

GLOBAL RATES TRADER

Energy Speedbump

AI issuance and capex remain the structural focus for markets, but oil reemerged as the main driver of rates volatility this week. Long-end valuations are no longer rich in the US, and the investment backdrop should be a factor keeping yields higher, but there's little to suggest meaningful risk premium versus what macro and fiscal fundamentals imply. Near-term oil dynamics will likely dictate asymmetry around CPI, but our economists' benign expectations for the print can allow front-end risks to compress. The sell-off in European and UK front-end rates is a reminder that stalling on the progress of disinflation presents some risk for long positioning. We think that ECB pricing will oscillate around one hike, and prefer 1y1y for longs on the curve. In the UK, despite the risks to the front-end we continue to think the 2s10s curve will steepen in coming months. Greater GPIF demand could support JGBs from an NIIP perspective, but would likely fall short of addressing the underlying macro disequilibrium that has fueled JGB volatility this year.

United States and Canada

■ **Recent rate vol more oil than issuance.** Renewed escalation of the US-Iran conflict at least temporarily restored energy as the common global factor for markets, with US yields trading in relative lockstep with oil prices over the middle of the week ([Exhibit 1](#)). The larger sell-off further out the curve in the context of continued elevated corporate supply at the start of a typically quieter issuance period has helped to increase focus on the impact of AI-related borrowing on the broader level of yields. While the focus is understandable, and we have argued previously that a debt financed investment cycle should put upward pressure on yields, we would note the recent rebound in longer-term yields has taken US forwards from levels that were slightly rich to about fair. To the extent that rising borrowing is financing investment that is in turn boosting future growth expectations and adding to cyclical pressure, it should push our estimates of fair value higher. However, we think the lack of clear dislocation between the level of longer-term yields and what macro and fiscal fundamentals imply undercut the notion that the level of corporate borrowing is playing an outsized role in driving Treasury valuations. Fed officials' ongoing focus on the inflation side of the mandate puts the spotlight on next Tuesday's June CPI release. Energy prices will have some bearing on the degree of asymmetry surrounding the print, with higher oil leaving markets more vulnerable to a firmer print. That said, we think realizing our economists' projections for a 0.17% increase in core CPI alongside a

0.11% decline in headline CPI should compress the distribution of risks around front-end rates and erode hike pricing. With about 45bp of hikes priced through early-27 and Fed uncertainty premium already embedded in upper left vol, we think limited downside distributional structures that position for an on-hold Fed are sensible carry expressions here.

- **Front-end uncertainty a headwind to bill valuations.** 1-month bills remain well-supported, reflecting a period of seasonally low bill supply, favorable funding conditions and solid MMF AUM growth. At the same time, 3m and 6m bills have underperformed the very front-end as MMF WAM has skewed shorter (Exhibit 2), also reflected in modestly higher primary dealer take-up at auctions for term bills. We think higher policy uncertainty as the Fed's leadership redefines how much guidance to give around its reaction function is likely to keep WAM shorter for now, and 1m bills relatively rich. Our Bills-OIS valuation framework suggests that one day shorter WAM translates into ~0.1bp cheaper 3m/6m bills vs OIS, but richens 1m bills by 0.3bp. Heavier bill supply throughout the summer could also provide a headwind to valuations. But with money fund AUM expected to continue to grow given elevated policy rates and a generally flatter curve, and the cautious tone by SOMA Manager Perli likely indicative of greater willingness to wait before further slowing the pace of RMPs, we expect cheapening pressure in 3m and 6m bills to remain somewhat contained.

- **Dollar strength still a drag on foreign official demand.** Dollar strength remains a drag on foreign official Treasury demand, with both TIC and New York Fed custody holdings data pointing to continued net selling of USTs (Exhibit 3). That said, the selling pressure has had a limited impact on the broader market. Our FX strategists recently revised their Dollar forecasts stronger, suggesting Dollar performance may continue to weigh on foreign official demand. While those forecasts are differentiated across low- and high-yielders, we find little meaningful difference in foreign official UST flows based on the source of Dollar strength or weakness; typically, the broader Dollar backdrop matters most. As we have written, Dollar performance is a key driver of foreign official Treasury demand, and with sustained,

broad-based depreciation unlikely to return for some time, this demand may stay soft. However, a lower vol environment for the Dollar should keep outright selling contained.

