Value Retailers 1H26/2Q26 Preview: Raise earnings on robust store open pace and resilient SSSG; Reiterate Buy

Our value retailer coverage (Busy Ming/Wanchen) share prices have rebounded 29%/18% from recent lows, but still c.15% below the previous peak in mid-May. **We see upside to 1H26 earnings driven by faster-than-expected store expansion (c.4,500+ gross opens for each in 1H26 on GSe, see tracker in [Exhibit 2](#)) while we expect per-store average GMV to remain largely resilient in 1H26 (with help from LNY seasonality, despite weather impact in 2Q) and healthy SSSG.** We currently **expect 54%/98% 1H26 sales/adjusted NP growth for Busy Ming and 41%/102% 2Q26 sales/pre-MI NP growth for Wanchen**, respectively. We reiterate that the TAM remains vast with substantial room for further penetration and category expansion (in [our view](#), industry-wide stores have the potential to reach up to c.100k in the long term vs. c.68k by end of 2026E on GSE).

1) Faster-than-expected store network scaling by the two leaders: Store openings accelerated YoY with [Wanchen](#) gross open above 2025 full year (c.4.7k) and Busy Ming also at 4.5k+ per our tracker vs 1.5k/2.5k gross open in 1H25, with accelerated monthly opening (monthly gross open sped up to 1k+ in May/Jun) ahead of upcoming summer school holiday season. **The store open is mainly from** cultivating stronghold markets (differentiation for leaders), exploring white space in low tier/under-penetrated area as well as taking market share from smaller regional players, ie. Wanchen emphasized that store-opening locations in 1H26 remains differentiated vs. competitors with 70% of openings concentrated in its stronghold markets (Yangtze River Delta/Shanhe Four Provinces). We noted that both [industry leaders remain rational](#) and disciplined over store-open subsidies, with special subsidies only approved for special location/regions. **Moving forward**, we expect both players to continue prioritizing health per-store GMV performance, but still looking for sufficient space to sustain the store opening pace into 2H26.

- **Our long-term view of still substantial industry store runway intact:** We project the industry store network to expand to 68k by end-2026 and c.80k outlets by 2028E, representing a +15% CAGR from 2025-28E, with we reiterate a long-term addressable space exceeding 100k stores. Meanwhile, we also expect leaders Busy Ming/Wanchen to grow the combined market share to 80% in 2026 (up from 70%+ in 2024-25) leveraging advantages in network scale/store mgmt expertise to gain share from smaller regional players (our tracker showed very limited store expansion in 2026YTD for smaller chains).

2) Resilient SSSG trends in 1H26/2Q26 on concrete growth

initiatives/better-than-feared traffic dilution: We expect 1H26 avg. per-store GMV still positive in both companies supported by: **i)** strong Jan-Feb CNY trading with HSD% per-store GMV growth per mgmt; **ii)** continued ramp up in SSSG of existing stores; **iii)** improved site selection quality in a more rational competitive environment; and **iv)** an easy comp, given per-store GMV declined MSD%/teens% in 1H25 for Busy Ming/Wanchen. That said, both players noted unfavorable impact on per-store GMV from weather/pax mobility especially in June/Late 2Q.

- **Into 2H**, we expect avg. per-store GMV growth to moderate sequentially vs. 1H26 on a higher comp base (Busy Ming/Wanchen returning to positive per store GMV in 3Q/4Q25), while we expect both companies to continue prioritizing store health and franchisee margins, and **category expansion/portfolio upgrades to support per-store GMV** (ie. both successfully added cold-chain and chilled/frozen categories, ie. at c.3% of total GMV for Wanchen).

3) Store UE remains healthy (key support to store open acceleration) while margin expansion runway intact: we highlight that store-level franchisee GPM has stayed stable or improved under disciplined pricing, while payback periods remain attractive (e.g., c.2 years). At the franchiser level, we continue to expect procurement scale and logistics optimization to further support GPM expansion, while **allowing franchisees to preserve attractive returns by sharing the gains in a more efficient industry value chain (F&B brands offering attractive pricings to value retailers channels to enjoy scalability/high channel growth/opex saving)**. We now forecast 4.6%/5.7% adj. NPM/pre-MI NPM for Busy Ming/Wanchen in 2026E, up 0.5pp/1.0pp YoY, while 1H26 margin will likely enjoy more operating leveraging from LNY peak season and 2H25 new store ramp-up.

