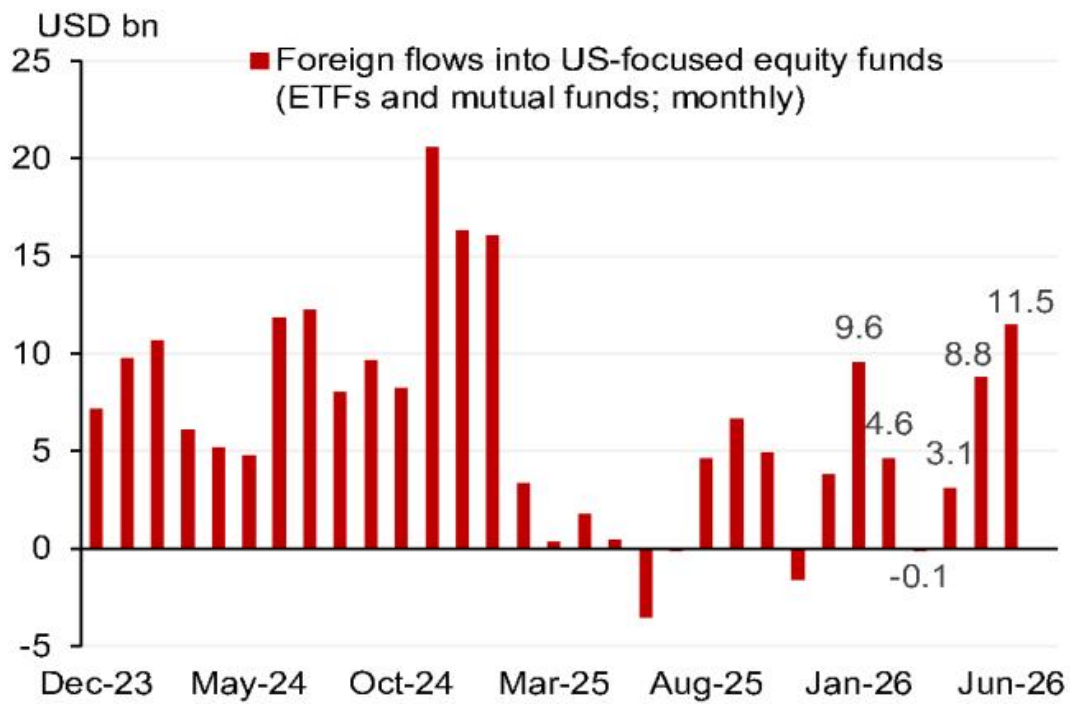

Figure 9 - Foreign inflows into EM-focused ETFs totaled USD1.8bn between 19 and 25 June, following inflows of USD1.9bn in the previous week. In MTD June, foreign investors net bought USD2.9bn of EM funds (mainly into EM equity funds USD2.3bn), surpassing infl

科技与产业变革：AI重塑制造业、农业与商业地产

AI正在从效率工具升级为竞争基础的重写力量，制造业选址逻辑、农业信息不对称和商业地产持有模式均面临根本性变革。

- BCG报告显示，德国食品加工厂通过部署未来工厂，比搬到中国获得高达14个百分点的成本优势。
- 麦肯锡调研发现88%的企业在实验AI，但81%没有报告任何有意义的利润改善，组织转型滞后是核心瓶颈。
- BCG指出农业AI正在压缩信息不对称和专家溢价，过去支撑农业价值链利润的“谁更懂”正在被重新定价。

- 商业地产行业每年错失约2000亿美元的“暗价值”，问题在于僵化的持有策略和运营模式的代际落后。
- 波士顿咨询认为CPG公司规模化部署AI可带来220-350个基点的EBIT提升，零售商对应180-360个基点。
- MS指出MLCC真正的赢家不是提价而是产品迭代，村田通过材料工艺优势在高端市场形成结构性壁垒。
- AI Agent正在成为企业AI应用的最大亮点，62%的企业在试水，但只有23%在规模化部署。

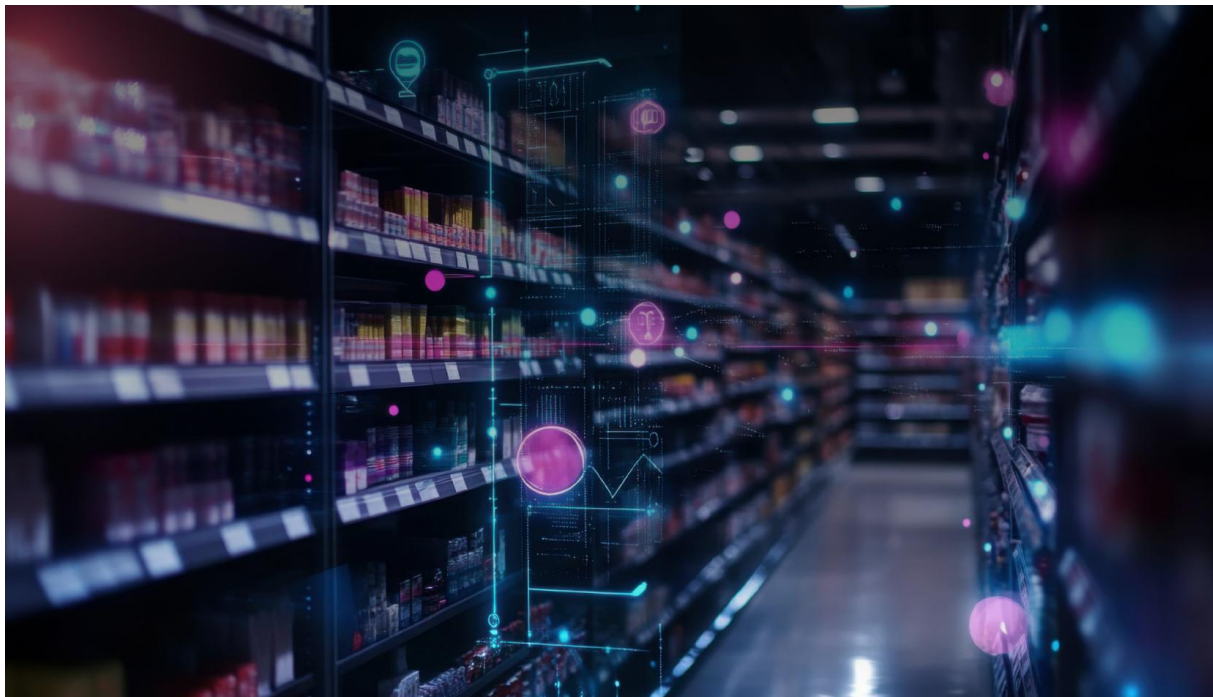

Exhibit 1 - The next competitive separation will not come from adding more solutions, nor from building more sophisticated models. It will come from applying AI more deeply to the core commercial initiatives that build sustainable advantage: faster innovation, higher-fide

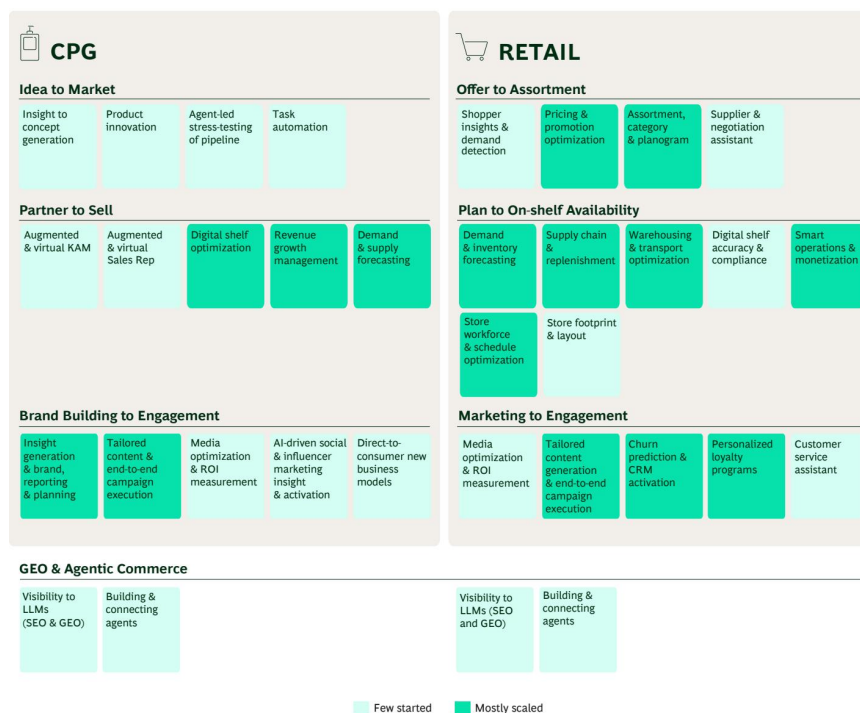

Exhibit 1 - AI's impact is expanding across the demand value chain. CPG companies and retailers have long used analytics and machine learning in areas such as product recommendations, pricing, and demand forecasting. What has changed is the range of work that AI can now a

Exhibit 2 - So far, companies have moved fastest where the economics are clearest. In CPG, that movement has occurred in demand and supply forecasting and revenue growth management optimization. Retailers have advanced furthest in how they manage availability, forecasting

Exhibit 2 - So far, companies have moved fastest where the economics are clearest. In CPG, that movement has occurred in demand and supply forecasting and revenue growth management optimization. Retailers have advanced furthest in how they manage availability, forecasting

Exhibit 3 - For the leaders, the value pool is material and likely to grow. BCG experience with clients in scaling individual initiatives suggests that scaling the full set of relevant AI initiatives across the demand value chain can deliver 220 to 350 basis points of cum

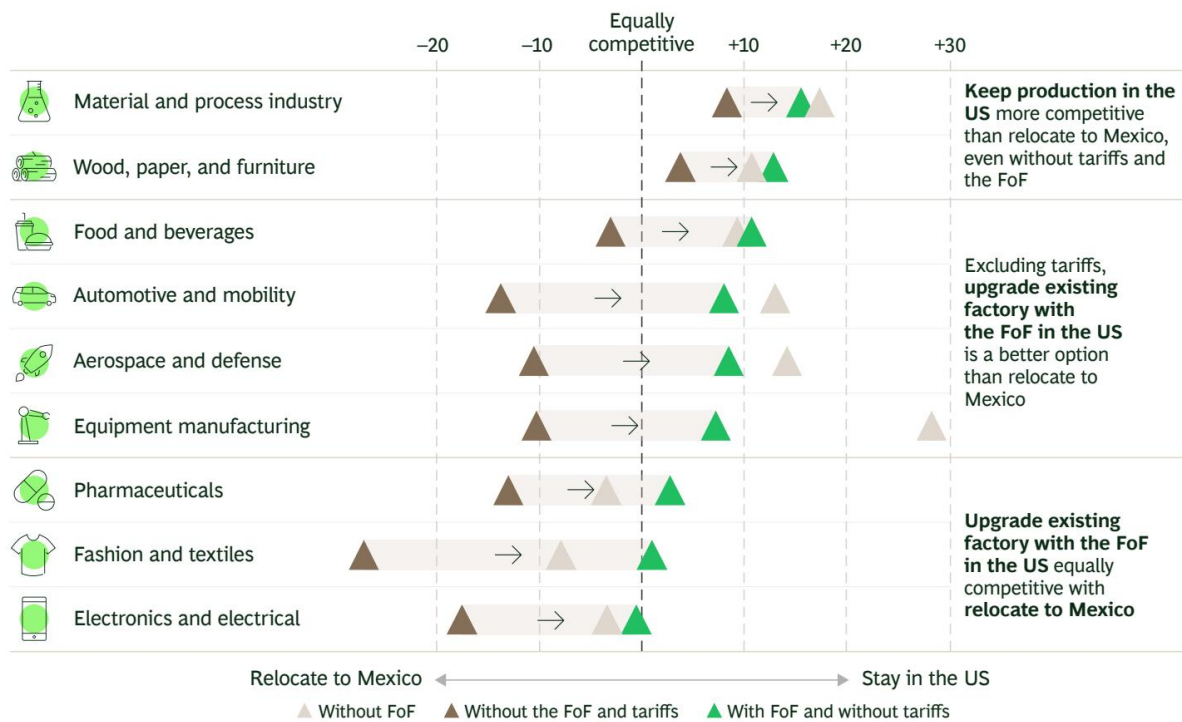

Exhibit 7 - In greenfield settings, by contrast, FoF capabilities can be embedded from the outset, making site selection more responsive to underlying differences in operating cost and initial one-offs (cost of land and factory building). Here, the Germany-versus-China co

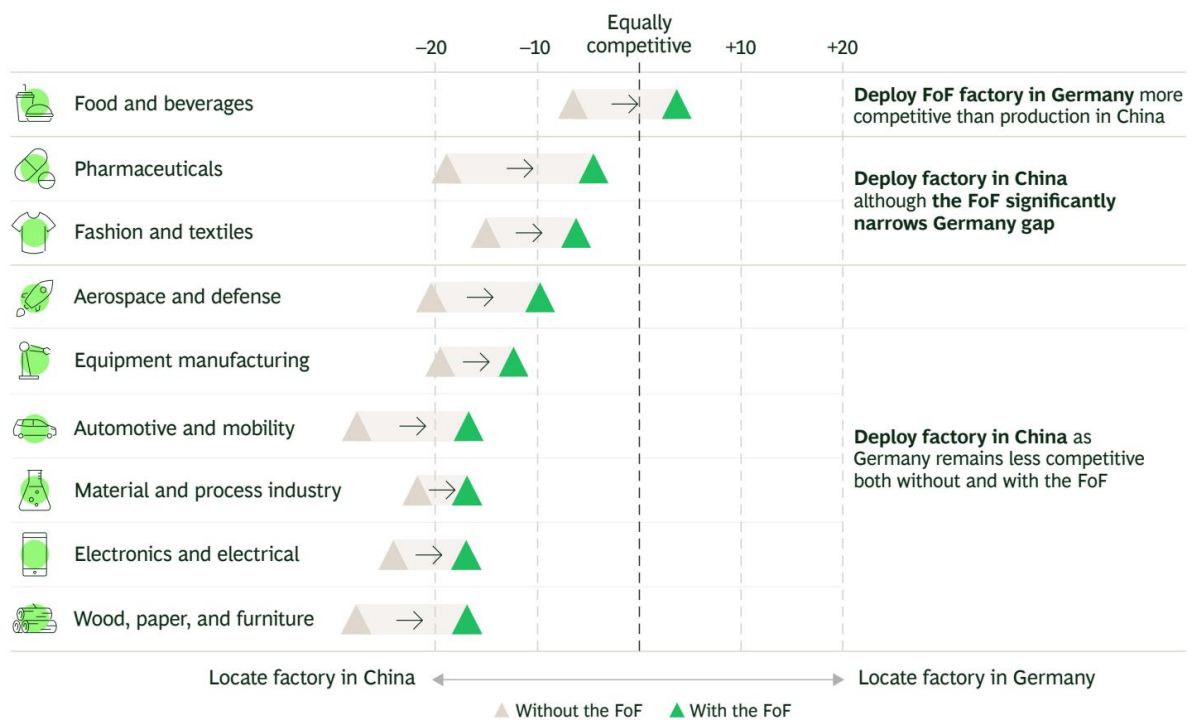

EXHIBIT 7 - Americas. Tariff-driven trade realignments are creating short-term uncertainty—most companies have deferred strategic decisions on production location waiting for clarity that has yet to materialize. Beyond these immediate dynamics, investing in the FoF and it

