## VRT 2Q26 Earnings Review: Still a great stock but the halo effect is now gone. Reducing TP to \$368.

**Recap:** Vertiv reported revenues of \$3.3B in 2Q26, missing consensus of ~\$3.4B, representing organic growth of approximately 18%. Adjusted diluted EPS of \$1.52 beat the Street estimate of ~\$1.42. Adj. op. profit of 22.6% also came in ~100 bps higher than expected. Growth was the big disappointment; VRT was down 18% on the weak print.

**Miss on organic + supply chain concerns:** In our preview, we said the bogey to beat was ~30% organic; VRT came in extremely light at 18%. Mgmt. mentioned this was related to supply chain issues, specifically for prefabricated solutions (e.g., SmartRun / OneCore). These products have more complicated supply chains, and delays in one component could lead to delays in shipping out these high value modular units. VRT needs to resolve these issues to meet a heavily back-weighted guide; we're not entirely convinced they can since we haven't heard much detail from them on the "how". It's hard to solve supply chain issues in a quarter. **800V DC lag:** Management highlighted that the SST is still in product development, while peers do seem to be much further ahead (for example, some are testing SSTs with hyperscalers). Part of the VRT premium comes from R&D excellence, and given how much importance the SST narrative has, it is not good optics for them to be behind.

**Strong deferred revenues:** VRT no longer discloses quarterly orders. So investors now use deferred revenue as an indicator of orders growth (since it includes in part some deposits for new project orders). This was up quite significantly in 2Q (over \$1.2B compared to what is usually a few \$100M) which would imply strong orders growth coming in. However, this likely won't have a major impact in 2026 on revenues since most of these orders will likely only materialize in 2027 (assuming a 12 month conversion timeline). **While this note reads bearish, we still think VRT is a great company and a great stock.** The stock is cheap; although we do not think it will return to peak multiples. There's a loss of the halo effect it earned over the last couple of years that's hard to regain without a couple of blowout prints. We'll be keenly looking at mgmt. commentary at their next set of conferences to get confidence on the supply chain / SST issues.

### Investment Implications

**We rate VRT Outperform with a revised TP of \$368.** This is driven by us reducing our EV / NTM EBITDA valuation multiple to 27x (from 32x) and rolling EBITDA forward by one quarter.

## DETAILS

### RECAP OF NUMBERS

Vertiv reported revenues of \$3,274 million in 2Q26, missing consensus of ~\$3,372 million, representing growth of approximately 24% year over year (18% organic) vs. \$2,638 million in Q2 2025. Adjusted diluted EPS of \$1.52 beat the Street estimate of ~\$1.42; this compares to \$0.95 in Q2 2025. Adjusted operating profit of 22.6% also came in ~100 bps higher than expected. The revenue number was disappointing given the market is used to VRT coming in much hotter on growth. 3Q EPS guide is \$1.80 at the midpoint and revenue is \$3,750 at the midpoint, which does seem low given that is where consensus was at for the quarter. For the full year, mid-point of revenue guidance is up \$250M to \$14B, with the full year EPS guide at \$6.70.

### WHAT STOOD OUT TO US

**Miss on organic + supply chain concerns:** In our preview, we said the bogey to beat was ~30% organic; VRT was guiding the quarter to mid-20s organic but came in extremely light at 18% (largely driven by Americas). Management then mentioned this was related to supply chain concerns, which when unpacked, specifically refers to concerns on prefabricated solutions (e.g., SmartRun / OneCore) vs. point solutions. The issue was that these prefabricated products have more complicated supply chains, and delays in even one component could lead to delays in shipping out these high value modular units. Vertiv is adding capacity to address this, and commentary seems to indicate there is some leeway for things to go wrong. But there was probably leeway baked into the 2Q guide as well, and that wasn't enough. VRT is guiding 35% organic in 3Q and implied >40% in 4Q which are a big step up. Most companies with data center exposure in our coverage are back-half weighted in terms of revenue conversion, but most of them also met the 2Q number so we remain a bit more nervous on VRT's ability to perform near-term vs. other names. Commentary from the earnings call and callback did not give us confidence that the issue has an immediate solve, supply chain issues often take more than a quarter to fix.

