In this report, we analyse the 2Q26 power generation figures for France, Germany, Austria, Italy, Spain, Portugal, Great Britain, Finland and Sweden, with a particular focus on renewable energy output and gas demand. Overall, solar output increased yoy, driven almost entirely by new capacity additions. Hydropower generation was down in all geographies but Sweden. Wind production was a mixed bag, up in France offshore, Great Britain, Italy, Finland, Sweden and German offshore - but declining in German onshore, France onshore, Portugal and Spain. French nuclear production saw a 9% increase.

Hydropower generation down in 2Q26 in all geographies but Sweden. Hydropower decreased in Portugal (production -42.7%/storage level -8.5%), Spain (-27.2%/ -1.9%), Italy (-25.1%/11.8%), Finland (-14.8%/+3.4%), Austria (including pumped storage, -10.9%/-1.2%), France (-2.4%/-7.2%) and Germany (including pumped storage, production was down -0.4%). On the other hand Sweden saw a production improvement (+2.6%/-21.3%). Note, however, there is a tough comparative effect versus high 2025 hydro levels in Spain and Portugal.

Wind production - mixed performance. In 2Q26 wind power output varies across Europe once again. A decline in load factor led to reduced output in Germany onshore wind (load factor -2.8pp/generation -12.0%), France onshore wind (-1.5pp/-5.9%), Portugal (-1.6pp/-5.4%) and Spain (-0.5pp/-0.6%). France offshore wind production increased 22.1% despite a lower implied load factor (-5.7pp) thanks to new capacity. A similar trend was observed in German offshore wind (+1.3% power/-2.7pp load). Wind production rose in Great Britain (+7.3%), Italy (+4.8%), Finland (+2.4%) and Sweden (+1.9%).

Solar output up in all geographies. In 2Q26, Austria, Spain, France, Portugal, Germany, Great Britain and Italy saw solar production rise by 27.4%, 22.3%, 19.0%, 16.8%, 6.9%, 6.2% and 4.5% respectively, thanks to new capacity.

Power demand slightly up. Based on Platts data, the 1H26 combined demand of Germany, France, Italy, Great Britain and Spain amounted to 855TWh, up 0.6% yoy, but 6.7% below 1H21 level. At the EU level demand was also up 0.6% yoy, using Eurelectric data. Based on TSOs data, we estimate that power consumption in 2Q26 was up +1.6% yoy in France, +2.1% in Spain and +1.5% in Germany - which is equivalent at 1H26 level at -0.5% yoy in France, +1.2% in Spain, and +1.9% in Germany. **Gas demand rose in 2Q25.** We estimate that European gas demand increased 3.1% yoy in 2Q26, with industrial demand up 3.0%, LDZ (residential and commercial) demand 2.0% higher yoy, and gas-to-power up 5.8% yoy. Alongside this, German industrial gas consumption was up 3.1% yoy in 1H26, still 7.4% below 2018-21 average levels. Gas storage levels stand at 50% of total capacity, at the bottom of the historical range.

Company impact. In our view, Enel should be negatively impacted by lower hydro production in Italy. In Spain and Portugal, Iberdrola, EDP and Engie should be the main companies impacted by hydropower's decline, as should Endesa to a lesser extent. Similarly, Verbund should be negatively impacted by lower hydro generation in Austria.

INVESTMENT IMPLICATIONS

Company impact. In our view, Enel should be negatively impacted by lower hydro production in Italy. In Spain and Portugal, Iberdrola, EDP and Engie should be the main companies impacted by hydropower's decline, as should Endesa to a lesser extent. Similarly, Verbund should be negatively impacted by lower hydro generation in Austria.

DETAILS

In this report, we analyse the 2Q26 power generation figures for France, Germany, Austria, Italy, Spain, Portugal, Great Britain, Finland and Sweden, with a particular focus on renewable energy output, and gas demand. Overall, solar output increased yoy, driven almost entirely by new capacity additions. Hydropower generation was down in all geographies but Sweden. Wind production was a mixed bag, up in France offshore, Great Britain, Italy, Finland, Sweden and German offshore - but declining in German onshore, France onshore, Portugal and Spain. In the nuclear sector, French production saw an increase of 9.0%.