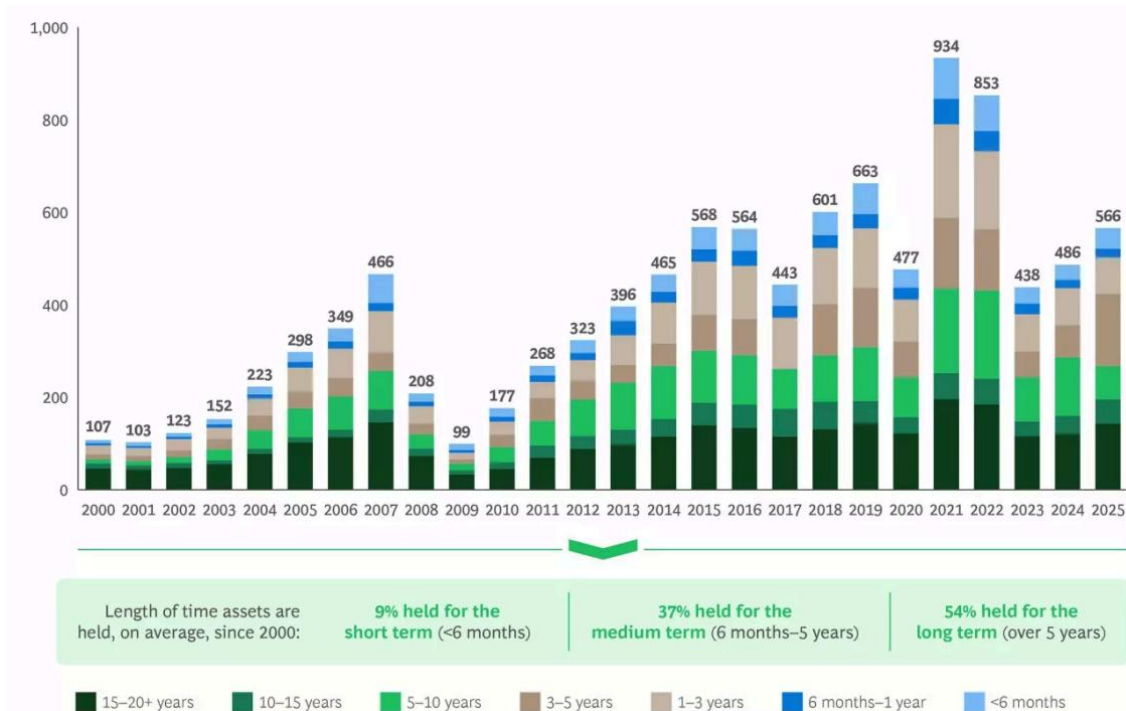

Exhibit 1 - ## EXHIBIT 1 Even in the US, Most Investors Hold Commercial Real Estate for the Long Term Share of property sales held for a given period before disposal (by volume, \\$/B) Sources: CoStar; BCG analysis. Note: Amounts apply to the price when assets were disposed

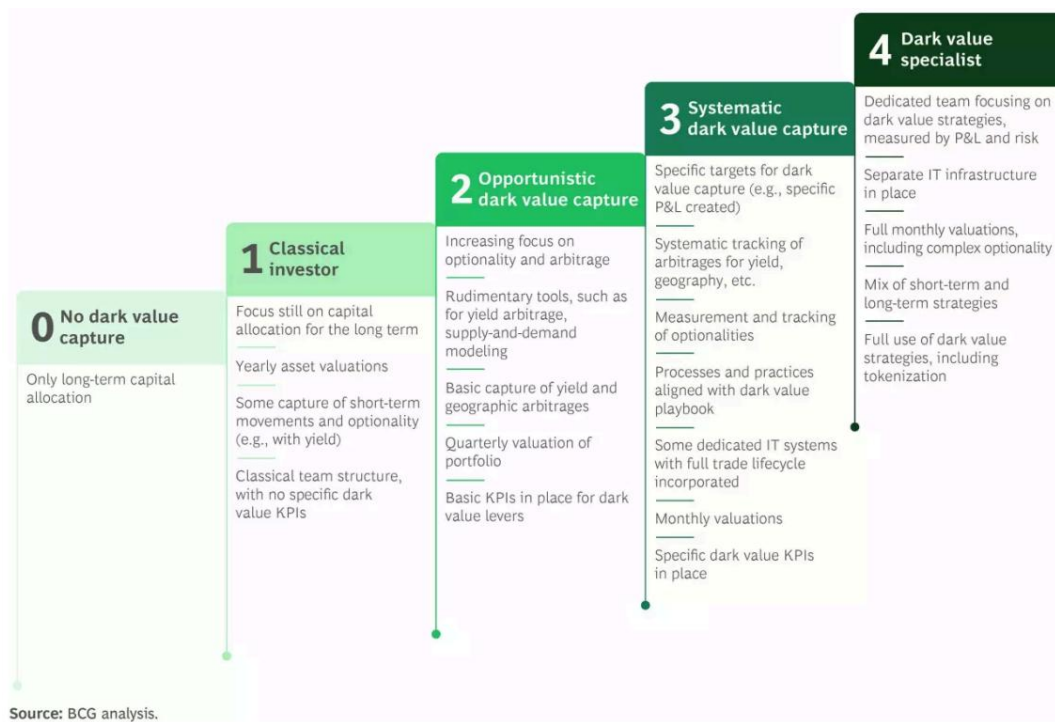

Exhibit 2 - approximately 500 C-suite executives across industries worldwide. We ' ve found that most players are currently still at zero or step one on a value capture ladder, meaning they allocate capital for the long term and revalue assets on a yearly basis. (See Exhibi

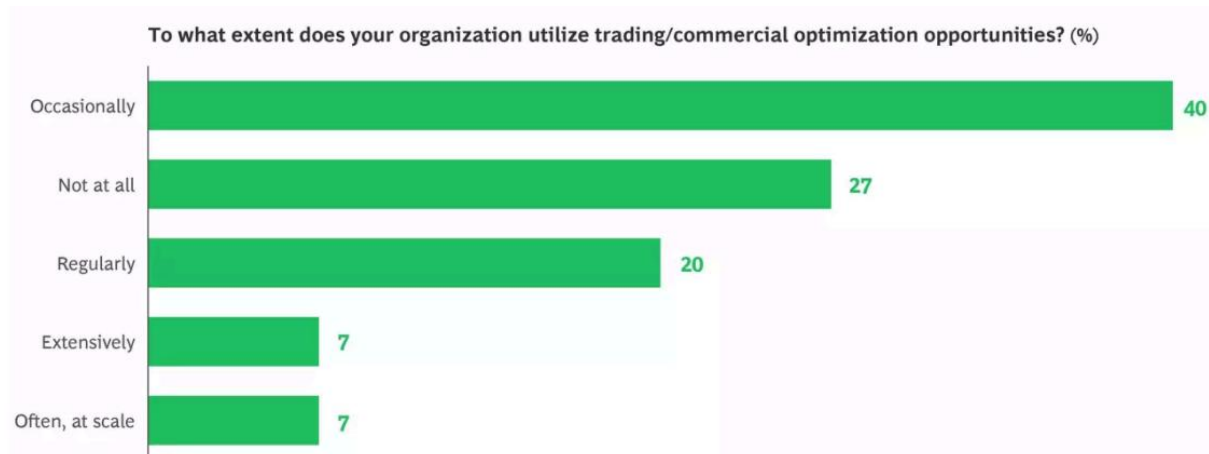

Exhibit 3 - # The Importance of Acting Systematically Some commercial real estate investors already use optimization strategies similar to those of commodity traders and hedge funds. For instance, they may “ flip ” an asset for a quick profit. But most use these strategies

Geographic complexity Yield arbitrage: move investments from lower yielding markets to those generating higher income relative to total investment, capturing spread opportunities while balancing asset risk and appreciation Mark-to-market/valuation modeling: provide real-time asset valuation based on current market prices or valuation models, enabling mispriced assets across markets to be identified	Quality complexity Rezoning/class upgrade: unlock value by repositioning existing assets as alternative types or classes offering stronger market demand and higher income potential, through rezoning, re-entitlement, or renovation Contract optionality optimization (lease period): maximize mid-term lease value by exercising built-in options, contingent on thoughtfully designed lease terms and accurate market forecasting	Time complexity Short-term leasing: agree leases of one year or less to capture cash flows that reflect or are above current market rates; the strategy is particularly advantageous where prices are expected to rise Short-term to medium-term lease optimization: optimize lease durations within market cycles by securing longer terms during expected rent or demand declines and using short-term leases to benefit from rising market rates
Industry reconfigurability Market sensing: leverage tools that monitor market dynamics, like social media monitoring, to detect shifts early and guide strategic/investment decisions, anticipating rather than reacting to market movements AI sentiment analysis: use LLM models to uncover hidden sentiment or patterns in public and private information to uncover changes in demand	Immediate buffers Dry powder for distressed assets: strategic use of available capital to acquire assets that are temporarily undervalued or facing financial stress, with the goal of benefiting from a recovery as market conditions stabilize Inventory optionality: hold a diverse mix of commercial real estate assets over the long term to enable selling of specific assets at a premium during short-term price spikes	Capital flows Capital raising/private credit/retail financing: access a diverse mix of funding sources with flexible financing structures that enhance resilience, sustain liquidity, and enable timely investment execution Tokenization: enable fractional real estate ownership through digital tokens to broaden investor access and improve liquidity through increased secondary market activity

Exhibit 4 - \- Industry Reconfigurability. Due to high transaction costs, substantial regulations, long development cycles, and information asymmetry, commercial real estate players are slow to respond to supply and demand signals. This weak reconfigurability increases as

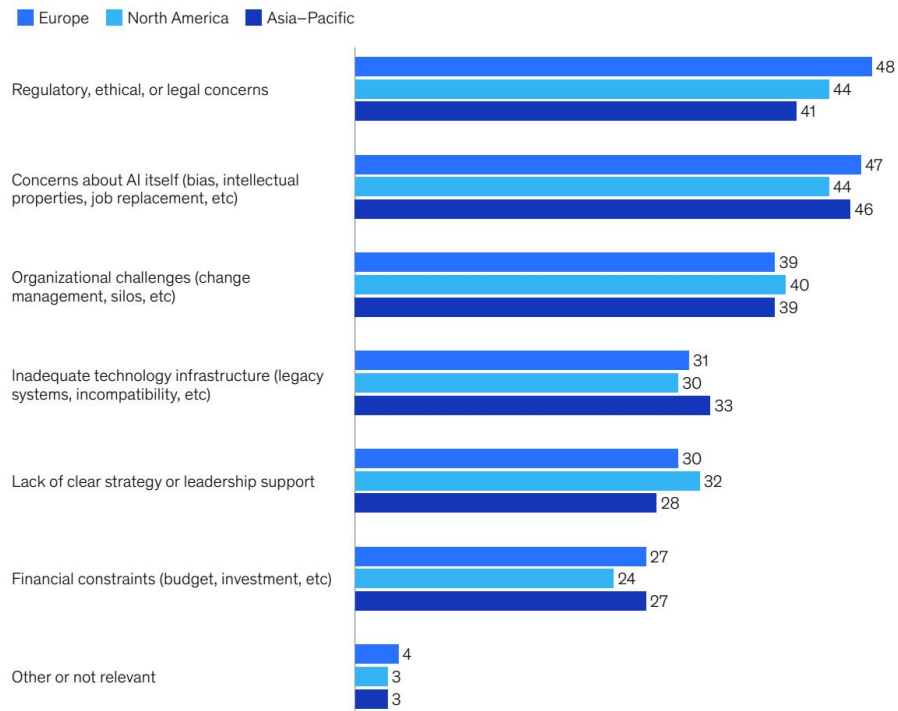

Exhibit 1 - These findings raise questions about how organizations can build a “ test, learn, and adapt ” mindset and a culture of continuous improvement, and about how leaders redefine roles and responsibilities in a world in which machines can think, orchestrate, decide,

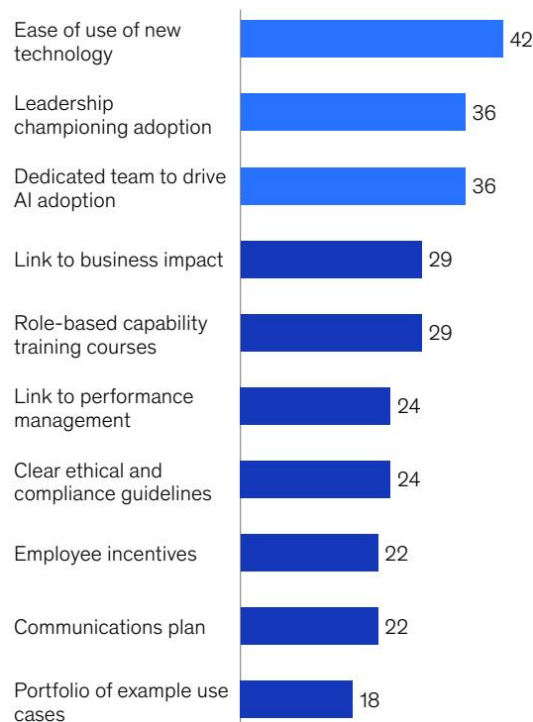

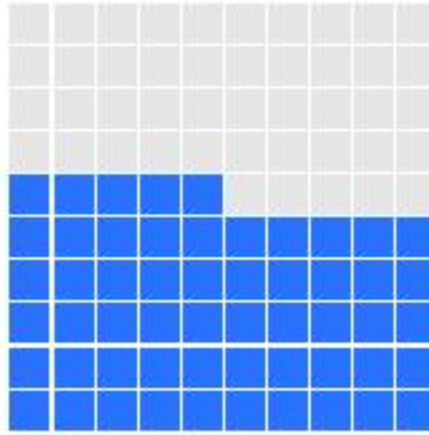

Exhibit 2 - One way to tackle such concerns is to build a responsive risk framework that proactively addresses both technical and ethical challenges. Winning employees' buy-in is another path to accelerating adoption at scale. This can be done by identifying high-impact A

金融与保险：结构性转向与风险重定价

银行股最大的未被定价风险从信用风险转向网络安全引发的流动性风险；保险业投资者偏好正从财险转向寿险和健康险。

- JPM报告指出前沿AI模型已将发现零日漏洞的时间从数月缩短至数小时，AI驱动的网络攻击已从理论进入实践。
- 银行股定价的核心变量正从盈利能力和资本充足率转向基础设施韧性和流动性管理能力。
- 美国大型银行在应对AI网络攻击方面处于优势地位，欧洲银行相对落后。
- 波士顿咨询报告显示全球保险业过去五年年化总股东回报率达15%，首次超过行业股权成本。
- 投资者正系统性地从财产与意外险和再保险转向人寿与健康险和综合险，同时将资金从美国向欧洲和亚太迁移。
- 欧洲五年TSR达20.3%，亚太一年TSR高达35.3%，背后逻辑是美国市场波动加大，资金在“寻找质量”。
- AI正在重塑承保、理赔、人才等核心环节，财险面临费率走软和竞争加剧，并购将成主要出路。

新兴市场与主权风险：制度韧性成为关键

小型开放经济体面临跨国公司依赖和地缘碎片化的双重挑战，制度性改革而非资源周期成为抵御外部冲击的核心。

- IMF对爱尔兰发出罕见警告，跨国公司税收和投资集中度成为脆弱性的关键来源，财政盈余可持续性存疑。
- IMF模型显示贸易战对爱尔兰整体经济影响有限，AI驱动的生产率提升才是真正增长引擎，高场景下GDP可涨11%。
- 世界银行报告指出毛里塔尼亚的韧性核心驱动力是制度性改革，公共债务从52%降至40%，非资源部门接过增长接力棒。
- IMF建议西班牙引入借款人导向的宏观审慎措施，新发放贷款中LTV超过80%的占比持续上升，风险在积累。
- 西班牙地方财政存在顺周期陷阱，衰退期间削减教育和医疗开支在欧元区几乎是独一无二的。
- 兰德公司报告揭示英国司法系统陷入“危机-修复”循环，传统预算拨款模式已显示系统性失灵。
- 预测市场在2026年世界杯推动下名义交易量创历史新高，年化规模达6750亿美元，较2025年增长超4倍。

教育与公共治理：结构性断层与融资模式创新

教育课后项目与课堂的学术对齐存在结构性断层，公共司法系统面临融资模式创新的迫切需求。

- 兰德公司调查显示仅52%的校长认为课后项目与课堂教学在学术上对齐，高贫困学校和城市学校更倾向于对齐。
 - 校内老师带的课后项目学术对齐比例更高（59%），外部机构只有45%，因为校内老师更熟悉教学内容。
 - 约五分之一的校长坦承学校根本没有对齐的努力，其中绝大多数是小学，定位是“看护”和“玩耍”。
 - 兰德公司报告指出英国司法系统根本问题不是缺钱，而是缺一种将资金从前端预防导向后端成本的融资机制。
 - 社会影响债券等创新融资模式在HMP
- Peterborough试点显示重新犯罪率降了8.4%，但尚未从“漂亮案例”走向“系统解法”。
- 麦肯锡报告强调企业需要“双重转型”：技术转型与组织转型同步推进，AI落地的真正瓶颈不是技术而是组织。
 - 仅20%的领导者认可非金钱激励能驱动绩效，72%的组织自认没准备好应对即将到来的变革。

