

ASEAN & Taiwan Telcos

Current AI token offerings are unlikely to drive earnings growth at telcos

ASEAN telcos have begun to offer AI tokens and models. In our view, current offerings are unlikely to drive sustained earnings growth, as any successful offering would likely be replicated by competitors. Hence, while some investors have drawn comparisons to Chinese telcos, we believe the current offerings are unlikely to be (and have not been) a share price driver. Select telcos building their own AI infrastructure could see some benefit from rising token consumption if it helps generate incremental revenues from the AI infrastructure. Our preferred telcos are ST, ADVANC, TRUE, 4904, and ISAT.

- Most telcos have outperformed over the last month on rotation.** Most notable are the Taiwanese telcos, led by FET, where earnings growth has driven the share price higher. FET's 1H26 mobile revenue and ICT revenues grew 6% and 33%, respectively, and its 1H26 NI growth rate of 17% is well above full-year guidance (3% growth). ISAT and TLKM share prices reacted positively to benign spectrum auctions, while ISAT has also reacted positively to the monetization of its fiber assets with cash proceeds of \$650m. We believe this transaction is value-accretive for shareholders, as the fiber assets are monetized at an EV/EBITDA multiple of ~7x. We believe proceeds could be deployed to growth initiatives, such as AI and 5G networks, and cash distribution to shareholders.
- ASEAN telcos have begun to offer AI tokens.** The tokens are being offered as a subscription plan bundling access to multiple models or as free access to select models as part of a telecom plan. For instance, Alisa AI, AIS's consumer AI service, bundles 10 AI models into a single subscription. Per AIS, AIS Alisa is offered to eligible AIS customers for Bt220/month, compared to a cumulative subscription price of Bt3.7k if a customer were to subscribe to each model individually ([link](#)). Examples of telcos bundling models into telecom plans are the free model access as part of subscription to telecom plans from StarHub and Telkom Indonesia.
- Current AI token offerings are unlikely to drive earnings growth.** While some have drawn parallels to the Chinese telcos, we believe the telcos are unlikely to see sustained material benefit from the distribution of third-party models. Without exclusive partnerships, any successful initiative is likely to be replicated by competitors. Hence, the benefit will accrue to the consumer, rather than the telco. There could be a positive impact on the telecom industry if the AI models are offered only for higher price plans (in contrast, StarHub has launched the gigaFLEX+ youth plan with unlimited AI access from S \$13.9/month), such that ARPU grows through uptrading. However, the impact on industry earnings will depend on the extent of uptrading and whether the incremental revenues are higher than the incremental costs of tokens.
- Rising token consumption could benefit select telcos with AI infrastructure.** Chinese telcos reacted positively earlier in the year to the launch of their AI packages targeting SME/retail users. The plans integrated proprietary models with open-source models backed by self-owned and third-party compute resources ([link](#)). Telcos like ST and ISAT have been building their own AI infrastructure. Rising token consumption could drive incremental revenue for the telcos' AI infrastructure. ST has disclosed capex of up to S \$600m to deploy 11MW of AI compute by FY27.

Table 1: AI initiatives of global telecom companies

Companies selling direct tokens		
China Telecom	Offers customers token plans for individuals, families, developers and SMEs starting at Rmb9.9/month for 10mn tokens, rising to Rmb49.9 for 80mn. Developer and SME packages range Rmb39.9-299.9, with API-key access for agents and third-party applications. The platform includes China Telecom's Xingchen models and ecosystem models.	link
China Mobile	Pursuing a providence-led rollout, Shanghai Mobile offers a universal token service with 400k tokens for Rmb1, unified model-switching and payment through the mobile bill. Beijing Mobile offers 10mn tokens for a monthly package for Rmb24.99, while one package starts at Rmb5.99.	link
China Unicom	Consumer entry packages are reported at Rmb15 for 6mn tokens, with enterprise packages starting at Rmb198. Provincial programs include 6mn, 12mn and 18mn token tiers and 30mn token trial allowance for select Shanghai business customers.	link
Multimodal aggregators		
TRUE	Enterprise multimodal platform aggregating more than 50 AI models from over 10 providers. Packages begin at Bt399 per usage per month, with shared usage across image generation, web search, document processing, reasoning, research and video generation tools.	link
3HK	Eligible 5G mobile and broadband customers receive a promotional AI token allowance that is converted into BasicRouter credits. The credits can be used across select Alibaba Cloud and BytePlus text, image and video models.	link
Globe	AI Fiesta provides a unified interface for leading AI models, rather than requiring separate subscriptions. The underlying subscription offers 3mn shared tokens per month; standard models consume at 1x and premium 4x. Globe positions the service for students, creators, SMEs and entrepreneurs.	link
AIS	Preferential access to SparkChat combines models from providers including OpenAI, Anthropic, Google, Alibaba, DeepSeek, xAI, Mistral, Moonshot AI and BytePlus. Packages include refillable credits that can be used for text, image, video and music generation, with additional credit packs available when the included balance is exhausted.	link
Bundled subscription providers		
Airtel	Offered all mobile, Wi-Fi and DTH customers 12 months of Perplexity Pro free.	link
TLKM	Provides Perplexity Pro for three months on select prepaid packages.	link
Circles.Life	Mobile subscription beginning at approximately S\$8/month, integrating models including GPT, Claude, Gemini, DeepSeek, Qwen and Perplexity/Sonar within one telecom plan.	link
StarHub	gigaFLEX+ includes a free gigaAI subscription with access to ChatGPT, Claude and Gemini in one interface, unlimited text usage and 300 image generations per month. Promotional pricing is S\$13.90/month for the first year and S\$19.90 thereafter.	link
SKT	SKT customers were offered one year of Perplexity Pro at no charge. The customer application period ended in October 2024, although the partnership subsequently supported SKT's broader AI-assistant strategy.	link
Deutsche Telekom	T Phone 3 and T Tablet 2 include an integrated Perplexity Assistant and 18 months of Perplexity Pro.	link
Free Mobile	Initially offered Free Mobile subscribers 12 months of Le Chat Pro free, followed by EUR17.99/month. Le Chat Pro remains available as a carrier-linked option for Free Mobile customers, with access to Mistral's frontier models.	link
O2 Telefonica	New O2 customers receive six months of ChatGPT Plus free; O2 Priority users had earlier received a three-month promotion. The subscription includes advanced GPT access, web search, file analysis and image processing.	link
Orange	Orange's Mistral partnership provides for Le Chat and Codestral integration into Orange offers, including a Le Chat option for French Mobile Pro customers. Orange Poland separately offered a six-month Le Chat Pro voucher for Orange Flex and Nju to eligible My Orange users; that claim campaign ran through 15 March 2026.	link
Verizon	Eligible Verizon mobile and home Internet customers can add Google AI Pro for \$10/month, approximately half the standalone list price. The benefit supports family sharing and includes Gemini and Google's wider AI/storage package.	link

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe). NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