- **No clarity, no outlook change for BOC after USMCA.** The decision to annually review the terms of USMCA seems to have dispelled some of deeper escalation concerns without offering much certainty around the Canadian outlook, leaving lingering trade policy concerns. With little additional clarity, our economists think this most likely keeps the BoC on hold next week and throughout this year. The BoC's Business Outlook Survey reflected a still soft underlying activity picture, but businesses also seem to be acclimating to a new normal rather than expecting further trade relief, while expectations on investment and the AI build-out also point to some optimism and the labor market appears to have stabilized. We think this should continue to push the CAD curve steeper, as markets focus on an eventual normalization (which our economists expect in 2H27). Following recent performance, we close our 2s5s steepener recommendation for a potential profit of 9bp incl carry and shift it out to 2s10s steepeners (Entry: 53bp, Target: 80bp, Stop: 40bp). We expect the underperformance to be led by 5y5y and think front-end pricing can decay over time (Exhibit 4).

Europe

- **Speed bumps on the decline in European vol.** The rally in European front-end rates ended abruptly this week as renewed strikes in Iran pushed energy prices higher. The emerging narrative was that the ECB may pass on future hikes, but with elevated volatility in energy markets, limited relief in refined products and ongoing upside risks to European gas prices, suggests that pricing in Z6 will oscillate around one more additional hike in September (our economists' base case). Even as the ECB is unlikely to hike in a way designed to tighten financial conditions materially, we continue to think there is more value in front-end flatteners, with about 15bps of hikes priced between October and June next year. Flattening exposure can work across a range of scenarios. A re-escalation in Iran would likely see markets pull forward hike pricing and place less relative weight on projection meetings. At the

same time, there is limited steepening risk given a gradual decline in inflation risk would erode cumulative hike pricing including to terminal rates. The main challenge to this view is that elevated long-end yields naturally bias the curve steeper via bear-steepening risk – for this reason we recommend pairing front-end flatteners vs short 2y2y rates. Or equivalently we believe EUR OIS 2y2y vs 1y1y steepeners offer good risk-reward in a world of steeper global curves.

- **OAT weakness on French elections premature.** European sovereign spreads have widened in recent weeks, and we recently hit the (tight) stop on our 3y BTP, Bono, OAT long vs OIS recommendation, which we've closed for a small potential gain from carry. This week French political focus and renewed front-end volatility have added to these headwinds, however we expect both to subside in coming months. As above, the ECB is likely to hike again but inflationary pressure does not appear high enough for future hikes to be designed to restrict growth, which reduces the risk to sovereign spreads. We also believe the hurdle is high for the market to stay focused on French politics this far away from the presidential elections. The RN Marine Le Pen's decision to run despite her conviction and to appeal her verdict may increase uncertainty around the RN's future policy platform, but at this stage of the campaign, polls are still imprecise and economic platforms have yet to be fleshed out. We also think differences in sensitivities between the RN candidates are small compared to the scale of France's fiscal challenges. Taken together, we think that means risk-reward is poor for shorts in OATs given the premium already priced and think that carry will continue to dictate returns over the coming months.
- **Euro-area money market crunch getting closer.** At a high level, we continue to think that Euro-area banks are adjusting smoothly to a lower liquidity environment. Borrowing at the ECB remains muted, but as liquidity continues to drain this may change in coming quarters. The number of bidders at the ECB's regular tenders has picked up, and an increasing number of bank treasurer report reserves are getting closer to their preferred level. A higher minimum reserve requirement (MRR) would reduce the level of excess liquidity, potentially leading to an increased demand for funding given the uneven distribution of reserves across the Euro area. We expect the liquidity drain to exert only a gentle pressure on money market rates and bases, however. The main reason for this is that we think broader conditions are not in place for a sharp widening; narrow spreads between financials and non-financials suggests bank credit risk is seen as low and macro-economic uncertainty is likely to trend lower. Against this, our empirical work suggests front-to-belly ESTR-BOR bases screen fair and are likely to widen only gradually over time (Exhibit 5).

Exhibit 5: Our analysis points to a modest widening pressure on ESTR-BOR basis

Source: Goldman Sachs FICC and Equities, Goldman Sachs Global Investment Research

- **UK front-end reprices on energy, but should rally back.** Limited data and central bank guidance this week left the UK front-end to respond to the repricing higher in energy prices. We think the front-end sell-off was likely exacerbated by long positioning, but is a reminder that stalling progress on energy relief remains a source of risk for BoE pricing. Nonetheless, we continue to think that the UK curve will continue to steepen as the hurdle for BoE hikes is unlikely to be met, but longer-run fiscal challenges will remain. Sticky risk premium is better expressed in curve trades than in Gilts on asset swap, in our view. Adjustments to the leverage ratio should create a modest tailwind for Gilts, by freeing up around £150bn of balance sheet capacity by our banks team estimates. At the current share of bank Gilt holdings, this would translate to a £2-3bn increase in Gilt holdings which is unlikely to make a difference to the level or relative yield on Gilts. But the indirect effect via the extension of leverage to the broader financial system offers more support, with carry on long Gilts on asset swaps offering reasonable risk reward in the 5y and 10y parts of the curve.

