YOFC-H has fallen ~50% since the peak in June, yet the earnings trajectory underpinned by the AI-driven optical fiber super-cycle is unchanged. We believe the de-rating has created a compelling entry point.

Key Takeaways

- YOFC's positive profit alert announced July 14 suggests 2Q26 earnings at Rmb1.9-2.5 bn, making our full-year estimate of Rmb7.5bn highly likely to be achieved.
- We believe the share price correction has reflected concerns about supply risk; we think risk/reward has become more attractive.
- Our price target remains HK\$230, and we upgrade to OW.

YOFC is a leader in next-generation innovation: In June 2026, YOFC announced the world's first successful field trial of a hollow-core fiber (HCF) WDM transmission system capable of 1.2Tb/s per wavelength over an ultra-long unrepeated span, setting a new world record for capacity-distance product. We think this positions YOFC on the frontier of next-generation optical technology.

Supply risk has been well reflected after two large new project announcements: In our [previous report](#), we took a more conservative stance as we believed consensus was too positive on the stock, ignoring the supply risk. We highlighted that several overseas players are undertaking aggressive expansion. Although Chinese companies' expansion has been more conservative initially, historically high margins could attract newcomers, eventually leading to peer pressure and resulting in accelerated capacity expansion. In the past several weeks, we have observed two key new projects.

Additional discussion

1. Hoshine Silicon's project in Xinjiang, with annual 3,200-ton optical fiber preform, officially passed filing approval on June 8, 2026.

2. Han's Laser has a project in Zhangjiagang, involving annual production capacity of 2,000 tons of optical fiber preforms.

We believe those new projects have raised investors' concerns about supply risk, which we consider a key fundamental reason for the recent de-rating.

In [our report dated June 2](#), we highlighted the reasons why we did not upgrade the H-shares to OW. We believe historically high margin (41.5% in 1Q26, 47%-57% in 2026-28 vs. 19%-31% from 2015 to 2025) will encourage supply addition, which makes fiber prices more likely to decline in 2028. If so, the company is likely to see earnings decline, which is why we made such a forecast.

However, we think capacity expansion will take time while demand from the AI infrastructure boom is robust. If so, earnings growth momentum is unlikely to see any material changes in the next 6-12 months. We believe the robust earnings release will be the key re-rating catalyst in the coming quarters.

MS vs. Consensus

Compared with consensus, our estimates are 10% higher in 2026 and 27% higher in 2027. This reflects our more positive stance on near-term earnings momentum. The latest results in 2Q26 suggest our above-consensus forecasts are highly likely to be achieved.

Valuation range

Using historical valuation as the benchmark, we find that YOFC traded in a 5x-38x forward P/E range across the cycle from 2020 to 2025. We believe the significant share price rally since 4Q25 reflected investors' more bullish earnings expectations. With the recent pullback of ~50% from the June peak, the current forward P/E has declined from 34x to 20x, slightly above the historical average of 17x but below +1 STDEV level.

Exhibit 2: YOFC – Forward P/E

Source: Factset, Morgan Stanley Research

Note: P/E is calculated as total market cap of A and H shares divided by the company's net income.

Key catalysts

We expect the company to record continuous earnings improvement, serving as a key catalyst in 2H26. We also expect the introduction of new fiber products in AI data infrastructure, such as hollow-core fiber, to not only introduce positive revenue/earnings impact, but also trigger valuation re-rating.

What could we be wrong?

If AI infrastructure demand is weaker-than-expected while new fiber capacity expansion is faster-than-expected, the industry cycle could change earlier than our expectation. Under such a scenario, the earnings recession cycle might start sometime in 2027, potentially capping share performance.

UNDERWEIGHT THESIS

- We see optical fiber entering a strong up-cycle, supported by AI-driven demand and tight supply conditions.
- The AI demand outlook is structural, but demand from drones is uncertain and sensitive to geopolitical factors.
- While near-term fundamentals remain robust, we expect increasing risks of cycle normalization as capacity expansion accelerates globally.
- However, we are UW on the A-shares relative to our coverage because valuation appears full. We consider the premium of more than 100% to the H-shares as too expensive for fundamentals to justify.

BULL CASE

Rmb369.32

41x base case 2026e EPS

Super cycle created by robust AI demand: We expect the AI infrastructure boom to create a super-cycle on the demand side while capacity expansion is slower-than-expected with execution issues. If so, the historical high margin could be sustained for a couple of years, which could make earnings grow beyond Rmb10bn to Rmb15-20bn.

BASE CASE

Rmb202.25

23x base case 2026e EPS

Margin improvement in 2H26 and 1H27: We expect the margin to further increase in 2H26 and 1H27, after which it is likely to turn south following the global capacity expansion and cycle normalization. However, we don't expect a sharp margin correction back to the historical average. The AI boom is likely to keep the margin at or a bit above the high end of the historical range.

BEAR CASE

Rmb87.94

10x base case 2026e EPS

Earlier-than-expected cycle normalization: We expect the cycle normalization to arrive earlier than expected, which could make Rmb10bn earnings unachievable. Once the earnings downturn starts, the margin contraction could trigger a significant de-rating.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1544	42%	453	49%	29%	757	44%
Equal-weight/Hold	1577	43%	390	42%	25%	769	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	544	15%	89	10%	16%	204	12%
Total	3,668		933			1731	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.
