

Energy, Utilities & Mining Pulse: Investors Asking: What Are Early Learnings from Earnings?

Through this earnings cycle, we have seen stock price volatility following earnings results, and look to the implications for future performance. This week in the Pulse, we ask our senior analyst team to discuss stocks that have stood out in 2Q26 earnings so far. Teams discuss the most surprising elements in the print compared to their views, whether these results serve as a potential read-through for the rest of the sector, and what their expectations are for the stock from here.

Clean Technology: ENPH

Energy Services: PWR

E&Ps: EQT

Majors & Refiners: VLO

Metals & Mining: NUE

Midstream: KMI

Utilities: FE

Clean Technology:

Within cleantech, **ENPH** was our first solar company to report earnings, which were relatively inline with expectations. More importantly, the company's outlook in 4Q26 was better than anticipated, especially when including ~\$61mn of safe harbor activity. Looking ahead, management communicated strong demand in Europe, especially for battery storage, as well as continued traction with prepaid leases in the US. The company also discussed some positive traction regarding its solid-state transformer (SST) product for data centers, including RFI and RFP negotiations representing a multi-GW pipeline. Lastly, management mentioned that the recently announced restrictions on foreign imports of power inverters could provide enhanced traction within the C&I market. We view the results as a positive read-through for the resi market, especially given the commentary on the European market, as well as the C&I sector following the inverter restrictions. We believe optimism on the SST opportunity remains a key potential upside catalyst as investors continue to assess the potential growth trajectory into 2027 in relation to the safe harbor uplift in 2026.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Through this earnings, Quanta Services (**PWR**) stood out as the company reported a ~21% adjusted EBITDA beat vs consensus, and raised organic FY26 guidance by ~13% at the mid-point. With the print, PWR also announced the completion of four acquisitions that bring further craft labor and fabrication capabilities to the company. As PWR looks to continue margin growth over the long-term and position itself within data and load center markets, these additions to PWR's existing portfolio gives us confidence for continued top-line and margin growth over the long-term. We currently estimate a ~19% EPS CAGR through 2030, as we estimate increasing contribution from vertically integrated projects, 765 kV lines, and data center build outs. As PWR continues to increase its fabrication capabilities and expand into more geographies with these services, we remain constructive on PWR's long-term growth, supported by its position as the largest player within the T&D space, as the grid continues to be electrified and built-out over the next several years. With the strength in PWR's results, we look to peers through this earnings season, as the sector remains exposed to high-growth trends across the power demand theme.

E&Ps:

Among companies in our E&P coverage that have reported earnings so far, results from **EQT** stood out given a combination of a strong 2Q26 production beat of 5% versus consensus estimates and raised FY production guidance on lower maintenance capital expenditure guidance. For EQT's print, we were most surprised by the outsized impact of EQT's ongoing compression testing on well results, as the company noted that these compression projects contributed to a 3% outperformance in EQT's base decline rates. The two key points that serve as a read-across for the rest of the E&P sub-sector are 1) continued robust outlook for natural gas production and supply in the near-term balanced with 2) compelling long-term demand upside potential in the Appalachian region. First, we saw EQT raise its production outlook alongside several peers that signaled for some level of growth, which adds downward pressure to near-term natural gas pricing, as the 2026 natural gas forward curve has fallen materially since YE2025, partly driven by the market's robust outlook for Permian associated gas supply. We also see EQT's outlook for ~20 Bcf/d of potential demand growth in Appalachia driven by power, data center, and egress expansion as a positive read across for the long-term outlook on the natural gas E&P sub-sector. A large portion of this upside potential still needs to be proven out through FIDs and other firm agreements, so we seek further clarity on incremental announcements and note EQT's effective commercial and marketing strategy to date.

Majors & Refiners:

Across the Integrated Oil & Refining coverage, Valero Energy (**VLO**, Buy) has been one of the stocks that has stood out the most thus far. VLO reported 2Q EPS results of \$12.54 relative to GS/FactSet consensus of \$10.25/\$10.13, driven by greater than anticipated results, particularly in Gulf Coast refining and renewable diesel. As a result, the company's shareholder returns in the quarter exceeded our expectations given the stronger cash flow generation where we highlight management returned ~\$2.6 bn via buybacks and dividends. During the call, we note VLO discussed a constructive crack spread outlook for refined products given inventory levels, global capacity disruptions, a growing export pull, and resilient demand, which we anticipate should screen well for the rest of the companies in the refining sector. With that said, while we remain mindful of YTD outperformance, we continue to see a constructive outlook for VLO where we

view the stock as a key beneficiary of the elevated margin backdrop. Additionally, we point towards the company's balance sheet strength, track record of execution, premium asset portfolio, and ongoing commitment to shareholder returns.