Earnings revision: We revise up Busy Ming/Wanchen 2026-28E sales by 2~10%/up to 9% and NP by 6~13%/2~11% on faster store expansion and operating leveraging. **We reiterate Buy on Busy Ming/Wanchen** given attractive risk/reward considering that the stocks are trading at 17x/14x 2026E P/E vs. 25%/21% NP CAGR in 2026-28E, respectively.

Earnings Revision

- **Busy Ming:** We revise up 2026-28E sales by 2~10% on 10~14% higher period-end store count forecast with c.3% more dilution on per-store GMV. Our earnings estimates are up 6~13% in 2026-28E with slightly higher GPM and more admin expenses savings on scale effects and efficiency gains. Currently we look for

42%/61% sales/adj. NP growth in 2026E, followed by 15%/25% sales/adj. NP CAGR in 2026-28E. **Our 12-m TP is up to HK\$581 vs. HK\$550 prior on: 1)** higher earnings estimates; **2)** rolling forward to mid-2027 (vs. end-2026 prior), despite **3)** lower target 2027E P/E at 21x vs. 23x prior, benchmarking the refreshed avg. trading NTM P/E of unchanged peer group (DG/DLTR/Ryohin Keikaku/PPIH). The stock is trading at 17x/13x 2026/27E P/E vs. 25% adj. NP CAGR in 2026-28E. Reiterate Buy on attractive risk/rewards.

- **Wanchen:** We revise up 2026-28E sales by up to 9% on 7~16% higher period-end store count forecast with more dilution on per-store GMV. Our earnings estimates are up 2~11% in 2026-28E with more prudent GPM progressing but more SG&A expense savings on scale effects and efficiency gains. Currently we look for 37%/65%/93% sales/pre-MI NP/NP growth in 2026E, followed by 16%/21% sales/NP CAGR in 2026-28E. **Our 12-m TP is up to Rmb324 vs. Rmb319 prior on: 1)** higher earnings estimates; **2)** rolling forward to mid-2027 (vs. end-2026 prior), despite **3)** lower target 2027E P/E at 19.6x vs. 21.5x prior, benchmarking to a HSD% valuation discount to Busy Ming referring the average gap of DLTR's NTM P/E vs. DG's in the past two years (unchanged rationale). The stock is trading at 14x/11x 2026/27E P/E vs. 21% NP CAGR in 2026-28E. Reiterate Buy on attractive risk/rewards.

Price Target Risks and Methodology - Busy Ming Group

Valuation: Our 12-month target price for Busy Ming is HK\$581, based on a 21x target P/E applied to our 2027E EPS and discounted back to mid-2027, using a COE of 9.4%, referencing the average NTM P/E of global value-focused retail peers including Dollar General and Dollar Tree in the US, and Ryohin Keikaku and Pan Pacific International Holdings (operates Donki) in Japan, as they are scaled, price-led operators with broad, defensible customer reach similar to Busy Ming.

Key risks: 1) Intensifying competition and price investment; 2) Network density and cannibalization; 3) Franchise model risk and scaling complexity; 4) Supply chain, food safety, and logistics.

Price Target Risks and Methodology - Fujian Wanchen Food

Valuation: Our 12m TP is Rmb324, based on a target 2027E P/E at 19.6x discounted back to mid-2027 at an 8.2 % COE. The target P/E is at a HSD% valuation discount to Busy Ming, as we reference the average gap of DLTR's NTM P/E vs. DG's in the past two years, factoring in the relatively slower network scaling momentum and less favorable UE (lower per-store GMV but profits driven by high mix of smaller brands/white labels).

Key risks: 1) intensifying market competition and price sustainability; 2) franchise model risk and scaling complexity; 3) M&A risks; 4) supply chain, food safety and logistics.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst’s judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst’s published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst’s fundamental equity rating for such stocks, which rating reflects a stock’s return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts’ fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst’s fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.
