Ahead of the Nice SMID Conference on 21 and 22 May 2026, we have set out a selection of questions for management of covered companies participating in the conference.

For ease of reference, the questions are shown alphabetically by company and follow the same format.

Contributions are from the Mid & Small Caps team and from sector analysts contributing to our Midcaps Research.

DETAILS

AALBERTS

Outperform, PT €40.00 - [Philippe Lorrain](#) - +33 1 42 14 75 16

Company profile

Based in the Netherlands, Aalberts is a leading provider of mission-critical technologies used in residential, commercial and industrial buildings, semicon equipment and industrial applications (automotive, aerospace, power generation and machine building). It designs, develops and manufactures hydronic flow control and integrated piping systems for building heating/cooling, as well as semiconductor equipment (lithography machine base frames, vibration isolation and linear motion systems, advanced mechatronics), and also provides a broad range of services in surface treatment and material extrusion.

Key themes

i) Short-term organic growth outlook in the different segments; ii) margin improvement potential and improvement levers in the various segments; iii) 2030 financial targets; iv) potential impacts from the war in the Middle East; and v) capital allocation and M&A (and divestment) strategy.

Questions

1. What is your view on potential impacts to your operations from the current situation in the Middle East?
2. How much of the expected margin improvement in 2026 should come from volume growth (including Semicon recovery) vs self-help and consolidation scope changes?
3. In Semicon, how visible is the 2H recovery today, and what are the key assumptions behind your confidence in a stronger 2027? How did the segment perform vs your own expectations in 1Q (as it delivered better organic growth than expected by consensus)?
4. After the GVT acquisition, what are the main commercial and operational synergies you expect in semicon backend and Southeast Asia?
5. How should we think about the margin trajectory in the Building segment if residential markets in France and Germany remain weak for longer?
6. In the Industry segment, are aerospace, defence and power generation strong enough to offset flatter automotive and machinery demand on a multi-year view?
7. When do you expect to deliver in terms of the remainder of the divestment programme (and of the M&A programme) embedded in the 'Thrive 2030' strategy?
8. By how much more can operational excellence reduce fixed costs and footprint complexity, improve margins and optimise inventories?
9. How should we think about your capital allocation policy? Could share buybacks become more regular in the future?
10. Which end-markets or technologies do you think the market still underappreciates in Aalberts' medium-term growth profile?

ALTEN

Outperform, PT €135.00 — [Derric Marcon](#) - +33 1 58 98 06 30

Company profile

Alten is an independent world leader in IT & network engineering and services consulting. It generates 65% of its revenue in product engineering (R&D outsourcing), 25% in application development/IT, and 10% in telecom network architecture.

Key themes

Customer demand levels in the automotive sector. Customer appetite for the nearshore/offshore delivery model. The impact of AI on Alten's economic performance. Whether the pipeline of M&A opportunities is well-filled or not.

Questions

1. What level of visibility do you have on your clients' investment plans for 2H26?
2. Will the strong revenue growth you recorded in the aerospace sector in 1Q26 continue in the coming quarters?
3. Faced with increased competition from purely Indian IT Services companies in the automotive sector (KPIT, Tata Elxsi, LTTS), are you losing market share?
4. Do you think you can grow your revenue in the automotive sector in the coming years despite all the headwinds you are facing?
5. Are you seeing expansion of your revenue with specialized players in SDV, autonomous and EVs in the automotive sector (Waymo, Wave, Mobileye, Momenta)?
6. What percentage of your business relies on a nearshore/offshore delivery model today, and how high could this proportion go?
7. Are your sales growth prospects in the oil & gas sector benefiting from the current high price of oil?
8. The defense sector already represents c.9% of your sales, do you still have significant gaps in this sector, either in terms of client portfolio or expertise?
9. In a more AI-driven world, will Alten's pricing model and standard margin level change?
10. Do you see any M&A targets in the US that could be transformative?

AMBU

Outperform, PT DKK116.40 — [Delphine Le Louët](#) - +33 1 42 13 92 93

Company profile

Ambu is a European medtech company, founded in 1937 and is now the world leader in single-use endoscopy (60% of 2025 revenues), first launched in 2009. Its legacy business is focused on Anesthesia & Patient Monitoring (40% of 2025 revenues), and its products are mostly used in critical care or intensive care units. The company is exposed to North America, which accounts for 51% of its business (40% in Europe). The company underwent significant restructuring in 2022 following a margin collapse, leading to the appointment of a new CEO who remains in place today.

Key themes

The double-digit single-use endoscopic growth drivers at both the sector and the mix level. Competition for multi-use endoscope manufacturers and the evolution of emerging Chinese players. Levers for margin accretion over the next five years vs investments needed to sustain revenue growth. Shareholder return policy.

Questions

1. Can you break down your market penetration per endoscopic modality, its evolution and the growth drivers per segment?
2. What are the major changes resulting from tariff implementation for AMBU in terms of suppliers, production and market focus?
3. How the Iran war is impacting the manufacturing price?
4. How do you see the capex level and capex allocation evolving in the future?
5. Ambu enjoys a negative leverage ratio, how can the company optimize shareholder return?
6. Ambu has built a major sales organization in the US; can you outline the current set-up, customer dynamics, and key learnings from Europe?
7. What is the outlook for the legacy businesses (anesthesia and patient monitoring) over the next three to five years?
8. Will Ambu's bronchoscopes be challenged in the next five years by another modality when it comes to revenues size or margin contribution?
9. Competition is intensifying in urology, how should investors assess the sales trajectory?
10. How is AI transforming the endoscopy market and how does Ambu compare with other players in the field?

ARCADIS

Outperform, PT €48.00 — [Derric Marcon](#) - +33 1 58 98 06 30

Company profile

Arcadis is a global design, engineering and consulting firm headquartered in the Netherlands, supporting infrastructure, environmental and sustainability projects across more than 70 countries, with a diversified client base across the public and private sector.

Key themes

Operational turnaround in a structurally sound market, with the group's weak organic revenue growth since 4Q24 owing more to execution issues than demand. What is the new management team doing to improve operational rigor, resource utilization, and cost control? How quickly could the qualified pipeline of opportunities translate into signed contracts?

Questions

1. When do you expect business with Property & Investment clients in your Places unit to bottom out, or could it one day rebound thanks to a repositioning of this business?
2. Do you plan to divest underperforming or non-strategic assets?
3. To what extent does the engineering services activity related to the construction of data centers constitute a significant growth driver for Arcadis today?
4. Do you have any other contracts in the coming years that could create as many headwinds as the ramp-down of the HS2 contract in the UK?
5. Have you implemented any measures to better anticipate the impact of a ramp-down of a mega-deal on the group's overall growth?
6. What efficiency gains do you expect from AI, and could it affect your pricing model?
7. With a new management team in place bringing a fresh perspective on how Arcadis' business should be conducted, do you expect any changes the group's internal organization?
8. When do you plan to reinstate a three-year objective plan, and would that make sense given the difficulty in delivering the ambitions of previous plans?
9. Your mobility division performed better than expected in 1Q26, do you think the division can sustain the same growth trend over the next few quarters?
10. Are you able to structurally improve backlog-to-revenue conversion so that this indicator becomes a good leading indicator of future organic growth over the next few quarters?

ASMODEE

Outperform, PT SEK158.30 - [Marie-Line Fort](#) - +33 1 42 13 85 21

Company profile

Asmodee is a leading global tabletop games group, which combines publishing and distribution operations and generated c. €1.6bn in FY25-26 sales and focuses on affordable, social entertainment. It has two main growth engines: resilient, high-margin board games built on 400+ IPs (of which Catan, Ticket to Ride, Dobble/Spot It!, Exploding Kittens) and a higher-growth but more cyclical Trading Card Game (TCG) activity through which it distributes top franchises, such as Pokémon, Magic and One Piece, especially in Europe.

Key themes

How to maintain the growth momentum.

Questions

1. Is the board games sector now mature? Which sub-segments are experiencing the strongest growth?
2. How are you able to counter the cyclical nature of the TCG business?
3. What is your added value in TCG distribution?
4. Who are your competitors in TCGs and do you see any opportunities for external growth?
5. What is your growth potential in the US? Have you achieved critical mass in the region?
6. How great is the risk of you losing contracts and how long are your distribution contracts on average?
7. How could you scale your distribution model further? Could you introduce other product categories?
8. What are your plans beyond 2027, and who stands to benefit from the 30th anniversary of the Pokémon franchise?
9. What is the rationale behind the acquisition of ATM Gaming? Do you have any other external growth projects in the pipeline?
10. When do you expect to be in a position to pay a dividend?

ATOS

Underperform, PT €43.00 — [Derric Marcon](#) - +33 1 58 98 06 30

Company profile

Atos is one of Europe's largest IT services companies and has a strong historical franchise in managed IT infrastructure services. The group has a major presence in Germany, France, the UK, the US, and the Netherlands.

Key themes

The feasibility of the recovery plan presented in May 2025 and group's ability to execute it. The impact of AI on the group's economic performance. Ability to reduce debt and refinance it.

Questions

1. When do you expect to see tangible improvements in sales momentum and new business order intake?
2. What visibility do you currently have on the renewal of large contracts with your major clients (Siemens, Texas DIR, etc.)?
3. When do you expect churn on existing managed services contracts to return to normal levels or the historical average?
4. What does your Cloud and Modernization business consist of (c.30% of revenue) and how is it split across key activities (mainframes, datacenters, networks, self-managed locations, etc.)?
5. Is Atos' presence in the US market necessary for the smooth running of the group's European activities? Could you consider selling your US business?
6. Do you think you have managed to reduce your costs over the past two years without adversely affecting the company's momentum, the quality of your services, or your attractiveness as an employer?
7. How many EBIT margin points do you still have to gain from improving your project margin, your gross margin, or reducing your SG&A (as a % of revenue) over 2026-2028?
8. Do you think you have brought the disbursements related to restructuring efforts, onerous contracts or disputes with customers/suppliers under control and what are your forecasts in this regard for the next three years?
9. As the group repositions toward less capital-intensive activities, do you expect the capex-to-sales ratio to decline in the coming years?
10. Is your age pyramid or ability to deliver services from India optimised enough for you to be competitive on price?

AZIMUT

Neutral, PT €34.80 — [Ian White](#) - +44 20 7676 6560

Company profile

Azimut is a global group focused primarily on asset and wealth management, with a tied network of financial advisors and international subsidiaries distributing a wide range of solutions across ~20 countries. The group also operates investment banking and fintech businesses and is in the process of establishing a digital bank alongside private equity firm FSI.

Key themes

Azimut has seen organic net inflows accelerate in recent years, with the group able to attract new money while also executing and integrating a number of M&A transactions. However, we think the investment case continues to hinge on execution of specific growth initiatives. The New Bank project – which has already been delayed once – is the main ‘make or break’ here, but Nova Investment Management also provides significant upside in the event that UniCredit supports Nova more forcefully.

List of 10 questions

1. Where do you see competitive threats to the business? Are other wealth management platforms, execution-only or neo-broker businesses more relevant in your view?
2. How do you see the group evolving on a 5-year horizon? Do you expect to see a meaningful shift from clients towards passive products?
3. On TNB, what gave you confidence to agree to a 12-year revenue guarantee? Under what types of regulatory interventions could the terms be changed?
4. You said some TNB proceeds could be invested in the IT platform and Advanced Advisory offering. Which elements would benefit from investment?
5. Why is it important for Azimut to keep expanding internationally, and which regions may be of focus in the coming years?
6. How do you reconcile potential inefficiency within the personnel cost base with continued expansion in new markets? To what degree are staff local vs regional vs global and might this change as the group becomes more diverse?
7. During FY25 results, you said you would consider external financing for attractive M&A opportunities. Have you set a maximum gross or net debt figure that you would extend to in order to pursue M&A?
8. How is Nova Investment Management progressing and what contribution to net inflows has it made over the last 6 months or so? And what is the current situation with respect to private markets products in Nova?
9. On private markets, can you provide any aggregate-level performance indicators, such as the unrealised MOIC on the first funds you closed in 2020?
10. How is the Kennedy Capital Management/NSI integration progressing? Do you think the combined business has the requisite scale to compete effectively in the US market, or could bolt-on M&A in the US accelerate growth plans?

BAM GROEP

Outperform, PT €10.30 - [Philippe Lorrain](#) - +33 1 42 14 75 16

Company profile

BAM Groep is a leading Dutch construction services business, with over 150 years of experience. It is active in: i) residential construction and property development, ii) non-residential construction, and iii) civil engineering and infrastructure. Following a refocusing period, the company operates in its home markets: the Netherlands, the UK and Ireland. It also has some activities in Belgium and is still working on a few other international projects (e.g. in Denmark and Australia).

Key themes

i) Potential impact on costs, sales, and demand from the current macro and geopolitical situation; ii) evolution of the 'nitrogen crisis' situation in the Netherlands; iii) progress on the 'Building a sustainable tomorrow' strategy and longer-term margin potential; and iv) growth potential in the different markets from structural trends — energy transition/energy security and climate adaptation, demand for (near) net-zero houses and buildings.