Japan

- **JGBs still on a steepening path.** 10y and 30y JGBs rallied close to 10bps following comments from Finance Minister Katayama suggesting that the government is “looking to pursue measures to encourage pension funds, including GPIF, to make further investments in Japanese financial assets.” GPIF currently holds about 26.9% of its assets in domestic bonds, slightly above the target allocation of 25%, but well within the +/-6pp deviation limit. Last week, GPIF President Uchida stated that the fund would not change its strategic asset allocation in response to short-term risk factors given solid performance; its domestic bond portfolio returned -5.1% versus sizable gains across domestic equities and foreign equities and bonds. While greater GPIF demand could support JGBs from an NIIP perspective, we are skeptical that it would fully address the underlying macro disequilibrium. Critically, most of this year’s cheapening in JGBs appears to have been macro-led rather than a function of supply/demand imbalances—long-end swap spreads have widened this year, likely supported by renewed buying from Lifers, but 30y bonds have still cheapened. From

that perspective, a shift from GPIF would be more likely to support 30s, which saw the brunt of the supply-led cheapening last year, but may have less impact further in on the curve where macro volatility has become increasingly dominant of late. Other reports this week that the Takaichi administration added a reference to “inflation stabilization” in the Basic Policy to ease concerns about its stance on BoJ independence garnered minimal reaction from JGBs. Fiscal dominance concerns have continued to see the curve steepen in Japan in contrast to the rest of G3, where curves have mostly flattened year-to-date, with the long-end underperformance not counteracted by easing in inflation pricing following the US-Iran MOU. In fact, 2s10s and 10y traded inflation have begun to decouple, suggesting that broader (not just inflation) risk premium is still on the rise ([Exhibit 6](#)). Through this, JPY has continued to weaken, and our FX strategists have revised their forecasts to show a JPY weakening trend over the next 12 months. Intervention remains likely and could exacerbate volatility in JGBs as limiting JPY depreciation necessarily means rates become the pressure release valve in markets. Provided fiscal dominance concerns remain in focus, the market seems likely to continue loading risk premium into the long-end, with the release of the Basic Policy this month a key focus.

Exhibit 6: JGB curve steepening and inflation pricing have started to decouple

Source: Goldman Sachs FICC and Equities, Goldman Sachs Global Investment Research

Exhibit 7: AUD forward rates should decouple from oil prices

Source: Goldman Sachs Global Investment Research, Goldman Sachs FICC and Equities

Australia and New Zealand

- **RBNZ kicks off mini-tightening cycle, but 2s10s still too flat.** The rise in oil following the resumption of hostilities in Iran has taken AUD forward rates higher. But with little spillover from energy prices to broader inflation so far and a front-footed policy response that has already delivered 75bp of tightening this year, we think the elevated correlation between oil and forward rates should weaken ([Exhibit 7](#)). Despite the uptick in forward yields, near-term RBA pricing has remained relatively stable, not providing the hedge we expected, taking our receive AUD 2y1y vs pay Aug RBA trade recommendation to its stop. However, we view any sell-off driven by higher energy prices (rather than underlying fundamentals) as an opportunity to reengage in longs further out the curve and still see good risk/reward for paying near-term meetings, especially if a renewed flare-up in oil prices push the

RBA to take a precautionary stance against inflation risk. In New Zealand, the RBNZ delivered the first of what our economists expect to be two hikes and guided towards further tightening ahead. While a September hike is the baseline, at 22bp priced we think risk/reward for paying is poor and prefer fading hike premium above one hike further out. The statement acknowledged that spare capacity will likely limit any inflation passthrough and energy prices pose a risk to consumption and investment. That should delay market expectations for an eventual return to a more neutral stance to take longer; we maintain our NZD 2s10s steepener recommendation.

Disclosure Appendix

Reg AC

We, George Cole, William Marshall, Simon Freycenet, Isabella Rosenberg, Friedrich Schaper and Loic Mathys, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: George Cole Goldman Sachs International, William Marshall Goldman Sachs & Co. LLC, Simon Freycenet Goldman Sachs Bank Europe SE - Paris Branch, Isabella Rosenberg Goldman Sachs & Co. LLC, Friedrich Schaper Goldman Sachs & Co. LLC, Loic Mathys Goldman Sachs International.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who

would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global

Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