结语

综合来看，当前市场正处于宏观压力缓解但结构性分化加剧的十字路口。油价回落与AI热潮并行，但真正的胜负手在于各国能否在政策工具箱收紧的背景下，抓住科技驱动的增长机遇，同时管理好内需疲弱、地缘风险和制度转型的挑战。投资者需要从“看总量”转向“看结构”，在分化中寻找alpha。

逐篇报告摘录

以下摘录来自当天已完成 MinerU 解析和内容生成的报告文件夹，用于确认覆盖范围；主题摘要仍以开头各板块为准。

[R001] HSBC：油价下跌不是万灵药，全球经济的“暗流”才真正决定胜负

归类：宏观与利率：全球增长分化，政策博弈加剧 / 能源与大宗：油价回落与电力瓶颈并行

HSBC：油价下跌不是万灵药，全球经济的“暗流”才真正决定胜负

油价跌了。布伦特原油从冲突高峰回落至每桶80美元附近，霍尔木兹海峡在停火协议延长后逐步恢复通航。市场松了一口气，政策制定者也面露宽慰之色。

但HSBC全球首席经济学家Janet Henry团队在最新发布的《Crosscurrents》报告中明确指出：油价回落只是消除了最坏情景，全球经济真正的胜负手，藏在三条彼此对冲的“暗流”之中——人工智能投资的狂热、厄尔尼诺对粮食供给的威胁，以及各国财政与货币政策的分道扬镳。

这不是一份“油价跌了，全球就安全了”的报告。恰恰相反，它告诉我们：即便地缘风险暂时缓解，年的全球经济仍将是一个高度分化的世界——有人受益，有人承压，而大多数决策者面临的挑战远未结束。

1. 油价下跌只解了近忧，远虑在于三条“暗流”正在重塑全球增长格局

[R002] NOM：全球资金流向正在发出一个被忽视的信号

归类：风险偏好与资金流向：全球资金正在重新配置

全球资金流向正在经历一次微妙但值得警惕的切换。NOM最新一期高频资金流监测数据揭示了一个关键事实：涌入美国股票基金的外资规模在6月下旬骤然减速，从上一周的39亿美元骤降至14亿美元，降幅超过60%。与此同时，新兴市场基金却保持了稳定的资金流入。

这不是一个孤立的数据波动。它可能标志着全球投资者风险偏好的结构性再平衡，以及AI主题从普涨到分化的临界点。对于正在评估下半年资产配置的决策者而言，这份周度报告提供了一个不可忽视的早期信号。

NOM亚洲外汇策略团队在6月最后一周发布的这份报告中，没有给出任何方向性判断。但数据本身就在说话。

KC评论：NOM的这份报告没有结论，但数据层面的减速信号非常清晰。完整报告包含了从月度、周度到日度的多层次资金流图表，以及韩国、台湾等关键市场的零售资金拆解。这些细颗粒度的数据，往往比一个简单的“买入/卖出”评级更能揭示市场情绪的边际变化。

NOM数据显示，6月19日至25日当周，海外资金流入美国股票基金（ETF和共同基金）的规模为14亿美元，较前一周的39亿美元显著收窄。这是连续第二周流入规模从高位回落。

[R003] GS：信用债市场真正的故事不是崩盘，而是分化

归类：风险偏好与资金流向：全球资金正在重新配置

当市场还在争论信用利差是否过于狭窄、风险是否被低估时，GS最新发布的宏观信用报告给出了一个反直觉的核心判断：信用债市场当前最值得关注的不是系统性风险，而是结构性分化。

这份由GS信用策略主管Amanda Lynam执笔的报告，在2026年中这个时间节点上，提出了一个对机构投资者至关重要的观察框架。报告的核心主张可以概括为一句话：在利率中枢抬升的新常态下，信用市场的定价逻辑已经发生根本性转变，真正的alpha机会不在于判断利差方向，而在于理解不同板块、评级和区域之间的分化程度。

对于手握重金的保险、养老金以及企业司库而言，这份报告的价值不在于预测市场走向——事实上，GS对利率和利差的总体判断相当温和——而在于它提供了一个在当前环境下如何重新定义“风险”与“机会”

的思维框架。

GS报告最核心的洞察，或许在于它解释了为什么信用利差可以在历史低位徘徊，而投资者却并未因此感到不安。

关键数据点在于：从2010年到2021年，美元投资级信用利差平均占全部收益率的43%；而今天，这个比例只有15%。在欧元投资级市场，这一转变更为剧烈——从84%骤降至23%。

[R004] JPM：银行股最大的风险不是坏账，是AI黑客

归类：金融与保险：结构性转向与风险重定价

当市场还在为利率曲线、信贷周期和资本充足率争论不休时，JPM一份长达数十页的研报抛出了一个完全不同的风险排序：全球银行股估值中，目前最大的未被定价风险不是信用风险，而是网络安全风险。

这不是一个遥远的威胁。报告指出，前沿AI模型——如Anthropic在2026年4月发布的Claude Mythos Preview和GPT-5.5——已将发现零日漏洞的时间从数月缩短至数小时。英国AI安全研究所的评估显示，Mythos在专家级黑客任务上的成功达到了73%，而2025年4月之前没有任何模型能够完成这些任务。

更值得注意的是，谷歌威胁情报集团在2026年5月首次确认，已发现一个威胁行为者使用了其认为是由AI开发的零日漏洞。这意味着AI驱动的网络攻击已从理论进入实践。

对于银行投资者而言，这意味着传统的估值框架可能需要重新审视。JPM提出，在“神话时代”（Mythos-class era）的网络安全威胁下，银行股定价的核心变量正在从盈利能力和资本充足率，转向基础设施韧性和流动性管理能力。

KC评论：这份报告的核心信号很清晰——网络风险正在从“运营问题”升级为“估值因子”。投资者需要关注的不仅是银行赚了多少钱，而是它们在面对AI驱动的网络攻击时，存款是否会在社交媒体时代瞬间流失。这直接决定了银行的资金成本和生存概率。

[R005] GS：最高法院5-4裁决，美联储独立性的真正考验刚刚开始

归类：宏观与利率：全球增长分化，政策博弈加剧

这份由GS首席经济学家Jan Hatzius与政治政策分析师Alec

Phillips联合署名的最新报告，在8月最高法院就美联储理事Lisa Cook去留问题作出5-4裁决后迅速发布。市场普遍关注的是“Cook能否留任”这个短期结果，但GS团队却在字里行间给出了一个更值得推敲的判断：本轮诉讼的终点不在Cook本人，而在美联储的独立性能否经受住总统更换理事的实质性挑战。

报告的核心价值不在于预测Cook案的最终胜负，而在于拆解了最高法院多数意见与异议意见之间的真实分歧，并由此推断出未来12-18个月美联储治理结构面临的不确定性。对于任何持有美债、关注利率路径或配置全球宏观资产的投资者而言，这都不是一个可以忽略的次要议题。

GS团队在报告中明确指出，尽管1月口头辩论时市场预期最高法院可能以接近共识的方式支持Cook留任，但最终5-4的投票结果比预期更接近。然而，报告随即给出了一个重要的分层判断：多数意见的措辞远比投票数字所暗示的要坚定。

多数意见写道，法院“拒绝为这个国家（以及世界）最重要的金融机构之一的状态制造疑虑”，并强调核心问题是“所提出的解职理由是否真正表明不称职……或者它仅代表一种试图换上一个更合意人选的努力”。GS认为，这种措辞本身就是对美联储独立性的一种实质性背书。

相比之下，多数异议意见主要聚焦于程序性问题，而非Cook案本身的实质是非。这意味着，那些投下反对票的大法官，未必会在案件的最终审理中作出不利于Cook的裁决。

[R006] Citi：耐克若切断中国经销商线上渠道，最大赢家不是它自己

归类：未被主题摘要引用

7月1日，耐克将发布第四财季业绩。对很多投资者而言，这只是一次常规财报。但对关注中国运动鞋服赛道的人来说，这可能是一个决定未来两年板块格局的关键时刻。

Citi在最新一份研报中，围绕耐克中国线上分销策略的三种可能情景，给出了明确的股票含义推演。这份报告的价值不在于预测耐克会选哪条路，而在于它揭示了一个被市场低估的结构性问题：耐克在中国市场积累的“线上分销能力”，远比它自己想象的更难被替代。

这不是一个简单的“品牌方要不要直营”的决策。这是一场关于渠道权力转移、本土化运营壁垒、以及反垄断风险的博弈。而在这场博弈中，最值得关注的，可能不是耐克本身，而是那些站在它对立面的中国品牌 and 竞争对手。

上周，耐克中国最大经销商宝胜国际（Topsports）的股价持续下跌。即便公司在周四晚间发布了澄清公告，周五股价依然没有止住跌势。

Citi的分析师认为，这种市场行为传递了一个清晰的信号：投资者已经在为“耐克将终止与宝胜的线上分销合作”这一最坏情景定价。宝胜的线上业务约占集团总销售的22%，如果这部分业务被直接砍掉，对公司的冲击将是实质性的。

[R007] GS：亚洲正迎来一个“油跌、钱紧、科技热”的罕见窗口

归类：宏观与利率：全球增长分化，政策博弈加剧 / 能源与大宗：油价回落与电力瓶颈并行 /

中国：内需疲弱与出口强劲的罕见分化 / 区域市场：亚洲与新兴市场的结构性机遇

过去几周，亚洲市场正在经历一场罕见的“三重奏”：油价暴跌、美元走强、科技出口狂飙。GS在最新发布的《Asia Views》报告中，给出了一个看似矛盾但逻辑自洽的核心判断：亚洲正站在一个“宏观压力缓解、但政策工具箱收紧”的十字路口。这不是一个简单的“利好出尽”或“利空出尽”的故事，而是一个需要精细拆解的结构性窗口。

这份报告最值得关注的判断是：亚洲的通胀压力正在快速消退，但央行的紧缩倾向并未同步降温。与此同时，以AI为核心的科技出口正在重塑部分经济体的增长曲线，而中国则陷入“出口独大、内需疲弱”的罕见分化。对于投资者而言，关键不再是判断方向，而是识别哪些经济体能够从“油跌”和“科技热”中真正受益，哪些仍被“美元压力”和“内需塌陷”所拖累。

1. 油价暴跌是“解药”，但不是“万能药”：亚洲的通胀故事正在重写

布伦特原油从4月底接近120美元/桶的高位，暴跌至报告撰写时的72美元/桶。GS大宗商品团队预计四季度油价将稳定在80美元/桶。这轮油价的“近乎回吐”是亚洲进口国最直接的利好。

但GS同时指出，成品油价格仍高于战前水平，因为海湾地区和俄罗斯的炼油设施受损，炼油利润空间依然宽裕。这意味着，终端消费者感受到的降价幅度可能不及原油期货的跌幅。对于菲律宾等能源补贴有限的经济体，通胀压力虽已见顶，但回落速度可能慢于预期。

[R008] 摩根斯坦利：MS：中国正等待的不是刺激，而是“花钱的方向”

归类：中国：内需疲弱与出口强劲的罕见分化

当市场仍在猜测中国是否会推出新一轮大规模消费刺激时，MS最新一期中国情绪追踪报告给出了一个更克制的判断：北京正在准备的是以资本支出为核心的财政发力，时间窗口在第三季度，但重点投向是AI和电网，而非消费。

这个判断对当前市场叙事构成了一次清晰的纠偏。如果你还在用“消费复苏强度”来评估中国资产，这份报告提醒你，政策层关注的变量，可能和你不在同一个频道上。

报告由首席中国经济学家邢自强团队撰写，核心观点可以浓缩为一句话：二季度经济仍在温和放缓，但政策层正在为下半年积蓄弹药，只是这些弹药将主要打向供给端的基础设施，而非需求端的消费补贴。

1. 二季度GDP增速可能只有4.4%，但这不是最值得担心的事

MS对二季度实际GDP增速的追踪值为4.4%，低于全年5%左右的官方目标。但报告没有将这一点渲染为风险信号，而是将其理解为两个暂时性逆风叠加的结果。

[R009] NOM：美元下半年会跌，但真正的赢家不是欧元

归类：宏观与利率：全球增长分化，政策博弈加剧

过去几个月，美元在美联储鹰派预期和中东局势缓和的夹缝中走出一波反弹。市场普遍认为，美联储年内还有加息空间，美国经济韧性足以支撑美元维持强势。但NOM最新发布的中期外汇展望报告给出了一个截然不同的判断：美元的强势在下半年很难持续，DXY指数年底将回落至98附近，2027年甚至可能跌至92.7。这背后不是地缘政治的转向，而是美联储政策路径与市场定价之间正在积累的预期差。

这份报告的核心主张清晰而直接：全球外汇市场的焦点正在从中东地缘风险回归到央行动作与利率定价的相对变化上。对于G10货币，NOM认为最大的机会来自那些央行仍有加息空间、同时资本流动动能正在改善的货币——欧元、日元、新西兰元和澳元。而对于亚洲（不含日本）市场，人民币、新台币和新加坡元将跑赢韩元、印尼盾和印度卢比。

这些判断的背后，是NOM对美联储年内不会加息的坚定预期。报告指出，市场目前定价了约40个基点的加息，但NOM认为，下半年美国增长和通胀动能的逐季放缓，将给美联储主席沃什提供向鹰派回击的机会。如果相对美国收益率下降40个基点，美元将面临系统性贬值压力。

KC评论：NOM这个判断的核心逻辑不是美国经济要崩，而是市场对美联储的定价太鹰了。如果下半年通胀数据确实走软，美联储按兵不动，美元就会补跌。但这里有一个关键假设尚未验证——沃什是否真的会“向鹰派回击”？报告没有完全展开的是，如果沃什选择观望而非主动打压加息预期，美元的下行节奏可能会慢于NOM的预测。完整报告里对沃什第一次会议讲话中“被忽略的鸽派元素”做了详细拆解，这部分值得仔细阅读。

1. 欧元是G10中最大的受益者，但前提是市场重新定价ECB

[R010] NOM：德里的电动车新政，正在给CNG天然气写下“终局”

归类：区域市场：亚洲与新兴市场的结构性机遇

一份来自印度首都的政策文件，可能正在改写整个城市天然气分销行业的估值逻辑。2026年6月29日，德里内阁批准了其“电动车政策”，并于7月1日正式生效。NOM在第一时间发布的研报中给出了一个直接而冷静的判断：这项政策对德里最大的天然气分销商IGL的CNG（压缩天然气）业务，构成了“终局价值风险”。

这不是一个关于补贴多少、销量增速放缓多少的温和讨论。这是一份关于“一个核心业务模式在特定市场内，何时以及以多快的速度走向终结”的研究。对于任何关注印度能源转型、基础设施资产定价，乃至全球城市治理范式的投资者而言，这份研报的价值不在于预测一家公司的季度盈利，而在于揭示一个正在发生、且可能被其他城市复制的结构性拐点。

要理解这份政策的冲击力，需要先看清其与前身——2020年德里电动车政策的根本差异。NOM在报告中用了一个清晰的对比表格。2020年政策的核心哲学是“激励引导”，政府提供购车补贴和税费减免，希望人们自愿转向电动车。结果如何？2024年电动车在新车注册中的渗透率目标为25%，实际只达到约13%。

2026年政策的核心哲学则变成了“强制要求”。它不再只是发钱，而是直接设立了硬性的注册禁令。从2027年1月1日起，德里将只允许新的电动三轮车（包括自动人力车）和小型货物运输车注册，汽油、柴油、CNG和混合动力车型一律禁止。从2028年4月1日起，同样的禁令将适用于两轮车。政策目标更是激进：到2027年，95%的新增个人车辆注册必须是电动车。

这不再是政策风向的微调，而是游戏规则的根本性改写。当政府从“引导者”变为“执法者”，整个市场的需求曲线将从平滑的渐进式替代，变成陡峭的断崖式切换。对于依赖CNG作为核心燃料的资产，其未来现金流的时间分布被瞬间压缩。

[R011] JPM：韩国3.1万亿美元押注，存储器行业进入“超级周期”还是“产能陷阱”？

归类：半导体与存储器：超级周期还是产能陷阱？ / 区域市场：亚洲与新兴市场的结构性机遇

JPM：韩国3.1万亿美元押注，存储器行业进入“超级周期”还是“产能陷阱”？

当韩国政府与三星、SK集团共同宣布一项高达4755万亿韩元（约合3.1万亿美元）的长期投资计划时，全球半导体产业的目光再次聚焦于存储器。这份由JPM分析师Jay Kwon团队发布的报告，并未停留在对投资数字的简单罗列，而是试图回答一个更本质的问题：在AI需求看似无底洞的当下，存储器行业面临的究竟是前所未有的机遇，还是正在重蹈历史覆辙？