FRANCE

Based on TSO data, we estimate French solar output rose 19.0% yoy in 2Q26, thanks to new capacity additions (+23% yoy) offsetting a lower load factor (-3.2pp). Similarly, offshore wind production was up 22.1% yoy, thanks new capacity addition (+49.6%) - with a negative load factor effect (-5.7pp). France's onshore wind production was down 5.9%, due to a negative load factor effect (-1.5pp), while capacity was up (+3.1%). Hydropower output down 2.4% yoy.

Nuclear power production was up 9.0% yoy in 2Q26. As a reminder, EDF estimates French nuclear output, including Flamanville 3, between 350-370TWh in 2026 and 2027.

Offshore wind: France saw the commissioning of its first offshore wind farms in 2022-23: 480MW in 2022, 496MW in 1Q23 and 500MW in 3Q23. 2023 TSO reporting for offshore wind was not yet fully in place, so we focus our analysis on offshore wind production starting in 2024.

SPAIN

Based on TSO data, we estimate that solar production was up 22.3% yoy in 2Q26 thanks to new capacity, while the load factor was down 0.8pp. Wind production decreased 0.6% yoy, due to lower load factor (-0.5pp). Hydropower output was down 27.2%

at 7.2TWh, while hydro stock levels ended the quarter at a record-high level.

PORTUGAL

Based on TSO data, we estimate solar production was up 16.8% yoy in 2Q26, thanks to new capacity addition (+17.2%) while load factor was slightly down (-0.3pp). Wind production declined by 5.4% yoy due to a negative load factor effect (-1.6pp). Furthermore, hydropower generation declined sharply (-42.3% yoy) on a high 2025 base level, while hydro storage levels ended the quarter above historical average levels. We estimate power consumption was up 3.2% yoy.

GERMANY

Based on Bundesnetzagentur data, we estimate that German solar production was up 6.9% yoy in 2026 as capacity increase (+16.6% to 124.0GW) more than offset a lower load factor (-1.1pp). Similarly, offshore wind production was slightly up (+1.3%), as capacity addition (+15.0% at 10.6GW) offset a lower load factor (-2.7pp). Onshore wind generation declined by 12.0% yoy, due to lower load factor effect (-2.8pp), while capacity was up +7.0% at 69.6GW. Hydropower production, including pumped storage, was slightly down (-0.4% yoy). We note that coal production (lignite, plus hard coal) increased 6.0% yoy in 2026 at 18.7TWh.

AUSTRIA

According to our estimates, based on Bundesnetzagentur data, Austrian hydropower production was down 10.2% yoy in 2Q26, while hydropower pumped storage production declined by 16.0% yoy - resulting in a total hydropower production down 10.9% yoy. Hydro storage reservoirs levels are within the historical range.

ITALY

Based on TSO data, we estimate solar production rose 4.5% yoy in 2Q26, thanks to new capacity addition of 6.2GW (+15.6% yoy) while the load factor was down 1.4% yoy. Wind production was up 4.8% yoy thanks to new capacity (+4.8%), as load factor remained stable. Hydropower production was down 25.1% yoy in 2Q26, while hydro storage levels are now at the lower end of the historical range.

We note that the format of ENTSOE and Terna data for Italy appears to have changed between 2024 and 2025; the numbers below are based on our best analysis of available data.

GREAT BRITAIN

Based on TSO data, we estimate that solar production increased by 6.2% yoy in 2Q26, thanks to new capacity addition (+13.1%), while load factor effect was negative (-0.7pp). Wind production increased 7.3% yoy. Over 2Q26, nuclear production was down 11.7% yoy, reaching 8.3TWh.