Metals & Mining:

Within Metals and Mining, **NUE**'s results stood out the most. While the results were better than expected, forward commentary was more bullish than expected with 2026 volume guidance now closer to +10% for the year. This trend continues to show the return of demand to local companies, as domestic steel producers take market share from imports due to the 50% section 232 tariffs put in place last year. This commentary was also accompanied by strong demand commentary with tailwinds from multi-year investment cycles across energy, public infrastructure, data center demand and more. Additionally, despite auto demand remaining weaker, commentary on domestic steel demand for autos is strengthening, which stood out to us as well, as auto manufacturers are shifting toward purchasing steel domestically which should provide additional tailwinds to demand. We view NUE's commentary as a positive read for our entire sector as higher volumes and utilization should continue to drive operating leverage and margin expansion through 2H26.

Midstream:

Within midstream, **KMI** kicked off earnings for the group last week where the company posted a solid beat driven in part by commodity/spread gains (butane blending, Waha spreads) and raised FY26 guidance. Looking forward, the project backlog was lower QoQ, as we expected, at \$9.6b (vs \$10.1b prior), though management detailed line of sight to announcing at least \$1.4b (or more) of projects in 2H26 which are expected to offset \$1b of projects coming into service. Specific projects to watch in the coming quarters include the pre-FID Western Gateway project, which is now expected to reach FID in the coming 1-2 months (vs a potential FID alongside 2Q26 results), and pre-FID projects like TGP's 219 South project and NGPL's Permian Link project, which will be key read-throughs for KMI's ability to capitalize on growing power demand across their footprint. We see KMI's solid execution on the quarter as a potential positive read-through for products operators with butane blending capabilities and gas pipeline operators who can market around Waha differentials. Looking forward, we maintain our constructive view on KMI, as we see the company as a beneficiary of the still-robust natural gas infrastructure trade, which remains the most visible and durable thematic for the sector. We see a constructive backdrop for the company to win its fair share of the >\$10b pre-FID backlog, and we believe expectations remain relatively muted vs peers where the market has been willing to capitalize significant pre-FID growth.

Utilities:

While we have only had four companies report thus far in our power/utilities coverage, FirstEnergy (**FE**) was one stock that stood out to us with results. While the print itself was in line with consensus, and the timing of O&M expenses was more weighted to 2Q than we anticipated, we continue to see the company well-positioned to execute solidly on full year numbers. The biggest incremental update on the quarter in our view was the data center pipeline update and commentary on the potential opportunity in West Virginia. The company continues to expect approvals on its CPCN for the Maidsville Energy Center in 2H, which if approved, could add an incremental 100 bps to the

company's rate base growth outlook. Management also indicated that it is exploring a potential second gas plant due to the strong interest from data center customers in the region, and noted that it could consider different structures to ensure a fast time to power and customer protections, including a GenCo like structure. We believe this presents upside risk to our current 8% EPS growth CAGR through 2030, which we believe as the regulatory calendar is derisked, will drive a re-rate of the stock to close the multiple discount relative to our coverage. While few companies in our coverage also have exposure to West Virginia, AEP is also exposed to that market, which could provide upside potential around large load and transmission/generation capex opportunities. Otherwise, we continue to see data center updates as potential positive drivers for the regulated utilities broadly given the support for rate base/earnings growth outlooks.

Conversations we are having with investors

E&P – Neil Mehta

EXE. Investors have been focused on EXE following the company's 2Q26 earnings results, which were released on July 28, as well as the recent announcement on July 27 detailing the company's plans to acquire Twin Eagle for \$1.25 bn. On the earnings print, investors have noted the company's FCF beat versus consensus for the quarter given the softness in natural gas pricing. Investors remain focused on the long-term natural gas demand potential as the near-term downward pressure on pricing has resulted in EXE trading at attractive levels of 10% FCF yield relative to peer average of 8% (peers include CRK, EQT, AR, NFG, RRC, and TOU). Investors have also noted management's decision to focus on shareholder returns with \$849 mn in repurchases year-to-date following a focus on debt reduction during the first quarter. On the Twin Eagle acquisition, investor conversations have focused on the outlook for the company to achieve its \$150 mn synergy target by YE2028. Investors also seek more clarity on EXE's competitive positioning versus peers for securing incremental commercial and marketing agreements.