List of 10 questions

1. What is your view on potential impacts on your operations from the current situation in the Middle East?
2. What are the main levers that can still drive further margin improvement from current levels without requiring more aggressive risk appetite?
3. How much of the recent profitability improvement is structural versus helped by a favourable mix, phasing or legacy normalisation?
4. What should investors look for to assess the quality of the €13bn order book beyond the headline number?
5. How much upside is there in Dutch residential development, and what are the biggest constraints from grid congestion, permitting or nitrogen regulation?
6. In the UK, what gives you confidence that Construction UK can continue its recovery and not relapse into lower-margin execution?
7. How material could energy-transition work become as a share of group revenues and profits over the next three to five years? What potential do you see from increased government increased spending on defence?
8. What is the remaining financial and execution risk around the legacy portfolio, especially Fehmarnbelt and the Children's Hospital in Ireland and final close-out discussions elsewhere?
9. How do you balance land investment, bolt-on M&A, dividends and buybacks when free cash flow is improving materially?
10. As you prepare a new strategic cycle, what would need to happen for medium-term targets to move clearly above the current margin framework?

CANAL+

Outperform, PT £3.15 — [Christophe Cherblanc](#) - +41 58 272 35 40

Company profile

Canal+ is a €8.7bn rev. (FY26e), €0.75bn EBITA (FY26e) company active in Europe, Africa and Asia. Beyond its pay-TV activities, it also operates a Content unit (StudioCanal and Dailymotion), small free-to-air (FTA) channels in France, Africa and Poland, and internet access in Africa (GVA). C+ acquired the pan-African TV group MultiChoice in 2025 and owns minority stakes in the Asian streaming platform Viu (37%), Nordic pay TV group Viaplay (29%) and French cinema group UGC (34%).

Key themes

- Commercial relaunch of Multichoice
- Mid-term potential for Canal+ France's margin and cash conversion
- Minority stakes and balance sheet management (Viaplay, UGC etc)

Questions

1. Multichoice: any initial feedback on recent commercial initiatives? What is the most important driver among price stabilization, offer simplification and decoder subsidies?
2. Multichoice: what's the potential to renegotiate pre-existing content commitments?
3. Multichoice initially reported high margins in South Africa and losses elsewhere: Does this reflect your assessment of the economic reality of group financials? Are there particularly challenging geographies?
4. Multichoice: are there ways for Canal+ to better hedge the FX swings seen in the past?
5. Canal+ France is now in the black. What could be a sustainable LT EBITA margin given its dominant position in France? Is double digit too aggressive?
6. Football rights: Is Canal+ France interested in regaining exposure to the French Football Ligue 1 rights? Potential to sublicense the Champions League rights (beIN)?
7. Europe: M7's historical distribution model is under pressure: is it fair to expect continued margin pressure in 2026-27?
8. Minority stakes: what is the LT plan for your minority stakes in Viu (Asia) and Viaplay (Nordics)? Will you need to inject cash into those assets in 2026-27? What would be the synergies from taking Viaplay private? What would be the balance sheet impact of buying 100% of UGC by 2028? What is the strategic value of UGC?
9. What is the path to de-lever the balance sheet given the above-mentioned investments?
10. What is your assessment of the potential investor demand stemming from the planned listing in Johannesburg?

CARL ZEISS MEDITEC

Market-Perform, PT €26.10 — [Susannah Ludwig](#) - +41 582 723 127

Company profile

Carl Zeiss Meditec is a leading global medtech company focused on ophthalmology and microsurgery, ranking in the top four in the c. \$13bn surgical ophthalmology market and holding a leading position in the c. \$1.8bn refractive surgery market. It is also the No. 1 player in the c. \$0.8bn microsurgery segment with a market share of >60%. Revenues are skewed to ophthalmology (77%) and the company has strong geographic exposure to APAC (46%), of which China represents >50%.

Key themes

FY2025/26 is shaping up to be a trough year, with the abrupt departure of the CEO and the ongoing search for a permanent successor (expected by fiscal year-end in September) adding to strategic uncertainty. Operational headwinds in China are evident across key segments, including challenges in the intraocular lenses, the impact of volume-based procurement programs, and rising competitive intensity in refractive surgery. At the same time, weaker equipment sales in the US call into question the market's longer-term growth outlook. However, management has recently initiated a significant transformation program targeting €200m in annual savings by 2028/2029E. Delivering on these efficiencies will be a key priority for the incoming CEO.

Questions

1. How do you see the refractive surgery market in China evolving in terms of volumes and pricing post-VBP and what could the resulting impact be on your business?
2. How do you position Carl Zeiss Meditec relative to emerging competitors in the Chinese refractive market?
3. What are the key initiatives to strengthening equipment sales in the US?
4. What underpins your confidence in delivering the targeted outcomes of the restructuring program and what has been the response of employees?
5. To what extent do your previously announced initiatives to drive greater commercial focus and keep discipline intact and how do they interact with the restructuring program?
6. Which businesses do you see as core and which are potential targets for your planned portfolio optimization?
7. What are the key recent and upcoming product launches and how do they support your medium-term growth strategy?
8. Can you comment on the expected approval timeline for your AT-IOL in the US and to what extent do you see this as a key catalyst to strengthen your position in the US cataract market?
9. What are the main priorities within your R&D pipeline, particularly across ophthalmology and microsurgery (including consumables)?
10. How do you intend to integrate DORC within the broader group, and what will the commercial strategy look like?

CLARIANE

Outperform, PT €4.80 — [Aleksander Peterc](#) - +33 1 57 29 45 25

Company profile

Clariane is Europe's leading private operator of comprehensive care and support services for frail and dependent people, accompanying individuals at every stage of their vulnerability through its network of nursing homes, specialised healthcare facilities, shared living solutions and homecare services across six European countries.

Key themes

The core watch point is whether Germany and France can deliver on the announced cost-cutting to drive the +100-150bp EBITDA margin expansion by 2026. Occupancy recovery (+130bp yoy to 91.7%) and price/mix (+3.3%) are tracking, but margin execution - not revenue - remains the swing factor. The successful €500m high-yield bond (5x oversubscribed) removes near-term refinancing risk, while energy hedging (93% in 2026) de-risks the cost side. The leverage trajectory to ~4.5x by 2028 is the financial compass to monitor.

Questions

1. France's nursing home occupancy is still materially below historical peaks. What do you see as the credible ceiling, and by when do you expect to reach it?
2. With the EUR green bond repaid and the ODIRNANE bond issue step-up approaching, what is the plan: redeem with cash, refinance with senior debt, or convert? And what is the net cost impact on equity?
3. You describe a "cautious approach with limited reliance on public funding increases". What specific French and German allowance growth assumption is baked into the 7-9% EBITDA CAGR, and what happens if it is zero?
4. Clariane Germany posted +8% organic revenue growth in FY25 on the back of a tariff catch-up; is this level of pricing uplift replicable in 2026-28, or was this just a one-off?
5. You are targeting positive free cash flow as of 2026 with ~€300m in total capex; can you walk through the bridge from EBITDA to FCF, including working capital and cash interest drag?
6. Dividends are capped at 40% of net profit and contingent on Wholeco leverage below 4x. When do you realistically expect to cross that threshold?
7. You referenced significant savings from digitalising billing, accounting and planning. What is the total savings envelope and delivery timeline?
8. Community/alternative living grew +8.7% organically in FY25; what is the EBITDAR margin profile versus nursing homes, and is this where you see the greatest long-term growth?
9. Clariane Spain posted +15.2% organic revenue growth in 1Q26; what investments are needed to make it a core geography, and when will it achieve a normalised margin contribution?
10. Growing private-pay and non-regulated activities is explicitly cited as a key margin lever. What share of revenues could this represent by 2028, and with which leading geographies?

COVIVIO

Market-Perform, PT €64.00 — [Valérie Jacob](#) - +44 20 7762 4885

Company profile

Covivio owns a €24bn diversified European portfolio (€16bn group share) made up of Offices in France (27%, group share), Italy (15%) and Germany (7%), German residential (30%) and European hotels (21%). The portfolio is built on three main pillars: centrality, hospitality, and sustainability.

Key themes

Impact of the current macro environment on European real estate, especially increases in interest rates in low-yielding segments such as German residential and on demand for hotels. The future of offices and the threat from AI-driven job cuts.

Questions

1. Have recent developments in your markets changed the way you think about your targeted portfolio split in the mid-term ? (1/3 office, 1/3 resi, 1/3 hotels)
2. How should we think about your targeted total return (cash yield + value creation) over a full cycle?
3. What are the key trends in your various markets? How do you see like-for-like rental growth and occupancy trending over the next 2–3 years across offices, residential and hotels?
4. You recently disposed of 50% of the Thales site in Velizy; do you think you will dispose of more assets in JVs?
5. How do you expect property values in Germany to trend if bund yields stay high?
6. What do you expect from the Berlin state election in September?
7. How cyclical do you think your hotel exposure is? And what is the split between fixed and variable rents or management contracts today?
8. What are the investment opportunities at the moment and what kind of returns/yields are you seeing?
9. What is your target LTV range through the cycle?
10. How do you see your cost of debt evolving over the next two years?
11. There have been some press articles about Delfin looking at its various shareholdings. Have you had any discussions with them? Do you know what their intentions are?

DEUTSCHE LUFTHANSA GROUP

Market-Perform, PT €7.90 — [Alex Irving](#) - +44 207 676 7044

Company profile

Lufthansa is Europe's largest airline group by capacity, with the highest skew to transfer traffic: making it a more pan-European network play. The group operates five core hubs, Frankfurt, Munich, Zurich, Vienna, and Brussels, with Frankfurt among the world's leading connecting airports. A notable part of Lufthansa's EBIT comes from its non-airline businesses: Lufthansa Technik and Cargo.

Key themes

Lufthansa's multi-year turnaround is making progress on operational reliability, but margin recovery remains constrained by weak labour productivity, fleet complexity, and OEM delivery delays. Strong aftermarket maintenance demand, with maintenance activities representing around one-third of run rate EBIT, support the earnings trajectory. In the current downturn, Lufthansa benefits from strong Asia exposure and a large non-airline earnings base, but margins are at risk as fuel costs weigh on the outlook.

Questions

1. How is demand looking for this quarter and how do you expect RASK to evolve?
2. What booking patterns are you seeing with respect to demand for leisure and business travel, both short haul and long haul?
3. To what extent are you able to recover the increase in fuel prices through fare adjustments? Where do you expect yields / RASK to normalise?
4. Where do you see the largest cost savings opportunities? How confident are you that you can make these reductions without hindering the effectiveness of the business?
5. What progress are you making on your turnaround plan? What milestones are you targeting in the coming months?
6. What are your thoughts on fleet and non-fleet capex beyond 2026?
7. The Portuguese government intends to privatize TAP. How this could fit in your overall strategy?
8. Why are you confident that you can make money with ITA? How much restructuring does it require?
9. What impact do you expect from alternative connecting hubs in the Middle East on your Asian yields in the current context?
10. Would you consider a spin-off of Technik? Why (not)?

ELIS

Outperform, PT €30.50 - [Sabrina Blanc](#) - +33 1 42 13 47 32

Company profile

Elis is a European leader in the rental and maintenance of textile and hygiene articles and wellbeing items. It operates in 28 countries across Europe and Latin America, in fragmented markets that are partly outsourced (30% on average) and where demand for services is growing.

Key themes

(i) The economic environment and the group's capacity to navigate in a more challenging context; (ii) labour costs and capacity to continue increasing prices and improving margins; (iii) the new capital allocation to prioritise cash return to shareholders and deleveraging while maintaining an investment-grade rating and focusing on bolt-on M&A

Questions

1. Could you remind us of your updated capital allocation priorities? What is your target leverage range as you continue to pursue bolt-on M&A? How much of the share buyback programme is still to be executed to partly offset the convertible bond dilution?
2. Could we have an update on the current environment in your key geographies? France, Germany, and the UK? Do you have concerns about the pace of signing new contracts? Have you noticed any reduction in workwear demand?
3. Could you tell us more about your workwear strategy, and outsourcing globally? Where do you see growth opportunities? Which countries are the main drivers?
4. Could you give us details about competitive dynamics globally and by country, notably in Denmark?
5. What is your guidance in terms of volumes and pricing for 2026? Are there still opportunities for price increases, for example in German healthcare? Do you have difficulties passing inflation on to your clients?
6. Which country is the closest to France in terms of plant network density, product offering and geography? Which countries are you targeting to replicate this model? And which countries would never be able to achieve this level of coverage?
7. What is your strategy for further improving the EBITDA margin (10/20bp p.a. in line with historical trends)? How have you hedged your fuel and electricity costs? Is there a risk that, as those hedges roll off or if energy prices fall, you may have to pass on some of the hedging gains to your largest clients?
8. How is capex evolving in the current environment and what is the impact at the EBIT level? Are you seeing any sourcing or supply chain disruptions linked to the conflict in the Middle East, particularly on linen or energy?
9. Could you comment on your current shareholder structure? How do you engage with Brasil Warrant (Moreira Salles family) as your largest shareholder with an 18% stake, and how should investors view this position going forward?
10. Following the successful entry into the Mexican market at the beginning of 2022, and Malaysia in 2024, do you see further M&A opportunities in those markets, or in any others? What can we expect in 2026 in terms of M&A?

