一页摘要

- Bernstein：At 2% of revenue, Apple ’s capex budget has hardly been impacted by AI as it has chosen to partner with Google for its Apple Foundation Models (AFMs) and as it rolls out its Siri AI, many of the AFMs run on-device and hence rely less on expensive AI servers.

- Bernstein：We are downgrading NVDA ’s stock from Outperform to Market-Perform, and lowering our price target from $400 to $200.

- BofA：This now implies nearly 7x growth off the ~$35bn CY25 level, and still >3.5x growth off a strong CY26E base given continued inflection across agentic workloads (TAM now +39% CAGR vs. +36% prior) and increasing unit supply visibility for CPUs in CY27-28.

- Citi：China's export engine remained resilient in October, with AI-related products driving another month of strong growth.

- GS：We expect accelerating 8-inch wafer adoption, rising penetration in 800V EV architectures, and increasing power demand from next-generation Al server racks to support SICC ’s gross margin expansion and revenue growth ahead.

- BARC：The average organic growth reported by our coverage is so far tracking at +1.1% for 3Q26, (excluding Richemont and Burberry, who still have to report) sequentially below the +3.5% average for 2926 for the same names.

- JPM：We have analysed product launches, focusing on brand new family lines under two lenses: the amount of newness that has come to market, and the price points within the pricing pyramids the products have been launched at.

- JPM：This material is neither intended to be distributed to Mainland China investors nor to provide securities investment consultancy services within the territory of Mainland China.

AI、半导体与硬件

本节按主题列出已取得来源的研究摘录，保留机构归属与原始图表。

机构观点摘录

Bernstein｜At 2% of revenue, Apple’s capex budget has hardly been impacted by AI as it has chosen to partner with Google for its Apple Foundation Models (AFMs) and as it rolls out its Siri AI, many of the AFMs run on-device and hence rely less on expensive AI servers.

原文补充：During this period Apple’s capex intensity has fallen from 4% to just 1.9% of revenue, or from 3.4% to 2.0% using CY19-2…

来源：R001 第1 – 2页

Bernstein｜We are downgrading NVDA’s stock from Outperform to Market-Perform, and lowering our price target from $400 to $200.

原文补充：For the supply chain itself we wonder what will happen to the company’s myriad of investments in the space, various back…

BofA｜This now implies nearly 7x growth off the ~$35bn CY25 level, and still >3.5x growth off a strong CY26E base given continued inflection across agentic workloads (TAM now +39% CAGR vs. +36% prior) and increasing unit supply visibility for CPUs in CY27-28.

原文补充：Despite potential concerns around AI capex slowdown from CY28-onward, we flag AI compute demand is at all time-high leve…

来源：R007 第1页

Citi｜China's export engine remained resilient in October, with AI-related products driving another month of strong growth.

原文补充：Imports accelerated well above expectations, supported by robust technology demand and higher energy prices.

GS｜We expect accelerating 8-inch wafer adoption, rising penetration in 800V EV architectures, and increasing power demand from next-generation Al server racks to support SICC’s gross margin expansion and revenue growth ahead.

原文补充：Currently established as a top SiC epitaxial wafer supplier with a leading domestic market share, the company is ramping…

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.
The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.
Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.
Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

机构观点摘录

JPM｜Its share price weakness in 1Q26 was due to concerns over ‘ AI disruption in the game industry ’, and its share price has rebounded 20%+ since then, as it reported strong game revenue/profit supported by resilient existing games (game revenue/OP +10%/29% YoY in 2Q26).

原文补充：For 3Q26 game revenue growth, investors already expect a deceleration from 2Q26 (mid to high single digit YoY game growt…
