bridget.alkin@bernsteinsg.com

This note is part of a series expanding on the economics of the Waste Industry, following previous primers covering the Solid Waste [Collection](#), [Landfill](#), and [Recycling](#) segments.

At <3% of Waste Industry revenue and EBITDA, the Renewable Natural Gas (RNG) is the smallest segment within the waste value chain. Capital requirements are real, but with attractive payoffs, with ~90% of profitability stemming from D3 RINs that drive 1.5-3 year payback periods for investments, and EBITDA margins of 40-50% for the RNG segment. RNG facilities capture methane that landfills naturally emit (14% of total US methane emissions), which is then sold to a nearby gas pipeline or used by CNG trucks, generating a D3 RIN. These renewable fuel credits are then sold primarily to oil refiners and importers, who must purchase them to comply with federal Renewable Fuel Standard (RFS) volume mandates.

RNG is high margin and incremental to growth, but introduces materially higher earnings volatility. For WM, the Renewables segment should grow from 0.4% of sales in FY23 to 3.7% in FY28E, adding 70bps of growth from FY26-FY28E and ~1ppt to EBITDA growth. This is a more recent phenomenon. Historically, methane was flared and generated electricity that was sold back to the grid—an afterthought rarely discussed by investors. The commercial transformation came in 2014, when the US Environmental Protection Agency (EPA) qualified landfill biogas as a D3 cellulosic biofuel, and investments followed in 2018.

With 90% of segment revenue from renewable fuel credits, profitability is ultimately a function of government regulation. The Clean Air Act directs the EPA to set D3 RIN volume targets through a process that grants significant discretion: volumes themselves, small refinery exemptions, and retroactive waivers if production falls short of the mandate—all levers that can suppress or increase RIN prices. In April 2026, the EPA finalized volume through 2027, meaning the next rulemaking cycle will address 2028 volumes. **D3 RIN prices reflect policy sensitivity, trading as low as ~\$0.50 in 2019 to ~\$3.75 in 2022, and are currently \$2.70.**

That said, the D3 RIN program has support from a broad group of stakeholders—infrastructure operators, municipal governments, union labor, CNG fleet producers and operators—that make it politically inexpensive to maintain. Since 2014, the program has survived both Republican and Democratic administrations.

Waste Management, Republic Services, and Waste Connections all invest in RNG facilities, but through a variation of wholly-owned projects (WM), joint ventures (RSG), or a combination of both (WCN). Waste Management was an early strategic leader in RNG, building facilities directly by spending \$1.2bn in capex, with consensus calling for \$1.1bn in Renewables revenue by FY28E. RSG is pursuing projects through partnerships with BP-owned Archaea Energy and Ameresco with \$100m in revenue by the end of the decade, paid out through royalties making the projects highly margin accretive. WCN's hybrid structure means two-thirds of RNG investments are paid as royalties while one-third is recognized in Other Revenue, together adding \$150m-\$200m in EBITDA by the end of FY2027.

INVESTMENT IMPLICATIONS

The purpose of this report is to educate investors on the economics of the Renewables segment. Renewable Energy represents 2-3% of industry sales and EBITDA for waste companies. Despite lower contribution at the total company level relative to other segments, profitability is superior with 40-50% EBITDA margins, tied with the Landfill segment. Roughly half of a landfill's methane is generated within 30 years of closure, although only about half of total emissions are ultimately viable for capture. With landfill closures expected to accelerate over the next decade according to EPA estimates, we expect an acceleration in methane production levels and capture rates, driving an improved outlook for the RNG segment.

We rate Waste Connections Outperform with a \$205 PT, Waste Management Outperform with a \$260 PT, and Republic Services Market-Perform with a \$220 PT.

DETAILS

AN OVERVIEW OF THE TRADITIONAL SOLID WASTE INDUSTRY

At its most basic level the Municipal Solid Waste Industry collects waste from homes, businesses, and construction sites and disposes of it through a recycling facility or landfill, with the latter often monetizing the methane gas it naturally emits. The industry is typically divided into 5 segments: 1) Collection (Residential, Commercial, and Industrial), 2) Transfer Stations, 3) Recycling, 4) Landfills, and 5) Renewables (Exhibit 1).