报告的核心判断是，韩国存储器双雄的巨额投资，本质上是一场关于“供给短缺”与“竞争壁垒”的豪赌。但市场对此的反应却相当复杂——消息公布当日，韩国存储器股价反而下跌。这种“利好出尽”的走势背后，隐藏着更深层的担忧：当供给以数倍于历史的速度扩张，当客户开始抱怨价格过高并诉诸法律，这个行业的游戏规则是否正在被改写？

这份投资计划的震撼力不在于数字本身，而在于其时间表和执行意图。JPM报告指出，三星和SK集团计划建设的产能规模，将是当前全球DRAM装机容量的两倍。更关键的是，建设节奏被大幅提前——三星将龙仁工厂的投产时间从年提前至

年，SK集团则将第四座工厂的投产时间从2045年拉近到2033年，整整缩短了12年。

这意味着，在2020年代末期之后，存储器产能的投放速度将比历史上任何时期都快。报告估算，仅前道晶圆设备支出就将占到总投资的60-70%，达到约万亿美元。如此庞大的资本开支，其背后的逻辑是韩国政府和企业对“AI存储器需求将长期超过供给”这一判断的坚定信仰。

[R012] JPM：工业利润的双速引擎，一个在飞驰，一个在熄火

归类：中国：内需疲弱与出口强劲的罕见分化

中国5月工业利润数据出炉，同比增速18.8%，看似稳健。但JPM这份最新研报揭示了一个核心判断：这轮利润增长不是“普涨”，而是一场结构性的“双速分化”——高科技和上游原材料行业利润飞驰，而消费相关行业却几乎熄火。对于投资者和产业决策者而言，真正的挑战在于：这种分化是暂时的周期错位，还是中国经济转型的长期底色？

这份报告的价值不在于告诉你利润在增长，而在于指出了容易被总量数据掩盖的关键信号：利润增长的质量和可持续性，正面临来自终端需求的根本性约束。读懂这份报告，需要关注的不是18.8%这个数字本身，而是数字背后的“温差”。

5月工业利润增长最显著的特征是“双引擎”驱动。第一个引擎是高科技制造业，尤其是与全球AI周期紧密相关的电子设备制造。报告数据显示，计算机、通信和其他电子设备制造业1-5月利润累计同比飙升103.9%，高技术制造业整体利润增长44.7%。这背后是全球AI投资浪潮对存储芯片、电子专用材料等产品的强劲需求，半导体供应链的快速改善成为最直接的受益者。

第二个引擎来自上游原材料。非有色金属行业利润同比增长117.1%，化学原料及制品利润增长71.6%。这与全球能源价格高位运行、以及AI和新能源产品对铜、铝等基础金属的需求拉动密切相关。上游企业不仅享受了量价齐升，还受益于成本端相对可控，利润空间显著扩大。

KC评论：这两个引擎的本质不同。高科技的利润增长来自“技术溢价”和全球需求共振，可持续性较强；而上游利润更多依赖价格周期，一旦全球能源价格回落，利润弹性可能迅速逆转。报告后面提到能源风险缓解，恰恰暗示了上游利润的“脆弱性”。

[R013] 摩根斯坦利：MS：中国顺差遇上欧盟防御，真正的风险不是关税战

归类：中国：内需疲弱与出口强劲的罕见分化

摩根斯坦利：MS：中国顺差遇上欧盟防御，真正的风险不是关税战

欧盟与中国的贸易摩擦正在升级，但这一次的剧本与2018年中美贸易战截然不同。MS首席中国经济学家邢子林（Robin Xing）团队在最新发布的研报中给出了一个核心判断：中国与欧盟之间的贸易紧张不会走向全面脱钩，但会以一种更制度化、更行业化的方式持续发酵。而真正值得关注的，不是关税清单本身，而是中国内部需求结构失衡正在将贸易顺差变成一个结构性变量——这意味着，即便没有新的贸易摩擦，中国与主要贸易伙伴之间的张力也会自然上升。

这份报告的价值不在于预测短期关税博弈，而在于揭示了一个长期逻辑：中国的经常账户顺差正在从“政策驱动”转向“结构驱动”。当住房投资进入长期下行、基础设施刺激空间收窄、而居民储蓄率居高不下时，过剩储蓄必然会表现为外部顺差。这不是一个可以靠汇率调整或短期让步解决的问题。

欧盟正在构建一套比2024年电动车反补贴调查更系统的对华贸易管理框架。MS团队梳理了欧盟近年来的政策工具演变，发现一个清晰的趋势：从个案式的反倾销反补贴，转向“制度化的经济安全管控”。

核心工具包括：外国补贴条例（FSR）在政府采购中的使用、国际采购工具（IPI）首次针对中国医疗器械、碳边境调节机制（CBAM）覆盖钢铁铝材和化工品、以及清洁能源补贴和汽车采购中不断强化的本地化要求。

[R014] NOM：中国二季度GDP增速或骤降至4.1%，出口繁荣掩盖了内需的真实收缩

归类：中国：内需疲弱与出口强劲的罕见分化

NOM：中国二季度GDP增速或骤降至4.1%，出口繁荣掩盖了内需的真实收缩

中国经济在2025年二季度正经历一场“冷热不均”的剧烈分化。NOM东方国际证券最新发布的研报给出了一个让市场难以忽视的判断：在经历了短暂的一季度反弹后，中国二季度实际GDP增速将从一季度的5.0%明显放缓至4.1%。这一预测并非危言耸听，而是基于对供给端和需求端双重指标的交叉验证。

更值得警惕的是，这份报告揭示了一个核心矛盾：出口在AI超级周期的推动下表现强劲，但这种繁荣更多体现在价格而非实物量上，且未能有效传导至国内生产与消费。与此同时，国内零售与固定资产投资增速已再次转负，房地产市场持续探底，居民消费信心受挫。这些信号叠加在一起，指向一个结论：当前经济的真实动能，比官方GDP数字所呈现的要弱得多。

这份NOM研报的价值，不在于它给出了一个悲观的数字，而在于它拆解了这个数字背后的结构性失衡——出口的“虚假繁荣”与内需的“真实萎缩”正在同时发生。对于产业决策者和投资者而言，理解这种分化的根源，远比争论GDP增速是否达标更为重要。

KC评论：NOM这个4.1%的预测，比市场主流预期要低。关键在于，他们认为二季度名义GDP增速可能因为通胀回升而稳定，但实际增长动能显著下滑。这意味着企业营收增长可能更多来自价格因素，而非销量扩张，利润质量需要仔细审视。完整报告中还有对GDP平减指数由负转正的分析，这个指标对理解企业盈利环境非常关键。

[R015] Citi：地产股回调不是终点，而是下一轮选股的起点

归类：地产与消费：分化加剧，结构性机会浮现

当市场被周度二手房成交量环比下降10%和季末流动性收紧所惊吓，地产板块再次遭遇抛售时，Citi却在6月下旬的行业会议后给出了一个反直觉的结论：他们正在变得更加积极。

这份由Citi分析师Griffin Chan和Cindy Li主笔的报告，并非简单喊多。它建立在一个关键的时间差判断上——市场当前的悲观情绪，忽略了一个即将到来的结构性窗口：从9月开始，主要开发商将集中推出新盘，而7月政治局会议很可能释放更明确的政策支撑信号。

换句话说，Citi认为，地产股最恐慌的时刻可能已经过去，但真正的分化才刚刚开始。投资者需要关注的不是整个板块是否见底，而是谁能在“销量复苏但利润承压”的新常态中，证明自己的商业模式可以穿越周期。

这份报告最值得被记住的判断是：2026年上半年将是开发商盈利能力的“压力测试”，但那些在土地市场保持纪律、在核心城市拥有产品溢价能力的公司，将在下半年迎来估值修复的窗口。

1. 5月销售数据已经出现“隐形的分化”——5家公司实现两位数增长，但行业整体仍在收缩

[R016] Citi：电池材料6月数据低于预期，但7月已开始修复

归类：未被主题摘要引用

这份来自Citi的最新实地调研报告，揭示了一个关键信号：中国电池产业链在经历了6月的生产放缓后，7月正在温和复苏。但更值得关注的是，这个信号背后的结构性含义——它并不等同于需求全面回暖，而是产业链在库存周期和价格预期双重压力下的自我调整。

报告的核心判断是：6月电池产量环比仅增1%，低于此前调研预期的3%，主要受锂价下行趋势和电池厂中报前库存管理影响。但7月头部电池厂商（除中创新航外）的排产预计环比增长5%，恢复了温和增长节奏。Citi认为这合理，因为6-7月本身需求加速不明显，而8月在新增产能和传统旺季（金九银十）支撑下，产量有望进一步提速。

对于产业决策者和投资者，这份报告的价值不在于“6月弱”或“7月修复”这个结论本身，而在于它提供了一个观察产业链真实运行状态的窗口——当数据与预期出现偏差时，偏差背后的驱动因素是什么？这些因素是暂时的还是结构性的？

KC评论：这份报告最值得看的不是7月环比增长5%这个数字，而是Citi如何在“6月数据低于预期”这个事实基础上，给出了一个既合理又留有谨慎余地的解读框架。完整报告里还有正极、负极、锂盐等各环节的7月排产预测对比图，这些数据比单一电池产量更能反映产业链全貌。

6月电池产量环比仅增1%，与调研预期的3%形成差距。Citi将其归因于两个因素：锂价下行趋势和中报前的库存管理。

[R017] Citi：苹果看上长鑫存储，中国DRAM的“全球第四极”叙事就此成立

归类：半导体与存储器：超级周期还是产能陷阱？

Citi：苹果看上长鑫存储，中国DRAM的“全球第四极”叙事就此成立

一份来自《金融时报》的报道，在6月最后一个周末悄然改变了中国半导体产业的一个关键叙事。苹果正在寻求美国政府批准，向中国DRAM制造商长鑫存储（CXMT）采购内存芯片。审批结果尚不可知，但Citi在第一时间发布的研报中给出了一个极其明确的判断：苹果的“考虑”本身，已经是对长鑫存储技术能力最有力的背书。这份背书，足以将长鑫存储从“国产替代故事”升级为“可信的全球第四大DRAM制造商”。

这不是一个关于“能不能获批”的新闻，这是一个关于“市场认知如何被重塑”的拐点信号。对于关注中国半导体产业链的投资者来说，Citi这份报告的核心洞察不在于苹果能否成功，而在于长鑫存储的LPDDR5 X产品已经达到10667Mbps的速度，具备了进入高端移动、平板和笔记本应用的资质。苹果的主动接触，意味着这家中国公司在产品可靠性上通过了全球最严苛的消费电子客户的初步筛选。

KC评论：很多人把注意力放在“美国会不会批准”这个政治博弈上，但Citi的视角完全不同。它告诉我们，苹果的“意向”本身就是一项巨大的信息增量。这意味着长鑫存储的产品在技术指标和良率上已经达到了可以进入苹果供应链的水平。政治审批是一个变量，但技术能力的确认是基本面变化。这个基本面变化，才是驱动供应链公司估值的核心。

1. 苹果的“意向”比“获批”更重要，它验证了长鑫存储已跨越技术分水岭

[R018] GS：DRAM周期正从“涨不涨”切换为“涨多少”

归类：半导体与存储器：超级周期还是产能陷阱？

2026年6月，当市场还在争论半导体周期是否见顶时，GS发布的最新DRAM情绪指标给出了一个不太一样的信号：整体指向“温和积极”，且与4月持平。

这个结论没有太多惊喜。真正值得关注的，是这份报告内部几个数据点构成的隐含叙事——它们指向一个判断：DRAM周期正在从“价格是否上涨”切换为“上涨的斜率、持续性和结构性分配”。

这不是一个简单的周期延续问题。它意味着投资者需要调整分析框架：过去两年靠“有没有涨价”判断景气度的做法，正在让位于更精细的定价权、需求结构和HBM（高带宽存储器）定价博弈。

5月以来，DDR5现货价格累计上涨20%，对5月合约价的溢价已达到25%。DDR4的溢价更激进，达到45%。

现货溢价本身并不罕见。但这次的不同在于：DDR5作为新一代主流DRAM，其现货价格正在成为合约谈判的参考锚点，而非传统的合约价引导现货。GS在报告中指出，投资者对2027年HBM定价的预期持续上升，部分原因正是“当前强劲的常规DRAM定价，可能在明年HBM定价谈判中被纳入考量”。

[R019] Citi：三星十年1000万亿韩元投资，韩国半导体设备商才是真正的“卖铲人”

归类：半导体与存储器：超级周期还是产能陷阱？

Citi：三星十年1000万亿韩元投资，韩国半导体设备商才是真正的“卖铲人”

当全球市场还在争论AI资本开支何时见顶时，一份来自韩国本土的产业信号正在被低估。

2026年6月29日，三星集团将在青瓦台正式公布一项规模空前的投资计划：未来十年，向半导体与AI领域投入约1000万亿韩元。这不是一个普通的扩产计划。Citi在最新发布的研报中明确指出，这笔投资的核心受益者并非三星电子本身，而是一批韩国半导体设备制造商——Wonik IPS、TES、Eugene Technology、TechWing等。

市场讨论AI芯片、讨论HBM、讨论先进封装，但真正决定这些技术能否落地的，是制造设备。而韩国正试图通过国家意志，把半导体设备供应链的主动权留在本土。

这份报告的真正价值，不在于告诉你三星要花多少钱，而在于揭示了三个被市场忽视的结构性变化：第一，韩国政府正在用“国家项目”的框架加速半导体产业地理重塑；第二，三星的投资节奏被大幅前置，Yongin集群的完工时间从2048年提前至

年；第三，Citi对韩国设备商的估值逻辑，已经隐含了一个“多年代际向上周期”的假设。

[R020] GS：中国楼市正在走出“政策底”，但真正的考验在供给端

归类：中国：内需疲弱与出口强劲的罕见分化 / 地产与消费：分化加剧，结构性机会浮现

中国房地产市场在2026年6月最后一周交出了一份让市场意外但又不信誓旦旦的答卷。GS最新一期周度数据显示，端午假期后，新房和二手房交易量分别环比反弹38%和27%，双双超越节前6月周均水平。这份反弹在数据层面干净利落，但真正让专业投资者需要停下来思考的，不是“涨了多少”，而是“涨在哪个结构里”。

新房同比仍跌17%，二手房同比转正至+6%；上半年新房累计成交同比下滑14%，而二手房几乎持平。这组数字背后，中国楼市正在经历从“规模驱动”到“存量主导”的不可逆切换。GS这份周报的核心判断可以浓缩为一句话：市场情绪在边际修复，但资产定价仍处于历史低谷，真正的胜负手不在需求端，而在供给端的出清节奏。

KC评论：这份报告最值得关注的不是单周反弹，而是二手房已经连续多月跑赢新房。这意味着中国房地产市场的定价权正在从开发商转向业主和流通环节。贝壳这类平台的价值逻辑，可能比开发商更值得重新审视。完整报告中对贝壳2Q26 GTV的测算，恰恰指向了这一结构性变化的量化证据。

1. 交易量反弹确认了“政策底”，但新房与二手房的分化才是真正的信号

GS周报覆盖的约75个城市数据显示，第26周新房成交面积环比增长38%，但同比仍下降17%。二手房表现更为强劲，环比增长27%，同比转正至+6%。更关键的是，二手房上半年累计成交同比持平，而新房则下滑14%。

[R021] 摩根斯坦利：MS：中国需求真的在拖累矿业吗？数据告诉你答案

归类：未被主题摘要引用

当大多数市场参与者将目光聚焦于中国房地产的持续疲软和国内消费的放缓时，一份来自MS的月度矿业报告揭示了一个更为复杂的图景：中国经济的“两速”分化正在重塑全球大宗商品的定价逻辑。出口驱动的生产端依然坚挺，而国内消费和投资却在持续走弱。对于矿业投资者而言，这意味着简单的“中国需求强则矿业强”的框架已经失效，取而代之的是一场关于结构性分化的精准博弈。

这份报告的核心判断是：尽管中国宏观环境出现软化迹象，但特定商品——尤其是铝和铜——正受益于供给端的约束和结构性需求（如电网、AI算力基础设施），而铁矿石和钢铁则深陷房地产和基建的泥潭。投资者需要从“看中国总量”转向“看商品个体”。