ENAGAS

Outperform, PT €18.50 - [Jorge Luis Alonzo](#) - +34 915 893 913

Company profile

Enagas is the Spanish gas transmission system operator (TSO), operating a largely regulated infrastructure base with high visibility of cash flows. The company owns and operates Spain's core natural gas transport network (>12,000km), LNG regasification plants (6 main terminals), and underground gas storage facilities, and acts as the technical manager of the Spanish gas system. Its business model is predominantly based on regulated returns, complemented by a portfolio of international and energy-transition related affiliates.

Key themes

1) the new regulated remuneration framework provided positive surprises, 2) green hydrogen has a great but uncertain future, 3) we see hidden value in natural gas assets but unlikely to be unlocked soon.

Questions

1. Could you provide details about the main remuneration parameters written into the draft by the regulator?
2. Based on the new regulation parameters, what level of EPS growth do you expect for the coming years?
3. In your view, how visible are some of the incentives set by the regulator? What is the rationale for keeping the incentives in the long run?
4. Can you provide color on how advanced Paon is on green hydrogen infrastructure?
5. How much could Enagas potentially invest in the green hydrogen backbone and interconnections? Over what timeframe?
6. What will the remuneration for green hydrogen look like? Will work in progress be remunerated immediately? (to avoid cash flow issues until the full pipeline is completed)
7. What is the situation in Peru regarding the TGP and GSP arbitrage cases?
8. Would you allocate more resources to European infrastructure if green hydrogen is delayed? If so, in what areas? Why is green hydrogen an area of interest for Enagas? New revenue streams?
9. How solid are dividends looking? If green hydrogen is delayed, is there room to increase DPS?
10. What does Enagas think the market could be missing in its equity story?

EURAZEO

Neutral, PT €52.00 — [Isobel Hettrick](#) - +44 20 7762 5095

Company profile

Eurazeo is a European alternative asset manager with €28.9bn of FPAUM and €39.2bn of AUM as of 1Q26. Eurazeo has capabilities across private equity (buyout, growth and secondaries), private debt and real assets. AUM is split across third-party institutional investors (63% of AUM), third party private wealth investors (15%) and the balance sheet company (22%, i.e. Eurazeo's assets from its legacy holding company business and co-investment alongside third-party funds).

Key themes

Key themes for the company include the disposal and rotation of its balance sheet, as Eurazeo looks to increase the share of its third-party AUM business and return capital to shareholders. Other initiatives include the build out of the private wealth offering with two new evergreen funds recently launched (ELTIFs in private credit and secondaries), whilst the market's scepticism over balance sheet investment portfolio marks has increased in recent months due to the large share of software assets (25% of balance sheet AUM).

Questions

1. When you look at your competitors and the needs of LPs today, what product gaps (if any) do you think you have? And should we expect these to be filled over time with the seeding of new strategies?
2. What role do you envisage Eurazeo playing in the wave of consolidation expected within private markets?
3. What could be potential target areas for M&A?
4. How back-end loaded should we expect the return of capital from the balance sheet to be?
5. Given that developing private wealth franchises is a target for most private market managers, what comparative advantages do you think the Eurazeo brand has here?
6. How are your conversations changing (if at all) with potential distributors given negative headlines around US BDCs, and credit-focused evergreen funds?
7. With plans to broaden the investor base outside of France, how should we think about costs related to potentially hiring more local sales teams etc.?
8. How can you give the market confidence that we will not see further (non-FX) adverse mark downs to the balance sheet NAV?
9. Given your exposure to software on the balance sheet, how can we be confident marks are appropriate given the potential risk of AI driven transformation?
10. How are you utilising AI across your business and in the investment process?

EXAIL

Outperform, PT €167.00 — [Aleksander Peterc](#) - +33 1 57 29 45 25

Company profile

Exail Technologies is a leading French high-tech group specialised in autonomous maritime robotics, advanced navigation systems, aerospace and photonics. It provides cutting-edge solutions for civil and defence customers operating in harsh environments.

Key themes

Demand is not the issue - execution and ramp are. The key themes are: 1) the delivery pace and margin profile of the two jumbo contracts, the ~€400m “unnamed navy” MCM contract and the €450m BENL ramp; 2) navigation order momentum (1Q26 +40% yoy, a record quarter, displacing US incumbents) as a structural share-gain story; and 3) whether the DriX civil offshore ramp (subsea cable, energy) adds a sustainable third revenue pillar beyond defence. Backlog coverage at 2x 2025 revenues provides strong visibility, but investors are keen to see some of the €3bn “pipeline” of MCM deals with 10 major navies (as defined by Exail itself) materialising in additional new jumbo contracts.

Questions

1. How much of the €1.1bn backlog is deliverable in 2026, and what operational constraints could delay revenue recognition?
2. What is the timeline of bidding processes and the potential signing of new deals as part of your €3bn funnel of opportunities between now and 2030?
3. Describe the mechanics behind the compensation of private equity firm ICG. Will you exercise your option to redeem its bonds and buy out its equity as soon as possible? What happens if ICG does not accept your buyout terms?
4. With €554m in undated convertible bonds outstanding, what is the most likely redemption path and what is the realistic maximum dilution (capped at 21%)?
5. You are investing €10-15m in additional production capex. Where are the binding constraints and when should they be resolved?
6. DriX revenue grew 75% in 2025. Is there now a credible path to serial production and what navies are in the sales pipeline?
7. Is the margin expansion primarily a volume/scale story in navigation, or does it require a structural mix shift towards higher-margin autonomous systems?
8. You previously characterised the Navigation (INS) business as a 15% growth business; the growth rate is now materially higher. What is driving your share gains and how sustainable are they?
9. Could you pursue Navigation/INS opportunities more aggressively outside naval/submarine solutions, and what is the opportunity in air (drones), terrestrial warfare (e.g. your Rheinmetall win), missile guidance and space (LEO)?
10. As you build out a US commercial presence, how do you manage tariff and ITAR compliance risk, and does the new US administration create opportunity or risk?

EXOSENS

Outperform, PT €72.50 — [Aleksander Peterc](#) - +33 1 57 29 45 25

Company profile

Exosens is a global leader in high-end electro-optical solutions for amplification, detection and imaging in demanding defence, nuclear, industrial and life-science environments.

Key themes

The binding constraint is capacity, not demand. The critical point to monitor is the 2H26 inflection from the +40% European capacity expansion, the timing of the US facility ramp (10-15% of total by 2027) and further orders from the US Army. On margins, the NVLS dilution in Amplification fades over the year and D&I higher-margin detectors/cameras should rebalance the mix. Mid-term, the €1bn revenue ambition rests on M&A discipline - management is now targeting ~€50m+ revenue with 2x EBITDA leverage headroom.

Questions

1. New capacity investments come online in late 2026. What is the exact volume uplift in tubes per month, and is there immediate demand to absorb it?
2. Should we expect Amplification to outgrow the group again, or does D&I acceleration re-balance the mix?
3. The exposure of D&I to defence has doubled from ~5% in 2024 to ~10% of 2025 group revenue. How high can it go and does a heavier defence mix in D&I structurally improve or compress its margins?
4. How material is the drag from US research funding cuts and tariff uncertainty in D&I, and when do you expect a recovery?
5. What year do you define as “mid-term” for the €1bn target, and what is the assumed organic vs M&A split?
6. You are now targeting larger acquisitions (€50m+ revenue) vs prior bolt-ons. What type of asset justifies leveraging at 2x EBITDA?
7. The gross margin in Amplification dipped from 51% to the low-to-mid 40s% in 4Q25. Was this driven by the 5G technology mix or the impact of NVLS, and is this now behind you?
8. After the Microwave Amplification disposal, is the portfolio fully optimised or are there remaining non-core activities to address?
9. FCF was €57.3m at 73.6% cash conversion - as capex normalises post-2026 to ~5% of sales, what is the sustainable FCF yield?
10. With 75% of revenue in defence, how do you protect the business if European defence budget growth decelerates post-2027?

GTT

Outperform, PT €245.00 — [Guillaume Delaby](#) - +33 1 42 13 62 29

Company profile

GTT is a technology and engineering company that provides membrane containment systems mainly for LNG carriers but also for FLNG units, LNG bunkering vessels and onshore tanks. It is the world leader in designing tanks for LNG Carriers (LNGCs), with a c.100% market share. GTT is also diversifying into services, smart shipping, AI-driven solutions and hydrogen. The company's long-term visibility has increased over the past 12 months thanks to: 1) the acquisition of Danelec; 2) the sanctioning of 107 MTPA (2025: 84MTPA; 1Q26: 23MTPA) of new LNG projects over the past 15 months; and 3) the longer-term implications of the ongoing turmoil in the Middle East.

Key themes

LNG dynamics. Are economists underestimating long-term LNG demand (c.600 MTPA by 2030) – the key factor behind LNG operators sanctioning new LNG projects? Are LNG consultancy firms underestimating long-term LNG supply (c.750MTPA by 2030) – the key factor behind shipowners investing in new vessels? To what extent is the turmoil in the Middle East changing the long-term outlook for both LNG supply and LNG demand?

Questions

1. What would you consider a reasonable order intake level in 2026 — c.80 units? And, over 2027-30 — c.60 units p.a.?
2. When do you plan to update your outlook on the 10-year cumulative order intake — in 1H26?
3. What is the current annual shipbuilding capacity — c.100 vessels p.a.? Would the split be c.80 in South Korea and c.20 in China? Is this annual capacity set to increase? What plans do the US and Japan have in this regard?
4. Do you think your FY26 guidance (€740-780m revenue; €490-530m EBITDA) is now on the conservative side, given the 1Q26 revenue of €193m?
5. Is the replacement market for obsolete LNGCs now gaining traction? Should we assume a potential market of c.350 vessels, comprising c.200 built before 2000 and c.150 built after? Are these older vessels now uneconomical to operate? Is the tightening of EU and IMO regulations having an impact?
6. Can you give more colour on your strategy to industrialise the company's corporate culture? How large could the opportunity be to provide services to LNGC operators (within GTT's Energy segment)?
7. Do you intend to maintain strict monitoring of costs?
8. Could you give us a sense of the EBITDA margins for the two segments: GTT Energy and GTT Marine?
9. Beyond the €25-30m in revenue synergies, what level of cost synergies do you expect from the Danelec acquisition?
10. Which companies in your ventures portfolio do you view as the most promising?

GETINGE

Market-Perform, PT SEK224.00 — [Delphine Le Louët](#) - +33 1 42 13 92 93

Business description

Geringe is a medical equipment B2B company. It has built leading global positions in the 20-45% market-share range in advanced cardiopulmonary therapy, sterile reprocessing and operating room equipment.

Key themes

Investors are focused on quality issues at Geringe, and also, as for any medtech, on the sales and margin trajectories. The 0.8% OSG in 1Q26 was negatively perceived by investors, while the order intake proved robust (+3.9%) and the FY26 sales guidance of 3-5% was solid. The margin trajectory on the back of low Acute Care contribution was challenged in 1Q26 but structural margin gains are in place.

Questions

1. How is the Iran war impacting raw materials or influencing prices and logistics expenses?
2. Can you take us through your tariffs experience and how sustainable you expect your mitigation measures to be over the next two years?
3. How should we think about the pricing dynamic by region and division?
4. The evolution of the mix and all the work on high-margin products has resulted in recurring revenues now representing two-thirds of the total. What is your targeted breakdown between recurring and non-recurring revenues by 2028e?
5. In ACT (Acute Care), could you elaborate on the underlying market dynamics for ECLS, ventilators and Paragonix?
6. As the largest division, ACT posted a resilient gross margin in 1Q, after 40bps acceleration last year, in context of negative FX and tariffs. What are the structural changes you have been implementing this past year?
7. At Life Science (LS) are you seeing an improvement in demand for biomanufacturing? And if so, for which modality?
8. Leverage is at 1.5x and FCF is accelerating; how should we think about the shareholder distribution and the M&A policy going forward?
9. Can you walk us through the latest innovations at each of your divisions? What should we expect in terms of R&D as a proportion of sales and the capex level?
10. What is the key element missing in terms of improving overall quality and reducing the number of field actions? Can you say a word on Cardiohelp II's EU roll out?

GROUPE SEB

Outperform, PT €73.00 - [Marie-Line Fort](#) - +33 1 42 13 85 21

Company profile

Groupe Seb is the world's leading supplier of small domestic equipment and fully automatic professional coffee machines (PCM). The group experienced a difficult FY25, with OSG of 0.3% and ORfA down 25% to €601m (7.4% margin)

Key themes

When does the group expect to be able to recover to 5% organic growth? What are the execution risks of the Rebound Plan?

