

Japan SMID Monitor: How do *yuutai* SMIDs perform during corrections?

In this month's edition of the **Japan SMID Monitor**, we focus on the performance of Japanese SMID stocks with *kabunushi yuutai* (or shareholder benefits) programs in place, versus those that do not. We first wrote about SMID companies with *yuutai* programs in [Japan SMID Monitor: Measuring the impact of *kabunushi yuutai*](#) (11 April 2025). We then followed this up with [Japan Portfolio Strategy: Unequal equities – How do stocks with shareholder benefits perform during major market corrections?](#) (3 June 2026), which focused more on the broader *yuutai* universe in Japan. *Kabunushi yuutai* or 'shareholder benefits' programs involve giving domestic Japanese retail investors some sort of in-kind gift or discount for owning a minimum number of shares in the company. Japanese domestic institutions and overseas investors are not eligible for these *yuutai* programs. One third of listed companies have *yuutai* programs in place and have tended to trade at a valuation premium to their sector peers, and their price action usually more resilient during corrections.

- **Japan SMID companies exhibit similar characteristics to their larger cap peers:** Japanese SMID stocks with *yuutai* programs in place tend to have a higher number of retail shareholders, which provides a defensive overlay because retail shareholders usually behave in a contrarian manner during downturns (i.e., they buy when the market is falling), and also because they want to maintain their *yuutai* benefits even during corrections, so they are less inclined to sell ([Exhibit 6](#)).
- **Japan SMID companies with *yuutai* have tended to provide downside protection during major market corrections:** *Yuutai* companies have tended to provide superior volatility-adjusted returns during major market downturns, versus those that did not have *yuutai* programs in place. They have also tended to trade at a significant valuation premia to their sector peers ([Exhibit 7](#)).
- **History suggests Japan SMID stocks with *yuutai* programs and high dividend yields should perform well during corrections:** We have included in [Exhibit 5](#) a screen of 19 Japanese SMID names which have some sort of *yuutai* program in place, and which are trading with a dividend yield of at least 3.0%.
- **Individuals and Foreigners net bought TSE Growth, and sold TSE Standard:** As can be seen in [Exhibit 1](#) and [Exhibit 2](#) below, for the month of May, individuals and foreigners net sold -¥12.6bn and -¥9.5bn of Standard cash equities, whilst buying ¥11.1bn and ¥15.5bn respectively of Growth cash.

Appendix One - Methodology

Our **SMID Market Monitor** product focuses on sector and thematic performance of the small to mid cap portion of the Japanese equities market. This is defined as any Japanese stocks that trade over US\$5mn ADTV and a market cap between ¥50-500bn. By our calculations, there are currently 231 stocks in Japan that satisfy this criteria.

We have sub-divided this universe into 42 equal weighted indices that focus on either MSCI-defined sector and sub-sectors, or areas of thematic focus that stretch across multiple sectors (such as High Dividend Yield or Entertainment). For these thematic indices, we have relied either on quantitative measures and/or GS Equity analyst input on component selection. We hope to expand the number of indices over time and would welcome client feedback on any areas of thematic interest we should focus on.

We track the performance of the equal-weighted sector, sub-sector and thematic indices over time and also measure the spread between the best-performing and the worst-performing stocks within the index. For example, [Exhibit 10](#) illustrates both the volatility of the mean weekly performance in the SMID Banks index (the dark blue line), as well as the relatively large weekly Best-Worst spreads within the index (the light blue cloud).

Exhibit 10: Banks index 52-week equal-weighted cumulative weekly performance and best-worst spreads

Source: FactSet, Data compiled by Goldman Sachs Global Investment Research

The criteria we have used in our analysis of the liquid Japanese equities market can be summarized as follows:

- Total universe consists of Japanese stocks with a 6-month ADTV of over US\$5mn and with a market cap of ¥50-500bn (currently 231 stocks).
- The universe will be refreshed every 6 months.
- Indices are all equal-weighted.
- Index component selection is based on MSCI sector and sub-sector definitions, quantitative factors and/or GS single-stock Equity Analyst guidance.
- The same stock can appear in multiple indices.
- The Best-Worst spread is based on the difference between the best performing and worst performing component within each index.
- The first 6 months of trading of any new listing are not included in the index performance.
- Japanese stocks on the JPX Securities Under Supervision & Securities to be Delisted list are excluded from the universe

We anticipate that the number of indices will be adjusted over time and would welcome any client feedback on other areas within the liquid Japan equities universe we should be focused on.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g.,

marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