MS的数据显示，5月份中国新开工面积同比下降24.7%，虽然较4月的-27.1%略有收窄，但销售面积（GFA sold）的降幅却从-10.3%扩大至-14.1%。更令人担忧的是，该机构的中国房地产团队预计三季度将更加疲弱。高能级城市的二手房实时销售数据自5月中旬开始走弱，且近期加速下滑。

KC评论：市场普遍认为房地产已经触底，但这份报告给出了相反的信号——政策效果正在递减，积压需求已经释放完毕，而新的可售资源在减少。这意味着三季度地产相关的大宗商品需求可能面临二次探底，而不是温和复苏。完整报告中对房地产“余震”的量化分析值得深入阅读。

报告进一步指出，固定资产投资（FAI）5月同比下降12.5%，较4月的-9.4%进一步恶化。公路FAI下滑13.8%，反映出基建项目的“空窗期”——一季度前置发力后，项目储备出现断层。这与政府债券发行放缓相互印证，表明短期内财政刺激的传导效应尚未显现。

[R022] 摩根斯坦利：MS：奢侈品最危险的阶段已过，但反弹不会普照所有人

归类：地产与消费：分化加剧，结构性机会浮现

摩根斯坦利：MS：奢侈品最危险的阶段已过，但反弹不会普照所有人

纽约的投资者正在重新打量欧洲奢侈品。在上周MS于纽约举办的投资人会议上，超过20位机构投资者密集讨论了LVMH、历峰、爱马仕、法拉利、开云、Inditex和阿迪达斯。讨论的核心不再是“要不要买奢侈品”，而是“买谁，以及为什么现在”。

这份研报传递的最关键信号是：奢侈品板块的情绪正在从“全面回避”转向“选择性进场”。但这不是一个普涨的信号。MS团队发现，多头和空头在每一个名字上都形成了清晰的对峙线，而胜负手取决于三个变量：中国市场的恢复节奏、美国财富效应能否持续外溢，以及香奈儿这个19亿美元营收的巨兽究竟是在做大蛋糕还是切分蛋糕。

对于产业决策者和投资人而言，现在需要做的不是判断板块整体是否触底，而是识别哪些品牌在下一轮周期中拥有不可复制的结构性优势。

1. 纽约投资者的新共识：科技财富的外溢效应是奢侈品最真实的短期催化剂

[R023] 摩根斯坦利：MS：GlassBridge不是AI光模块的敌人，但FAU厂商的护城河正在变浅

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

摩根斯坦利：MS：GlassBridge不是AI光模块的敌人，但FAU厂商的护城河正在变浅

AI数据中心的光互联赛道，正在经历一次技术路线的微妙转向。2025年9月就已经出现在行业视野中的一项技术——康宁的GlassBridge玻璃光互连组件，在2026年6月正式发布后，引发了市场对CPO（共封装光学）

产业链的重新定价。

MS在最新发布的研报中给出了一个层次分明的判断：GlassBridge对现有FAU（光纤阵列单元）制造商构成潜在颠覆，但对AI光模块公司的直接影响在未来1-2年内非常有限。这个结论看似平衡，但真正值得深挖的是它背后隐含的产业逻辑变化——当光纤直接耦合到光子集成电路（PIC）成为可能，传统的光纤组装方案在密度、可扩展性和可拆卸性上的劣势正在被技术演进所放大。

这份报告的核心价值不在于告诉你“谁赢谁输”，而在于它揭示了一个更根本的问题：在AI数据中心向更高带宽、更低功耗演进的过程中，光学互连的物理瓶颈正在从“能不能做”转向“怎么做得更密、更省、更可维护”。而GlassBridge的出现，恰恰是对这一转向的技术回应。

KC评论：MS的这份报告值得细读的地方在于，它没有简单地把GlassBridge定义为“颠覆者”或“过客”，而是给出了一个动态的时间框架——短期对光模块公司影响有限，中期对FAU厂商构成结构性挑战。这种分时间维度的判断，在技术分析中比“利好/利空”的二元结论更有参考价值。

[R024] 摩根斯坦利：MS：奢侈品行业正在经历一场“有条件的回暖”

归类：地产与消费：分化加剧，结构性机会浮现

纽约的投资者正在重新审视奢侈品。但这一次，他们的热情带着明确的条件句。

MS上周在纽约举办了超过20场投资者会议，覆盖了欧洲消费品板块中奢侈品、运动服饰、零售和眼镜等子行业。结论并不简单：看多情绪在升温，但远非一致。最值得关注的变化是什么？报告指出，投资者首次对LVMH核心部门F&LG（时尚与皮具）的2Q26销售预期在过去五周内出现了上调——这是数月来的第一次。虽然幅度不大（从接近0%的同店增长上调至约2%），但方向性转变本身就是一个信号。

但与此同时，反对的声音同样有力：没有中国，这个行业能行吗？没有中产阶级消费者，LV和Gucci还能维持增长吗？在一个全行业增速仅为约+2%（固定汇率）的背景下，年营收190亿美元的Chanel到底是在做大蛋糕，还是在抢别人的份额？

这份报告的价值不在于给出一个“买还是卖”的简单答案，而在于它清晰地勾勒出了当前奢侈品投资的核心矛盾——行业正在从“普涨”切换到“精选”阶段，而每一家公司的叙事都将被严格审视。

KC评论：MS的这份调研报告，本质上是一次对“市场情绪温度计”的精确测量。它告诉我们，华尔街的机构资金正在从“全面回避”转向“选择性下注”。但这个选择的标准非常苛刻——不再是“谁的故事好听”，而是“谁的数据能兑现”。完整报告里关于各家公司2Q26的sell-side与buy-side预期对比图表，是理解这种“预期差”的关键。

[R025] 摩根斯坦利：MS：GlassBridge不是AI光模块的利空，但FAU厂商的护城河正在变窄

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

摩根斯坦利：MS：GlassBridge不是AI光模块的利空，但FAU厂商的护城河正在变窄

2026年6月24日，康宁在首尔一场AI数据中心光通信技术会议上正式发布了GlassBridge。这个看起来像玻璃基板互联组件的产品，在随后的几个交易日里引发了市场对AI光模块和光纤阵列单元（FAU）厂商的重新定价。部分FAU相关标的出现了明显波动，光模块公司也受到波及。

MS在最新发布的研报中给出了一个清晰但容易被市场误读的判断：GlassBridge对AI光模块公司的影响在未来1-2年内极为有限，但它对FAU厂商的长期技术路线确实构成了实质性挑战。这份报告的价值不在于确认了“新技术出现”，而在于它帮助投资者区分了真正的结构性风险与短期的情绪误判。

市场往往高估新技术的短期冲击，同时低估其长期重塑供应链的能力。MS的分析框架正好提供了这样一个分层视角。

KC评论：这份研报最值得读的部分并不是结论本身，而是它如何用“时间窗口”和“应用场景”两个维度来拆解同一个技术对不同公司的差异化影响。完整报告中有几张关键图表，展示了GlassBridge在CPO和NPO两种架构下的渗透路径，这些细节是理解风险定价的核心。

[R026] NOM：人民币中间价模型指向6.79，但逆周期因子才是真正的胜负手

归类：宏观与利率：全球增长分化，政策博弈加剧

NOM：人民币中间价模型指向6.79，但逆周期因子才是真正的胜负手

当市场还在为美元走势争论不休时，一份来自NOM亚洲外汇策略团队的报告，给出了一个值得中国资产持有者认真对待的信号。

这份由Craig Chan领衔发布的研报，核心是一个技术性极强的判断：NOM的人民币中间价预测模型显示，最新一期的模型预测值为6.7882，较此前的6.8175低了293个基点。换言之，模型本身指向人民币升值。但报告同时给出了另一个数字——引入逆周期因子调整后的预测值为6.7965，仅比前次官方中间价低210个基点。这47个基点的差异，就是政策意图与市场力量之间的博弈空间。

对于任何关注人民币资产定价的人来说，这组数字传递的信息远比表面看起来丰富。它意味着，如果完全由模型驱动，人民币汇率本应走得更强；但政策层面通过逆周期因子，正在有意识地放缓这个节奏。

这不仅仅是一个汇率预测的更新，它实际上是理解当前中国宏观经济政策框架的一个窗口。在出口承压、内需修复尚不稳固、外部地缘不确定性持续的背景下，人民币汇率的管理逻辑已经从“单向升值”转向了“区间稳定”与“预期管理”并重。

[R027] Citi：AI缺的不是算力，是变压器和燃气轮机

归类：AI/算力：从芯片到电力，基础设施瓶颈转移 / 能源与大宗：油价回落与电力瓶颈并行

全球AI军备竞赛正在遭遇一个意想不到的瓶颈：不是芯片，不是算法，而是变压器、燃气轮机和开关柜。Citi在2026年6月发布的这份名为《Overcoming Gridlock 2.0》的重磅报告中，给出了一个核心判断：电力基础设施的供应瓶颈，正在从根本上改变AI数据中心建设的选址逻辑、技术路线和商业模型。而市场对这一瓶颈的持续时间和规模，仍然存在系统性低估。

报告提到，全球已有超过2500GW的可再生能源、储能和大型负荷项目在电网并网排队中停滞。仅电网投资一项，到2030年每年就需要增加约4000亿美元。这不是一个周期性问题，而是一个结构性缺口。

这份报告的核心价值不在于罗列数据，而在于它提供了一个完整的分析框架：当“速度优先”成为电力获取的第一原则时，整个产业链的赢家和输家将被重新定义。

1. 电力瓶颈正在重塑AI数据中心的选址逻辑，得天然气者得天下

传统上，数据中心的选址取决于网络延迟、土地成本和税收优惠。但Citi报告揭示了一个更底层的变量：电力获取的速度。

[R028] GS：供应链拥堵已回到疫情前，但真正的考验还没来

归类：风险偏好与资金流向：全球资金正在重新配置

全球供应链的核心矛盾，正在从“能不能运”转向“运了有没有人买”。GS最新一期供应链拥堵指数（GS Supply Chain Congestion Scale）给出了一个看似平淡、实则意味深长的读数：截至2026年6月29日当周，周度拥堵指数环比下降7%，瓶颈规模连续维持在“2”的水平——这个数字，已经基本回到了2020年2月疫情爆发前的基准线。

这不是一个“一切恢复正常”的信号。这是一份提醒市场重新定义“正常”的报告。

当拥堵指数从2021年底/2022年初的峰值“10”一路回落到“2”，市场早已不再讨论港口瘫痪、一箱难求。但GS在报告末尾埋下了一个关键追问：关税和地缘政治冲突将如何影响货运需求、时间节奏以及全球贸

易的再平衡？如果供应链压力继续缓解，指数有可能在2026年更稳定地进入“1”区间——那意味着，我们正在进入一个“后拥堵时代”的全新博弈。

KC评论：GS这份周报的核心价值不在于告诉你“拥堵缓解了”——这件事市场已经price in。真正值得细读的是，当物理瓶颈消失后，哪些运输子行业会成为新的风向标。报告专门列出了“拥堵保持低位时值得关注的运输子板块”，但并没有给出完整结论。这正是需要深入阅读的地方。

最值得关注的信号来自美国西海岸的铁路网络。GS追踪的两大一级铁路公司——联合太平洋（UNP）和伯灵顿北方圣塔菲（BNSF）——的联运量同比增速在6月最后一周进一步加速至14%，高于前一周的11%。其中BNSF达到15%，UNP为12.5%。

[R029] 摩根斯坦利：MS：AI ASIC正在取代GPU，成为亚洲最值得下注的赛道

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

摩根斯坦利：MS：AI ASIC正在取代GPU，成为亚洲最值得下注的赛道

这份MS最新发布的“Three Actionable Ideas”报告，表面上给出了三只风格迥异的个股推荐——一家台湾芯片设计服务商、一家日本汽车半导体巨头、一家印度多元化企业集团。但把这些看似分散的机会放在一起看，一个清晰的主线浮出水面：AI基础设施的下一波增长，正从通用GPU转向定制化ASIC，而亚洲供应链中那些能够承接这种结构性转移的公司，正在获得超出市场预期的定价权。

这不是一个关于“AI概念股”的故事。这是一个关于算力需求从训练侧向推理侧迁移、从通用向专用转移、从美国向亚洲供应链深度扩散的产业逻辑。MS在这份报告中，用三只看似无关的个股，拼出了一张AI基础设施投资的完整地图。

1. AI ASIC的长期增速正在超越GPU，设计服务商成为最大受益者

报告对Global Unichip Corp（世芯-KY，3443.TW）的推荐，是理解整个AI基础设施投资逻辑的起点。MS将其评级设为“Overweight”，核心论据不只是2026年谷歌CPU的营收贡献，而是2027年来自特斯拉AI5、亚马逊边缘AI芯片以及SanDisk SSD控制器的增量收入。

[R030] Citi：康宁的“玻璃桥”技术，对中国光模块龙头影响有限

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

市场对康宁新发布的GlassBridge光纤连接技术反应热烈，不少投资者担忧这会颠覆中国光模块企业的竞争格局。Citi最新研报给出了一个更冷静的判断：短期冲击可控，长期替代路径清晰但遥远。这份报告的核心洞察是，真正决定行业格局的，不是一项新连接技术本身，而是技术切换带来的系统性成本与客户锁定效应。

1. 当前CPO方案已定型，GlassBridge在2028年前不具备进入量产的条件

Citi认为，康宁在2026年6月正式发布的GlassBridge技术，本质上是为下一代NPO（近封装光学）和CPO（共封装光学）架构设计的替代方案，目标是取代当前CPO方案中使用的iFAU（集成光纤阵列单元）。但关键判断在于：当前两大主流CPO方案——Quantum和Spectrum——的设计已经冻结，进入量产阶段，不会因GlassBridge的出现而更改。

更值得注意的是，预计在2026年下半年最终确定的2027年下半年CPO方案（用于英伟达Rubin Ultra Kyber平台），也大概率不会采纳GlassBridge。Citi给出的理由是，GlassBridge需要经历CPO/NPO系统的评估周期、高速AI集群环境下的现场测试和可靠性验证，这些流程在1到2年内难以完成。

KC评论：Citi的分析逻辑很清晰——新技术在半导体行业从来不是“发布即替代”。CPO方案的定型周期长达18-24个月，客户一旦完成设计锁定，更换连接方案意味着重新设计光芯片的波导布局、修改点尺寸转换器、调整凸块结构。这些切换成本构成了强大的技术惯性。对于投资者来说，真正需要关注的不是技术发布本身，而是技术进入客户设计验证窗口的时间点。

[R031] 摩根斯坦利：MS：AI ASIC正在超越GPU，但真正的机会在三个不起眼的名字

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

摩根斯坦利：MS：AI ASIC正在超越GPU，但真正的机会在三个不起眼的名字

当市场还在为英伟达的下一代GPU争论不休时，一份来自MS的研报提出了一个值得认真对待的判断：AI ASIC的长期增速将超过AI GPU。这不是一个遥远的预测，而是已经体现在三个具体公司身上的现实。

这份2026年6月28日发布的“Three Actionable Ideas”报告，表面上给出了三个独立推荐——Global Unichip、Renesas和Adani Enterprises。但将它们放在一起看，一个清晰的逻辑浮现出来：AI基础设施的竞争正在从“算力军备竞赛”转向“定制化效率竞赛”，而真正受益的，不是那些被广泛讨论的巨头，而是那些在特定垂直领域建立了不可替代性的公司。

报告的历史数据显示，该策略自推出以来累计跑赢基准9533个基点，平均持有期绝对回报4.3%，12个月平均绝对回报16.1%。这些数字本身已经说明问题。但更值得追问的是：为什么是这三个？它们之间有什么共同逻辑？这份报告没有直接说出来的结构性变化是什么？

KC评论：MS的“Three Actionable Ideas”是一个持续更新的选股策略，不是一次性推荐。其核心优势在于用系统化的方法寻找被低估的结构性机会，而不是追逐短期热点。理解这个框架，比知道具体哪三只股票更重要。

[R032] GS：印度国防板块的下一轮上涨，不靠估值靠订单

归类：区域市场：亚洲与新兴市场的结构性机遇

当市场还在争论印度股市整体是否估值过高时，GS最新的一份亚太路演反馈给出了一个更具体的信号：投资者对印度国防板块的兴趣已经从“能不能买”转向了“买什么、什么时候买”。这不仅是情绪的变化，更意味着该板块正在进入一个由订单兑现和盈利增长驱动的新阶段。