Questions

1. How do you explain the loss of market share in both kitchen appliances and cookware?
2. Your Rebound Plan includes a number of commercial initiatives that underline the need to close the gap with your competitors. How do you explain this lag? Is it an organisational or a management issue, and have you implemented any management changes as a result?
3. What is the strategy behind moving part of the R&D division to China, and what are the expected benefits?
4. You plan to reduce SKUs by 25-30%. In which regions or categories do you see the biggest risk that simplification could cost you market share, and what evidence do you have so far that retailers and consumers are on board with this rationalisation?
5. What are the two to three concrete organisational changes that make your social-commerce and influencer strategy in 2026 structurally different from previous marketing approaches?
6. Do you think you could return to stronger growth in China, and to what extent?
7. What is a reasonable recovery range for US revenues in 2026 and how could recent changes to tariffs help this recovery? What is the magnitude of potential duty reimbursements?
8. What is a realistic growth and margin profile for the Professional coffee business over the next two to three years, given the Shaoxing hub and the new range of more affordable machines?
9. How are negotiations with employee representative bodies regarding the planned headcount reductions progressing, and is the risk of social unrest significant enough to jeopardise the €200m of savings targeted in the plan?
10. What concrete milestones (WCR ratio, capex, dividend) should we track to gain confidence in the deleveraging path back to ~2x by 2027?

HAVAS

Outperform, PT €21.00 — [Annick Maas](#) +44 20 7676 6683

Company profile

Havas is a global media agency, which was listed in December 2024 on the back of the Vivendi split. The group provides traditional advertising services. Its largest exposure is to Europe, and it is comparably less exposed to the US than its peers.

Key themes

Havas is a multinational advertising and public relations company. For 2025, the group reported €2,783m net revenues, up 3.1% organically, €358m adj. EBIT and €312m FCF. For FY25, the group guides for 2%-3% organic revenue growth and an adj. EBIT margin of 13.2-13.5%. Headquartered in Paris, Havas has operations in over 100 countries and employs more than 23k people.

Questions

1. Can you please tell how the Middle East uncertainties have impacted you? Is there a risk to your guidance?
2. Can you please run us through the cost flexibility you have if the macro were to deteriorate?
3. What is the cadence of growth you are expecting this year? How much visibility do you have (how many months out?)
4. What is the momentum looking like for new business – are there lots of pitches at the moment and how is Havas positioned?
5. You have an envelope for M&A – do you have an investment preference for any particular type of business or geography?
6. Can you give us an update on how your Converge strategy is developing? What stands out in the offer vs peers?
7. Quid AI – do you see disruption risk and conversely has it allowed you to cut some costs?
8. Your balance sheet is strong – could you engineer a transformational deal?
9. Any comments on 2Q?
10. You are much less exposed to the US than to Europe, are you happy with your position there and why not invest more in the US? You've invested in Horizon Media can you give us an update on how this partnership goes?

ID LOGISTICS

Outperform, PT €470.00 - [Philippe Lorrain](#) - +33 1 42 14 75 16

Company profile

Founded in 2001 and headquartered in France, ID Logistics is a global logistics services provider operating in the contractual logistics (or contract logistics) industry. The company has developed and operates an asset-light model, mainly focused on highly technical customer-specific warehouse logistics. Having expanded into Canada in 2025, the group now has a presence in 19 countries across Europe, the Americas, Asia and Africa. ID Logistics serves a well-balanced portfolio of sectors including retail, e-commerce and consumer goods for leading international customers.

Key themes

i) The potential impact from the current geopolitical situation; ii) current trading in the regions, main countries and verticals (how are volumes, prices and contract launches trending?); iii) potential impacts on the business from AI, and from Amazon opening its logistics network to other businesses; and iv) the M&A pipeline.

List of 10 questions

1. How did customer discussions about new contracts and customer behaviour change after the start of the war in the Middle East? Has there been any change in recent weeks?
2. Have you observed/are you observing changing volume trends through the warehouses you operate in the past few weeks as a potential result of the geopolitical situation?
3. How are volume trends in the different verticals currently? How about volumes in the various countries?
4. Are you still seeing the same outsourcing momentum across retail, e-commerce and consumer goods, or are customers in some verticals becoming more cautious?
5. Looking at your target to achieve 11-13% yoy sales growth this year, how would you break it down between: i) volumes (on existing contracts); ii) pricing (on existing contracts); iii) on-board growth from the contract launches last year; and iv) new contract launches; and v) FX?
6. Your sales growth target of 11-13% yoy is based on 25-27 new contract launches. Now that we are well into 2Q, would you see this volume of contract launches as still being a reasonable assumption or is it likely to be more?
7. How do AI and automation help ID Logistics and its customers make their warehouse operations more productive? What is the impact on capital intensity over time and in the short term?
8. What is your take on Amazon's announcement in early May that it was launching 'Amazon Supply Chain Services' and opening its logistics network to every business (i.e. other companies can now use the same supply chain as that which supports Amazon and its independent selling partners)? How could this impact the contract logistics industry and ID Logistics?
9. In a softer macro backdrop, what are the earliest indicators that customer volumes are slowing and how quickly can you adapt the cost base? How are the mechanisms of higher/lower volumes and price per task working out in your contracts?
10. Is there any update regarding potential M&A deals?

INDRA

Outperform, PT €69.00 - [Richard Nguyen](#) - +33 1 42 13 54 22

Company profile

Indra is a Spanish company that generated €5.5bn in revenues and a 9.5% EBIT margin in 2025. The group aims to increase its revenues to €10bn before 2030. Its activities are split between Minsait (IT Services, 57% of group sales), Defense (23%), Air Traffic Management (ATM, 10%), Mobility (7%), and Space (2%).

Key themes

Indra today is a leveraged play on structurally higher European defense and security spending. The company has built up a record defense and ATM backlog, is accelerating growth in high-margin Defense and Mobility, and is making a strategic pivot towards an integrated defense-space industrial ecosystem via platforms like Indra Land Vehicles, Indra Space and Hispasat. The group is gradually shifting Minsait towards higher-value digital, AI and cybersecurity work, thereby recycling capital out of low-growth/low-margin business process services. Indra targets increased cash generation, dividends and disciplined M&A to consolidate its position as a national and European champion across Defense, ATM, Mobility and IT services.

Questions

1. What are the growth prospects for the Land Vehicle division over 2026-29?
2. Could you describe your Drone business, and what are the targets over 2026-29?
3. How far can Defense margins stretch before you hit capacity or complexity limits?
4. Space is growing fast; what is a realistic revenue and margin target by 2029-30?
5. Mobility has lower margins today; what is the path to make it accretive rather than dilutive to group returns?
6. ATM is growing strongly; what are the prerequisites to ensure continued +10–20% growth without eroding profitability?
7. Minsait is targeting mid-single-digit growth and +200bp margin increase; what are the two biggest factors that will ensure it is actually delivered?
8. How do you decide between buying IT capabilities for Minsait versus building them organically around IndraMind and adjacent tech?
9. What types of acquisitions accelerate growth vs just add revenue?
10. Across Defense, Minsait, ATM, Space and Mobility, where are you most likely to exceed/miss your 2026-27 revenue or margin targets, and why?

INTERPARFUM

Outperform, PT €32.30 - [Marie-Line Fort](#) - +33 1 42 13 85 21

Company profile

Interparfums operates a portfolio of premium and *Haute Parfumerie* brands in the fashion, leather goods, *haute couture*, fine jewellery, and accessories sectors, either under exclusive licence agreements (the biggest contributors being Jimmy Choo, Montblanc and Coach) or that it owns directly (e.g. Lanvin, Rochas, the recently acquired Off-White and Maison Goutal and the Solférino Haute parfumerie brand developed in house and launched in 2025).

Key themes

Does the perfume sector still retain a premium image? What opportunities does Interparfums have in a market in which demand and distribution are changing?

Questions

1. Last April, Philippe Bénacin stated that Interparfums held a market share of around 4% and aimed to take this to 5% to 6%. What is the financial rationale behind this drive to increase the company's market share?
2. Do you think that the current developments in the licensed perfume brands market (L'Oréal/Kering, Estée Lauder/Puig and a possible restructuring at Coty) could present opportunities for you?
3. You entered the niche perfumes market in 2025. Would you agree that this segment is already highly competitive? How do you intend to stand out from your peers?
4. How is the integration of Annick Goutal going? What are your goals for this brand?
5. What is the potential of Longchamp fragrances? What is the launch plan for 2027?
6. In terms of distribution, how are you adapting to the difficulties faced by certain retailers: department stores, specialist chains. How are you addressing online sales, and what does this represent?
7. What is the impact of the conflict in the Middle East on your markets, both in terms of demand and raw materials costs?
8. How did you go about setting your marketing budgets for 2026 and 2027? Do you have the flexibility to reduce these budgets in the event of weak demand?
9. How much have you paid in undue US customs duties that you could recover?
10. Could there be a change in the group's scope (merger with Interparfums Inc) in the coming years?

IPSOS

Outperform, PT €73.00 - [Marie-Line Fort](#) - +33 1 42 13 85 21

Company profile

Ipsos is the third-largest generalist market research and opinion survey company in the world, after Nielsen and Kantar. It employs c.20,000 people in almost 90 markets and has over 5,000 clients.

Key themes

In our view, the implementation of the group's new strategy and the ability to maintain a competitive edge in the age of AI are the two key issues.

Questions

1. What is the total value of the GMS (Globally Managed Services)? Or what proportion do the GMS account for in current turnover? When was this initiative actually launched, and when do you expect to see a return on investment? What investments have been made so far?
2. When do you plan to launch new GMS? Conversely, would you consider discontinuing one of them if it failed to meet your expectations?
3. How committed are your teams to these GMS initiatives, and how are the teams incentivised?
4. Do you plan to share more detailed information about the GMS? Do you see competition emerging for Ipsos Digital? What is your competitive/technological advantage?
5. Is Ipsos Digital available in all countries and for all divisions?
6. What proportion of your turnover does China account for? Which services are most developed there? Who are your local competitors? What is the potential in China, and in which segments?
7. Is Public Affairs still a growth segment given the budgetary constraints faced by governments? What are your strengths in this segment? Would a recovery in Public Affairs have a positive impact on your margins?
8. At what point might we see an acceleration in organic growth at the group level? How confident are you in achieving your organic growth target of 2-3% from 2026?
9. Do you intend to disclose your order book on a quarterly basis now?
10. Do you think you have finished building your management team? If not, which roles do you still need to fill?

LECTRA

Outperform, PT €27.50 - [Aleksander Peterc](#) - +33 1 57 29 45 25

Company profile

Lectra is a leading provider of industrial intelligence and Industry 4.0 technology solutions, combining software, cutting equipment, data and services to help fashion, automotive and furniture companies optimise the design, development and manufacture of products made from soft materials, such as textiles and leather.

Key themes

The debate is purely about the timing of the equipment cycle trough. 1Q backlog jumped +61% qoq (€24.6m, ~80% shipping in 2Q), the first credible bottoming signal in six quarters, while SaaS/ARR (+14% LFL) continues to compound regardless of the cycle. The structural story - Valia platform ramp, SaaS mix shift to 75%+ of revenues, operating leverage from a nearly fixed cost base - is intact and supports the 2026-28 roadmap (+120-180bp EBITDA margin per year). The key area of uncertainty: when do tariff-driven supply chain shifts (India, Bangladesh, Vietnam - all Lectra strongholds) translate into tangible equipment order recovery?

Questions

1. What concrete signals (order conversations, customer budget releases, etc) would indicate that equipment orders are about to recover from -19% in 2025?
2. What is your installed base of Lectra machines worldwide, what is the percentage of connected machines, and how can Valia drive installed base upgrades?
3. Your 1Q26 EBITDA margin dropped to just 10.6%. Is this as bad as things can get, or is there further downside in this cycle, in your view?
4. Every €0.05 fluctuation in the EUR/USD has a €9m impact on revenues and €3.8m impact on EBITDA. What is your hedging strategy for operating cash flows?
5. When do you expect recurring revenues to exceed 100% of costs, and what does this mean practically for your capital allocation and dividend policy?
6. Launchmetrics grew by 9% versus 10% targeted. What are the specific levers to reaccelerate growth, particularly given fashion press segment weakness?
7. Describe how Lectra is positioned vis-a-vis AI. Is the market's concern about SaaS displacement by AI justified in Lectra's case?
8. When should TextileGenesis turn a profit, and what revenue scale would unlock its EBITDA potential?
9. With ARR approaching €100m, is 15% annual growth increasingly harder to achieve as the base grows, and which solutions carry the most upside risk?
10. In automotive and furniture segments in China, how do you defend against local software vendors on price, and what is your market share trajectory?

MELEXIS

Outperform, PT €72.00 - [Aleksander Peterc](#) - +33 1 57 29 45 25

Company profile

Melexis is a leading designer and supplier of semiconductor sensors and integrated circuits for automotive and industrial applications, enabling smarter, safer and more energy-efficient systems.