FINLAND

Based on ENTSOE data, we estimate that wind production rose 2.4% yoy in 2Q26, as capacity additions (+0.7GW bringing installed capacity to 9.4GW) more than offset a negative load factor impact (-1.5pp). Hydropower production decreased by 14.8% yoy in 2Q26 to 2.9TWh, while hydropower storage remained in the lower end of the historical range.

POWER DEMAND

Based on Platts data, the 1H26 combined demand of Germany, France, Italy, Great Britain and Spain amounted to 855TWh, up 0.6% yoy, but 6.7% below 1H21 level. At the EU level demand was also up 0.6% yoy, using Eurelectric data. Based on TSOs data, we estimate that power consumption in 2Q26 was up +1.6% yoy in France, +2.1% in Spain and +1.5% in Germany - which is equivalent at 1H26 level of -0.5% yoy in France, +1.2% in Spain, and +1.9% in Germany.

GAS DEMAND AND SUPPLY

We estimate that European gas demand increased 3.1% yoy in 2Q26, with industrial demand up 3.0%, LDZ (residential and commercial) demand 2.0% higher yoy, and gas-to-power up 5.8% yoy. Alongside this, German industrial gas consumption was up 3.1% yoy in 1H26, still 7.4% below 2018-21 average levels. Gas storage levels stand at 50% of total capacity, at the bottom of historical range.

LNG traffic through the Strait of Hormuz: The number of LNG tankers crossing the strait of Hormuz has slightly increased since mid-June (see Exhibit 66). This followed the interim US-Iran ceasefire agreement announced on 17 June ([link](#)), which helped ease concerns over maritime traffic. However, the agreement was subsequently overshadowed by renewed military strikes in the days that followed ([link](#)), highlighting the continued fragility of the security situation in the region.

DISCLOSURE APPENDIX

I. REQUIRED DISCLOSURES

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社) and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY**Verbund**

Our SOTP based PT of €54.6 uses:

- For the hydropower assets a DCF with a post-tax WACC of 6.5% and a terminal growth rate of 0%. We use a mark to market for the baseload price on the unhedged exposure from 26-27-28-29. For 2030 we assume a baseload price of €60/MWh and peakload of €75/MWh.
- We value Verbund's regulated activities APG (power) with a 9-year DCF with a post-tax WACC of 4.3% and a terminal value set at 15% premium on FY34e RAB — implying a 22% premium to FY26e RAB; and GCA (gas) at FY26e RAB.
- We value the New Renewable segment 3-year DCF with a post-tax WACC of 5.5% and a terminal value set at 12.0x EV/EBITDA on our FY29e estimate.
- We value the Sales segment using a 6.0x EV/EBITDA multiple, based on our estimate of 2026.
- We value 'All other segments' using an 8.0x EV/EBITDA multiple, based on FY25e EBITDA.

Enel SpA

We value Enel on an SOTP basis to arrive at our target price of €9.3. We value Enel's renewables assets in Italy with a FY26e-FY28e DCF, WACC of 6% and FY29e EV/EBITDA multiple of 10x. Assets in North America are valued with a FY26e-FY28e DCF, WACC of 7% and FY29e EV/EBITDA multiple of 11x. Enel's Spanish renewable assets the FY26e EV/EBITDA multiple of 10x. For Italy and Iberia, we use 2026e EV/EBITDA multiples of 5-6x for Generation & Trading, 8.0-8.8x for Infrastructure and Networks and 8x-8.4xx for Retail. LatAm activities we valued at 3.9-7.0x FY26e EV/EBITDA, in line with implied market valuations. We subtract net financial debt, hybrid debt, provisions and minorities (7x FY26e P/E) from the estimated EV.