这份报告来自于GS印度股票研究团队在3月底对新加坡和香港约25位机构投资者的路演。核心发现是：投资者对国防板块的讨论深度和具体程度，远超过金属矿业板块的关注。他们不再满足于“印度国防支出会增长”这个宏观叙事，而是开始逐一拆解每家公司的订单管线、执行能力、技术壁垒和估值合理性。这种从“板块”到“个股”的聚焦，本身就是市场成熟的标志。

GS团队发现，与上一次路演相比，投资者对国防板块的提问发生了根本性转变。上一次，大家还在问“印度国防支出是否会因为财政平衡而减少”；而这一次，投资者普遍认同“无论财政如何在消费和资本开支之间平衡，国防支出都会持续增长”。共识形成后，讨论自然下沉到个股层面。

在大型股中，Solar Industries是被讨论最多的股票。投资者普遍认可其“国防板块中的清晰买入标的”地位，但焦点集中在两个看似矛盾的问题上：股价近期上涨能否持续，以及公司能否成功从一家炸药企业转型为复杂的平台级国防供应商。投资者对Solar Industries参与MALE无人机项目竞标、155毫米炮弹和反无人机系统(Bhargavastra)的市场空间，以及硝酸铵价格下跌对盈利的影响，都表现出高度兴趣。

在中型股中，PTC Industries成为焦点。这家公司之所以吸引关注，在于其陡峭的盈利增长轨迹——GS预计其FY27-FY35的EPS年复合增长率达到51%。投资者不仅追问订单积压和产能投产时间表，还主动将PTC与全球领先的Howmet Aerospace和Precision Cast Corp进行对标，讨论其在钛合金和高温合金铸件领域的护城河。这种全球对标思维，说明投资者已经将印度国防供应链放在全球视角下审视。

[R033] 摩根斯坦利：化工周期比市场预期的来得更快

归类：能源与大宗：油价回落与电力瓶颈并行

化工行业正在经历一个不被市场充分定价的转折。摩根斯坦利在最新发布的亚洲化工行业深度报告中，给出了一个与当前市场共识有明显差异的判断：亚洲石化裂解装置的利润率已经非常接近周期中段水平，而这一修复速度远快于华尔街的模型预期。更重要的是，该机构认为约有半数利润率回升具有粘性，不会随

着成本端通胀的消退而全部回吐。

这份报告发布于2026年6月28日，距离摩根斯坦利自2025年第三季度以来一直保持的“非共识看多”立场已近一年。在化工板块经历了长达数年的资本开支下行、产能出清与利润率压缩之后，报告认为行业正在进入一个真正意义上的修复周期——不是短暂反弹，而是结构性改善。

对于关注制造业、大宗商品周期以及亚太资产配置的投资而言，这份报告值得认真拆解。以下几层逻辑尤其关键。

摩根斯坦利报告中最核心的实证发现是：亚洲石化裂解装置的整合利润率已经非常接近周期中段水平，而市场此前普遍认为这一修复需要更长时间。报告特别指出，尽管石脑油供应在增加，但过去三周中大部分时间石脑油成本在下降，这为利润率修复提供了额外支撑。

这一判断之所以重要，是因为它直接挑战了当前市场对化工板块盈利能力的普遍悲观预期。如果利润率确实已经接近周期中段，那么当前估值所隐含的盈利假设就存在显著的上修空间。

[R034] GS：美国供应链已经“正常”到让人忽略，但运费正在悄悄反弹

归类：风险偏好与资金流向：全球资金正在重新配置

当大多数市场参与者还在用年的记忆来想象供应链紧张时，GS最新的供应链拥堵指数给出了一个反直觉的信号：拥堵水平已经回到疫情前基线，但运费正在以每周19%的速度反弹。

这份截至2026年6月29日的周度报告显示，GS供应链拥堵指数连续第二周维持在“2”的水平——这个数字在2021年12月/2022年1月的峰值是“10”。更关键的是，GS自己判断：“如果供应链压力继续缓解，指数可能在2026年稳定在‘1’的区间。”

换句话说，供应链已经不是问题。但问题恰恰在于，市场对“供应链已正常”这件事的交易已经充分定价，而新的边际变化——运费反弹、东海岸船舶积压、以及关税对贸易流的潜在冲击——正在被忽视。

这份报告的核心价值不在于告诉你“供应链恢复了”，而在于它提供了一套高频指标体系，让你能在大多数人还没反应过来之前，捕捉到下一个拐点的早期信号。

1. 拥堵指数已回疫情前，但“正常”本身就是一个需要重新定义的基准

[R035] NOM：小红书首次下滑背后，中国互联网正在经历一场AI替代

归类：地产与消费：分化加剧，结构性机会浮现

根据NOM最新发布的5月App追踪报告，中国移动互联网大盘仍在增长——月活跃智能设备用户同比增长1.2%至12.8亿，总使用时长同比增长10.1%。但这些宏观数字之下，几个关键信号正在浮现。

其中最引人注目的，是小红书自NOM2020年开始追踪以来，首次出现月度总使用时长同比下降。尽管日活跃用户仍有3%的增长，但人均日使用时长下滑了4%，导致总时长录得1%的负增长。

这绝不是孤例。百度App总使用时长同比暴跌21%，日活下降21%。腾讯视频总时长下降31%，日活下降22%。携程、去哪儿、飞猪等旅游App的总时长跌幅均在14%-19%之间。京东App在618大促季仍录得10%的总时长同比下降。

这些数据指向一个共同的问题：用户正在从哪些App流失，又流向了哪里？

KC评论：NOM的这份月度追踪报告，表面看是流量数据汇总，实际上揭示了一个正在发生的结构性变化——AI正在替代传统App的功能价值。这不是周期性的波动，而是用户行为习惯的迁移。完整报告中大量细分赛道的DAU和时长图表，能帮助读者直观看到哪些App在“失血”，哪些在“造血”。

[R036] Citi：康宁的GlassBridge，短期不必恐慌，但长期格局已埋下伏笔

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

Citi：康宁的GlassBridge，短期不必恐慌，但长期格局已埋下伏笔

2026年6月24日，康宁正式发布了GlassBridge技术。消息一出，市场对国内光通信产业链的担忧迅速升温：这是否意味着CPO（共封装光学）架构中的关键连接件iFAU将被替代？国内相关供应商是否面临灭顶之灾？

Citi在第一时间发布的研报给出了一个清晰且克制的判断：GlassBridge在接下来1-2年内不会对现有CPO方案和供应链产生实质性冲击，但它的出现，为年后的行业格局埋下了真正需要关注的伏笔。

这份报告的价值，不在于它给出了一个简单的“利好”或“利空”结论，而在于它用技术、生态和商业逻辑，分层拆解了“一个新技术出现后，产业真实会发生什么”。对于决策者而言，真正重要的不是GlassBridge本身，而是它揭示的行业演进路径。

1. 当前CPO方案已经锁定，GlassBridge短期内无法插队

[R037] 摩根斯坦利：MS：化工周期比市场预期的来得更快，也更粘

归类：能源与大宗：油价回落与电力瓶颈并行

化工行业正在经历一场多数投资者尚未定价的变化。MS在最新发布的亚洲化工行业深度报告中，给出了一个在当下市场环境里显得相当有分量的判断：亚洲裂解装置的利润率已经非常接近周期中段水平，而这个修复速度比市场普遍定价的要快得多。

这份报告发布于2026年6月底，距离MS首次在2025年第三季度转为看多化工行业已经过去三个季度。在当时，这还是一个非共识的立场。而现在，报告的核心观点已经不只是“看好”，而是“修复正在发生，且部分修复具有结构性”。

对于一家在化工领域拥有多年跟踪经验的投行而言，这个判断的分量在于：它不是在说“底部到了”，而是在说“中段正在被重新定义”。

KC评论：市场对化工股的定价仍然停留在“周期底部”的叙事里。但MS认为，利润率修复的速度和幅度都超过预期，而且其中约一半的改善是可持续的。这意味着，如果投资者继续用底部估值框架来给这些公司定价，他们可能正在错过一个周期拐点。完整报告中的图1和图2分别展示了整合利润率与估值水平的关系，值得仔细对比。

过去一年，亚洲约有10%的烯烃产能被永久关闭、暂停运营或处于超长检修期。这不是一个小数字。在化工这样一个资本密集、产能刚性极强的行业里，10%的产能退出意味着供给曲线已经发生了实质性位移。

[R038] GS：印度国防股的下一轮催化，不在订单，在交付

归类：区域市场：亚洲与新兴市场的结构性机遇

当大多数市场参与者还盯着印度国防部的季度订单公告时，GS最新一期亚太路演反馈揭示了一个更微妙的信号：投资者对印度国防板块的关切点，正在从“订单数量”转向“交付质量”。

这份来自GS印度研究团队的路演纪要，覆盖了新加坡和香港约25位机构投资者。核心发现是：投资者普遍认可印度国防支出的结构性上升趋势，但开始对短期订单疲软、估值支撑和盈利兑现能力提出更尖锐的问题。这不是一个简单的“看好”或“看空”信号，而是一个市场正在进入“验证期”的标志。

1. 国防板块的共识已经形成，市场现在需要的是“超预期”的证据

GS团队在路演中观察到，投资者对印度国防板块的讨论起点高度一致：政府国防支出将继续增长，不论财政在消费与资本开支之间如何平衡。在这一点上，几乎没有分歧。

但共识的背面是焦虑。Q1FY27订单流入疲软，让投资者开始追问：这个结构性故事，是否已经充分定价？GS团队注意到，相比上一次路演，关于估值的质疑明显减少，取而代之的是对“催化剂”和“执行细节”的追问。这恰恰说明市场已经从“要不要买”进入了“买什么、什么时候买”的阶段。

[R039] NOM：小红书首次下滑，中国互联网的“AI替代”开始兑现了

归类：地产与消费：分化加剧，结构性机会浮现

中国互联网行业正在经历一个微妙但关键的转折点。NOM最新发布的5月App追踪报告揭示了一个此前从未出现的信号：小红书，这个被誉为“中国版Instagram”的平台，自2020年有追踪数据以来，首次出现了用户总使用时长同比下降。

这个1%的跌幅看似不大，但它指向的结构性变化，可能比618大促期间电商增速放缓、旅游出行App全面走弱、甚至长视频持续萎缩都更具长期意义。

NOM的这份月度报告，核心判断可以浓缩为一句话：AI正在从“补充工具”变成“替代入口”，它最先冲击的，不是搜索或电商，而是那些以“信息发现”为核心价值的内容平台。

1. 小红书“首次下滑”背后，是AI对信息发现入口的替代已经实质发生

根据QuestMobile数据，小红书的月总使用时长在5月同比下降1%。拆分来看，日活跃用户仍有3%的增长，但每位日活用户的日均使用时长下降了4%。这是典型的“用户还在，但黏性在流失”的信号。

[R040] 摩根斯坦利：MS：中国真正的考验不在出口，而在内需能否接棒

归类：中国：内需疲弱与出口强劲的罕见分化

当市场还在为中美关税的反复拉锯而焦虑时，另一个战场已经悄然升温。MS最新发布的亚太投资者报告，将聚光灯打向了一个被许多人低估的风险点：中国与欧盟之间的贸易摩擦。报告的核心判断非常清晰：中国面临的核心挑战，并非外部需求的骤然熄火，而是国内需求能否在外部压力升级之前，真正形成有效的支撑。这不再是一个关于“出口好不好”的问题，而是一个关于“增长引擎切换”的命题。

这份由首席中国经济学家邢自强执笔的报告，其价值不在于预测一个具体的冲突结果，而在于提供了一个全新的分析框架：将中国与欧盟的贸易动态，与中国内部经济结构的冷热不均，放在同一个坐标系里审视。当外需面临的结构性压力开始显性化，国内“生产强、消费弱”的分化格局能否被打破，将成为决定未来12个月资产定价的核心变量。

KC评论：大部分关于贸易摩擦的分析，要么聚焦于中美，要么停留在对关税影响的静态测算。MS这份报告的独特之处，在于它把欧盟的“工具包”扩张和中国内部需求的“温差”联系了起来。这意味着，评估风险不能只看出口订单的即时波动，更要看国内政策能否在外部压力加码前，把内需的短板补上。完整报告对中国与欧盟关键贸易品类的“依赖度-脆弱性”矩阵拆解，是理解这一判断的底层数据支撑。

1. 欧盟的“去风险”正从口号转向工具箱，中国面对的贸易压力点正在扩散

报告用大量篇幅展示了欧盟对华贸易赤字的持续扩大这一基本面事实。数据显示，欧盟对华贸易逆差在过去几年里显著走阔，这直接触发了布鲁塞尔的政策反应。从2024年5月的“大学定向辩论”，到2025年6月的G7领导人声明和欧洲理事会结论，措辞从“中国是伙伴，但现状不可持续”升级为“解决大规模和持续性的全球失衡问题”以及“提升欧盟竞争力和战略自主权”。

[R041] Bernstein：美国建筑市场正在被“巨型项目”重塑，而非住宅本身

归类：能源与大宗：油价回落与电力瓶颈并行

Bernstein：美国建筑市场正在被“巨型项目”重塑，而非住宅本身

美国非住宅建筑开工数据在5月呈现出一种罕见的“量价背离”：按金额计算，总开工同比飙升约60%，但按面积计算，却同比下滑了约8%。这是Bernstein最新发布的美国机械与建筑设备研报中揭示的一个核心信号。这份报告的价值不在于罗列数据，而在于指出一个正在发生的结构性变化——美国建筑市场的增长引擎，正在从分散的、由利率驱动的住宅和商业地产，转向集中的、由政策与能源转型驱动的“巨型项目”。

对于关注机械设备、建筑材料、租赁服务和工业股的投资者而言，这不仅仅是一个月度数据更新。它意味着传统的需求分析框架需要被修正。过去，人们习惯用住宅开工、商业地产空置率和利率走向来预测卡特彼勒、联合租赁或建筑材料公司的业绩。但现在，一个价值140亿美元的LNG出口设施在路易斯安那州破土动工，就能在一个月内贡献全美非住宅开工总额的约40%。这种“项目集中度”的跃升，正在从根本上改变行业的竞争逻辑和盈利模式。

KC评论：这份研报最值得看的判断是：美国建筑市场的“beta”正在从“广泛复苏”转向“结构分化”。市场整体开工面积在下降，但巨型项目的金额和占比却在飙升。这意味着，能否抓住这些集中、大型、高门槛的项目，将成为区分公司优劣的关键。你手里的机械设备股或建材股，到底是在为那些几十亿美元的LNG工厂、数据中心和公共基础设施供货，还是在为那些越来越难赚钱的仓库和公寓楼服务？答案决定了它们的估值天花板。

Bernstein的数据显示，5月美国巨型项目（通常指价值超过10亿美元的项目）开工金额高达约330亿美元，同比增长约420%，环比增长约100%。更关键的是，巨型项目在当月非住宅开工总额中的占比达到了约30%，而过去12个月的平均水平仅为约20%。这意味着，5月的“集中度”是历史均值的1.5倍。

[R042] 摩根斯坦利：MS：村田不是靠涨价，是在重新定义MLCC的护城河

归类：科技与产业变革；AI重塑制造业、农业与商业地产

摩根斯坦利：MS：村田不是靠涨价，是在重新定义MLCC的护城河

当市场上大多数投资者还在追问“MLCC会不会像2018年那样集体提价”时，MS在2026年6月的新加坡和香港投资者路演中发现了一个更值得关注的信号。

这份覆盖20家日本电子元件公司的研报，核心判断不是供需紧张，也不是周期拐点。它指向一个更根本的分化：那些通过涨价追求短期利润最大化的公司，与那些通过持续提升产品竞争力来扩大价值捕获的公司，其企业价值差距正在不可逆地拉大。

对于关注AI产业链、日本电子板块或被动元件定价逻辑的读者来说，这份报告提供了一个观察框架：高价值MLCC的竞争，已经不再是产能竞赛，而是材料和工艺能力的分层。

KC评论：MS这个判断的核心不在于“AI服务器需要更多MLCC”，而在于“只有村田能稳定量产所有关键型号”。这意味着，当其他厂商还在追赶现有产品时，村田已经在量产下一代产品。这种差距不是价格竞争能弥补的，而是结构性的技术壁垒。