TOU. Investors have also been focused on TOU following the company's 2Q26 earnings results which were released on July 29. One particular focus area regarding TOU was the announcement of a one-year pause in Phase 2 of the NEBC buildout, as investors seek more clarity on the incremental opportunity for shareholder returns in 2H27/2028 as a result of the temporary pause in Phase 2. Given the company's commentary around maintaining the flexibility to resume Phase 2 construction on the original timeline if management sees a sustainably improving pricing environment, investors look for further commentary around the macro indicators that would constitute a change in strategy regarding the Phase 2 timeline. Given the elevated liquids pricing environment, investors also remain focused on TOU's outlook for liquids volumes in 2H26 with the current macro backdrop of significant pricing volatility.

Majors & Refining - Neil Mehta & Alexa Petrick

Canadian Oils. Investors focus on Canadian Oils this week, with CVE kicking off 2Q26 earnings. CVE delivered a strong CFPS beat, raising full-year production guidance to reflect strong Oil Sands results and optimization of turnaround activity at Foster Creek and Christina Lake, while leaving capital spend unchanged. Looking ahead, we expect shares to benefit from volume and free cash flow growth as West White Rose comes online in late 3Q26. Operational availability and continued cost discipline across refining assets position the company to capitalize on the current pricing environment supported by low Midwest inventories, robust crack spreads, and wider heavy oil differentials. While many investors are focused on leverage after the MEG acquisition, we highlight significant progress on the balance sheet this quarter, with net debt now below C\$6 bn, allowing management to return ~75% of excess free funds flow to shareholders. That said, some shorter-horizon investors may also remain cautious due to strong year-to-date outperformance. For upcoming prints from IMO.TO, SU, and CNQ, investors look for commentary on production growth, capital returns, pipeline egress, margin capture, and wet weather conditions.

U.S. Majors. Investors turn their attention to XOM and CVX ahead of 2Q26 results tomorrow. Per the recent XOM 8-K, investors look for sequential improvement in Upstream, Downstream, and Chemicals earnings. Those with a constructive view on the company continue to highlight advantaged Permian technology, attractive refining exposure, and consistent capital returns. Relative valuation remains a key area of pushback, where we note XOM shares offer a 6% free cash flow yield in 2027/2028 vs. CVX at 8%. Investors also look for updates on the recovery timeline for damaged LNG trains in Qatar. For CVX, investors highlight strong long-term free cash flow growth paired with capital discipline. Many see a positive setup into the quarter, reflecting operational momentum across the U.S., and at TCO, Gorgon, and Wheatstone, with tailwinds from projects in Guyana and potential volume upside in Venezuela and Argentina. Key pushback relates to geopolitical risk in the portfolio, particularly in Kazakhstan following recent headlines.

Energy Services - Neil Mehta

LBRT. Conversations with investors this week focused on LBRT after the company reported earnings on 7/22 and the stock faced pricing pressure. Investors were focused on the increased capex requirement for LBRT for 2026, as the company guided to higher than previous capex, now expected to be ~\$1.5 bil for FY26 compared to previous guide of ~\$1.1 bil. With the increase in capex, the capex per MW was raised, with the company now estimating an average of ~\$1.7 mil/MW across their Behind-the-Meter projects. We hosted a call with LBRT management on the back of earnings, where the company discussed their capex expectations over 2026 and the next several years, as well as their expectation for the signing of ESAs through 2H26 that could amount to more than 500 MWs. Investors were focused on LBRT's plan to fund the increase in capex, and the different strategies the company may use to support a higher capital spend than anticipated. The market was also focused on the nature of the ESAs, and if LBRT would consider the option for bridge financing if ESA timelines were pushed to the right. LBRT management messaged their plan to use project financing for contracts, and see the pipeline with customers as robust over the long-term.

FTI. After the company reported earnings on 7/30, investors were focused on relative share performance after the print, and the forward orders profile for the company. With higher EBITDA results vs GS and the Street, investors were focused on what the 2027 order target could look like, as the company reiterated their expectation for a step up in subsea orders from 2026 into 2027. Management commentary focused on the make-up of orders in 2027 vs 2026, and noted their expectation for larger greenfield orders to comprise 2027 orders vs the smaller brownfield tie-backs that the company expects through 2026. As the company continues to focus on the industrialization of the other portions of their subsea exposure, referred to as iEPCI 2.0, investors are focused on the incremental EBITDA margin expansion the company could achieve in their subsea business from the initiative, as well as the level of magnitude in order growth over the next several years.

