

Yingliu (603308.SS): 2Q26 Preview: Slight capacity expansion in June with more to come in 2H26, with long-term agreements extended; Buy

We revise our 2026–30E EPS forecasts down by c.10–11%, mainly reflecting an updated revenue ramp based on the company's latest capacity-expansion schedule, as well as more limited pricing actions as management prioritizes volume growth and strategic market-share gains.

Previewing 2Q26 earnings, we forecast 2Q26 revenue of Rmb916mn, up 27% yoy. With gross margin recovering modestly to 34.5% from 33.7% in 1Q26, we expect net profit of Rmb118mn, up 23% yoy.

In our view, the key market debate has shifted away from Yingliu's company-specific execution toward the sustainability of global gas-turbine order growth. We maintain our Buy rating following the recent correction. The stock is trading at 38.6x 12-m forward P/E, with approximately 20% downside to its historical trough multiple of 30x but materially greater upside with visibility extending to 2028–29 and beyond (our target multiple implies 88% upside), should hyperscalers provide better visibility on data center capex. Remain Buy with new 12-m TP at Rmb82.4.

2Q26 and 2H26 preview: Additional capacity to ramp in 2H26

We expect Yingliu's **two-engine business (gas turbine and aero-engine) to generate approximately Rmb420mn of production value in 2Q26**, based on monthly output of Rmb130–140mn in April and May and approximately Rmb150mn in June. Assuming the traditional business remains broadly stable, **we forecast total revenue of Rmb916mn, Rmb981mn and Rmb1,033mn in 2Q26, 3Q26 and 4Q26, respectively, representing yoy growth of 27%, 33% and 30%, which is based on the following capacity expansion plan.**

Capacity should continue to expand in 2H26 as three new pieces of equipment enter production. The first machine arrived on May 20 and is expected to complete commissioning in August. The second has arrived and is expected to commence production in September, while the third is scheduled to arrive on July 29 and begin production in October. Each machine could add approximately Rmb10mn of monthly production value after reaching normal utilization. Assuming the ramp proceeds broadly on schedule, quarterly two-engine production value could increase to approximately Rmb450–480mn in 3Q26E and Rmb480–530mn in 4Q26E vs c.Rmb400mn in 1Q26 and Rmb420 in 2Q26E.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

2Q26 margin preview: Raw-material pressure easing, but pricing remains stable

The company has partially passed higher raw-material costs through to customers, supported by contractual adjustment mechanisms in certain long-term agreements. However, management does not intend to pursue aggressive price increases with key strategic customers. Given the importance of long-term qualification, market-share gains and deeper customer relationships, Yingliu is prioritizing volume growth and supplier positioning over maximizing near-term pricing.

Nickel, cobalt and tungsten account for approximately 57%, 14% and LSD%, respectively, of raw-material costs within COGS. Their prices increased by approximately 19%, 67% and 322% yoy, while changing by +4%, 0% and -1% qoq.

As sequential raw-material pressure begins to ease and part of the cost increase is passed through, we expect gross margin to recover to 34.5% in 2Q26 from 33.7% in 1Q26. We forecast net profit of Rmb118mn, up 23% yoy. Margin improvement should remain gradual, as the company continues to prioritize strategic customer relationships and volume expansion over aggressive pricing.

Order momentum remains strong, with backlog continuing to expand

Yingliu's order momentum remained robust in 2Q26. Backlog increased slightly from approximately Rmb2.1bn at the end of 1Q26 to more than Rmb2.2bn currently, net of deliveries of roughly Rmb420mn of two-engine products in the quarter. This suggests that new order intake of roughly Rmb500mn in 2Q26, or ytd total of 1.34bn (45% run rate of previous full-year target of Rmb3bn, while the new target of Rmb4bn looks aggressive at this point). However, management indicated that they generally record firm orders only when they can commit to delivery within 52 weeks; longer-dated indications and framework agreements are not included in reported backlog.

2Q26 orders were roughly Rmb500mn, including Rmb100-200mn from Ansaldo (ytd Rmb450mn orders signed), rolling orders from Baker Hughes, new order with Shanghai Electric, prototyping orders with Doosan, and orders from Safran.

Long-term agreements with Baker Hughes renewed and new orders signed

Long-term agreements also extended with Baker Hughes: Yingliu recently renewed its long-term agreement with Baker Hughes through 2031. Compared with the previous agreement signed in June 2023, the renewed framework covers a broader product range and materially higher committed volumes. Under the latest agreement, expected monthly volumes include: c.14 sets per month across eight LT16 gas-turbine models; four sets per month across five MS5002E product categories; one set for the MS5001 and LM9000 platforms each.

