

Copper Dashboard

Global inventory eases on China destocking; tariff front running continues as US stocks continue to build; remain constructive on most copper miners

Key takeaways: (1) **Global visible copper inventories** have fallen to 1.05Mt from 1.37Mt in March - SHFE + China bonded warehouse destocking has been the main driver (down 450kt to ~120kt), while US located LME & COMEX inventory has continued to rise on tariff front-running (now at ~725kt or ~70% of the global total). Overall, ex-US-based inventory has normalized back to 2025 levels. (2) **China demand** was flat YTD through May, with higher refined production offset by lower imports; global mined production was up a modest 1.4% YTD through April. (3) **High-frequency indicators** appear positive with China cathode premia strong and LME canceled warrants elevated. Copper prices have remained resilient at around \$6-6.2/lb (+8% YTD), with China dip-buying and US tariff front running appearing to be stronger price drivers than fundamental demand. Price risks going forward seem to hinge on tariff outcomes (certainty vs higher tariffs in the future that could drive further US inventory build or de-stocking). We are OW on CSC/SFR/BHP/RIO/S32 in Australia and prefer Freeport (OW) in North America. Within EMEA, we upgraded Antofagasta to OW, owing to its peer-leading copper volume growth (~30% to 2028E), FCF and ROCE inflection, as well as improving valuation ([link](#)). We are UW on Anglo American and recently placed it on Negative Catalyst Watch for 2Q production results (23 July) as we see the greatest cost-driven risks due to its unique exposure to high Brazil and South Africa iron ore freight rates and weakness in diamonds ([link](#)). For both Anglo American and Glencore (44%/44% owners of Collahuasi), an update on the suspension of Collahuasi's desalination plant carries tail risks, as we believe a prolonged suspension could have implications for copper recoveries in H2'26 or 2027.

J.P. Morgan's Head of Base & Precious Metals Research, **Greg Shearer**, noted that while tight mine supply and structurally supported demand keep the medium-term backdrop supportive, at ~\$13,600/mt, up more than 40% YoY and against a surplus global refined market of over 500 kmt in 2025, it is hard to argue copper prices look cheap. The key 2H26 catalyst is policy, not balances: the market is effectively in a US-China tug of war, with the US having pulled metal via an attractive COMEX/LME arb since early 2025, building a ~1.2 mmt stockpile in 18 months - tightening the ex-US market and forcing China's buying floor materially higher toward \$13,500/mt. On tariffs, the team believes the Trump administration will pursue a phased, escalating Section 232 tariff on refined copper cathode imports, likely 15% starting January 2027, escalating to 30% in January 2028 - designed to keep imported copper onshore as a critical reserve. As this tug of war continues, the team expects persistently higher floors and ceilings on a push towards \$15,000/mt, with risks skewed towards a very bullish pinch point driven by rapidly dwindling ex-US inventories. See Greg and the team's latest note here: [Copper: Where we're going, we don't need balances](#) and [Base Metals Supply Demand Tracker](#).

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Fagan, Lyndon : BHP (BHP.AX), Capstone Copper (CSC.AX), Deterra Royalties (DRR.AX), Fortescue (FMG.AX), IGO Ltd. (IGO.AX), Liontown Resources (LTR.AX), Mineral Resources Ltd. (MIN.AX), PLS Group (PLS.AX), Rio Tinto Limited (RIO.AX), Sandfire Resources (SFR.AX), South32 (S32.AX)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.