EXHIBIT 1: **The Waste Industry Lifecycle**

Source: Company filings, Bernstein analysis

Within Traditional Solid Waste the Collection segment is the largest (55-65% of sales), followed by Landfills (20%), Transfer Stations (10%), Recycling (5-10%), and Renewable Energy (<3%) (Exhibit 2). Renewable Energy is a small but fast-growing segment, that should drive top line growth and margin expansion as facilities continue to come online over the coming years.

Waste Management, Republic Services, and Waste Connections all invest in RNG facilities, but through a variation of company owned investments (WM), joint-ventures (RSG), or a combination of both (WCN). The result, Waste Management is the only company that discloses financials for the segment, whose EBITDA margins are 40-50% at today's current D3 RIN price of \$2.25-\$2.75, tied as the most profitable segment with the Landfill segment (Exhibit 3). However, earnings variability is dramatically higher—landfill pricing and volumes are very stable, whereas RNG investments are price takers in the RIN market—and more vulnerable to federal legislation. For Republic Services, RNG investments are paid through royalties, not equity method income/loss, making them highly accretive to margins. Waste Connections's hybrid structure means two-thirds of RNG investments are paid as royalties while one-third recognized in Other Revenue.

EXHIBIT 2: The Renewable Energy segment is a small but growing part of the industry, driving 2-3% of industry sales and EBITDA

Source: Company filings, Bernstein analysis and estimates

EXHIBIT 3: We estimate Renewable Energy margins are attractive at 40-50%, but subject to changes in pricing of RINs or renewable fuel credits

Source: Company filings, Bernstein analysis and estimates

RENEWABLES (<3% OF SALES, EBITDA MARGINS OF 40-50%)

The Renewables segment has been through a bit of a transformation over the past several years. Historically methane gas emitted from a landfill was federally required to be treated, which was flared and generated electricity that was sold back to the grid (landfill gas-to-electricity or LFGTE)—an afterthought rarely discussed by investors. Today, catalyzed by federal legislation that created a new environmental compliance credit market for landfill gas (D3 RINs), waste operators are transitioning away from LFGTE to more profitable RNG investments. These projects capture the methane, sell it to a nearby gas pipeline or is used by CNG trucks the companies own. In turn a D3 RIN credit is generated that can be sold into the open market, which generates 90% of sales for RNG investments, while LNG the remaining 10% (Exhibit 4).

For Waste Management, sales for the Renewables segment was \$75m in FY2023 (0.4% of sales), driven primarily by LFGTE. This is expected to grow at a 70% CAGR to \$1,102m by FY2028E (3.7% of sales and ~5% EBITDA) according to consensus, with the increase attributable to RNG investments. We estimate RNG investments will contribute 70bps of growth to the 5.8% CAGR from FY26-FY28E, and will be margin accretive, contributing 1% to EBITDA growth per year to the 7.6% CAGR (Exhibit 5 - Exhibit 6).

EXHIBIT 4: RNG Sensitivity analysis: An estimated 90% of renewable natural gas sales stem from D3 RIN credits, with the remaining 10% actual natural gas sales. Payback periods for these investments are attractive, often 2-3 years excluding one-time tax benefits. However, profitability is highly dependent on D3 RIN pricing, which exhibits high variance. Waste Management attempts to reduce portfolio variance through pre-selling D3 RINs - 50-60% of expected RNG sales are hedged entering the year.

Bernstein 2026 Renewable Natural Gas Plant Sensitivity Analysis

D3 RIN Political Risks - Volume Obligations, and thus Pricing, are Prone to Politics

Considering ~90% of profits stem from government-enabled renewable fuel credits, **past changes in legislation were the impetus for investments in methane capture systems.** Specifically in 2014 the EPA allowed for landfill biogas to qualify for D3 cellulosic biofuel RINs, in part due to successful lobbying by the Waste Industry, rather than just D5 RINs. This was commercially transformative, as D3 credits traded at a material premium (Exhibit 8). To generate the RIN credit landfill operators must convert biogas to RNG, inject it into a natural gas grid, and demonstrate it displaces a transportation fuel. Further policy changes such as Investment Tax Credits on RNG facilities through the Inflation Reduction Act and the Small Refinery Exemption (SRE) improved project economics.

The Energy Policy Act of 2005 program's stated rationale combined energy security with environmental goals. Landfill gas capture satisfies this, diverting methane from atmospheric release and substituting it for fossil CNG in transportation. Today the US RFS program requires transportation fuels to contain a minimum volume of designated renewable fuels, which is met by refiners or importers of gasoline. These obligated parties can comply with the renewable volume obligation by either producing renewable fuels, or purchasing sufficient RINs. Proponents of landfill gas D3 RIN credits are waste operators, RNG distributors and CNG fleet operators, and the American Biogas Council while opponents include petroleum refiners and sometimes corn ethanol producers who compete for other environmental compliance credits.