This implies total annual deliveries of more than 200 sets once the agreement reaches its targeted run rate. The higher volumes are expected to begin converting into firm orders from 2027 and beyond for delivery in 2028 and beyond. Additionally on July 10, the company just certified for Frame5Max products, with a content value of several million RMB per unit, at 50% market share, and 4 sets of orders per month. Lastly, they are also starting to conduct R&D for LT12 products.

The Baker Hughes agreement also includes a raw-material adjustment mechanism. If raw-material prices move by more than 10%, product prices can be renegotiated, reducing Yingliu's exposure to significant alloy-price volatility.

Siemens Energy cooperation is moving from validation toward mass production

Yingliu's cooperation with Siemens Energy continues to deepen across both large and medium-sized gas-turbine platforms. The company expects all relevant 4000F prototypes to enter mass production during 2026. It is also developing components for the 8000H platform and progressing projects for the SGT-450, SGT-700 and SGT-800 medium-sized gas turbines. Beyond individual component programs, Yingliu and Siemens Energy are establishing a joint laboratory in Hainan.

Key debate: Has gas-turbine order growth peaked?

Although we continue to expect gas-turbine supply to remain tight beyond 2028-29, consistent with the current delivery lead times of major turbine OEMs, the market has increasingly shifted its focus toward the outlook for new order growth and whether the cycle has peaked in 2026.

We agree that order **growth** is unlikely to remain at the same exceptionally high level in 2027. However, we still expect **order level** to remain robust, supported by both the replacement cycle for turbines installed in the early 2000s and incremental demand from data centers. At its June 29 pre-close call, Siemens Energy indicated that, based on current visibility, it expects the global gas-turbine market to sustain annual demand of approximately 110-120GW over the coming years.

Near term, the key uncertainty is the limited visibility on hyperscaler capex beyond 2026. Until hyperscalers provide clearer spending plans for 2027 and beyond, we think investors may continue to treat Yingliu as a cyclical stock and value it closer to pre-AI multiples, which has contributed to the recent correction. The stock is already trading at 38.6x P/E, below its historical average of around 40x since 2018, with approximately 20% downside to its historical trough valuation of around 30x P/E.

However, once hyperscaler capex provides greater clarity on the durability of data-center power demand, we believe order visibility could extend again into 2028-29 and potentially beyond, supporting a more favorable rerating. At current levels, we continue to see the risk-reward as skewed to the upside.

Exhibit 1: Yingliu is trading at 38.6x P/E, slightly below historical average of 40x since 2018

TP, EPS revision: We revise down our 2026-30E EPS by c.10-11%. Accordingly, our 12-m TP moves lower to Rmb82.4 (from previously Rmb92.0), still based on 2030E P/E of 30X, discounted to 2027E at a COE of 10.0%.

Investment thesis, valuation methodology and risks

Yingliu (603308.SS, Buy)

Yingliu is a leading domestic high-end cast component supplier with <1% global share, leaving a long runway for growth. We expect U.S. AIDC to source up to ~60% of power from gas turbines, while global OEMs (Siemens Energy, GE Vernova, MHI) face severe capacity constraints, with turbine blades a key bottleneck due to stringent metallurgical requirements and supply concentration among Western suppliers (e.g., PCC, Howmet), who prioritize aerospace and face labor shortages. Yingliu is well positioned to capture demand spillover given available capacity, lower ASPs, comparable quality, and strong R&D and customer relationships, reinforced by expanded product development for Siemens Energy and long-term contracts with Baker Hughes, Ansaldo, and GE Aerospace. While still a complementary supplier relative to Western incumbents with single-digit global share by 2030E, improving product mix, scale, and asset turnover should drive GPM, NPM, and ROE expansion through the cycle. We forecast 28%/41% total sales/earnings CAGR in 2026E-30E and derive a 12m TP of Rmb82.4. We are Buy rated.

Valuation methodology: Our 12m target price of Rmb82.4 is based on 2030E P/E of 30x discounted back to 2027E at 10% CoE.

Key downside risks: (1) Capacity ramp-up comes in below expectations due to failure to improve yield rate or recruit skilled technicians; (2) Order intake growth below our expectations, potentially due to the long cycle to develop new SKU; (3) AIDC demand weakens with hyperscalers canceling orders for gas turbine manufacturers.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
