

Oil Markets Weekly

The first thousand miles

The largest supply disruption on record has produced a surprisingly unremarkable price chart. Since the start of the conflict, Brent has averaged just \$101, closely tracking the price path implied by our framework in early March.

At the time, we concluded that only two forces could plausibly explain such a restrained outcome. Either demand losses, alongside inventory drawdowns, could prove large enough to rebalance the market outright. Or the adjustment could move down the barrel, away from crude and into refined products ([Down the barrel](#), 8 May 2026). Under that scenario, crude prices could hover near \$100/bbl while scarcity shows up instead in gasoline, diesel, and jet fuel prices. The shock would be expressed not through materially higher flat crude prices, but through widening product cracks and sharply higher refined product prices. In March, we viewed the latter as the more likely adjustment mechanism.

The first part of that framework proved correct. The second did not. Crude prices followed the expected path. Product markets did not. After an initial spike, gasoline, diesel, and jet fuel prices have reset lower, while refining margins have narrowed rather than widened (**Figure 1**).

The most plausible explanation is that the market has absorbed much of the disruption through a combination of demand losses and large-scale inventory releases. Demand has weakened in the conflict zone itself. In parts of Asia, reduced physical oil availability has curtailed consumption directly. In China, consumers have substituted away from oil more readily than many expected. In Africa, higher prices have triggered more traditional forms of demand destruction. At the same time, governments and commercial operators have drawn heavily on both crude and refined product inventories. Together, these adjustments have reduced the burden on prices to do the balancing.

For US consumers, however, this does not mean that fuel markets have fully normalized. Our forecast still calls for Brent to average around \$100 through most of the remainder of 2026. On that view, we estimate that the US retail gasoline prices will remain near \$4 per gallon for much of the year (**Figure 2**). While far below the levels implied by a full-blown product shortage in more extreme scenarios, they remain elevated enough to keep energy firmly in focus for households and policymakers alike.

Figure 2: J.P. Morgan US retail gasoline price forecast under alternative Strait of Hormuz reopening scenarios

\$ per gallon

Importantly, national averages can obscure significant regional differences. Nowhere is this more evident than on the US West Coast, where fuel markets remain the tightest in the country. [California is particularly exposed](#). A combination of unique state regulations—including high taxes and environmental mandates—and the closure of Valero’s Benicia refinery and Phillips 66’s Los Angeles refinery, which together account for 17% of California’s refining capacity, is expected to tighten fuel balances further in a market that already operates with limited flexibility.

Unlike most of the country, California cannot easily draw on supplies from neighboring states. Instead, the state relies heavily on CARB (California Air Resources Board)-compliant gasoline from Asian refiners, which account for nearly [two-thirds of gasoline imports](#) into California and roughly 20% to 30% of the state’s total gasoline supply. Since March 1, however, many Asian refiners have been forced to reduce refined product exports as disruptions to crude flows from Hormuz have constrained feedstock availability.

The challenge is compounded by California's unique fuel specifications and the lack of major product pipelines linking the state to the rest of the country. More broadly, California's vulnerability reflects a longer-term shift. Once a major producer and exporter of oil and refined products, the state has become increasingly import-dependent as local production has steadily declined.

This structural tightness is evident at the pump. Even as crude oil prices have dipped below \$100 per barrel, pump prices have steadily declined. Today, the national average for a gallon of regular gasoline sits at roughly \$4.16, down more than 10% from a late-May peak near \$4.56. Prices nevertheless exceed \$5.0 in six states, with drivers in California paying an average of \$5.89 a gallon (**Figure 3**).

Diesel shows the same pattern. Nationwide, average diesel prices have eased to about \$5.32 per gallon. Yet, truckers filling up in California are still paying an average of \$7.16 at the pump.

This matters far beyond the region itself. Roughly one in five of all goods entering the United States arrives through West Coast gateways such as the Ports of Los Angeles and Long Beach. And before those imports ever reach warehouses, distribution centers, and consumers across the country, they often travel their first several hundred—or even thousand—miles powered by West Coast diesel and gasoline. In practice, this means that a meaningful share of America's supply chain pays West Coast fuel prices. These prices influence freight costs, transportation margins, and ultimately the delivered cost of goods nationwide.

Understanding where fuel prices go from here requires looking beyond crude oil to the underlying product markets.

US gasoline prices surged in May as the domestic balance tightened on both the supply and demand fronts. Inventories fell while refiners increasingly prioritized jet fuel, constraining gasoline output. At the same time, demand rebounded from the February-April lull, supported by strong Memorial Day travel and resilient consumer activity.

Higher gasoline prices have since begun to elicit a partial response: some refinery production has shifted back from jet fuel toward gasoline, and incremental imports from Canada and Northwest Europe have started to arrive, offering relief to the East Coast market. That said, this rebalancing may be short-lived. European gasoline markets remain tight, and as summer demand builds, incentives to keep barrels in-region are likely to strengthen. If so, US gasoline imports could slow later this summer, leaving domestic inventories at relatively low seasonal levels, though still comfortable overall in terms of days of demand (**Figures 4 & 5**).

Figure 4: US commercial inventories of gasoline and diesel

Thousand barrels

Figure 5: US commercial inventories of gasoline and diesel in days of demand coverage

Source: EIA, J.P. Morgan Commodities Research

Diesel, by contrast, is being pulled by both domestic needs and a widening global shortfall, with the US Gulf Coast increasingly acting as the marginal supplier. Diesel exports averaged 1.2 mbd in January and February, nearly 150 kbd higher than the same period last year, despite the closure of three US refineries since the start of 2025. Much of the increase appears tied to stronger demand from Brazil, where Russian diesel shipments have declined, and from Europe, where restrictions on products refined from Russian crude came into effect in January.

The closure of Hormuz has only amplified these dynamics. Since the start of the conflict, US diesel exports have risen further to 1.5 mbd, accelerating inventory draws and pushing stocks to a 23 year low, even as refinery utilization remains strong (**Figures 4 & 5**).

If gasoline illustrates regional tightness and diesel highlights global scarcity, jet fuel sits somewhere in between. US jet fuel inventories have remained relatively resilient despite strong domestic consumption and rising export demand as record refinery yields keep pace with demand, leaving inventories well supplied. [Seasonal demand has continued to strengthen](#) with the onset of summer travel and the approach of the World Cup, even as several airlines have already reduced flight schedules through the third quarter (**Figure 6**).

Disclosures

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