The politics behind the environmental compliance credits which benefit the Waste Industry are not as strong as those that benefit the corn ethanol industry. States who grow corn have an important farming constituent base that support ethanol which drives significant corn demand, often placed in swing states, giving it strong political backing. Nonetheless, landfill gas D3 RIN credits have credible support—infrastructure operators, municipal governments, union labor, CNG fleet producers and operators—that make it politically inexpensive to maintain. To date, the legislation has remained despite both republican and democratic presidential administrations.

While recategorization or getting rid of D3 credits are unlikely, political risks still exist, mainly around how renewable volume obligations are set. Since 2022 the Clean Air Act directs the EPA, while working with the Secretary of Energy and Agriculture, to determine volume targets for D3 RIN credits using a process that gives the administration significant discretion. Volume levels themselves are set, small refinery exemptions (a negative for demand), and retroactive waivers issued if production falls short of the mandate, all of which are levers that could work to suppress or increase RIN prices. The debate around D3 credits is less around whether the program survives and more how the EPA calibrates demand year over year, making the annual volume setting process a very important variable in determine RNG project returns. In April 2026 the EPA finalized volume through 2027, meaning the next rule making cycle will address 2028 volumes.

EXHIBIT 8: The 2014 modification to EPA's Renewable Fuel Standard that added landfill gas as a cellulosic biofuel and created the D3 RIN opportunity was the primary catalyst for WM's strategic shift from landfill gas-to-electricity to RNG development, a pivot the company formally accelerated in 2017.

Source: Company filings (WM Sustainability Growth Investment Program 2023)

Different RNG Strategies - Wholly owned (WM), JV-owned (RSG), and a Hybrid strategy (WCN)

Waste Management was an early strategic leader in RNG. The company initially announced plans to invest \$825m in RNG infrastructure between 2022 and 2025, targeting the development of 17 plants expected to generate \$400m in run-rate operating EBITDA in 2026. At its Sustainability Investor Day in early 2023, management increased its targets, raising planned RNG-related capex to \$1.215bn over the same period. This update expanded the target to 20 facilities and increased the expected incremental EBITDA contribution to \$500m from RNG. By June 2025, Waste Management reaffirmed its \$500m incremental EBITDA target but pushed the timeline for achieving this run rate to 2027. Waste Management initially guided to \$760-\$800m in incremental EBITDA from Sustainability projects including recycling automation and growth initiatives. However, this outlook is now closer to \$700m, reflecting headwinds from higher electricity costs and weaker commodity prices, with 23 facilities.

Republic Services set RNG targets in 2022 shortly after Waste Management, announcing a joint venture with Archaea to build 17 landfill gas projects and generate \$100m in revenue by the end of the decade. The company is pursuing its RNG projects through partnerships with British Petroleum-owned Archaea Energy and Ameresco, leveraging their Renewables expertise. At the end of last year, Republic Services reported 45 landfill gas-to-RNG projects under development expected to come online in the coming years. Republic Services also has a long-standing 20+ year partnership with Ameresco that provided the foundation for a JV to accelerate RNG development. So far the two have completed 16 RNG facilities across the US. Landfill gas to energy projects are expected to scale through 2029 from an estimated \$20m incremental EBITDA in 2025 to \$120m incremental EBITDA annually in 2029.

Waste Connections has a more conservative hybrid equity structure, owning and operating one-third of the projects, while outsourcing and collecting royalties on the remaining two-thirds—lowering execution risk but also decreasing potential upside. Waste Connections signed its first facility agreement with Vision RNG in late 2022 signaling its intention to build out RNG infrastructure. FY2022 capex included \$75m for Sustainability initiatives, and in 2023 the company announced a \$200m investment in 12 RNG facilities expected to generate \$200m in incremental annual EBITDA by FY2026, later pushed to FY2027. At the current RIN price, the target is implied to be \$150m-\$200m run-rate EBITDA by FY2027. Long term, management sees opportunity for a total of 15-20 RNG facilities.

