Tier 1 cities' home price stabilization extends into April

The latest NBS data for April shows a continued stabilization trend in home prices: (1) tier-1 cities' secondary price growth remained at +0.4% M/M, with all four cities showing positive growth; (2) 70-city home price decline marginally narrowed in both primary & secondary. Regarding the share price weakness on 18 May (sector -4% vs. HSI -1%), we believe it was mostly due to a lack of major upside surprises from the NBS data, triggering some profit-taking (after all, the sector has outperformed the HSI by 16% over the past month). We remain positive on SOE developers with a strong focus on tier-1 cities (**COLI, CR Land & Jinmao**).

- 70-city primary home prices - M/M decline narrowed:** M/M decline narrowed from -0.21% M/M in March to -0.19% M/M in April. While tier-1 cities continued to outperform (+0.1% M/M) led by Shanghai (+0.4% M/M) (Table 1), home prices in top tier-2 cities also turned marginally positive to +0.07% M/M (the first time since May 2025) (outperformers: Hangzhou +0.4% M/M, Nanjing +0.3% M/M).
- 70-city secondary home prices - all four tier-1 cities saw positive M/M growth (2nd month in a row):** Overall secondary home prices fell 0.23% M/M in April, marginally narrowing from -0.24% in March. Tier-1 cities recorded positive M/M growth (+0.4%) for the second consecutive month, with all 4 cities seeing positive growth (Beijing: +0.4%; Shanghai +0.7%; Guangzhou +0.2%; Shenzhen +0.3%). We also cross-check the trend with Centaline's tier-1 city secondary home price index, which shows +0.6% M/M growth (down from +0.9% M/M but still positive). For the full year of 2026, we expect a soft form of stabilization in secondary home prices among tier-1 cities (particularly Shanghai, where secondary inventory months have notably dropped - Figure 5). This will also be partially supported by a 3% drop in secondary listings in tier-1 cities in April (after a 4% increase in March, partially due to seasonality).
- Y/Y decline in national sales value narrowed due to a lower base:** Residential sales value Y/Y decline narrowed from -15% Y/Y in March to -7% Y/Y in April (Figure 13), in line with top 100 developers' contracted sales ([report](#)). That said, the narrowing Y/Y decline is partially due to a lower base. Compared to the 2018-21 average, the decline widened from -40% in March to -53% in April (Table 7). For the full year of 2026, we forecast a 7% Y/Y decline. We expect the Y/Y decline over the next few months will likely stay in the low/mid-single-digit % range due to a lower base.
- New starts and completions remain weak:** New starts fell 27% Y/Y in April (Figure 15), widening from -17% Y/Y in March, due to a weaker land market in 2H25. We expect new starts to remain weak over the next few months due to soft land sales volume in 1Q26. We revise down our full-year new starts forecast to -18% Y/Y, implying a 16% Y/Y decline for the rest of the year. The bright side of weak new starts is the potentially lower new supply in the primary market, which may help stabilize home prices. Meanwhile, completions fell 19% Y/Y (March: -19%) (Figure 16). For FY26, we expect a 19% Y/Y decline, implying a 17% Y/Y decline for the rest of the year.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