[R043] 摩根斯坦利：AI对内存的饥渴，正在改写软件行业的估值逻辑

归类：半导体与存储器；超级周期还是产能陷阱？

当一家存储芯片公司的季度收入同比暴涨350%，从90亿美元跃升至410亿美元，市场的第一反应往往是“又一个AI基建周期的受益者”。但摩根斯坦利在最新一期《Software Snippets》中给出了一个更值得深思的判断：这轮内存需求的爆发，其结构性可能远大于周期性。

这份报告的核心洞察不在于Micron的财务数字本身，而在于数字背后正在发生的、软件工作负载的深层演变。AI正在从“一问一答”的聊天工具，进化为能够规划、调用工具、阅读文档、保持会话历史、生成子代理并迭代趋近结果的Agent系统。这种从“对话式”到“工作流式”的转变，意味着每一次交互消耗的内存和存储，不再是线性增长，而是指数级膨胀。

KC评论：市场习惯用“资本开支周期”来理解半导体需求，但摩根斯坦利暗示了一个更本质的变化——AI的“记忆需求”正在从周期性变成结构性。如果Agent成为AI的主流形态，每个Agent都需要长期保持上下文、记忆和工具调用历史，那么内存消耗将不再是“每次对话重置”的临时需求，而是持续存在的固定成本。这对整个软件栈的架构设计、成本模型和定价逻辑，都意味着根本性的重塑。

Micron的财报中最值得关注的细节，不是收入数字本身，而是其背后16份已签署的长期战略客户协议。在半导体行业，长期协议通常意味着两件事：一是需求的确定性足够高，客户愿意锁价锁量；二是供应端开始出现结构性紧张，客户不得不提前锁定产能。

摩根斯坦利的全球半导体团队将此称为“Chipflation——一场记忆体危机”。这个判断的潜台词是：如果内存供给持续偏紧，拥有规模化产能和先进工艺的厂商将获得显著的议价权。而对于下游的软件公司来说，这意味着AI推理和Agent运行的成本结构将面临持续上行压力。

[R044] 摩根斯坦利：MS：AI对内存的“永不满足”胃口，正在改变整个软件业的底层逻辑

归类：半导体与存储器：超级周期还是产能陷阱？

摩根斯坦利：MS：AI对内存的“永不满足”胃口，正在改变整个软件业的底层逻辑

美光科技最新一季财报让市场不得不重新审视一个问题：AI对内存的需求，究竟是一次性基建周期，还是结构性重置的开始？

6月24日，美光发布2026财年第三季度业绩，营收达到410亿美元，同比增长近350%。一年前，这个数字还只有约90亿。MS在最新一期《Software Snippets》中指出，表面原因是AI数据中心的建设，但更值得关注的软件业信号，藏在工作负载本身的变化里。

AI正在从“一问一答”的聊天模式，转向真正的智能体系统——这些系统会规划任务、调用工具、读取文档、保留会话历史、生成子代理，并反复迭代直至达成目标。这种端到端的持续性工作流，对内存的需求不再是一次性的，而是持续、连贯、结构性的。

美光已经签下了16份长期战略客户协议。这组数字背后，是MS半导体团队近期提出的一个核心问题：这一波内存需求是否比过去更少周期性，更多结构性？

[R045] 摩根斯坦利：MS：AI算力基建的下一个瓶颈不是芯片，是电和地

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

摩根斯坦利：MS：AI算力基建的下一个瓶颈不是芯片，是电和地

全球AI基础设施的建设正站在一个历史性的拐点上。英伟达GPU的持续迭代与Agentic AI框架的崛起，正在将算力需求推向一个前所未有的量级。当市场目光仍聚焦于芯片性能竞赛与模型参数规模时，MS在一份面向亚太投资者的专题报告中，提出了一个关键的判断：真正的稀缺资源，正在从硅片转向土地、电力与冷却能力。而东南亚，正处在这场结构性变迁的独特交汇点。

这份报告的价值不在于复述“AI浪潮来了”的共识，而在于它为投资者提供了一个框架：如何在一个物理资源而非技术性能成为瓶颈的时代，重新定位基础设施投资的价值链。报告的核心洞察可以浓缩为一句话：未来的算力之争，本质上是能源与空间之争。

KC评论：MS这个判断的意义在于，它把投资者的注意力从“谁的芯片更强”转向了“谁能把电和地变成可租用的算力”。对于非技术背景的决策者来说，这意味着评估一家数据中心运营商的价值，不再主要看它用了什么服务器，而是看它拿了多少地、签了多少电力协议、拿到了哪些审批。这是理解这份报告所有后续分析的基石。

报告的叙事逻辑非常清晰：先拆解数据中心的物理构成与商业模式，再分析东南亚作为新兴枢纽的禀赋条件，最后落到具体标的——尤其是新加坡电信Singtel的AI基础设施布局。这种从宏观产业趋势到微观公司价值的推导，正是金字塔原理的典型应用。以下是我们从中提炼的几个关键层次。

[R046] 摩根斯坦利：MLCC真正的赢家不是提价，而是产品迭代

归类：科技与产业变革：AI重塑制造业、农业与商业地产

2026年6月，摩根斯坦利分析师在新加坡和香港与机构投资者举行了31场一对一会议和两场午餐会。讨论的焦点不是宏观经济，不是地缘政治，而是两个看似不起眼的电子元器件：MLCC（多层陶瓷电容）和ABF封装基板。

但这份路演纪要透露出的信号，远比元器件本身重要。它指向一个正在发生的结构性分化：那些靠涨价赚快钱的公司，与那些通过持续产品迭代构筑护城河的公司，其企业价值差距正在急剧拉大。

投资者几乎把所有注意力都放在了“普通MLCC能涨多少价”上，却忽视了真正驱动盈利增长的引擎——AI服务器对高端MLCC的需求正在以每年接近翻倍的速度扩张。这个误判，可能正在制造一个显著的定价偏差。

摩根斯坦利的调研发现了一个有趣的认知错位。在与机构投资者的交流中，几乎所有问题都围绕着一个主题：普通MLCC还能涨多少价？很少有人问：AI服务器带来的高端MLCC增长能持续多久？

报告的核心判断非常清晰：村田制作所的MLCC业务，即便不主动提价，其ASP（平均售价）也会因产品结构改善而显著增长。具体来说，在AI服务器加速器板卡上，每一代新GPU对MLCC的总容值需求大约翻倍，而安装空间却在缩小。这推动了对小型化、高容值、高附加值MLCC的持续需求。

[R047] 摩根斯坦利：MS：AI基建的下一站不在美国，在东盟

归类：AI/算力：从芯片到电力，基础设施瓶颈转移

当全球资本还在争论美国数据中心是否已经过热时，一份来自MS的投资者演示材料提出了一个值得深思的判断：AI基础设施建设的下一个结构性机会，可能出现在一个被多数投资者低估的区域——东盟。

这不是一个关于“东南亚是否值得关注”的泛泛之谈。报告的核心主张非常具体：东盟正处在AI基础设施建设的独特交汇点上——拥有充足的廉价土地和电力、战略性的海底光缆连接、以及正在崛起的主权AI需求。这三个要素的组合，在全球范围内几乎找不到第二个区域同时具备。

更为关键的是，这份报告不是停留在宏观叙事层面。它提供了一套完整的“数据中心投资指南”，从资产解剖到商业模式拆解，再到具体标的的估值分析，最后甚至讨论了一个可能改变游戏规则长期变量——轨道数据中心。

1. AI数据中心的瓶颈已经从“空间”转向“功率密度”，这改变了整个投资逻辑

传统数据中心的指标是面积和机柜数量。但AI训练和推理的需求完全不同。报告指出，一个AI GPU机架的功率密度已经从传统企业级机架的5-15千瓦飙升至40-200千瓦，下一代平台甚至可能达到数百千瓦级别。

[R048] IMF对爱尔兰发出罕见警告：繁荣背后，跨国公司依赖正成为最大风险

归类：宏观与利率：全球增长分化，政策博弈加剧 / 区域市场：亚洲与新兴市场的结构性机遇 / 新兴市场与主权风险：制度韧性成为关键

IMF对爱尔兰发出罕见警告：繁荣背后，跨国公司依赖正成为最大风险

爱尔兰经济正站在一个罕见的十字路口。一方面，2025年国内经济增速约4%，财政持续盈余，就业市场虽有所降温但仍处于历史较好水平。另一方面，国际货币基金组织在2026年6月发布的最新国别磋商报告中，用了一个不常见的措辞——“不能将韧性视为理所当然”。

这份报告的核心判断值得每一个关注全球产业链和发达国家财政可持续性的读者认真对待：爱尔兰当前的强劲表现，很大程度上建立在跨国公司税收和投资的集中度之上，而这一模式在日益碎片化的全球环境中正变得脆弱。更关键的是，IMF认为爱尔兰需要利用当前“窗口期”进行结构性改革，否则繁荣可能难以持续。

爱尔兰的经济表现与跨国公司深度绑定。2025年，由跨国公司主导的出口表现强劲，企业所得税收入持续支撑财政盈余。但IMF明确指出，这种依赖是“脆弱性的关键来源”。

报告的论证逻辑很清晰：地缘经济碎片化加剧、供应链重组、贸易和资本流动的重新配置，都会对爱尔兰这种高度全球化的经济体产生不对称冲击。跨国公司并非不忠诚，但它们作为全球性实体，会根据税收、监管和地缘风险的变化调整布局。一旦全球税收协调或地缘格局发生重大变化，爱尔兰的财政收入和经济增长可能面临双重压力。

[R049] IMF：爱尔兰的AI红利，比关税更值得关注

归类：区域市场：亚洲与新兴市场的结构性机遇 / 新兴市场与主权风险：制度韧性成为关键

当全球目光聚焦于美国关税政策的反复与地缘贸易谈判的博弈时，一份来自国际货币基金组织（IMF）的最新爱尔兰国别报告，提出了一个更具结构性的判断：对爱尔兰这样的小型开放经济体而言，贸易政策调整带来的更多是贸易流向的重新分配，而真正能驱动产出和出口增长的引擎，是人工智能驱动的生产率提升。这份报告通过一个多区域、多部门的可计算一般均衡模型，量化了贸易政策、AI和能源转型三大力量对爱尔兰的长期影响。其核心结论对于理解全球知识密集型经济体的未来竞争逻辑，具有超越爱尔兰一国的启示意义。

报告直言，当前的关税和贸易协定冲击，主要效果是“重新路由”贸易伙伴和行业间的流向，对爱尔兰整体GDP和出口的宏观影响相当温和。相比之下，AI驱动的生产率提升则能带来强劲的产出和出口增长，尤其在知识密集型部门，同时也会引发显著的跨行业劳动力重新配置。而碳定价政策，则可能在AI抬高能源需求和排放的背景下，成为平衡增长与脱碳目标的关键工具。

KC评论：这份报告的价值在于，它用一个统一的框架，同时考察了三个通常被分开讨论的变量。它揭示了一个关键权衡：AI带来的增长红利，可能会被其催生的能源需求部分抵消。理解这三者如何互动，比孤立地看任何一个政策都更重要。完整报告中的图表和分行业数据，清晰地展示了这种权衡的量化程度。

在关税与贸易协定情景下，IMF模型得出的结论可能会让一些投资者感到意外：美国在2025年底实施的关税，对爱尔兰整体经济的负面影响非常有限。报告显示，即使在最极端的组合情景（美国关税叠加欧盟与南方共同市场、欧盟与印度的自贸协定）下，爱尔兰实际GDP的增幅也低于0.20%。

这背后的机制是什么？核心在于爱尔兰出口结构的特殊性。报告指出，制药业作为爱尔兰的核心出口支柱，在全球关税调整中承受的税率增加相对较轻。这意味着，当贸易战导致其他行业的贸易成本上升时，资源会向制药这类“避风港”行业重新配置。同时，资本密集型行业在调整中相对受益，这反过来抵消了部分负面的需求效应。

[R050] 世界银行：毛里塔尼亚的韧性不是运气，是制度

归类：新兴市场与主权风险：制度韧性成为关键

当一个经济体在战争、边境封锁、大宗商品价格剧烈波动的夹击下，仍能保持宏观稳定、让公共债务从52%降至40%，外界往往将其归因于“资源禀赋”或“外部援助”。但世界银行与IMF联合发布的这份毛里塔尼亚最新融资安排评估报告揭示了一个更深刻的判断：这一轮韧性，核心驱动力是制度性改革，而非资源周期。

2026年6月，IMF执行董事会批准了毛里塔尼亚新一轮42个月的ECF/EFF安排，总额9580万美元。这并非简单的续贷。该机构同时完成了RSF的第五次也是最后一次审查，标志着该国在气候韧性领域的制度框架已初步成型。报告传递的核心信号是：一个长期依赖资源出口、被列为“脆弱国家”的西非经济体，正在通过财政规则法制化、社会登记系统数字化、国有企业监督透明化，构建一套能够抵御外部冲击的制度护城河。

对于关注新兴市场债务、资源型经济体转型、以及全球南方治理范式的读者而言，这份报告的真正价值不在于毛里塔尼亚本身，而在于它提供了一个“小国如何在大国博弈与气候冲击中守住底线”的可复制样本。

1. 这轮增长放缓揭示了一个结构性拐点：非资源部门正在接过接力棒

2025年毛里塔尼亚实际GDP增速从2024年的6.3%回落至4.0%。表面看是“减速”，但拆解数据后会发现，这恰恰是经济结构改善的证明。

[R051] IMF：西班牙需要的不只是资本缓冲，而是贷款发放时的“刹车”

归类：新兴市场与主权风险：制度韧性成为关键

IMF：西班牙需要的不只是资本缓冲，而是贷款发放时的“刹车”

当西班牙房价在疫情期间加速攀升、高风险房贷占比持续上升时，一个核心问题浮出水面：西班牙银行体系目前看似健康的资产负债表，是否足以抵御下一轮房地产下行周期？

国际货币基金组织（IMF）在2026年6月发布的一份Selected Issues

Paper中给出了一个明确的判断：不够。这份题为《The Case for Borrower-Based Macroprudential Measures in Spain》的报告，通过贷款级数据和压力测试，论证了一个被西班牙央行至今未采纳的政策工具——借款人导向的宏观审慎措施（BBMs）——为何在当前时点变得必要。

这不是一份泛泛的风险警示。它直接指向一个关键的制度缺口：西班牙是欧元区银行业联盟中少数几个尚未激活任何BBM的国家之一。当18个欧元区国家已至少实施一项LTV或LSTI上限时，西班牙仍然完全依赖资本缓冲来吸收损失。IMF认为，这种“事后吸收”而非“事前预防”的框架，可能正在积累系统性脆弱性。

1. 房价上涨与贷款标准放松的组合，正在制造一个未被资本缓冲覆盖的风险敞口

[R052] IMF：西班牙地方财政的顺周期陷阱，需要一个支出增长锚

归类：新兴市场与主权风险：制度韧性成为关键

西班牙的自治区（Autonomous Communities）承担了全国超过四分之一的公共支出，尤其是在教育和医疗这两个与长期人力资本最相关的领域。然而，IMF最新一份Selected Issues Paper揭示了一个令人不安的事实：过去二十年，西班牙地方政府的公共支出不仅没有起到稳定经济的作用，反而在衰退期间大幅削减了教育和医疗开支——这在欧元区主要国家中几乎是独一无二的。

这份由IMF欧洲部经济学家Carlo Pizzinelli撰写的报告，核心判断清晰而锐利：西班牙现行的多重地方财政规则没有实现两个基本目标——避免顺周期支出和确保债务可持续性。而欧盟新经济治理框架的落地，恰好为改革提供了一个制度窗口。

报告建议，将地方财政规则的核心从复杂的赤字、债务、支出增速多重目标，简化为一个以支出增长为锚的单一规则。这不仅是技术调整，更是一次财政哲学的重塑。

报告通过2004至2024年的面板数据回归发现，西班牙自治区的总支出与地区GDP之间存在显著的正相关关系——这意味着经济好的时候多花钱，经济差的时候少花钱。更令人警惕的是，这种顺周期特征在2008年全球金融危机之后变得更加明显。

KC评论：顺周期支出本身并不罕见，罕见的是西班牙地方政府的支出顺周期主要集中在教育和医疗领域。报告对比了欧元区其他主要国家，发现这些国家的教育和医疗支出基本是逆周期或非周期的——经济下行时，中央政府会通过转移支付维持这些基本公共服务的稳定。而西班牙的自治区在危机中被迫削减了这些最不应该削减的开支。