Utilities - Carly Davenport

FE. This week, FE reported 2Q earnings, and the stock remains debated in our investor conversations. Those that are more bullish on FE highlight (1) the upside opportunities in West Virginia, where the single gas plant at the Maidsville Energy Center could drive 100 bps of incremental rate base growth to the plan (per the company), and there is now potential for incremental gas plants to be built due to the strong data center interest in the region and the strong support from the state to build out incremental, (2) potential for incremental transmission investment on top of already robust rate base growth from the transmission business as a result of data center growth and the PJM open window, and (3) discounted valuation relative to peers with clear upside catalysts in the next six months including the CPCN approval and final order on the West Virginia inflation and investment adjustment mechanism. For those that are more bearish, the focus is largely on regulatory risk across a number of FE's PJM states, including NJ, MD, PA, and OH. The concern is most pronounced around affordability and regulatory outcomes in NJ/MD, potential for reallocation of capital outside of PA in the event of less constructive recovery mechanisms, and gubernatorial election risk in OH. There are some investors who are also skeptical of the potential West Virginia upside despite the positive momentum in the pipeline given the data center build out there is still in the very early stages.

PCG. Last week, PCG kicked off utilities earnings season and we have received a number of investor inbounds on the back of results. Investors broadly are evaluating the optimal entry point for the stock as the California state legislator returns from its summer recess next week and potentially progresses wildfire reform legislation in the state. The outcome of the legislative session remains debated, with discussions centering on whether action will be taken, or if potential reform will get pushed into future legislative sessions due to the fact that the Governor's term is ending later this year. Some investors also queried if a state backed solution spreading the burden more broadly than just CA IOU customers would be considered. There was also focus on the company's plan B in the event that wildfire reform is not passed, in which case investors are trying to size how much capex could be at risk of reduction relative to the 5-year \$73 bn capital plan, and what the company might to do adjust the capital allocation strategy. Lastly, there are some questions on the company's data center load, though some investors still debate the potential for meaningful data center load to materialize in California.

MLPs/Pipelines – John Mackay & Olivia Foster

Focus on KGS core compression business value and power upside. We fielded several investor inbounds this week regarding the value of KGS's core compression business following recent stock underperformance (down -16% since 7/22). This sell off was driven by broader AI and power market volatility post 2Q26 earnings, including a more cautious long-term outlook from LBRT on their earnings call (higher upfront spending, questions on power gen terminal value), which contrasted with positive contracting momentum from PUMP. Relatively more constructive sentiment around the power space came during our virtual investor event with LBRT management on Tuesday, highlighting long contract durations and >500 MWs of service agreements by YE26, in addition to PUMP's newly contracted power generation capacity (though we note these contracts are for upstream and industrial customers). Notably, data center opportunities appear to take longer to achieve due to a more complex commercial process, whereas oil and gas or industrial applications could offer a faster conversion timeline. For KGS, investors are debating power upside with focus on commercial momentum, project economics, and returns – while seeking to identify the stock's fundamental bottom (the core compression business). Most investors view the recent sell-off as overdone, highlighting supportive macro tailwinds (long lead times and industry discipline), pricing power, and margin expansion potential as constructive for the underlying compression business. Looking ahead to next week's earnings, while major commercial announcements should come later this year given management commentary, investors are watching for contracting momentum commentary, KGS's willingness to participate in microgrid solutions, potential for higher capital spending, and conviction in compression fundamentals.

Initial read-throughs for gas demand from the Paducah data center announcement.

This week, a consortium including Brookfield, NextEra Energy (NEE), and local utilities announced a \$100b data center campus at a site in Paducah, Kentucky, including the construction of 2 GW of natural gas-fired power and up to 2.6 GW of battery storage capacity, with full construction targeted for 2032. We fielded several inbounds this week on read-throughs for incremental gas demand for power gen and which pipelines are best positioned to capture the opportunity. Given their proximity to the site in Paducah, investor conversations centered on if the following four pipes could be considered as best positioned: Trunkline (ET), TGT (Boardwalk), TETCO (ENB), and ANR (TRP). On sizing, investors questioned what this could mean for incremental throughput, and for illustrative purposes, at an assumed ~200 mmcf/d per GW of data center power, the up to 2 GW of gas generation would imply roughly 400 mmcf/d. From here, focus remains on which operator ultimately secures the incremental transportation commitment, the timing of any pre-FID project announcements against the staged generation buildout, and read-throughs for the broader gas pipeline group, as gas demand for power generation continues to be a key growth driver for the sector.

