Goldman Sachs (Asia) L.L.C.

The top 500 cosmetics brands in Douyin grew by mid-30s yoy in May to Jun-18 with Jun-to date GMV yoy moderated vs May yoy, but still faster than 1Q26; we see consolidation trend with top 50 outgrowing at c.40% yoy while brands below 100 underperformed at high-20s yoy.

Performance by MNCs & locals/pricing segment (refer to [Exhibit 3](#) for our definition for different pricing segment): Within top 500 brands, we see global brands tracking above local brands, in majority of the pricing segment except for premium as MGP managed to deliver 54% yoy during the May to Jun-to-date; Overall luxury/premium brands recorded solid result, set to accelerate from mid-20s/high-20s yoy in May to high-30s/high-50s yoy in June to date, while mid-high end/mass market brands moderated from 40s yoy in May to high-teens to 20s yoy in June to date;

Brand performance in Douyin (refer to [Exhibit 1](#) for Douyin tracker): For full period (May 15 - Jun 18), we saw western brands have c.140% completion rate vs local brands' 110% on average, while Japanese brands are on par to prior year:

1) Local brands: We saw strong performance across our covered local brands led by higher-end brands (i.e. Forest Cabin & Mao Geping). Forest Cabin is the leader with 188% yoy growth in Douyin for 2026 5.1-6.18 and highest full-period completion rate at 356%; **Mao Geping** achieved 54% yoy in 5.1-6.18 and full period completion of 150%, thanks to strong Jun performance (1-18) at 91% yoy, while **Giant** GMV was better than expected with 15% yoy growth for 2026 5.1-6.18 and Jun performance catching up at 44% yoy, leading to a 120% full period completion rate. **Shanghai Jahwa** and **Botanee** also delivered encouraging yoy growth with 137%/130% full period completion. **Proya** achieved 24% yoy for 5.1-6.18 and 121% full 618 completion despite Jun weakened at 5% yoy decline. On the other hand, **Bloomage** and **Chicmax** remained under pressure at 77%/63% full period completion.

2) Western brands: Premium brands continued to be the drivers for Western brands. **Estee Lauder Group** led with 56% yoy growth in Douyin for 2026 5.1-6.18 and further accelerated to 75% yoy in 6.1-6.18, with the highest full-period completion rate at 155%, where we see strength in higher-end brands (Estee

Lauder/Lamer at 167%/154% full period completion); **L'Oréal Group** also achieved 33% yoy in 5.1-6.18 and full period completion of 130%, thanks to strong performance in higher-end brands (Skinceuticals/YSL reached 190%/176% full period completion rates), though mass-market brands were behind. **Beiersdorf** also delivered encouraging growth with 146% full period completion thanks to strong performance of La Prairie at 168% completion.

3) Japanese brands: we note a slowdown of growth in Jun across Japanese names; Shiseido Group declined at 21% in Jun 1-18, still delivering 113% full period completion thanks to outperformance of higher-end brands CPB/NARS at 166%/151% full period completion. Decorte (under **Kose**) / SK-II (under **P&G**) saw weakness at 40%/83% full period completion.

We reiterate our top-pick Buy (on CL) on Mao Geping for the strong full 618 period results in Douyin despite the softer sales in May, which we attribute to Company's deliberate pacing and online competitive strategy, a pattern previously observed during major events like Double 11 and Company managed to deliver solid and healthy results set in topline growth and margin profile. We are going to host a **cosmetics expert call at 10am on 22 Jun (Monday)**, focusing more on Tmall and comprehensive operational metrics including discounts/platform and governments subsidies/product returns etc, more to follow.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DAFCF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