[R053] 兰德公司：兰德报告：英国司法融资的“危机-修复”循环，正在耗尽最后一点改革空间

归类：新兴市场与主权风险：制度韧性成为关键 / 教育与公共治理：结构性断层与融资模式创新

兰德公司：兰德报告：英国司法融资的“危机-修复”循环，正在耗尽最后一点改革空间

英国刑事司法系统正陷入一个自我强化的恶性循环：法庭积压突破8万件，监狱超容运行超过12年，而政府每增加一笔拨款，几乎都流向了“灭火”而非“防火”。兰德公司最新发布的《为正义融资》报告，系

统性地揭示了这一结构性困境，并提出了一个在主流政策辩论中常被忽视的出路——私人资本与结果导向的融资模式。但报告更深层的追问是：在财政纪律与政治周期双重约束下，这些试验能否从“漂亮案例”走向“系统解法”？

这份报告的核心判断值得每一位关注公共财政与治理效率的读者认真对待：英国司法系统的根本问题不是缺钱，而是缺一种能够将资金从前端预防导向后端成本的融资机制。传统的政府预算拨款模式，在应对日益复杂的犯罪类型和不断膨胀的案件量时，已经显示出系统性的失灵。

KC评论：这不是一份关于“司法危机”的泛泛之谈，而是一份关于“钱从哪里来、花到哪里去、效果如何衡量”的硬核分析。报告没有停留在“多拨钱”的简单呼吁，而是拿出了具体的金融工具与案例数据。对于关注政府效率、社会影响力投资或公共管理创新的读者，这份报告提供了难得的实操视角。完整报告包含多个未在本文展开的融资模型对比图表，值得细读。

报告开篇即点明一个反直觉的事实：尽管英国政府在过去几年中大幅增加了对监狱基础设施的资本投入——2025年支出审查承诺在 年间投入70亿英镑用于监狱建设，新增1.4万个床位——但根据英国国家审计署的预测，到2027年底，监狱需求仍将超过可用容量1.24万个位置。这意味着，即便所有在建项目按时交付，缺口依然存在。

[R054] 兰德公司：仅半数校长认为课后班与课堂衔接，结构性断层比想象中更深

归类：教育与公共治理：结构性断层与融资模式创新

兰德公司：仅半数校长认为课后班与课堂衔接，结构性断层比想象中更深

当教育系统将课后项目视为弥补疫情学习损失的关键抓手时，一份来自兰德公司的全国性调查给出了一个耐人寻味的数据：在全国范围内，仅有约半数的公立学校校长认为，他们学校的课后项目在学术上与课堂内的教学是“对齐”的。更值得关注的是，这个比例背后隐藏着深刻的阶层、学段和治理结构差异。

这份基于对全美1038名K-12公立学校校长调查的报告，并非一份简单的“现状描述”。它揭示了美国公立教育体系中一个长期被忽视的结构性断层：课后项目究竟应该扮演“看护者”的角色，还是“教学延伸”的角色？不同学校、不同学生的答案截然不同，而这种差异本身，正在加剧教育公平的老问题。

KC评论：这份报告的核心洞察不在于“一半校长说没对齐”，而在于“谁在说对齐，谁在说没对齐”。当高贫困学校和城市学校的校长更倾向于认为课后班与课堂对齐时，这并非他们做得更好，而可能恰恰反映了课后项目的功能分化——弱势群体的孩子被投入更多“补课式”课后班，而优势群体的孩子则拥有更多“去学术化”的探索时间。这是教育公平的一个新维度。

报告的核心发现是，在拥有课后项目的校长中，仅有52%同意或强烈同意其课后项目与学校日教学在学术上对齐。这意味着，如果再算上那24%根本未提供课后项目的学校，全美实际上只有不到四成的学校同时具备课后项目且校长认为其具备学术对齐性。

[R055] 波士顿咨询：CPG与零售的AI竞赛，赢家已经拉开差距

归类：科技与产业变革：AI重塑制造业、农业与商业地产

AI在消费行业的渗透已经不是新闻。真正值得关注的问题是：为什么有些公司已经将AI转化为实实在在的利润率提升，而绝大多数还在“试点泥潭”里打转？

波士顿咨询与消费品论坛联合发布的最新报告，基于对39位CPG和零售高管的调研，给出了一个方向性的判断：行业正在加速分化，赢家与追赶者的差距不是由技术投入规模决定的，而是由“AI能否嵌入核心商业决策流程”决定的。

这份报告最值得关注的信号不是AI的应用场景清单，而是两个关键数字：CPG公司如果规模化部署全部相关AI应用，可以带来220至350个基点的EBIT提升；零售商对应的数字是180至360个基点。在消费行业利润率普遍承压的当下，这个量级意味着AI不再是锦上添花的效率工具，而是决定未来5年竞争格局的结构性

变量。

KC评论：报告给出的EBIT提升区间是“假设所有相关AI应用都规模化部署”的理论值。现实是，75%的CPG公司仍停留在试点阶段。这意味着，率先突破规模化瓶颈的公司将获得不对称的竞争优势，而追赶者会陷入“越试点越焦虑”的困境。完整报告中有这些价值池的详细拆解，包括每个AI应用的具体EBIT贡献测算，值得仔细研究。

在零售样本中，45%的公司已经进入规模化部署阶段，但同样有40%的公司几乎还没开始。这种“两头大、中间小”的分布说明零售业已经形成了清晰的分水岭。领先者没有在所有领域平均用力，而是集中资源在需求预测、补货、定价和运输优化这几个价值最容易验证的环节。

[R056] 波士顿咨询：农业AI不是新工具，而是新氮气时刻

归类：科技与产业变革；AI重塑制造业、农业与商业地产

当1898年英国科学家克鲁克斯爵士警告世界氮肥即将枯竭时，他预言的是农业的一场硬约束危机。11年后哈伯找到了从空气中固氮的方法，博世将其工业化。那一次技术突破之所以重塑了全球食物体系，不是因为解决了一个具体问题，而是因为它解除了农业增长的上限，引发了一整条创新链的连锁反应：种子遗传学、机械化、农艺学，每一层都在前一层的基础上叠加，最终改变了人类如何种地、如何交易、如何吃饭。

波士顿咨询在2026年6月发布的最新研报中提出了一个判断：今天我们正在面对农业的第二个“氮气时刻”。但这一次的上限不是化学元素，而是信息与决策的密度。农业智能——即AI在从育种到零售的全链条上的自主决策能力——正在以同样的方式解除农业增长的另一重硬约束。

*这份报告最值得看的判断是：农业AI压缩的不是成本，而是信息不对称和专家溢价。过去一百多年支撑农业价值链上各环节利润来源的核心资产——谁更懂、谁先知道、谁能判断——正在被重新定价。这不是效率改进，是竞争基础的重写。**

波士顿咨询将当前全球农业食物体系面临的威胁归纳为三类：气候波动性、地缘政治重组、以及监管范式转移。这三者不是独立的风险清单，它们共同指向同一个问题：农业的生产函数正在变得不可预测。

气候让降水、温度和季节规律变得不可靠。地缘政治让供应链冲击从偶发事件变成永久特征——中美关税、乌克兰战争、霍尔木兹海峡的化肥供应中断，这些不再是黑天鹅，而是新常态。监管则要求整个行业建立一个从未有过的数据基础设施：欧盟的森林砍伐规则、Scope 3碳报告、碳市场协议，都在要求企业精确、可验证地回答“每一粒粮食从哪里来、在什么条件下种出来的、用了什么方法”。

[R057] 波士顿咨询：AI正在重置全球制造业的选址逻辑，高成本国家并非必然输家

归类：科技与产业变革；AI重塑制造业、农业与商业地产

波士顿咨询：AI正在重置全球制造业的选址逻辑，高成本国家并非必然输家

当全球制造业CEO们还在争论“要不要把工厂搬出中国”时，一份来自波士顿咨询（BCG）的最新研报提出了一个更具颠覆性的判断：真正决定制造业竞争力的变量，已经从“哪里劳动力最便宜”变成了“哪里能最快部署未来工厂”。

这不是一个渐进式的优化建议。BCG的量化模型显示，在食品加工领域，一家德国工厂通过部署未来工厂（FoF）能力，可以比搬到中国获得高达14个百分点的成本优势。而在电子行业，即便完成同样的智能化改造，留在德国依然比搬到中国贵15个百分点。

差异如此悬殊，意味着过去二十年支撑全球供应链布局的底层逻辑——劳动力成本套利——正在被改写。未来工厂不是锦上添花的效率工具，而是重新划分全球制造业版图的力量。

BCG这份报告基于对1000家制造商的全球调研、42个成本与定性因素的复合指数，以及横跨54个国家、47个行业的竞争力评分模型。它给出的不是笼统的“回岸制造”或“AI赋能”口号，而是一套可量化的决策

框架：哪些行业、哪些地区、在什么条件下，升级工厂能打败搬迁。

[R058] 波士顿咨询：商业地产正在错过每年2000亿美元的“暗价值”

归类：科技与产业变革：AI重塑制造业、农业与商业地产

商业地产行业正站在一个十字路口。一边是延续数十年的“买入并持有”传统模式，另一边是每年高达2000亿美元的潜在收益增量——相当于行业年回报率提升三分之一。波士顿咨询(BCG)在最新发布的研报中提出了一个尖锐的判断：大部分商业地产投资者正在系统性地错过短中期优化带来的价值，而问题不在于信息不足，而在于思维方式与运营模式的代际落后。

这份报告的核心洞察，用一个物理学比喻来概括——“暗价值”。就像暗物质无法被直接观测但其引力效应真实存在一样，商业地产中因僵化的持有策略而损失的价值也无法被传统报表捕捉，但它正在每年吞噬2000亿美元。BCG的结论是：学会像大宗商品交易商那样思考，是解锁这笔价值的关键。

为什么是现在？因为AI正在以前所未有的速度降低数据分析和市场扫描的成本。那些曾经只有顶级对冲基金才能负担的实时定价模型、套利识别工具和供需预测系统，如今已经变得触手可及。但行业的态度却远远落后于技术的变化。

1. 行业最大的敌人不是市场波动，而是根深蒂固的“持有惰性”

商业地产的长期持有模式并非没有道理。对于养老基金、保险公司等机构投资者而言，稳定的现金流、通胀对冲和分散化配置是核心诉求。BCG的数据显示，即便是在流动性最好的美国市场，自2000年以来，54%的投资者平均持有资产超过五年。在欧洲和亚洲，这一比例更高。全球约60%的商业地产资本配置在“核心”或“核心+”策略上，目标就是可预测的长期收益。

[R059] 波士顿咨询：保险业正在经历一次投资者偏好的结构性转向

归类：金融与保险：结构性转向与风险重定价

全球保险业在过去五年里交出了一份让股东满意的答卷。15%的年化总股东回报率，自2017年以来首次超过了行业自身的股权成本。这组数据本身并不令人意外，毕竟疫情后的复苏、利率环境的改善都在推高收益。但波士顿咨询在刚刚发布的《2026保险价值创造者报告》中揭示了一个更值得关注的变化：投资者正在系统性地从财产与意外险和再保险转向人寿与健康险和综合险，同时将资金从美国市场向欧洲和亚太迁移。

这不是一次短期的板块轮动。它背后是保险行业底层逻辑的松动——定价周期的拐点、技术渗透的加速、以及全球资本对“确定性”的重新定价。对于保险公司的管理层、投资者以及关注金融行业趋势的决策者而言，理解这个转向的驱动力和持续时间，比跟踪季度保费数字重要得多。

过去五年，全球保险业的年化TSR达到15%，高于整体市场平均水平。但波士顿咨询的这份早期报告明确指出，这个数字并非来自保费规模的扩张，而是来自两个结构性因素的叠加：疫情冲击逐步消退带来的赔付正常化，以及净投资收益率的显著提升。

这意味着行业增长的可持续性取决于利率环境和承保纪律。如果利率进入下行通道，而定价竞争重新加剧，15%的TSR可能难以维持。报告已经给出了一个早期信号：商业财产险的费率正在松动，这将在未来几年内压缩财产险公司的股本回报率。

KC评论：对于关注保险板块的投资者来说，核心问题不是“保险股还能不能涨”，而是“哪些细分赛道在利率下行周期中依然能维持回报率”。波士顿咨询的后续报告将提供区域和细分市场的详细拆解，这是完整报告的核心价值所在。

[R060] 麦肯锡：88%企业试了AI，81%没赚到钱

归类：科技与产业变革：AI重塑制造业、农业与商业地产 / 教育与公共治理：结构性断层与融资模式创新

2026年2月，麦肯锡发布了第二版《组织状态报告》（The State of Organizations 2026），基于对全球15个国家、16个行业、超过10,000名高管的调研。这份报告的核心判断，值得每一个产业决策者认真对待：企业正面临技术、经济和劳动力三大结构性力量的叠加冲击，但绝大多数组织尚未准备好应对。

报告最引人注目的数据是：88%的组织正在实验AI，但81%没有报告任何有意义的利润改善。这组数字背后，不是AI本身的问题，而是组织转型的滞后。麦肯锡的结论很直白——企业需要的不是“插电即用”的AI工具，而是一场“双重转型”：技术转型与组织转型同步推进。

这不仅仅是AI的问题。地缘政治碎片化、贸易格局重组、劳动力期望变化，都在迫使企业重新思考“如何组织工作”这个根本问题。报告提出了九大组织变革方向，但核心主线只有一个：在不确定的世界里，持续绩效和价值创造，比短期收益更重要。

报告揭示了一个反直觉的事实：企业对AI的投入热情很高，但转化率极低。86%的领导者认为自己的组织在将AI融入日常运营方面准备不足。更关键的是，六分之一的组织没有明确的C级负责人来推动AI落地。

这意味着什么？AI战略在多数企业里仍处于“散点实验”阶段——某个团队用AI做客服，另一个团队用AI写报告，但没有人从全局视角重新设计端到端的业务流程。

[R061] 麦肯锡：AI已铺开，但企业级价值仍卡在“最后一公里”

归类：科技与产业变革：AI重塑制造业、农业与商业地产

三年前，生成式AI引爆了新一轮人工智能浪潮。三年后的今天，麦肯锡2025年全球AI调研给出了一个看似矛盾但意味深长的画面：88%的受访者表示其所在组织已在至少一个业务职能中常规使用AI，这一比例较去年的78%显著上升。然而，近三分之二的受访者坦言，他们的组织尚未开始将AI规模化推广至企业全境。

这意味着什么？AI工具已从实验室进入办公室，但从“用起来”到“产生企业级价值”，中间横亘着一道尚未被多数企业跨越的鸿沟。这道鸿沟不是技术问题，而是组织能力、战略定力和工作流重构的问题。

麦肯锡这份基于近2000名全球受访者的调研报告，揭示了一个正在形成但尚未定型的新竞争格局：谁先跨越这道鸿沟，谁就可能在下一轮产业洗牌中占据结构性优势。

1. AI使用广度在扩大，但深度仍然有限——多数企业停留在“多点开花”而非“系统性嵌入”

88%的AI使用率听起来很高，但这更像是一个“广度指标”。麦肯锡的调研进一步追问了AI在组织内的渗透深度，结果并不乐观：只有约三分之一的企业进入了规模化阶段，其余企业仍处于实验或试点状态。

[R062] 木头姐ARK：#515: Are Prediction Markets Going Mainstream Again?, & More

归类：新兴市场与主权风险：制度韧性成为关键

木头姐ARK：#515: Are Prediction Markets Going Mainstream Again?, & More

Is the boom in prediction markets structural or the result of momentary catalysts? Hosted across the US, Canada, and Mexico, the 2026 FIFA World Cup is the latest test. The notional volume of prediction markets hit an all-time high of \$13 billion, or ~\$675 billion at an annual rate, during the first full week of group play ended June 15. Year-to-date, the broader market is on pace for notional volume of ~\$330 billion at an annual rate, more than quadrupling the \$71 billion in 2025. In the early days of prediction markets, the 2024 US national election caused the initial spike. Now, the World Cup is the prime mover. Importantly, volume is ratcheting higher in the aftermath of each event.

木头姐ARK：#512: Blue Origin Explosion Highlights Launch Capacity Constraints In Race To The Moon, & More

Last week, ahead of its fourth mission, Blue Origin 's New Glenn rocket exploded during a test fire at its launch site in Florida. The explosion severely damaged Launch Complex 36, Blue Origin 's only operational orbital launch pad for New Glenn. While the company is building additional launch infrastructure and investigating the root cause, the damage is likely to delay the vehicle 's next flight by at least one year.