Waste Management's early efforts gave them a first-mover advantage and a several-year head start compared to peers, which in part explains why peers took the JV route, which expedited their RNG investment process. Note this strategy is also risk-reducing—construction is faster and going forward operated by an energy company—but also splits the economics with another party. To minimize D3 RIN pricing risk, Waste Management pre-sells 50-60% of its expected volumes before entering the year, and has 80-90% locked in by the middle of the year, leaving a modest open exposure to the spot market.

THE LANDFILL GAS PRODUCTION AND CONVERSION PROCESS

Organic waste within landfills decomposes, producing a gas that is ~50% methane and ~50% carbon dioxide—in total landfills contribute almost 15% of US methane emissions (Exhibit 9). The gas is extracted using wells that have been retrofitted into the landfill and transported to a collection header, where it is processed and purified. Any LFG that is unviable for use is flared to satisfy regulatory and safety requirements.

On average, about 30% of total methane emissions occur while the landfill is in operation, which can last 20+ years. Typically, 50% of total gas production occurs in the first 30 years after the landfill closure, with the remaining 20% produced gradually over the following century. Often, this means that only half of the gas emitted from a landfill is available for collection, and collections systems are built later into a landfill's life (Exhibit 10).¹ According to EPA estimates, landfill closures are expected to accelerate over the coming decade, suggesting methane production levels should also accelerate (Exhibit 11).

Landfill size, access to pipeline infrastructure, and age are key factors determining the economic viability of RNG investments. For Waste Management, planned RNG investments are at landfills that are 2.0-2.5x larger than its median landfill, as initial fixed investments (pipeline infrastructure, separation systems, etc.) are large costs that need to be justified. Location matters as well—roughly 50-80% of RNG facilities are located in the Southern US where existing pipeline infrastructure is well-developed, as close vicinity to long-haul gas transmission pipelines is essential. Waste in place, related to age, is also an important factor—the more trash decomposing the better, ideally between 5-15 years of age. Taken together, these criteria,

¹ "Methanotrophic Oxygen Dependency and Availability for Sustained Oxidation" by Abdulazize Alshareedah and P. Salli

along with other data, provide a framework for identifying future RNG opportunities.

We see additional EBITDA upside from RNG investments of \$500m-\$800m for Waste Management, \$200m-\$400m for Waste Connections, and \$75m-\$100m for Republic Services beyond what the companies have already announced. Waste Management and Waste Connections have similar upside, an additional 8-10% of incremental EBITDA versus FY2025E, with Republic Services closer to 5-6%. These RNG investments are in addition to the \$470m-\$500m FY2027 EBITDA announced by Waste Management, \$200m FY2027 for Waste Connections, and \$120m by FY2029 for Republic Services. Waste Management has the greatest RNG whitespace, with planned RNG investments on ~10% of its landfill footprint, below ~20% for Waste Connections and Republic Services. However, Waste Connections prioritized smaller landfills first, unlike peers, with a strong pipeline of larger landfills ahead.

We would caution using this analysis as hard estimates. Although the science and economics of methane production are well understood, RNG investments lack consistent standards across projects. Instead, many metrics matter in assessing attractive investments, leaving some level of subjectivity in estimating future projects and revenues associated with them.

SIZING THE RNG OPPORTUNITY FROM HERE

We believe Waste Management, Waste Connections, and Republic Services have a healthy runway to expand RNG production beyond current targets. While our Waste companies do not lay out explicit facility criteria, our analysis appropriately looks at landfill size, age, expected landfill closure year, geographic location, capacity used and remaining, and LFG percent methane as relevant considerations for new RNG plants.

We initially expected each company to have consistent criteria for RNG plants at its landfills. While we find a number of similarities among each as we laid out earlier in today's note, the criteria vary widely and there is no "one-size-fits-all" landfill for an RNG plant. We view this as a positive as it gives our Waste companies a long runway to pursue strategic opportunities across their assets.

Using criteria for each company, we identify the following landfills as potential RNG investments. Note we use minimum size and number of years left as the main factors based on existing plants, making our assessment of future projects more broad.