Clean Technology - Brian Lee

Solar. We received increased interest on key solar earnings this week, such as expectations and positioning ahead of results, including ENPH (reported Tuesday evening) as well as FSLR and NXT (reporting post close on 7/30). On the resi side, there have been questions regarding the demand picture in the US and Europe, particularly for storage, and the outlook for solid-state transformer and other new products. Additionally, we fielded continued interest on ENPH post its earnings result as investors are trying to gauge how revenues could trend in 2027 in relation to the safe harbor activity recognized in 2026. On the utility-scale side, investors are trying to understand any updated timing on when we could get an outcome on the ongoing Section 232 investigation, as well as the potential market implications. Additionally, there were more idiosyncratic questions, such as expectations on bookings and ASPs for FSLR, and potential updates on NXT's recent acquisitions and potential implications to financial performance.

Rare Earths. We had incremental inbounds on the rare earth sector this week. Investors aimed to understand drivers of the recent weakness in equities, including how much further downside risk there could be over the near-term. Similarly, we fielded questions about the overall industry set up, including geopolitical concerns, as well as whether there are implications for the upcoming China export restrictions in November. Additionally, there have been more company specific questions across MP, UUUU, and METC, including near-term catalysts, thoughts on operational execution, and other idiosyncratic factors.

Metals & Mining – Nick Cash

STLD. Investor inbounds on STLD picked up this week following our reinstatement of coverage on the equity. While most investors agree that owning the mills continues to be the preferred investment strategy, valuations seem elevated which has given bearish investors pause. Investors continue to debate STLD vs. NUE and where the largest upside rate of change lies as the domestic steel demand and pricing picture improves. While NUE is the fundamental volume/market share capture story, some investors view STLD's aluminum business as undervalued, potentially driving earnings upside as production ramps in 2H26.

Key GS Energy Research Reports

GS Energy Research for the Week

Cenovus Energy Inc. (CVE): See Positive 2H26 Setup as West White Rose Nears First Oil and Deleveraging Continues

HF Sinclair Corp. (DINO): Continue to See Stock Trading at Attractive Discount to SOTP Value; \$114 Price Target, Buy

AMERICAS ENERGY: OIL: Modestly Raising SU and CNQ Targets; Focus on Pipeline Outlook, Return of Capital & Growth

Liberty Energy Inc. (LBRT): Management Meeting Takeaways: See Potential for >500 MWs of ESAs by Year-End, With Raised Capex Guide Supported by Project Financing

AMERICAS ENERGY: OIL & GAS - E&P: Balancing Near-Term Gas Macro Softness with Robust Long-Term Demand Potential; Buy on EQT, Neutral on RRC at \$3.50 MMBtu Mid-Cycle

AMERICAS ENERGY: OIL & GAS - E&P: Amid Uncertain Oil Macro, Screen for Idiosyncratic Stories; FANG for Productivity and DVN for Simplification

AMERICAS US Power Pipeline: June capacity increases as battery storage and solar drive additions

SLB (SLB): Remain Constructive Given Leverage to International Activity Resumptions and Idiosyncratic Opportunities, Contributing to Long-term Growth; Buy

Hayward Holdings (HAYW): 2Q26 results beat, FY2026 guidance maintained as appears to be gaining share; Neutral

Pentair Plc (PNR): Results inline as Pool destocking continues, proposed acquisition of Taco would expand exposure to data centers; Neutral

Enphase Energy Inc. (ENPH): Near-term outlook not as bad as feared, owing to safe harbor + Europe; SST customer traction potential next catalyst; Buy

Xylem Inc. (XYL): 2Q results mostly as expected but data center momentum appearing to build while margin expansion remains intact

Kodiak Gas Services Inc. (KGS): Valued Below Core Compression Value with BTM Concerns Overdone - Reiterate Buy

Kinder Morgan Inc. (KMI): 2Q26 Recap: Solid Quarter; Acceleration in 2H26 Project Announcements Key to Long-Term Growth Expectations