Engie SA

We value Engie on a 1-year forward SOTP basis, to arrive at our €29.4 price target. We value gas networks as 15% premium to RAB, while Brazilian and UK electricity grids are valued at a 20% and 50% premium, respectively. We value Supply and Energy Management activities at 6x FY26e EV/EBITDA, while contracted Local Energy Infrastructure is at 10x. Renewables valuation is a combination of a DCF (6.7% WACC) and a target multiple of 11x given the young age of the fleet and a high exposure to hydro generation, while Gas generation is valued at 6x EV/EBITDA for merchant and 9x EV/EBITDA for contracted capacities including the potential disposal proceeds. We value EV adjustments (e.g. minorities, provisions, hybrids, net financial debt, nuclear liabilities, pension liabilities and financial assets) by taking into account the book value.

Endesa SA

Our €33.25 price target is based on a sum-of-the-parts valuation. We employ a DCF with a 5.9% WACC for unregulated assets, comprising conventional Generation and non-mainland generation assets. We use a multiples approach for electricity Supply (EV/EBITDA of 6.5x on average EBITDA throughout the next three years, a discount to peers due to higher than average volatility). For

Renewables, we value the assets in operation using a DCF with a WACC of 4.8% while we value the pipeline using a spread on the WACC. We apply a 4.8% WACC for regulated assets (Distribution).

EDP - Energias de Portugal SA

Our €5.3 price target is derived from a sum-of-the-parts, based on a DCF analysis in which we apply a WACC of 4.8% for the regulated Iberian assets, 6.2% for the liberalized Iberian assets and 9.0% for the Brazilian assets. For the supply unit in Iberia we apply an EV/EBITDA multiple of 6.5x in line with peers. For the renewable assets we value the assets in operation through a DCF while the future growth valuation is based on an IRR spread on the WACC.

Iberdrola SA

To arrive at our price target of €19.8 we use a sum-of-the-parts approach to value Iberdrola, based on a separate DCF model for each asset class. In our EV valuation, the liberalized assets account for 11%, networks for 53% and renewables for 37%. We apply a WACC of 6.2% for the liberalised assets, 5.9% for the regulated networks and 4.6% for the renewable assets.

RISKS

Verbund

Upside risks:

- Demand for regulated earnings can vary significantly depending on macro economic developments. A more risk averse environment could lead to a higher rating in terms of EV/EBITDA and premium to RAB.
- Changing the RAB premium for GCA by +10pp changes our PT by +€0.20.
- Changing our long-term baseload power price assumption for 2030 and beyond from €60/MWh by +€5/MWh impacts our PT by +€2.8.

Enel SpA

Downside: 1) LatAm accounts for about 25% of Enel's EBITDA. A 10% depreciation of LatAm currencies would reduce FY27e EBITDA by 2.5%; 2) Failure to deliver on Enel's renewables expansion strategy adding 11.8GW of consolidated gross renewable capacities in FY26e-FY28e on our estimates; 3) Lack of a significant supply margin recovery.

Upside: 1) Attractively valued inorganic growth; 2) More investments in networks; 3) Positive regularity surprises

Engie SA

Performance of any of the company's large business segments would pose risks to our price target. Downside risks for the Conventional generation business include lower Clean Spreads and lower volatility on the power market. Downside risks for renewable assets include lower volumes or lower returns due to higher installation, capital or financing costs. Downside risks for networks include lower volumes for the French gas distribution activity.

Upside risks: Power demand impacting B2B and B2C, Gas demand impacting networks, Power prices, spread and volatility impacting Engie's trading division, gas power generation and merchant renewables

Endesa SA

Downside: Lower-than-expected power prices and supply margins; lower than expected regulated returns in networks; delay in renewable capacity deployment; unexpected political events such as new taxes and clawbacks and higher sovereign risk.

Upside: higher returns and capex in regulated networks than expected, the life extension of nuclear plants and higher power prices.

EDP - Energias de Portugal SA

Downside risks: Lower generation and supply margins than anticipated and delays in the commissioning of the new renewable capacity. Lower electricity prices would have a negative impact in our valuation. A USD and/or Brazilian Real depreciation would have a negative impact. Cost overruns in networks and/or renewable capacity assets as well as lower capital gains in the planned

asset rotation would have a negative impact.