Waste Management: Our initial analysis identified 13 landfills with similar characteristics—based on size, age, and gas distribution—to Waste Management's Fairless plant, which management describes as, "the crown jewel of (their) network." Assuming similar economics to Waste Management's 2027 targets—\$470- \$500m EBITDA from 25m MMBtu—we estimate these 13 landfills could collectively generate 40-50m MMBtu, translating to more than \$800m of incremental EBITDA. **Expanding this analysis to landfills with similar criteria to other existing plants including landfill size and remaining life, we identify 12 landfill candidates that we estimate could drive 30m-40m MMBtu of RNG or \$600m-\$800m incremental EBITDA.**

Waste Connections: Based on our analysis we identify 13 potential RNG plant candidates that could contribute \$200m-\$400m in incremental EBITDA beyond 2027. Management has not discussed potential RNG investments beyond the FY2027 guidance but similar to Waste Management we see potential for further growth. EBITDA contribution from the company's 10 existing plants is likely de minimis through 2026 suggesting Waste Connections's 12 new plants in development will drive the bulk of the growth which we expect to impact financial starting in 2027. We estimate incremental plants will add \$150-200m in EBITDA in 2027 using a \$1.90-\$2.50 RIN price and 80 MMBtu of RNG annual (6-7 MMBtu per plant annually). Applying these assumptions to unannounced RNG plants beyond 2027, we see potential for 13 additional RNG facilities to add 15m-20m MMBtu of RNG annually or \$250m-\$300m incremental EBITDA.

Republic Services: We identify 12 potential RNG facilities that we believe could add \$75m-\$100m in incremental EBITDA beyond 2029. Republic Services is targeting 45 RNG projects and \$120m in annual incremental EBITDA by 2029. Republic Services's RNG plants at the Lee County, Roxana, and Charlotte Motor Speedway landfills are expected to generate between 1.2m and 1.4m MMBtu of RNG annually each, or an estimated 28,000 MMBtu per ton of waste per year based on their size. Looking beyond management's current guidance through 2029 we believe potential RNG plants could drive 30m-40m MMBtu of RNG or \$100m incremental EBITDA annually.

DISCLOSURE APPENDIX

I. REQUIRED DISCLOSURES

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社) and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY**Waste Management Inc**

We value Waste Management based on a combination of a three-stage discounted cash flow analysis (DCF) and a comps-based analysis of forward EV/EBITDA and P/FCF multiples. We set a \$260 target price using an EV/EBITDA multiple of 14.5x against our NTM+1 EBITDA estimate of \$9,045m, a P/FCF multiple of 25.0x against our NTM+1 FCF estimate of \$4,433m, and a DCF using a WACC of 7.4% and a terminal growth rate of 2.5%.

Republic Services Inc

We value Republic Services based on a combination of a three-stage discounted cash flow analysis (DCF) and a comps-based analysis of forward EV/EBITDA and P/FCF multiples. We set a \$220 target price using an EV/EBITDA multiple of 13.5x against our NTM+1 EBITDA estimate of \$6,023m, a P/FCF multiple of 26.0x against our NTM+1 FCF estimate of \$3,026m, and a DCF using a WACC of 7.4% and a terminal growth rate of 2.5%.

Waste Connections Inc.

We value Waste Connections based on a combination of a three-stage discounted cash flow analysis (DCF) and a comps-based analysis of forward EV/EBITDA and P/FCF multiples. We set a \$205 target price using an EV/EBITDA multiple of 17.0x against our NTM+1 EBITDA estimate of \$3,637m, a P/FCF multiple of 29.0x against our NTM+1 FCF estimate of \$1,857m, and a DCF using a WACC of 7.2% and a terminal growth rate of 2.5%.

RISKS**Waste Management Inc***Downside Risks:*

- Management is unable to revitalize a challenged Stericycle business
- Delays in construction of new facilities reduce sales and EBITDA estimates
- Weak industrial activity impacting waste volumes
- Competition within Residential waste increases, weighing on margins

Republic Services Inc*Upside Risks:*

- Collection segment volumes rebound faster than expected
- Management could surpass sustainability targets ahead of plan

- Contract rationalization may have a larger than anticipated impact on margins

Downside Risks:

- Persistent competition and weak end markets could lead to further volume losses in its Collection segment
- Declining commodity prices for recycled products could weigh on profitability
- Executional missteps by WM could force WM to be more competitive on pricing, hurting industry margins

Waste Connections Inc.