Key themes

The central question is why Melexis remains so much more cautious than peers (TXN, NXP, STM all beat-and-raise) despite improving order intake “week after week”. A flat 1H yoy and a vague “better 2H” leave too much uncertainty. Key watch points: 1) whether the 2H volume inflection is strong enough to justify current consensus; 2) gross margin recovery from yield improvements (+150bp qoq) offsetting the price of gold and price erosion headwinds; 3) the longer-dated robotics/non-auto optionality (~80 design wins in China, revenue ramp from 2027-28) as the structural re-rating catalyst - but that remains a 2028+ story for now.

Questions

1. Peers, such as Allegro (+20% yoy), NXP (+11%), STM (mid-teens) and Elmos (+20% in 1Q yoy) are growing materially faster. Is there a structural product mix issue, customer concentration or share losses holding back Melexis?
2. Order intake is improving “week after week”; what specific visibility do you have for 2H? In a blue-sky scenario, could we see supply shortages by year-end?
3. Yield improvements are the primary driver back towards 40% gross margins. What is the realistic gross margin ceiling and is a return to the prior 43%+ peak possible?
4. The lighting segment appears to be facing brutal price pressure, particularly in China. Is margin recovery possible or is this a structural deterioration?
5. With the new WFOE established in Shanghai and Chinese OEM consolidation under way, what is the specific localisation roadmap and how do you defend against price erosion from local competition?
6. You have guided to mid-single-digit price erosion in 2026. Is the product mix sufficient to protect margins, and are there any product lines where erosion is structurally worsening?
7. You do not expect any Robotics revenue until 2027-28. In the meantime, what non-automotive revenue will replace the digital health customer loss?
8. EPS fell 34% in 2025 yet the total dividend was €3.7/share. Is the current payout level sustainable, and under what scenario would it be cut?
9. Inventory peaked above €300m and has barely declined. When do you expect this to normalise, and does elevated inventory mask latent margin risk?
10. You reiterated your guidance of high single-digit long-term growth at the Capital Markets Day, but near-term trends suggest the gap between volume growth and euro revenue is widening. Can you walk through the building blocks?

MELIA

Outperform, PT €10.30 - [Sabrina Blanc](#) - +33 1 42 13 47 32

Company profile

Melia is a Spanish hotel group based in Mallorca and controlled by the founding family (Escarrer). The group's offering mainly consists of Resort hotels, mostly based in Spain and Latin America. Melia is also gradually expanding in continental Europe and Asia.

Key themes

Melia is likely to continue benefiting from strong leisure demand, especially given how the war in the Middle East is shifting demand away from that region. The group has been executing a refurbishment and repositioning strategy on selected large flagship assets, while stepping up its room openings and maintaining a sharp focus on cost efficiency. Regardless of the shareholder agreement within the Escarrer family, the governance structure could change over time.

Questions

1. With the conflict in the Middle East, how much re-routing of travel flows are you seeing? And which destinations are benefiting most from this trend?
2. One of your current areas of focus is asset enhancement and hotel repositioning to support higher ADR. What do you expect from the refurbishments of Paradisus Cancun in Mexico and Gran Melia Don Pepe in Spain?
3. NUG guidance was upgraded to 2–3% thanks to solid pipeline growth. Do you see further opportunities, and through which business model?
4. Can you provide more color on the situation in Cuba, and how do you see your business progressing there in the short and medium term?
5. Stoneshield has increased its stake to 9.5% and taken a board seat - what should we read into this?
6. Could you remind us of the terms of the Escarrer family's shareholder pact? What are the options? Are there any differences of opinion on the group's strategic direction or governance?
7. Has the board formally discussed improving free float liquidity? Either through a secondary placement or other mechanism?
8. With USD/EUR averaging down 10% year-on-year in Q1, could you estimate the full-year FX headwind to EBITDA embedded in your 'at least €565m' guidance?
9. With leverage comfortably within target, is there any appetite to raise the dividend payout ratio beyond the 22.5% announced for 2025?
10. You said you were actively looking at multi-property management partnerships. Can you give us a sense of size and geography, and what would need before committing to a deal? Is there anything being actively negotiated within your existing JV structures?

NEXANS

Market-Perform, PT €130.00 — [Alasdair Leslie](#) - +44 20 7762 4952

Company profile

Nexans is a leading supplier of cables for the transmission and distribution market, as well as cables for more general use in the industry and construction end-markets.

Key themes

i) Exposure to secular growth in offshore wind & interconnectors and grid capex; ii) strong earnings growth potential fuelled by margin improvement and M&A optionality; iii) potential for data center upside captured by the Republic Wire acquisition.

Questions

1. Please provide an update on the status of your main projects in Transmission, including the GSI contract in Europe, and any projects you have visibility over to replace the GSI shortfall.
2. What is the pipeline now looking like in offshore wind and interconnectors? Any signs of the market slowing down or any digestion from customers given higher input costs?
3. On M&A, would 2.5x leverage be comfortable contingent on the right targets, and so long as the deals are sufficiently transformational in aggregate?
4. Could you see yourself picking up more of the 10 or so smaller US LV players after Republic Wire, and generally which characteristics would you prioritise?
5. Expanding in accessories is a key aim in Grid – can you please elaborate on growth and margin upside here?
6. The market generally remains sceptical about further margin improvement potential at Connect. What do you think the market is missing, would you see the most upside purely from higher US exposure, or are there any other margin levers?
7. Can you compare and contrast channel access/differentiation of cables vs other low-voltage categories like wiring devices (sockets/switches) that already exhibit high margins.
8. In Grid, how material is data centre-related demand today versus two years ago, and should we expect that vertical to continue to be margin-accretive as it scales?
9. At what point do you expect LTC to stop being a drag on reported Connect margins?
10. How should we think about the pace of synergies from Republic Wire beyond year one?

OVHcloud

Outperform, PT €13.00 — [Derric Marcon](#) - +33 1 58 98 06 30

Company profile

OVHcloud is an IaaS/PaaS provider, offering its customers private cloud (bare metal server, hosted private cloud) and public cloud services, as well as web hosting. A sovereign cloud by nature (not subject to extraterritorial laws), OVHcloud positions itself as an alternative to US hyperscalers. Recently, it has intensified its ambition to capitalise on the market opportunity linked to AI.

Key themes

Customer appetite for sovereign cloud solutions. Adoption of recently launched products (e.g. data platform, OPCI and 3-AZ) and AI solutions (training/inference) by new/existing customers. The thinking behind the Dragon LLM acquisition announced in March 2026. Investment strategy to mitigate the sharp rise in memory component prices.

Questions

1. Does having a private cloud and a public cloud offering under the same roof still represent a competitive advantage?
2. Which products that have recently been launched or are about to be launched have the potential to become revenue-generating blockbusters?
3. Are you seeing a growing appetite among businesses for sovereign cloud solutions?
4. Have you quantified the business opportunity that AI represents for a group like OVHcloud?
5. What public cloud products are you still missing in order to compete on an equal footing with US hyperscalers?
6. To put the group back on the path to higher revenue growth, do you think it will be necessary to make trade-offs (resource allocation, divestment, more focused product strategy, etc.)?
7. When do you expect to conclude negotiations with EDF regarding medium-/long-term electricity supply contracts to replace AREHN?
8. What is your target ratio of 'growth capex/incremental revenues' for the coming years?
9. At what rate are you currently improving the occupancy rate of your data centers, and do you expect this to be a constraint over the next two to three years?
10. Since returning as CEO and Chairman of the Board, what changes have you made to the decision-making process and the organizational structure?

RATIONAL

Outperform, PT €1,045.00 - [Philippe Lorrain](#) - +33 1 42 14 75 16

Company profile

RATIONAL is the world's leading manufacturer of professional cooking appliances, with a market share of c.50%. Its two main products are the iCombi (hot air/steam cooking) and iVario (liquid/ contact cooking) ranges. In 2024, RATIONAL rounded out its offer with the iHexagon, which combines hot air, steam and microwave technologies in one appliance. The company also provides customers with after-sales services (spare parts, accessories, cleaning products).

Key themes

i) RATIONAL's growth potential in the short and longer term, ii) the company's pricing power potential on the back of the tariff situation in the US and the trajectory of input costs; iii) the market penetration of its various solutions; and iv) the company's margin and return potential.

List of 10 questions

1. What is your view on competition and market-share trends in the markets you serve? How does these compare with the past?
2. What are the main reasons you remain confident in sustaining your long-term mid- to high-single-digit growth algorithm despite a more volatile macro and geopolitical backdrop?
3. How much of the current US momentum reflects structural market penetration versus short-term prebuying or pricing-related effects?
4. What are the most important milestones investors should track to judge whether the US business still has the largest long-term upside in the group?
5. How much pressure on earnings and margins should we expect from tariffs, raw materials and logistics before pricing and refunds offset those headwinds?
6. In China, what concrete signs would tell you that the iCombi1 launch is translating into a more durable recovery in demand?
7. What do you think is the realistic size of the opportunity for iHexagon, and how broad is demand now beyond large venues and flagship sites?
8. To what extent can further sales-force expansion continue to drive incremental productivity, and where do you see the highest return on those hires?
9. Given low price elasticity, how much additional pricing power do you believe you still have in North America if tariffs increase further?
10. Over the next two to three years, which regions or customer segments are most likely to surprise positively versus your current assumptions?

ROBERTET

Market-Perform, PT € 888.00 - [Marie-Line Fort](#) - +33 1 42 13 85 21

Company profile

Robertet is the seventh-largest producer of flavours and fragrances worldwide, offering more than 1,600 natural raw materials sourced from 60 countries. The company reported €843.9m in revenues in 2025, representing a 4.5% year-on-year increase or +7.6% on a comparative basis.

Key themes

The group's ability to implement its strategic plan up to 2030. The nature of Robertet's competitive advantage in natural ingredients.

Questions

1. Many of your competitors claim that their ingredients are natural. What sets your product apart from the rest?
2. Which of your end-markets is the most closely linked to economic cycles?
3. What proportion of your growth is dependent on innovation, both overall and by division, please?
4. What is your pricing power across your divisions?
5. To what extent can the acceleration in growth XXin 2025XX in the Raw Materials division be extrapolated to 2026?
6. The Health & Beauty division is not achieving the growth projected in your 2030 plan. In your view, what is preventing it from achieving double-digit growth?
7. Why have you not rolled out a more ambitious operational strategy alongside this growth plan?
8. What is the impact of the conflict in the Middle East on your purchase prices or the availability of raw materials?
9. Could your M&A strategy be focused on transformative external growth?
10. Are your ambitions to reduce your working capital requirement consistent with your organic growth ambitions?

RUBIS

Outperform, PT €38.70 — [Guillaume Delaby](#) - +33 1 42 13 62 29

Company profile

Founded in 1990, Rubis has specialised in the distribution of petroleum and chemical products in Europe, Africa, the Indian Ocean and the Caribbean for the past 20 years. The company recently expanded into renewable energy generation.

Key themes

Stepped-up growth in the renewable energy segment. Outlook for the company's governance.

Questions

1. What is your pipeline for future acquisitions? Which regions or products, please?
2. How are the discussions with various partners proceeding? Puma Energy?
3. Do you still expect Renewables to represent c.25% of your group's EBITDA by 2030? What is your strategy for Photosol?
4. Should we expect a margin decline in 2Q26 and 3Q26, given the rise in the price of oil?
5. Can you remind us how your working capital changes when the price of oil goes up?
6. What are the main hypotheses underpinning your 2026 guidance?
7. What is your strategy in bitumen? What is the competitive landscape like in Europe?
8. What is the situation in Corsica? Why were you fined by the French Competition Authority?
9. Is Europe about to become a strategic region for Rubis again?
10. Is Jean-Christian Bergeron planning to hold a Capital Markets Day at some stage?

SIEGFRIED

Outperform, PT CHF126.00 — [Justin Smith](#) - +44 20 7762 5899

Company profile

Siegfried is a biopharma Contract, Development and Manufacturing Organization (CDMO) founded in 1870. Siegfried has executed well on the transformational acquisition of Novartis's two Barcelona plants. Reto Suter has been the CFO since 2Q17 but will retire this year.

Key themes

1) Maintaining an industry-leading reputation for quality, reliability, safety, capacity utilisation and ROIC. 2) Can excellent M&A execution continue? 3/ Are share gains sustainable?

Questions

1. 01/26 private equity acquisition: why is Siegfried the best owner of these three plants?
2. 01/26 private equity acquisition: how does this 'opportunity set' compare to the 2021 Novartis Barcelona transaction?
3. With the Tecan share price around 10-year lows, why is Tania Micki the best candidate to succeed Reto Suter?
4. How quickly will 'Biotech 2.0' become a growth driver for Siegfried? Why can small molecule innovation continue to bridge the gap?
5. Protein degraders: why is the CEO so enthusiastic about this technology given Pfizer's recent \$35m sale of Veppanu to Rigel?
6. Capex: what prevents Siegfried from investing more than 10-13% of sales over the cycle?
7. How will the company maintain its impressive capacity utilisation going forwards?
8. Profitability: when does Siegfried hope to achieve a core EBITDA margin of >25%? Structurally, is >30% achievable?
9. How will Siegfried maintain its best-in-class manufacturing track record and reputation?
10. What issues and challenges should keep the new CFO awake at night?