Golar LNG (GLNG): Turbine Order Points to Momentum Towards Fourth Vessel FID - Reiterate Buy

FirstEnergy Corp. (FE): Regulatory derisking in 2H26 to support data center upside and earnings growth visibility; Buy

AMERICAS UTILITIES: POWER - IPPS: Updating estimates into 2Q; PJM and ERCOT regulatory developments in focus

GLOBAL TECHNOLOGY Global Data Center Capacity update: Increased capacity expectations, but continued tightness

Steel Dynamics Inc. (STLD): Reinstate at Buy Given Favorable Commodity Price Tailwinds and Upside from Counter-Cyclical Aluminum Business

Nucor Corp. (NUE): Strong 2026 Results; Demand and Margin Momentum Increasing Profitability and Free Cash Flow; Reiterate Buy

Valuation and Key Risks

EQT. Our 12-month price target of \$62 is based on a target FCF yield of 8.0% on 2027/2028 estimates with \$75 per bbl Brent oil price and \$3.50 per MMBtu Henry Hub gas price. Key risks include lower commodity prices (particularly natural gas), delays in pipeline buildout, higher costs, government pronouncements and less favorable well results. Closing Price: \$52.58

KMI. We remain Buy rated with a 12-month price target of \$35 based on a 12.5x multiple on our 2027 EBITDA estimate. Downside risks include: 1) Slower-than-expected ramp in natural gas demand, 2) new unexpected recontracting headwinds, 3) worse-than-expected rate case headwinds, 4) lower-than-expected returns on new projects, 5) execution on RNG strategy, 6) lower commodity prices, especially for oil given the impact on the EOR business, 7) high-multiple acquisitions, and 8) over extension of balance sheet capacity for buybacks or new projects. Closing Price: \$31.86

FE. We are Buy rated on FE with a 12-month target price of \$55 which is based on an 18x P/E multiple on our Q5-Q8 estimates, reflecting a 1x premium over our baseline. Key risks for Buy rated FE relate to 1) an unfavorable outcome from its Ohio rate case; 2) pension expense and/or interest expense that could come in higher than expected; and 3) mild weather that could weigh on FE's earnings. Closing Price: \$49.13

NUE. Our 12-month price target of \$303 is based on a 9.5x EV/EBITDA multiple on average FY2026-FY2028 EBITDA. Risks. 1) Higher than expected scrap costs; 2) Reductions in tariffs; 3) Increases in domestic capacity could drive downward pressure on prices; 4) Slower-than-anticipated economic growth could drive a deceleration in US steel demand. Closing Price: \$256.16

PWR. Our 12-month price target is \$826, which reflects our target 32.0x NTM EV/EBITDA multiple. We are Buy-rated on PWR. Key Risks: 1) Slower revenue CAGR across segments from loss in project volume momentum, 2) Delays in project deliverables from supply chain related challenges, 3) Slower margin progression across the three segments from cost inflation or other operational challenges. Closing Price: \$560.07

ENPH. Our 12-month target price of \$55 is based on our target P/E multiple of 20.0X applied to our Q5-Q8 EPS, and then adding back ~\$7 of net cash per share. Key risks include lower-than-expected revenue growth and margins, changes in the competitive and technology landscape, US-China tariffs, and abnormal inventory builds across the channel. Closing Price: \$34.90

VLO. We are Buy-rated on VLO, and our 6-month, P/E (16.0x on our normalized EPS forecast) and SOTP-based price target is \$357. Key risks relate to refining margins, operational execution, and capital returns. Closing Price: \$302.28

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Kinder Morgan Inc. is/are relative to the other companies in its/their coverage universe: Antero Midstream Corp., Cheniere Energy Inc., Cheniere Energy Partners, DT Midstream Inc., EagleRock Land, Energy Transfer LP, Enterprise Products Partners LP, Excelerate Energy Inc., Golar LNG, Hess Midstream LP, Kinder Morgan Inc., Kinetik Holdings, Kodiak Gas Services Inc., LandBridge, MPLX LP, NextDecade Corp., ONEOK Inc., Plains All American Pipeline LP, Plains GP Holdings, South Bow Corp., TC Energy Corp., Targa Resources Corp., Venture Global, WaterBridge Infrastructure, Williams Cos.

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution				Investment Banking Relationships		
	Buy	Hold	Sell		Buy	Hold	Sell
Global	50%	34%	16%		65%	59%	43%

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an

officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data

feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