Downside Risks:

- Growth decelerates due to an unattractive M&A backdrop
- Incremental cost headwinds occur from the Chiquita Canyon Landfill
- Construction delays in sustainability initiatives reduce FY26 FCF estimates
- Continued worsening industrial volume weakness

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIA) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 500 Banks And Financial Services Index (BEBANKS) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 500 Insurance Index (BEINSUR) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, and the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments. Ratings are stated relative to the

sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/- 10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- Credit Outperform (C-OP): The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- Credit Neutral (C-N): The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- Credit Underperform (C-UP): The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e. the private side) within the Firm, and into other areas, units, groups or affiliates (i.e. public side) of the Firm

DISTRIBUTION OF EQUITY RATINGS/INVESTMENT BANKING SERVICES

Equity Rating	Market Abuse Regulation (MAR) and FINRA Rating Category	Global Rating Distribution	Investment Banking Relationships*
Outperform	BUY	51.2%	15.3%
Market-Perform (Bernstein Brand) Neutral (Autonomous Brand)	HOLD	35.8%	16.2%
Underperform	SELL	13.1%	13.6%

* These figures represent the percentage of companies within each equity rating category for which affiliates of Bernstein have provided investment banking services within the previous 12 months.
As of June 30, 2026. All figures are updated quarterly.

PRICE CHARTS / RATINGS AND PRICE TARGET HISTORY

All price target and closing price data in the chart(s) above are denominated in the currency noted in the Ticker Table of this report.

OTHER MATTERS

The legal entity(ies) employing the analyst(s) listed in this report, and their location, can be determined by the country code of their phone number, as follows:

- +1 Bernstein Institutional Services LLC; New York, New York, USA
- +44 Bernstein Autonomous LLP; London UK
- +212 Société Générale Africa Technologies & Services; Casablanca, Morocco
- +33 BSG France S.A.; Paris, France
- +34 BSG France S.A.; Madrid, Spain
- +41 Bernstein Autonomous LLP; Geneva, Switzerland
- +49 BSG France S.A.; Frankfurt, Germany
- +91 Sanford C. Bernstein (India) Private Limited; Mumbai, India
- +852 Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司; Hong Kong, China
- +65 Sanford C. Bernstein (Singapore) Private Limited; Singapore
- +81 Sanford C. Bernstein Japan KK; Tokyo, Japan

Where this report has been prepared by research analyst(s) employed by a non-US affiliate, such analyst(s), is/are (unless otherwise expressly noted below) not registered as associated persons of Bernstein Institutional Services LLC or any other SEC-registered broker-dealer and are not licensed or qualified as research analysts with FINRA. Accordingly, such analyst(s) may not be subject to FINRA's restrictions regarding (among other things) communications by research analysts with a subject company, interactions between research analysts and investment banking personnel, participation by research analysts in solicitation and marketing activities relating to investment banking transactions, public appearances by research analysts, and trading securities held by a research analyst account.

Where this report has been prepared by research analyst(s) employed by Société Générale Africa Technologies & Services (part of the Société Générale group of companies), it has been prepared on behalf of a Bernstein company under a Global Services Agreement in place between Bernstein and Société Générale.

CERTIFICATION

Each research analyst listed in this report, who is primarily responsible for the preparation of the content of this report, certifies that all of the views expressed in this publication accurately reflect that analyst's personal views about any and all of the subject securities or issuers and that no part of that analyst's compensation was, is, or will be, directly or indirectly, related to the specific

recommendations or views in this publication.

II. ADDITIONAL GLOBAL CONFLICT DISCLOSURES

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e., the private side) within the Firm, and into other areas, units, groups or affiliates (i.e., public side) of the Firm.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for “Bernstein” and “Autonomous” research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the “Autonomous” and “Bernstein” brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.
- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to “Autonomous” branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.

This report has been produced by an independent analyst as defined in Article 3 (1)(34)(i) of EU 596/2014 Market Abuse Regulation (“MAR”) and the same article of MAR as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018.

To our readers in the United States: Bernstein Institutional Services LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission (“SEC”) and a member of the U.S. Financial Industry Regulatory Authority, Inc. (“FINRA”) is distributing this publication in the United States and accepts responsibility for its contents. Where this material contains an analysis of debt product(s), such material is intended only for institutional investors and is not subject to the US independence and disclosure standards applicable to debt research prepared for retail investors.

Bernstein Institutional Services LLC may act as principal for its own account or as agent for another person (including an affiliate) in sales or purchases of any security which is a subject of this report. This report does not purport to meet the objectives or needs of any specific individuals, entities or accounts.

To our readers in Canada: If this publication pertains to a Canadian domiciled company, it is being distributed in Canada by Sanford C. Bernstein (Canada) Limited, which is licensed and regulated by the Canadian Investment Regulatory Organization. If the publication pertains to a non-Canadian domiciled company, it is being distributed by Bernstein Institutional Services LLC, which is licensed and regulated by both the SEC and FINRA, into Canada under the International Dealers Exemption.