SOLVAY

Market-Perform, PT €26.60 — [James Hooper](#) - +44 20 7676 6995

Company profile

Solvay is a Belgian chemical company founded in 1863. It has been in its current form since late 2023, when it demerged Syensqo to focus on “Essential Chemicals”, which are somewhat commoditized, but have important niches and low cyclicality. It has around 8400 employees. In 2025, the company achieved €4.3bn of revenue and €0.88bn of EBITDA. The company operates through five groups: Soda Ash & Derivatives (40% of total sales), Peroxides (22%), Silica (12%), Coatis (11%) and Special Chem (15%).

Key themes

Solvay met market expectations in 1Q26 thanks to a one-off sale of carbon credits. This result is perhaps not the best reflection of the underlying business trends, with pressures around the impact of the Iran war, soda ash, Chinese oversupply and environmental legislation. But they also have the only site in Europe able to process a full suite of rare earths, and some of their businesses could benefit from the conflict.

Questions

1. How far are you in your multi-year transformation plan? When do we get to see the benefits?
2. Do you think synthetic soda ash in Europe has a bright long-term future? Could it keep losing share to Turkish / US natural imports?
3. For seaborne soda ash, why do you believe that the Chinese will reduce supply? Or if they do, won't it be once new capacity is introduced?
4. Why isn't there more urgency to grow in rare earth in Europe?
5. The US seems to be planning some rare earth consolidation. Could you be a part of this? Buying or selling?
6. Do you think the EU are listening to your request for a slower free allocation phase-out?
7. Can you describe the impact of the conflict in Iran on your businesses? If Coatis is the winner, which is the loser?
8. What do you think the lasting impact of the Iran crisis will be, if anything?
9. Why do you believe underlying business performance will improve enough to make your 2026 guidance? Or can you just sell more carbon credits?
10. A lot of the European chemicals industry now has much smaller market cap than 5-10 years ago – do you think there will be broader consolidation?

SPIE

Outperform, PT €61.00 - [Aleksander Peterc](#) - +33 1 57 29 45 25

Company profile

SPIE is an independent provider of multi-technical services in the energy and communications sectors, supporting customers from design and installation to the operation and maintenance of energy-efficient, environmentally friendly facilities.

Key themes

Two focal points dominate: 1) CEO transition – Markus Holzke's ability to execute on the upgraded 8% EBITA margin target by 2028 (vs a prior $\geq 7.7\%$), while absorbing four acquisitions (€667m combined revenue) in early 2026, led by ROFA AG in Germany; and 2) organic recovery – France's 1Q surprise (+0.6% LFL, the first positive in over a year) and the weather-driven catch-up in Germany/central Europe in 2H are the near-term reads. Structural energy transition, data centres and nuclear services remain the durable multi-year tailwinds. Leverage at 1.3x and 108% cash conversion leave ample M&A firepower.

Questions

1. What are Markus Holzke's top strategic priorities as CEO, and is there any change in direction on M&A pace, geographies or the services mix?
2. At what point will France return to sustained positive organic growth, and what specifically needs to happen in Building Solutions and city networks?
3. ROFA adds ~€430m in industrial automation at a high single-digit EBITA margin. How does it integrate with Robur and what cross-selling opportunities are most tangible?
4. What is the realistic timeline for the German infrastructure package to translate into concrete SPIE contracts and revenue uplift?
5. With ~€100m in Middle East exposure and the ongoing conflict, how much revenue is at risk in 2H26 and is any of it recoverable?
6. After adding €667m in 1Q26 acquisition revenue, what does the pipeline look like for the rest of 2026, and what is your leverage comfort zone?
7. Are there opportunities for SPIE in nuclear services in Poland?
8. What share of total revenue is currently tied to structural growth drivers (data centres, energy storage, offshore wind, electrification)?
9. GSE has the highest EBITA margin (10.2%) but is oil-and-gas-heavy (~90%) - as offshore wind grows, is the margin set to compress, and how selective are you in new O&G contract renewals?
10. Is 8% by 2028 the structural ceiling given the labour-intensive model, or is there a path beyond that driven by mix, pricing and scale?

STROEER

Market-Perform, PT €36.00 — [Annick Maas](#) +44 20 7676 6683

Company profile

Stroeer is German's leading out-of-home (OOH) advertising company, with c.60% market share. The group also runs digital advertising activities (e.g. T-online) and call centres. It owns 100% of data platform Statista and 51% of beauty e-tailer Asam Beauty. OOH is the largest segment in the revenue mix, at c.48%, and represents an even larger c.70% of adj. EBITDA.

Key themes

Stroeer is the OOH advertising market leader in Germany. Its equity story hinges on the group's market power in Germany with a c.60% market share. It also stands to benefit from a catch-up opportunity in the digital out-of-home (DOOH) segment in Germany. Lastly, there is also an asset monetisation aspect to Stroeer's story, firstly with Asam Beauty and secondly with Statista, with the cash proceeds likely to be returned to shareholders in the form of a special dividend. Every now and then press speculates about a take-out of the company.

Questions

1. Can you please provide an update on recent trading in Germany in your various businesses?
2. OOH advertising gained considerable share last year in Germany from TV among other segments. Do you believe this is sustainable?
3. Asam Beauty had been earmarked as a disposal candidate for a while – now you seem to restructure the management team – can you elaborate as to what is going on at Asam?
4. Statista has had a few tough quarters, but new management has big AI ambitions – can you elaborate on these and tell us why AI should not be a risk for Statista?
5. The DOOH segment presents a catch-up opportunity in Germany. How much of German OOH revenues/inventory does DOOH currently represent?
6. At what level of the mix would you consider full penetration to have been achieved in DOOH?
7. Could you give us an update on your call centre business and your efforts to offshore and diversify the client mix?
8. You have major AI plans regarding the OOH booking/buying systems – where are you on these / can you provide an update on the plans and ambitions?
9. You've recently seen a few changes in the exec team at the Stroeer level – what drove these?
10. How do you intend to use any proceeds from asset disposals?

TECAN

Market-Perform, PT CHF160.80 — [Delphine Le Louët](#) - +33 1 42 13 92 93

Company profile

Tecan is a Swiss medtech company and global leader in liquid-handling solutions and laboratory automation for the biopharma, medtech, diagnostic and research / academia segments. The company's two divisions, Life Sciences and Partnering Business, have experienced differing growth trajectories since the COVID period that had a severe impact on all the life science device players. The Life Sciences division represents 43% of revenues and reported a -1.6% sales decline over 2020-25 in CAGR, while Partnering Business has enjoyed 9.4% growth over the same period.

Key themes

It is important to understand the basis of the underlying growth turnaround in terms of segment / end market, but also from a regional perspective. AI has been a game changer in the industry, as it is now integrated in many early-stage projects. Tecan has established a partnership with Nvidia for the next generation of labs, clearly reflecting how AI is transforming biopharma research and labwork. Other key themes are the tariff situation / mitigation actions and the reimbursement process. Finally, Tecan outlined its REWIRED midterm plan in March in a bid to fast-track a return to profitable growth, focusing on mix, and commercial and operational execution.

Questions

1. The top-line trajectory in your 3y plan calls for 55% to be driven by LS, which is lagging on growth as seen in 1Q; What would be the key driver in the core LS portfolio to achieve the additional revenues of CHF40m over the next 3y?
2. Could you outline how your businesses are doing region to region?
3. In which business segment do you think you have the most potential, and why?
4. How should we think about capex investment in LS and BP in terms of allocation and project type?
5. What are the current non-core businesses? And when do you plan to exit them?
6. Of your three pillars of excellence (portfolio, commercial or operational), which is the most challenging to execute successfully?
7. The gross margin has suffered a lot from the change in mix. How should we think about raw material prices? Has there been any geopolitical impact? Has the supply chain been affected?
8. How should we think about the dividend / SBB split in your shareholder return policy and the dividend payout?
9. What are the differentiated skills that your new CFO brings to Tecan?
10. What would accelerate the path to CHF1bn revenues and 20% adj. EBITDA in 2028e?

TECHNIP ENERGIES

Outperform, PT €47.00 — [Guillaume Delaby](#) - +33 1 42 13 62 29

Company profile

Technip Energies defines itself as an engineering and technology (E&T) firm specialising in energy transition. It operates in four areas: 1) LNG; 2) sustainable chemistry (biofuels, biochemicals, and the circular economy); 3) decarbonisation (efficiency, blue hydrogen, and CCUS); and 4) carbon-free solutions (green H2, offshore wind, and nuclear). It reports under two segments: Project Delivery (71% of revs / 65% of EBIT); and Technology, Products and Services (TPS, 29% of revs / 35% of EBIT).

Key themes

Middle East. With c.50% of 2025 revenue derived from the Middle East – particularly Qatar - Technip Energies recently trimmed its FY26 guidance and is now aiming at: 1) €5.7-6.3bn revenue / 6.5-7.5% EBITDA margin for its Project Delivery segment (vs €6.3-6.7bn / c.8%) and; 2) €1.9-2.2bn revenue / c.14.5% EBITDA margin for its TPS segment (vs €2.0-2.2bn / c.14.5%). This new guidance remains conditional on the reopening of the Strait of Hormuz by the end of 2Q26. **Commercial outlook.** The company's backlog, which was €16bn in 2025 is now at €20bn in 1Q26 and might even reach c.€24bn in the coming weeks/months, according to the company... in other words, while the company's ST visibility has declined over the past two to three months, its LT commercial prospects continue to improve.

Questions

1. How conservative is your new FY26 guidance? What would happen if the Strait of Hormuz did not reopen by July 2026?
2. If the Middle East crisis were to drag on for longer, would this translate into lower revenue / EBITDA for 2027? You seemed to be ahead of schedule for your 2028 targets on revenue > €8.6bn, EBITDA >€800m
3. What are the main takeaways from conversations with your clients over the past three months? What types of projects were prioritized before the war? What kind of projects are being prioritized now?
4. Why have you cut your FY26 revenue guidance for TPS, despite the consolidation of AM&C ahead of schedule?
5. Is the current situation likely to postpone potential M&A?
6. What is your real net cash position as of 1Q26? Could you provide us with a rough outline of how to calculate it?
7. How many hires do you expect in 2026? Which geographies will you be prioritizing?
8. Can you elaborate again on your capital allocation model?
9. Where are we with REJU?
10. What is the breakdown between New and Traditional energies in your 2025 revenue? What could it be in 2030?

TIKEHAU

Underperform, PT €16.70 — [Isobel Hettrick](#) - +44 20 7762 5095

Company profile

Tikehau is a European alternative manager, with capabilities across asset classes, but with a focus on credit and real estate. Its asset management company manages third-party funds, with sizeable co-investments from the investment company. As of 1Q26 AUM stood at €53bn, with a €3.9bn investment company portfolio.

Key themes

The key debate for the stock is whether it can continue to compete in an increasingly consolidated landscape, with LPs looking to place mandates with the larger, multi-asset global platforms. Meanwhile, whilst Tikehau has been an innovator in the provision of private wealth funds via French unit-linked insurance wrappers, changes to regulation looks set to increase competition, with many of the large US alternative asset managers targeting increased European private wealth penetration.

Questions

1. When you look at your competitors and the needs of LPs today, what product gaps (if any) do you think you have?
2. And should we expect these to be filled over time with the seeding of new strategies?
3. What role do you envisage Tikehau playing in the wave of consolidation expected within private markets?
4. What could be potential target areas for M&A?
5. Could we expect the balance sheet to buy any new stakes in traditional asset managers, following the disposal of Schroders, potentially providing distribution and/or product development opportunities?
6. VA consensus estimates indicate that the market does not believe that you will achieve your 2026 targets (>€60bn AUM, €175-225m FRE). What is consensus missing?
7. Given that developing private wealth franchises is a target for most private market managers, what comparative advantages do you think the Tikehau brand has here?
8. Flows into your real estate business remain lethargic – what is needed to improve sentiment here?
9. Are you seeing any increased competitive pressure within your aerospace and defence strategy (i.e. over deployment opportunities) as more managers focus on the need for increased European defence spending?
10. How are you utilising AI across your business and in the investment process?

TKMS

Market-Perform, PT €76.00 — [Adrien Rabier](#) - +44 20 7676 6820

Company profile

ThyssenKrupp Marine Systems (TKMS) is a European defense contractor, specializing in shipbuilding. It is a leader in non-nuclear submarines and mid-scale combat ships. The company serves navy customers globally, with half of sales derived from Europe, mainly Germany. TKMS was recently spun off from ThyssenKrupp (TKA).