**800V DC lag:** This was another area where we didn't see as much progress as we expected. Management highlighted that the SST is still under development, while peers do seem to be much further ahead (for example, some of them are already testing the SST with hyperscalers). Part of the VRT premium comes from R&D excellence, and given how much importance the SST narrative has, it is not good optics for them to be behind here. While we still think 800V DC is a 2028 ramp-up and VRT has time to develop the product, it is uncharacteristic for them to lag. They're clearly working on it, but the brevity of responses and detail on the earnings call have not helped investor sentiment on the narrative that VRT lags power-native peers in 800V DC.

**Strong deferred revenues:** VRT no longer discloses quarterly orders. So investors now use deferred revenue as an indicator of orders growth (since it includes in part some deposits for orders from customers along with deposits that comes in from meeting project based milestones). This was up quite significantly in 2Q (over \$1.2B increase compared to 1Q when the step up is usually a few \$100M each quarter) which would imply strong orders growth coming in. However, this likely won't have a major impact in 2026 on revenues since most of these orders will likely only materialize in 2027 (assuming a 12 month conversion timeline).

### THOUGHTS ON VALUATION

Valuations are unquestionably attractive at the moment. Demand is clearly robust, so it's operational execution that needs to be fixed. Given EPS is expected to grow >60% this year, and the buy-side expects earnings growth of 40%+ in FY27 and 20%+ in FY28 (sell side consensus is slightly lower in FY27 and slightly higher in FY28) it does feel like the stock has overcorrected to some extent.

With that said, we do think the peak valuation days of 55x P / E (NTM) and 40x EV / NTM EBITDA are behind us. Those multiples require flawless execution and a high degree of confidence in delivery of numbers and continued product development excellence, and Vertiv has missed on both those counts this quarter. Once bitten, twice shy as they say ... and given the magnitude of the move on earnings day we would imagine some hesitation from investors to take a fresh position with far more positive sentiment on the broader AI complex.

While we expect some recovery in the in the mid-term, we are also adjusting our assumptions on multiples down accordingly. We now assign a multiple of 27x to Vertiv (splitting the difference on our initial choice of multiple at 32x EV / NTM EBITDA and current multiple of 22x EV / NTM EBITDA).

## Business dynamics

### Market environment

- **Strong pipeline momentum:** points to another year of expected robust orders growth.
- **AMER market remains strong:** accelerating pipeline supports long-term growth trajectory.
- **EMEA confirmed positive momentum:** accelerating pipelines reinforcing confidence in performance through the remainder of 2026.
- **Broad-based strength across APAC:** healthy pipeline development and favorable market conditions support continued growth opportunities.
- **Pricing continues to be favorable:** expect pricing to continue to exceed inflation in 2026.

### Manufacturing and supply chain

- **Sequential and year-over-year revenue growth** reflects our continued investment in capacity expansion and strong backlog, positioning the business for H2 acceleration.
- **We are delivering data center infrastructure solutions at an increasing scale and level of complexity.** Experienced minor timing shifts in Q2 revenue, primarily due to temporary supply chain congestion and multi-phased project execution.
- **Capital expenditures expected to reach high-end of range** (~4% of 2026 sales). Investing to expand global capabilities and capacity to meet both near and long-term customer demand.
- **Continuing to invest in long-term growth** through strategic investments in future power architectures, advanced thermal systems, services and converged infrastructure to enable next-generation AI factories.

**Strong market momentum and proactive operational initiatives reinforce confidence in sustained growth**

## DISCLOSURE APPENDIX

**I. REQUIRED DISCLOSURES**

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社) and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

**VALUATION METHODOLOGY****Vertiv Holdings Co**

We value Vertiv at 27x NTM + 1 EBITDA of \$5.3B to reach our target price of \$368.

**RISKS****Vertiv Holdings Co**

Downside: (i) Efficiency increasing to the point where less cooling needed, (ii) Unexpected slowing of data center expansion, (iii) Faster than expected shift away from NVIDIA chips to custom silicon (impacts Vertiv because of strong relationships), (iv) Tech. shift away from DTC / 800 VDC if Vertiv can't react fast enough

**RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION****EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

### **Autonomous brand – common stocks**

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/- 10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

### **Autonomous brand – preferred stocks**

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

## **AUTONOMOUS CREDIT RESEARCH**

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

### **CREDIT RATINGS DEFINITIONS**

The Autonomous brand has three categories of credit ratings:

- **Credit Outperform (C-OP):** The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- **Credit Neutral (C-N):** The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- **Credit Underperform (C-UP):** The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.