This document may not be passed onto any person in Canada unless that person qualifies as “permitted client” as defined in Section 1.1 of NI 31-103.

To our readers in Brazil: This report has been prepared by Bernstein Institutional Services LLC, and Banco BTG Pactual S.A. (“BTG”) is responsible for the distribution of this report in Brazil.

To readers in the United Kingdom: This publication has been issued or approved for issue in the United Kingdom by Bernstein Autonomous LLP, authorised and regulated by the Financial Conduct Authority and located at 60 London Wall, London EC2M 5SH, +44 (0)20-7170-5000. Registered in England & Wales No OC343985.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the “Financial Promotion Order”), (ii) are persons falling within Article 49(2)(a) to (d) (“high net worth companies, unincorporated associations, etc.”) of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement

to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

To our readers in the member states of the EEA: This publication is being distributed by BSG France SA, which is authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and Autorité des Marchés Financiers (AMF).

To our readers in Hong Kong: This publication is being distributed in Hong Kong by Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, which is licensed and regulated by the Hong Kong Securities and Futures Commission (Central Entity No. AXC846) to carry out Type 4 (Advising on Securities) regulated activities and subject to the licensing conditions mentioned in the SFC Public Register (<https://www.sfc.hk/publicregWeb/corp/AXC846/details>). This publication is solely for professional investors, as defined in the Securities and Futures Ordinance (Cap. 571). The purpose of this report is solely to provide an analysis of the issuers referred to in this report and is not intended for any purpose contrary to the laws of Hong Kong.

To our readers in Singapore: This publication is being distributed in Singapore by Sanford C. Bernstein (Singapore) Private Limited, only to accredited investors or institutional investors, as defined in the Securities and Futures Act 2001 of Singapore (“SFA”). Recipients in Singapore should contact Sanford C. Bernstein (Singapore) Private Limited in respect of matters arising from, or in connection with, this publication. Sanford C. Bernstein (Singapore) Private Limited is regulated by the Monetary Authority of Singapore and licensed under the SFA as a capital markets services licence holder for dealing in capital markets products that are securities and collective investment schemes and an exempt financial adviser for advising on, issuing and promulgating analyses and reports on securities. Sanford C. Bernstein (Singapore) Private Limited is registered in Singapore with Company Registration No. 20213710W and located at 8 Marina Boulevard, #12-01, Marina Bay Financial Centre, Singapore 018981, +65-6326-7000.

To our readers in the People’s Republic of China: The securities referred to in this document are not being offered or sold and may not be offered or sold, directly or indirectly, in the People’s Republic of China (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan, the “PRC”) in contravention of any applicable laws of the PRC.

This document does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC to any person to whom it is unlawful to make the offer or solicitation in the PRC.

We do not represent that this document may be lawfully distributed, or that any securities may be lawfully offered, in compliance with any applicable registration or other requirements in the PRC, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by us which would permit a public offering of any securities or distribution of this document in the PRC. Accordingly, the securities are not being offered or sold within the PRC by means of this document or any other document. Neither this document nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations.

To our readers in Japan: This publication is being distributed in Japan by Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社), which is registered in Japan as a Financial Instruments Business Operator with the Kanto Local Finance Bureau (registration number: The Director-General of Kanto Local Finance Bureau (FIBO) No.3387) and regulated by the Financial Services Agency. It is also a member of Investment Management Association of Japan. This publication is solely for qualified institutional investors in Japan only, as defined in Article 2, paragraph (3), items (i) of the Financial Instruments and Exchange Act.

For the institutional client readers in Japan who have been granted access to the Bernstein website by Daiwa Securities Group Inc. (“Daiwa”), your access to this document should not be construed as meaning that Bernstein is providing you with investment advice for any purposes. Whilst Bernstein has prepared this document, your relationship is, and will remain with, Daiwa, and Bernstein has neither any contractual relationship with you nor any obligations towards you.

To our readers in Australia: Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is responsible for distributing research in Australia. It is regulated by the Securities and Exchange Commission under U.S. laws, by the Financial Conduct Authority under U.K. laws, which differs from Australian laws. Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 in respect of the provision of the following financial services to wholesale clients:

- providing financial product advice;
- dealing in a financial product;

- making a market for a financial product; and
- providing a custodial or depository service.