Key themes

TKMS is a turn-around story within European Defense. The group is delivering margin expansion as it benefits from more profitable contracts within the Submarine business, which are gradually flowing into the PnL. TKMS is well positioned. It is a national champion in Europe's best market, Germany. And a pure play on long-cycle products, submarines and ships. After years of underperformance, the need to renew fleets and secure maritime strategic points is triggering momentum for Naval.

Questions

1. Where do you expect the German budget to go after 3.5% of GDP is reached? Will spending stabilize?
2. Germany is playing catch-up on Naval spending with very large orders. Should we expect a slowdown in orders after the current ones are announced?
3. Given your rich backlog, should we expect you to build or acquire more capacity?
4. When do you expect to have a decision for the German Naval Yards acquisition? What will you do if you do / don't get it?
5. Given your expected performance in H2'26, should we consider that you can achieve your mid-term EBIT margin target in FY27?
6. In which segments and at what scale could you benefit from the conflict in the Middle East? What is your current exposure to mine-hunting?
7. Submarines: What is your expectation for long-term profitability? Can Submarines be a double-digit EBIT margin business once all legacy contracts have been delivered?
8. Submarines: Could you provide an update on the Indian and Canadian campaigns?
9. Surface Vessels: Can you update across the major campaigns and contracts? F125/F126/F127?
10. Atlas Electronics: What will be the sales growth and EBIT margin benefit from the recent torpedoes contract?

TRIGANO

Outperform, PT €210.00 - [Marie-Line Fort](#) - +33 1 42 13 85 21

Company profile

Trigano is Europe's leading motorhome and camping equipment manufacturer. The company is also the No. 1 RV distributor in France and the UK. At the end of 2024, Trigano acquired Bio Habitat from Beneteau, making the group the leader in the European mobile home market.

Key themes

The sustainability of demand for motorhomes and the return on investment from the acquisition of Bio Habitat are the main topics.

Questions

1. Do you think you can still gain market share in the motorhome market? Do you see any competitors struggling?
2. What might your strategy be in Germany to capitalise on growing demand for entry-level vehicles?
3. What revenue growth can we expect for the Mobile Homes division by 2027? When do you expect to return to a 10% margin?
4. In the distribution of the Libertium brand, what are the areas for improving sales momentum?
5. Do you expect your input costs to rise as a result of the conflict in the Middle East?
6. Beyond your current scope, what growth drivers could you add?
7. Do you think that a double-digit margin is a sustainable level for the group in the medium term?
8. Do you still have any M&A plans, and for which division?
9. Do you intend to increase shareholder returns, particularly via share buy backs?
10. Do you intend to be more proactive in terms of financial communication ?

VALLOUREC

Outperform, PT €29.00 — [Guillaume Delaby](#) - +33 1 42 13 62 29

Company profile

Vallourec is the world's second-largest manufacturer of seamless tubes, with a market share of c.10%. The tubes (90% of 2025 revenue) are mainly used in the O&G industry (90%). Vallourec also operates an iron ore mine and charcoal-producing forests in Brazil (10% of 2025 revs.).

Key themes

Are we at the beginning of a new O&G upcycle? Could geothermal become a new major source of revenue?

Questions

1. You have started to report in US dollars since 1Q26. What proportion of revenues is dollar-denominated? What proportion of operating costs is dollar-denominated?
2. North America. What are your US clients saying? Do you expect a c.10% increase in the number of rigs in the coming months (or c.50 more out of a total of 548 at the time of writing)? In other words, should we now expect a double positive impact in the coming months, i.e. higher volumes + higher prices?
3. Given the upcoming business acceleration, should we expect a significant deterioration in your WC position?
4. Is the average length of laterals still rising?
5. Brazil. Can you summarize your operations in Brazil? How is your LT agreement with Petrobras structured? Which proportion of tubes manufactured in Brazil is consumed locally (versus exported)? Is the Brazilian restructuring completed?
6. Can you provide some colour on your upcoming geothermal revenues? Is it true to say that you have opened up a lead on the competition?
7. Your mine seems to have entered a phase of diminishing returns. Is this still a good time to dispose of it? What about the forests?
8. Are you actively looking for acquisitions?
9. Do you plan to organize a new CMD over the next 12 months to communicate your new business plan?
10. What has surprised you the most after 6 months in the job?

VIRIDIEN

Outperform, PT €163.00 – [Guillaume Delaby](#) - +33 1 42 13 62 29

Company profile

Viridien – formerly CGG (Compagnie Générale de Géophysique) – is a geoscience company founded in 1931 by the Schlumberger brothers. It is a global technology and HPC leader, providing data, products, services and solutions in Earth science, data science, sensing and monitoring.

Key themes

1. FCF and organic deleveraging as net debt remains high (\$0.9bn). 2. Rebound in exploration capex. 3. Potential disposal of the SMO business.

Questions

1. Do you view your 2026 guidance (FCF >\$100m) as conservative given that 1Q26 FCF of \$26m was mainly driven by WC movements?
2. What do you expect in terms of WC movements for the remainder of 2026?
3. Which segment is likely to be the first to benefit from higher oil prices? Earth data? Geoscience? Sensing & Monitoring?
4. How have your commercial discussions evolved over the past 3, 6 and 12 months?
5. How should we model the relationship between your growing computing capacity with future geoscience revenue? Have you been successful in selling some computing capacity to non-O&G clients?
6. What is the outlook for equipment (mega-crews in the Middle East? OBN? Streamers?). To what extent is this business still non-strategic?
7. Can you describe your different new-energy businesses? What is their level of maturity? What margin profile do they typically provide?
8. Who are your competitors in CCUS, HPC and infrastructure monitoring?
9. Can you remind us of your flexibility to trim down financial costs (penalty for debt redemption)?
10. What long-term 'grand vision' have you drawn up to build your new equity story (what is the main theme/themes)? Should we expect a CMD in 2027?

VUSION

Outperform, PT €240.00 — [Flavien Baudemont](#) - +33 1 42 14 81 51

Company profile

Vusion is a supplier of digitalisation solutions for retail stores, and is the world's leading supplier of electronic shelf labels. Vusion's objective is to help retailers accelerate their digital transformation and thus streamline their store management operations through price change automation, pricing strategy improvement, product assortment optimisation, and in-store digital retail media services.

Key themes

Vusion has faced pressure this year from a weaker yoy demand in the ESL market and declining sales post the Walmart US roll-out. The key themes for the next 12 to 24 months are: 1) Vusion's ability to overcome the revenue cliff following the Walmart US roll-out; 2) the possibility of the Captana ramp-up finally materialising in 2H26 / 1H27; and 3) the extent to which the US market is mature enough to open up in the coming months.

Questions

1. Could you remind us what the continuation of your commercial relationship with Walmart will look like once the US roll-out is completed?
2. What is the current state of the US market? Not much seems to have happened since last year — what is holding US retailers back from investing in your solutions?
3. How do you respond to concerns raised by brokers at the start of the year regarding weak demand for ESL ?
4. Could you elaborate on the rationale behind reiterating your 2027 sales target (€2.2bn), given that order intake is declining?
5. Regarding your €2.2bn target, what share is expected to be generated by existing clients, and what will be the nature of these sales? What is the expected contribution of replacement label sales to 2027 revenues?
6. What is the outlook for Captana? Which clients have already subscribed to the solution, and how many large retailers are now (or nearly) fully equipped? How is this technology being received by convenience stores and DIY retailers?
7. Has the competitive landscape evolved since the start of the year? Are there any new product launches that could challenge your position? Have competitors secured any major deals in the US so far this year?
8. What would be the impact on margins and cash generation if ESL sales were to decline significantly?
9. Do you anticipate any external growth opportunities in Value-Added Services this year? What services are currently missing from your VAS offering?
10. What are you plans in terms of capital allocation ?

WENDEL

Neutral, PT €90.60 — [Isobel Hettrick](#) - +44 20 7762 5095

Company profile

Wendel is an investment company with a €5.5bn principal investment portfolio as of 1Q26, the most notable investment being the 21.4% stake in Bureau Veritas. More recently, Wendel has pivoted to build out a third-party private markets business. Wendel is using a boutique model where it acquires a manager for each asset class, maintaining operational and brand independence. As of 1Q26, FPAUM stood at €31.8bn concentrated across US private credit and European mid-market private equity. In early 2Q26, Wendel closed the acquisition of Committed Advisors – a European private equity secondaries manager – which will add c.€7.7bn in AUM.

Key themes

The key catalyst for the stock remains the build out of the third-party AUM business. We expect Wendel to face stiff competition for attractive targets in remaining asset classes, as the broader market looks to consolidate to offset fundraising headwinds. Meanwhile, whilst the aim of the boutique model is to promote cross-selling across the underlying managers, with regionally focused sales teams, evidence from peers suggests any benefits will take a while to come to fruition (at least 5+ years).

Questions

1. How will you make your private wealth products differentiated?
2. Can you provide an update on how fundraising is going for your recently launched private equity ELTIF, and the reaction from distributors/investors?
3. What do you think your competitive advantages are when it comes to pursuing further GP targets, given consolidation pressures in the industry?
4. What asset classes/strategies do you think Wendel is still missing?
5. How will you balance corporate bandwidth for integrating existing GPs / developing the asset management platform, versus undertaking further acquisitions?
6. When should we expect the role out of a direct lending strategy in Europe?
7. How is demand holding up for your US private credit offering, given recent news flow in the space?
8. The performance of your unlisted principal investments has been underwhelming in recent years – what steps are you taking to improve this?
9. How are your investments impacted by the risk of a prolonged oil/inflationary shock?
10. How are you utilising AI across your business and in the investment process?

WIZZ AIR HOLDINGS

Market-Perform, PT £1,300.00 — [Alex Irving](#) - +44 207 676 7044

Company profile

Low-cost carrier Wizz Air is the last growth story in European aviation. The network is well placed to structurally grow at low teens rates for the next decade and targets 334 planes by FY30 (vs 256 now). Its home markets are central and eastern Europe.

Key themes

Wizz Air has been battered by the Covid pandemic (as the only European carrier not to raise equity), wars (with the largest exposure to both Ukraine and Israel), and above all the GTF engine groundings. Costs spiralled out of control in 2024 and 2025, and the company now needs to rebuild investor confidence. The current retrenchment may have helped: Wizz has abandoned its former ambition of ~20% capacity CAGR (now guided to 10–12%), shut down the Abu Dhabi JV, and is explicitly prioritizing profitability over scale. However, the emerging industry downturn puts the carrier at risk. With the highest leverage and fuel costs set to absorb revenue growth, Wizz Air is likely to remain loss-making until 2029, effectively hostage to fuel prices.

Questions

1. How is demand evolving in your main markets and into summer?
2. To what extent are you able to recover the increase in fuel prices through fare adjustments? Where do you expect yields / RASK to normalise?
3. How are ancillary revenues developing?
4. Where do you expect CASKx to get to over the next couple of years? What are the up/downside risks to this?
5. Which markets are the most attractive growth opportunities for you right now?
6. What would lead you to increase your fraction of owned rather than leased aircraft?
7. How do you expect net debt and leverage to evolve over the next 12-24 months?
8. Would you consider offering a connecting product given your expanding geographic footprint?
9. What criteria would any potential acquisitions have to satisfy for them to be sufficiently attractive?
10. What do you intend to do with the XLRs that you cannot do with an A321neo?

X-FAB

Market-Perform, PT €5.00 - [Aleksander Peterc](#) - +33 1 57 29 45 25

Company profile

X-FAB is a leading specialty semiconductor foundry group focused on analog and mixed-signal ICs, MEMS and silicon carbide technologies for high-growth automotive, industrial and medical end-markets.

Key themes

X-FAB is the clearest “show me” name: while peers are in beat-and-raise mode, it remains in trough-management mode with utilisation in the low 60s% (vs a breakeven point of ~70%) and automotive revenue -10% yoy. The critical triggers are: 1) Melexis's volume recovery (35% of X-FAB revenue), without which the automotive inflection slips to 2027; 2) 2H26 cost savings from the high-single-digit headcount reduction; 3) non-auto diversification (SiC +152% yoy, Microsystems at an all-time high, Medical +39%) now at ~37% of sales, providing a genuine structural cushion. The stock's sharp re-rating from €4.5 to ~€7 on sector read-across looked premature given the print.

Questions

1. With utilisation in the low 60s% and 70% of costs fixed, what revenue level triggers meaningful margin recovery, and what is the target utilisation rate?
2. Melexis represents 43% of 2025 revenue and was the primary drag in 1Q26. What is your risk mitigation strategy, and which customers/segments can structurally reduce this dependency?
3. You expect an automotive recovery in 2H26. What specific order signals support this, and what would cause it not to materialise?
4. Wide-bandgap revenue was +152% yoy, with wafer shipments nearly tripling. Is this a sustainable ramp, and how do you prevent Chinese foundries from targeting these design wins? Would you say EV or AI cluster/datacenter demand is behind this surge?
5. The Malaysia facility targets 40,000 wafer starts per month by end-2026. When should it contribute materially to group revenue and margins, and what are the key qualification milestones?
6. Are you on track for a headcount reduction in the high single-digit range and \$6m in quarterly savings by 4Q26, and what are the execution risks?
7. Most long-term agreements expired at end-2025. Are you signing new multi-year contracts and at what pricing/XXprice levelXX, or is the business now fully spot?
8. Photonics accounts for 7% of total NRE but with no volume revenue yet. When do you expect the first volume production contracts, and which applications are leading?
9. How does the new structure (Smart CMOS & SOI, Microsystems & Photonics, Wide Bandgap) change commercial accountability, pricing discipline and go-to-market versus the prior structure?
10. G&A expense is set to remain elevated through ~2028 due to the SAP implementation - what is the total implementation cost and what savings do you expect post-go-live?