Iberdrola SA

Upside risks: Higher power prices in Iberia, the UK and the US than anticipated, more profitable remuneration frameworks for regulated assets than expected, higher load factors on the renewable assets than anticipated.

Downside risks: Unexpected regulatory and/or political measures limiting the profitability of assets, lower than expected power prices, delays in renewable capacity deployment, higher interest rates and bond yields than anticipated, lower achieved returns on the US grids than expected.

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 500 Banks And Financial Services Index (BEBANKS) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 500 Insurance Index (BEINSUR) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, and the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/- 10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- **Outperform (OP):** The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- **Neutral (N):** The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- **Underperform (UP):** The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- **Credit Outperform (C-OP):** The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- **Credit Neutral (C-N):** The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- **Credit Underperform (C-UP):** The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

Where this report has been prepared by research analyst(s) employed by a non-US affiliate, such analyst(s), is/are (unless otherwise expressly noted below) not registered as associated persons of Bernstein Institutional Services LLC or any other SEC-registered broker-dealer and are not licensed or qualified as research analysts with FINRA. Accordingly, such analyst(s) may not be subject to FINRA's restrictions regarding (among other things) communications by research analysts with a subject company, interactions between research analysts and investment banking personnel, participation by research analysts in solicitation and marketing activities relating to investment banking transactions, public appearances by research analysts, and trading securities held by a research analyst account.

Where this report has been prepared by research analyst(s) employed by Société Générale Africa Technologies & Services (part of the Société Générale group of companies), it has been prepared on behalf of a Bernstein company under a Global Services Agreement in place between Bernstein and Société Générale.

CERTIFICATION

Each research analyst listed in this report, who is primarily responsible for the preparation of the content of this report, certifies that all of the views expressed in this publication accurately reflect that analyst's personal views about any and all of the subject securities or issuers and that no part of that analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views in this publication.

II. ADDITIONAL GLOBAL CONFLICT DISCLOSURES

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e., the private side) within the Firm, and into other areas, units, groups or affiliates (i.e., public side) of the Firm.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for "Bernstein" and "Autonomous" research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the "Autonomous" and "Bernstein" brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.
- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to "Autonomous" branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.

This report has been produced by an independent analyst as defined in Article 3 (1)(34)(i) of EU 596/2014 Market Abuse Regulation ("MAR") and the same article of MAR as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018.

To our readers in the United States: Bernstein Institutional Services LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission ("SEC") and a member of the U.S. Financial Industry Regulatory Authority, Inc. ("FINRA") is distributing this publication in the United States and accepts responsibility for its contents. Where this material contains an analysis of debt product(s), such material is intended only for institutional investors and is not subject to the US independence and disclosure standards applicable to debt research prepared for retail investors.

Bernstein Institutional Services LLC may act as principal for its own account or as agent for another person (including an affiliate) in sales or purchases of any security which is a subject of this report. This report does not purport to meet the objectives or needs of any specific individuals, entities or accounts.

To our readers in Canada: If this publication pertains to a Canadian domiciled company, it is being distributed in Canada by Sanford C. Bernstein (Canada) Limited, which is licensed and regulated by the Canadian Investment Regulatory Organization. If the publication pertains to a non-Canadian domiciled company, it is being distributed by Bernstein Institutional Services LLC, which is licensed and regulated by both the SEC and FINRA, into Canada under the International Dealers Exemption.

This document may not be passed onto any person in Canada unless that person qualifies as "permitted client" as defined in Section 1.1 of NI 31-103.

To our readers in Brazil: This report has been prepared by Bernstein Institutional Services LLC, and Banco BTG Pactual S.A. ("BTG") is responsible for the distribution of this report in Brazil.