To our readers in India: This publication is being distributed in India by Sanford C. Bernstein (India) Private Limited (SCB India) which is licensed and regulated by Securities and Exchange Board of India ("SEBI") as a research analyst entity under the SEBI (Research Analyst) Regulations, 2014, having registration no. LEGAL

All research publications are disseminated to our clients through posting on the firm's password protected websites, bernsteinresearch.com and autonomous.com. Certain, but not all, research publications are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience.

This publication has been published and distributed in accordance with the Firm's policy for management of conflicts of interest in investment research, a copy of which is available from Bernstein Institutional Services LLC, Director of Compliance, 245 Park Avenue, New York, NY 10167. Additional disclosures and information regarding Bernstein's business are available on our website www.bernsteinresearch.com.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. This publication is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of, or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject any of the entities referenced herein or any of their subsidiaries or affiliates to any registration or licensing requirement within such jurisdiction. This publication is based upon public sources we believe to be reliable, but no representation is made by us that the publication is accurate or complete. We do not undertake to advise you of any change in the reported information or in the opinions herein. This publication was prepared and issued by entity referred to herein for distribution to eligible counterparties or professional clients. This publication is not an offer to buy or sell any security, and it does not constitute investment, legal or tax advice. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with their professional advisors in light of their specific circumstances. The value of investments may fluctuate, and investments that are denominated in foreign currencies may fluctuate in value as a result of exposure to exchange rate movements. Information about past performance of an investment is not necessarily a guide to, indicator of, or assurance of, future performance.

This report is directed to and intended only for our clients who are "eligible counterparties", "professional clients", "institutional investors" and/or "professional investors" as defined by the aforementioned regulators, and must not be redistributed to retail clients as defined by the aforementioned regulators. Retail clients who receive this report should note that the services of the entities noted herein are not available to them and should not rely on the material herein to make an investment decision. The result of such act will not hold the entities noted herein liable for any loss thus incurred as the entities noted herein are not registered/ authorised/ licensed to deal with retail clients and will not enter into any contractual agreement/arrangement with retail clients. This report is provided subject to the terms and conditions of any agreement that the clients may have entered into with the entities noted herein. All research reports are disseminated on a simultaneous basis to eligible clients through electronic publication to our client portal.

The information in this report was prepared by Bernstein solely for the internal business use of our clients. Clients may store, display, analyze, reformat and print the information in this report for this limited use only. Clients may not copy, alter, create derivative works, resell, reverse engineer, commercially exploit, share or distribute any part of the information contained herein for any purpose without Bernstein's express written consent. These restrictions include extracting data or using the content to develop indices or other products. Further, you may not use this report, or any portion of this report, to train or finetune any third-party machine learning or artificial intelligence system, or as a prompt or input into any such system. You also may not, without Bernstein's express written consent, do any of the foregoing in connection with your own internal machine learning or artificial intelligence system.

Bernstein may use artificial intelligence tools in the preparation of its materials. Any such materials are reviewed by Bernstein's research analysts prior to publication.

This report has been prepared for information purposes only and is based on current public information that we consider reliable, but the entities noted herein do not warrant or represent (express or implied) as to the sources of information or data contained herein are accurate, complete, not misleading or as to its fitness for the purpose intended even though the entities noted herein rely on reputable or trustworthy data providers, it should not be relied upon as such. Opinions expressed are the author(s)' current opinions as of the date appearing on the material only and we do not undertake to advise you of any change in the reported information or in the opinions herein.

Any references to Societe Generale herein are purely factual, based upon publicly available information, and included for comparative purposes only. They do not constitute an opinion or recommendation with respect to the securities of Societe Generale.

This publication was prepared and issued by the entity referred to herein for distribution to eligible counterparties or professional clients. The information in this report is intended for general circulation and does not constitute an offer to buy or sell any security, investment, legal or tax advice nor a personal recommendation, as defined by any of the aforementioned regulators. It does not take into account the particular investment objectives, financial situations, or needs of individual investors. The report has not been reviewed by any of the aforementioned regulators and does not represent any official recommendation from the aforementioned regulators. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with advice sought from a financial adviser regarding the suitability of the investment product, taking into account the specific investment objectives, financial situation or particular needs of any recipient of the recommendation, before the recipient makes a commitment to purchase the investment product.

The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The information in this report does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, or to induce engagement in any other investment activity. The value of any securities or financial instruments mentioned in this report may fluctuate subject to market conditions. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