RISKS

This research publication covers six or more companies. For risks and other company disclosures:

Please visit: <https://bernstein-autonomous.bluematrix.com/sellside/Disclosures.action>.

Or, you can also write to the Director of Compliance, Bernstein Institutional Services LLC, 245 Park Avenue, New York, NY 10167.

Bernstein brand**RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION****EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 500 Banks And Financial Services Index (BEBANKS) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 500 Insurance Index (BEINSUR) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, and the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/- 10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- Credit Outperform (C-OP): The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

- **Credit Neutral (C-N):** The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- **Credit Underperform (C-UP):** The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e. the private side) within the Firm, and into other areas, units, groups or affiliates (i.e. public side) of the Firm

DISTRIBUTION OF EQUITY RATINGS/INVESTMENT BANKING SERVICES

Equity Rating	Market Abuse Regulation (MAR) and FINRA Rating Category	Global Rating Distribution	Investment Banking Relationships*
Outperform	BUY	51.1%	16.5%
Market-Perform (Bernstein Brand) Neutral (Autonomous Brand)	HOLD	36.3%	17.8%
Underperform	SELL	12.6%	14.9%

* These figures represent the percentage of companies within each equity rating category for which affiliates of Bernstein have provided investment banking services within the previous 12 months.

As of March 31, 2026. All figures are updated quarterly.

PRICE CHARTS/ RATINGS AND PRICE TARGET HISTORY

+65 Sanford C. Bernstein (Singapore) Private Limited; Singapore

+81 Sanford C. Bernstein Japan KK; Tokyo, Japan

Where this report has been prepared by research analyst(s) employed by a non-US affiliate, such analyst(s), is/are (unless otherwise expressly noted below) not registered as associated persons of Bernstein Institutional Services LLC or any other SEC-registered broker-dealer and are not licensed or qualified as research analysts with FINRA. Accordingly, such analyst(s) may not be subject to FINRA's restrictions regarding (among other things) communications by research analysts with a subject company, interactions between research analysts and investment banking personnel, participation by research analysts in solicitation and marketing activities relating to investment banking transactions, public appearances by research analysts, and trading securities held by a research analyst account.

Where this report has been prepared by research analyst(s) employed by Société Générale Africa Technologies & Services (part of the Société Générale group of companies), it has been prepared on behalf of a Bernstein company under a Global Services Agreement in place between Bernstein and Société Générale.

CERTIFICATION

Each research analyst listed in this report, who is primarily responsible for the preparation of the content of this report, certifies that all of the views expressed in this publication accurately reflect that analyst's personal views about any and all of the subject securities or issuers and that no part of that analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views in this publication.

II. ADDITIONAL GLOBAL CONFLICT DISCLOSURES

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e., the private side) within the Firm, and into other areas, units, groups or affiliates (i.e., public side) of the Firm.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for "Bernstein" and "Autonomous" research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the "Autonomous" and "Bernstein" brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.
- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to "Autonomous" branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.

This report has been produced by an independent analyst as defined in Article 3 (1)(34)(i) of EU 596/2014 Market Abuse Regulation ("MAR") and the same article of MAR as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018.

To our readers in the United States: Bernstein Institutional Services LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission ("SEC") and a member of the U.S. Financial Industry Regulatory Authority, Inc. ("FINRA") is distributing this publication in the United States and accepts responsibility for its contents. Where this material contains an analysis of debt product(s), such material is intended only for institutional investors and is not subject to the US independence and disclosure standards applicable to debt research prepared for retail investors.

Bernstein Institutional Services LLC may act as principal for its own account or as agent for another person (including an affiliate) in sales or purchases of any security which is a subject of this report. This report does not purport to meet the objectives or needs of any specific individuals, entities or accounts.

To our readers in Canada: If this publication pertains to a Canadian domiciled company, it is being distributed in Canada by Sanford C. Bernstein (Canada) Limited, which is licensed and regulated by the Canadian Investment Regulatory Organization. If the publication pertains to a non-Canadian domiciled company, it is being distributed by Bernstein Institutional Services LLC, which is licensed and regulated by both the SEC and FINRA, into Canada under the International Dealers Exemption.

This document may not be passed onto any person in Canada unless that person qualifies as "permitted client" as defined in Section 1.1 of NI 31-103.

To our readers in Brazil: This report has been prepared by Bernstein Institutional Services LLC, and Banco BTG Pactual S.A. ("BTG") is responsible for the distribution of this report in Brazil.

To readers in the United Kingdom: This publication has been issued or approved for issue in the United Kingdom by Bernstein Autonomous LLP, authorised and regulated by the Financial Conduct Authority and located at 60 London Wall, London EC2M 5SH, +44 (0)20-7170-5000. Registered in England & Wales No OC343985.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "Financial Promotion Order"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations, etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

To our readers in the member states of the EEA: This publication is being distributed by BSG France SA, which is authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and Autorité des Marchés Financiers (AMF).

To our readers in Hong Kong: This publication is being distributed in Hong Kong by Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, which is licensed and regulated by the Hong Kong Securities and Futures Commission (Central Entity No. AXC846) to carry out Type 4 (Advising on Securities) regulated activities and subject to the licensing conditions mentioned in the SFC Public Register (<https://www.sfc.hk/publicregWeb/corp/AXC846/details>). This publication is solely for professional investors, as defined in the Securities and Futures Ordinance (Cap. 571). The purpose of this report is solely to provide an analysis of the issuers referred to in this report and is not intended for any purpose contrary to the laws of Hong Kong.

To our readers in Singapore: This publication is being distributed in Singapore by Sanford C. Bernstein (Singapore) Private Limited, only to accredited investors or institutional investors, as defined in the Securities and Futures Act 2001 of Singapore ("SFA"). Recipients in Singapore should contact Sanford C. Bernstein (Singapore) Private Limited in respect of matters arising from, or in connection with, this publication. Sanford C. Bernstein (Singapore) Private Limited is regulated by the Monetary Authority of Singapore and licensed under the SFA as a capital markets services licence holder for dealing in capital markets products that are securities and collective investment schemes and an exempt financial adviser for advising on, issuing and promulgating analyses and reports on securities. Sanford C. Bernstein (Singapore) Private Limited is registered in Singapore with Company Registration No. 20213710W and located at One Raffles Quay, #27-11 South Tower, Singapore 048583, +65-6230-4612.

To our readers in the People's Republic of China: The securities referred to in this document are not being offered or sold and may not be offered or sold, directly or indirectly, in the People's Republic of China (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan, the "PRC") in contravention of any applicable laws of the PRC.

This document does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC to any person to whom it is unlawful to make the offer or solicitation in the PRC.

We do not represent that this document may be lawfully distributed, or that any securities may be lawfully offered, in compliance with any applicable registration or other requirements in the PRC, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by us which would permit a public offering of any securities or distribution of this document in the PRC. Accordingly, the securities are not being offered or sold within the PRC by means of this document or any other document. Neither this document nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations.

To our readers in Japan: This publication is being distributed in Japan by Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社), which is registered in Japan as a Financial Instruments Business Operator with the Kanto Local Finance Bureau (registration number: The Director-General of Kanto Local Finance Bureau (FIBO) No.3387) and regulated by the Financial Services Agency. It is also a member of Japan Investment Advisers Association. This publication is solely for qualified

institutional investors in Japan only, as defined in Article 2, paragraph (3), items (i) of the Financial Instruments and Exchange Act.

For the institutional client readers in Japan who have been granted access to the Bernstein website by Daiwa Securities Group Inc. ("Daiwa"), your access to this document should not be construed as meaning that Bernstein is providing you with investment advice for any purposes. Whilst Bernstein has prepared this document, your relationship is, and will remain with, Daiwa, and Bernstein has neither any contractual relationship with you nor any obligations towards you.

To our readers in Australia: Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is responsible for distributing research in Australia. It is regulated by the Securities and Exchange Commission under U.S. laws, by the Financial Conduct Authority under U.K. laws, which differs from Australian laws. Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 in respect of the provision of the following financial services to wholesale clients:

- providing financial product advice;
- dealing in a financial product;
- making a market for a financial product; and
- providing a custodial or depository service.

To our readers in India: This publication is being distributed in India by Sanford C. Bernstein (India) Private Limited (SCB India) which is licensed and regulated by Securities and Exchange Board of India ("SEBI") as a research analyst entity under the SEBI (Research Analyst) Regulations, 2014, having registration no. LEGAL

All research publications are disseminated to our clients through posting on the firm's password protected websites, bernsteinresearch.com and autonomous.com. Certain, but not all, research publications are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience.

This publication has been published and distributed in accordance with the Firm's policy for management of conflicts of interest in investment research, a copy of which is available from Bernstein Institutional Services LLC, Director of Compliance, 245 Park Avenue, New York, NY 10167. Additional disclosures and information regarding Bernstein's business are available on our website www.bernsteinresearch.com.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. This publication is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of, or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject any of the entities referenced herein or any of their subsidiaries or affiliates to any registration or licensing requirement within such jurisdiction. This publication is based upon public sources we believe to be reliable, but no representation is made by us that the publication is accurate or complete. We do not undertake to advise you of any change in the reported information or in the opinions herein. This publication was prepared and issued by entity referred to herein for distribution to eligible counterparties or professional clients. This publication is not an offer to buy or sell any security, and it does not constitute investment, legal or tax advice. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with their professional advisors in light of their specific circumstances. The value of investments may fluctuate, and investments that are denominated in foreign currencies may fluctuate in value as a result of exposure to exchange rate movements. Information about past performance of an investment is not necessarily a guide to, indicator of, or assurance of, future performance.

This report is directed to and intended only for our clients who are "eligible counterparties", "professional clients", "institutional investors" and/or "professional investors" as defined by the aforementioned regulators, and must not be redistributed to retail clients as defined by the aforementioned regulators. Retail clients who receive this report should note that the services of the entities noted herein are not available to them and should not rely on the material herein to make an investment decision. The result of such act will not hold the entities noted herein liable for any loss thus incurred as the entities noted herein are not registered/

authorised/ licensed to deal with retail clients and will not enter into any contractual agreement/arrangement with retail clients. This report is provided subject to the terms and conditions of any agreement that the clients may have entered into with the entities noted herein. All research reports are disseminated on a simultaneous basis to eligible clients through electronic publication to our client portal.

The information in this report was prepared by Bernstein solely for the internal business use of our clients. Clients may store, display, analyze, reformat and print the information in this report for this limited use only. Clients may not copy, alter, create derivative works, resell, reverse engineer, commercially exploit, share or distribute any part of the information contained herein for any purpose without Bernstein's express written consent. These restrictions include extracting data or using the content to develop indices or other products. Further, you may not use this report, or any portion of this report, to train or finetune any third-party machine learning or artificial intelligence system, or as a prompt or input into any such system. You also may not, without Bernstein's express written consent, do any of the foregoing in connection with your own internal machine learning or artificial intelligence system.

Bernstein may use artificial intelligence tools in the preparation of its materials. Any such materials are reviewed by Bernstein's research analysts prior to publication.

This report has been prepared for information purposes only and is based on current public information that we consider reliable, but the entities noted herein do not warrant or represent (express or implied) as to the sources of information or data contained herein are accurate, complete, not misleading or as to its fitness for the purpose intended even though the entities noted herein rely on reputable or trustworthy data providers, it should not be relied upon as such. Opinions expressed are the author(s)' current opinions as of the date appearing on the material only and we do not undertake to advise you of any change in the reported information or in the opinions herein.

This publication was prepared and issued by the entity referred to herein for distribution to eligible counterparties or professional clients. The information in this report is intended for general circulation and does not constitute an offer to buy or sell any security, investment, legal or tax advice nor a personal recommendation, as defined by any of the aforementioned regulators. It does not take into account the particular investment objectives, financial situations, or needs of individual investors. The report has not been reviewed by any of the aforementioned regulators and does not represent any official recommendation from the aforementioned regulators. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with advice sought from a financial adviser regarding the suitability of the investment product, taking into account the specific investment objectives, financial situation or particular needs of any recipient of the recommendation, before the recipient makes a commitment to purchase the investment product.

The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The information in this report does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, or to induce engage in any other investment activity. The value of any securities or financial instruments mentioned in this report may fluctuate subject to market conditions. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek for independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