To readers in the United Kingdom: This publication has been issued or approved for issue in the United Kingdom by Bernstein Autonomous LLP, authorised and regulated by the Financial Conduct Authority and located at 60 London Wall, London EC2M 5SH, +44 (0)20-7170-5000. Registered in England & Wales No OC343985.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "Financial Promotion Order"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations, etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

To our readers in the member states of the EEA: This publication is being distributed by BSG France SA, which is authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and Autorité des Marchés Financiers (AMF).

To our readers in Hong Kong: This publication is being distributed in Hong Kong by Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, which is licensed and regulated by the Hong Kong Securities and Futures Commission (Central Entity No. AXC846) to carry out Type 4 (Advising on Securities) regulated activities and subject to the licensing conditions mentioned in the SFC Public Register (<https://www.sfc.hk/publicregWeb/corp/AXC846/details>). This publication is solely for professional investors, as defined in the Securities and Futures Ordinance (Cap. 571). The purpose of this report is solely to provide an analysis of the issuers referred to in this report and is not intended for any purpose contrary to the laws of Hong Kong.

To our readers in Singapore: This publication is being distributed in Singapore by Sanford C. Bernstein (Singapore) Private Limited, only to accredited investors or institutional investors, as defined in the Securities and Futures Act 2001 of Singapore ("SFA"). Recipients in Singapore should contact Sanford C. Bernstein (Singapore) Private Limited in respect of matters arising from, or in connection with, this publication. Sanford C. Bernstein (Singapore) Private Limited is regulated by the Monetary Authority of Singapore and licensed under the SFA as a capital markets services licence holder for dealing in capital markets products that are securities and collective investment schemes and an exempt financial adviser for advising on, issuing and promulgating analyses and reports on securities. Sanford C. Bernstein (Singapore) Private Limited is registered in Singapore with Company Registration No. 20213710W and located at 8 Marina Boulevard, #12-01, Marina Bay Financial Centre, Singapore 018981, +65-6326-7000.

To our readers in the People's Republic of China: The securities referred to in this document are not being offered or sold and may not be offered or sold, directly or indirectly, in the People's Republic of China (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan, the "PRC") in contravention of any applicable laws of the PRC.

This document does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC to any person to whom it is unlawful to make the offer or solicitation in the PRC.

We do not represent that this document may be lawfully distributed, or that any securities may be lawfully offered, in compliance with any applicable registration or other requirements in the PRC, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by us which would permit a public offering of any securities or distribution of this document in the PRC. Accordingly, the securities are not being offered or sold within the PRC by means of this document or any other document. Neither this document nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations.

To our readers in Japan: This publication is being distributed in Japan by Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社), which is registered in Japan as a Financial Instruments Business Operator with the Kanto Local Finance Bureau (registration number: The Director-General of Kanto Local Finance Bureau (FIBO) No.3387) and regulated by the Financial Services Agency. It is also a member of Investment Management Association of Japan. This publication is solely for qualified institutional investors in Japan only, as defined in Article 2, paragraph (3), items (i) of the Financial Instruments and Exchange Act.

For the institutional client readers in Japan who have been granted access to the Bernstein website by Daiwa Securities Group Inc. ("Daiwa"), your access to this document should not be construed as meaning that Bernstein is providing you with investment advice for any purposes. Whilst Bernstein has prepared this document, your relationship is, and will remain with, Daiwa, and Bernstein has neither any contractual relationship with you nor any obligations towards you.

To our readers in Australia: Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is responsible for distributing research in Australia. It is regulated by the Securities and Exchange Commission under U.S. laws, by the Financial Conduct Authority under U.K. laws, which differs from Australian laws. Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 in respect of the provision of the following financial services to wholesale clients:

- providing financial product advice;
- dealing in a financial product;
- making a market for a financial product; and
- providing a custodial or depository service.

LEGAL

All research publications are disseminated to our clients through posting on the firm's password protected websites, bernsteinresearch.com and autonomous.com. Certain, but not all, research publications are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience.

This publication has been published and distributed in accordance with the Firm's policy for management of conflicts of interest in investment research, a copy of which is available from Bernstein Institutional Services LLC, Director of Compliance, 245 Park Avenue, New York, NY 10167. Additional disclosures and information regarding Bernstein's business are available on our website

www.bernsteinresearch.com.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. This publication is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of, or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject any of the entities referenced herein or any of their subsidiaries or affiliates to any registration or licensing requirement within such jurisdiction. This publication is based upon public sources we believe to be reliable, but no representation is made by us that the publication is accurate or complete. We do not undertake to advise you of any change in the reported information or in the opinions herein. This publication was prepared and issued by entity referred to herein for distribution to eligible counterparties or professional clients. This publication is not an offer to buy or sell any security, and it does not constitute investment, legal or tax advice. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with their professional advisors in light of their specific circumstances. The value of investments may fluctuate, and investments that are denominated in foreign currencies may fluctuate in value as a result of exposure to exchange rate movements. Information about past performance of an investment is not necessarily a guide to, indicator of, or assurance of, future performance.

This report is directed to and intended only for our clients who are “eligible counterparties”, “professional clients”, “institutional investors” and/or “professional investors” as defined by the aforementioned regulators, and must not be redistributed to retail clients as defined by the aforementioned regulators. Retail clients who receive this report should note that the services of the entities noted herein are not available to them and should not rely on the material herein to make an investment decision. The result of such act will not hold the entities noted herein liable for any loss thus incurred as the entities noted herein are not registered/ authorised/ licensed to deal with retail clients and will not enter into any contractual agreement/arrangement with retail clients. This report is provided subject to the terms and conditions of any agreement that the clients may have entered into with the entities noted herein. All research reports are disseminated on a simultaneous basis to eligible clients through electronic publication to our client portal.

The information in this report was prepared by Bernstein solely for the internal business use of our clients. Clients may store, display, analyze, reformat and print the information in this report for this limited use only. Clients may not copy, alter, create derivative works, resell, reverse engineer, commercially exploit, share or distribute any part of the information contained herein for any purpose without Bernstein’s express written consent. These restrictions include extracting data or using the content to develop indices or other products. Further, you may not use this report, or any portion of this report, to train or finetune any third-party machine learning or artificial intelligence system, or as a prompt or input into any such system. You also may not, without Bernstein’s express written consent, do any of the foregoing in connection with your own internal machine learning or artificial intelligence system.

Bernstein may use artificial intelligence tools in the preparation of its materials. Any such materials are reviewed by Bernstein’s research analysts prior to publication.

This report has been prepared for information purposes only and is based on current public information that we consider reliable, but the entities noted herein do not warrant or represent (express or implied) as to the sources of information or data contained herein are accurate, complete, not misleading or as to its fitness for the purpose intended even though the entities noted herein rely on reputable or trustworthy data providers, it should not be relied upon as such. Opinions expressed are the author(s)’ current opinions as of the date appearing on the material only and we do not undertake to advise you of any change in the reported information or in the opinions herein.

Any references to Societe Generale herein are purely factual, based upon publicly available information, and included for comparative purposes only. They do not constitute an opinion or recommendation with respect to the securities of Societe Generale.

This publication was prepared and issued by the entity referred to herein for distribution to eligible counterparties or professional clients. The information in this report is intended for general circulation and does not constitute an offer to buy or sell any security, investment, legal or tax advice nor a personal recommendation, as defined by any of the aforementioned regulators. It does not take into account the particular investment objectives, financial situations, or needs of individual investors. The report has not been reviewed by any of the aforementioned regulators and does not represent any official recommendation from the aforementioned regulators. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with advice sought from a financial adviser regarding the suitability of the investment product, taking into account the specific investment objectives, financial situation or particular needs of any recipient of the recommendation, before the recipient makes a commitment to purchase the investment product.

The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The information in this report does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, or to induce engagement in any other investment activity. The value of any securities or financial instruments

mentioned in this report may fluctuate subject to market conditions. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
